Supplement to Government Gazette

OF

WESTERN AUSTRALIA.

[Published by Authority.]

No. 57. P.O. No. 38. | PERTH: FRIDAY, SEPTEMBER 21. | [1900.

CONTENTS:

Subject.	Page
Complete Specifications accepted	3511
Applications for Patents	3516
Provisional Specifications accepted	3517
Alphabetical list of Applicants for Patents	3517
Alphabetical list of Inventions for which Patents have been applied for	3518
Alphabetical list of Patentees	3518
Alphabetical list of Inventions for which Patents have been granted	3518
Applications for Registration of Trade Marks ...	3519
Alphabetical list of Registrants of Trade Marks ...	3524
Alphabetical list of Goods in respect of which Trade Marks have been registered	3525

Note.—Throughout this *Gazette* the names in Italics within parentheses are those of Communicators of Inventions.

Complete Specifications.

Patent Office, Perth,
21st September, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 2880.—Richard Sparrow, of Perth, Western Australia, Licensed Patents Agent (*Benjamin Garver Lamme*), "*Method of and installation for operating Two-phase Electric Motors.*"—Dated 24th February, 1900.

Claims:—

1. The method of starting a two-phase electric motor or operating the same economically under light load from a two-phase generator which consists in supplying the motor with currents from adjacent side leads of the generator or from two adjacent side leads and a joint intermediate lead (17) of the circuit.

2. An installation consisting of a two-phase generator supplying two-phase currents in quadrature to four wires (3, 4, 5, 6), and a fifth intermediate wire (17) the voltage between this intermediate wire and any of the four leads being less than that between any two of said leads.

3. An installation consisting of a two-phase generator having an open coil or lead circuit armature winding supplying current to a five wire circuit the fifth wire (17) being connected to the junction of the two armature circuits.

4. An open coil or two circuits two-phase electric generator in which the armature windings are unsymmetrically connected in star fashion so that the voltage between the junction point and two of the terminals is less than that between said point and the other terminals.

5. The various arrangements for operating two-phase electric motors substantially as herein described.

Specification, 6s. Drawings on Application.

Application No. 2881.—Richard Sparrow, of Perth, Western Australia, Licensed Patents Agent (*Benjamin Garver Lamme*), "*Improvements in Dynamo Electric Machines.*"—Dated 24th February, 1900.

Claims:—

1. The method of balancing the magnetic circuits of direct or alternating current generators which consists in providing on the armature one or more closed windings independent of the main armature windings, and symmetrically located with reference to the field magnet poles.

2. In a dynamo electric machine having the usual field magnet and armature windings, means for balancing the magnetic circuits comprising one or more closed armature windings having generating conductors symmetrically located with reference to the field magnet poles.

3. Dynamo electric machines provided with auxiliary closed armature windings arranged and operating substantially as described for the purpose specified.

Specification, 3s. Drawings on application.

Application No. 2936.—Richard Sparrow, of Perth, Western Australia, Licensed Patents Agent, (*Thomas Steel Perkins*), "*Improvements in Controllers for Electric Motors.*"—Dated 19th April, 1900.

Claims:—

1. For electric motors a controller of the kind described having arc shields provided with magnetic flux conductors projecting between adjacent contact fingers and in proximity to the pole pieces of the blow-out magnet or magnets for the purpose specified.

2. An electrical controller having two series of arc shields, the magnetic flux conductors of one series projecting from one of the pole pieces of the blow-out magnet or magnets and alternating with the magnetic flux conductors of the other series which project from the other pole piece of the blow-out magnet or magnets for the purpose specified.

3. Electrical controllers provided with arc shields constructed and operating substantially as described.

Specifications, 4s. 6d. Drawings on application.

Application No. 3066.—Ralph Nichols, of Kalgoorlie, Western Australia, Mine Manager, "*A new or improved process for precipitating Gold and Silver and other Precious Metals from Aqueous Cyanide Solution containing same.*"—Dated 24th August, 1900.

Claims:—

1. The process of obtaining gold and silver or other precious metals extracted from ores and other compounds, containing same in cyanide solutions or in conjunction with other salts capable of dissolving gold, by the addition of the substance known as zinc dust or fume to solutions of cyanide or other gold solvent, containing gold or other precious metals, and then by violent agitation precipitating the contained gold or silver or other metal substantially as hereinbefore described.

2. The combination of apparatus, including vats A and B, compressed air tank C, with filter passes D, with the process consisting of the addition of zinc dust or fume to liquids containing cyanide, or other gold solvent, and gold and silver or other precious metals in solution and the violent agitation to secure the resulting product in the manner and for the purpose substantially as shown and described.

Specification, 3s. 6d. Drawings on application.

Application No. 3069.—Donald Barns Morison, of Hartlepool, Durham, England, Engineer, "*Improvements in Stamping Apparatus suitable for Crushing Ores and for other purposes.*"—Dated 27th August, 1900.

Claims:—

1. Stamping apparatus wherein a positively reciprocated part, after the commencement of its upstroke, lifts the stamp head, the resistance of which is gradually overcome partly by liquid being forced at an increased velocity through a port or passage of decreasing effective area and partly by liquid being forced into one or more air vessels or chambers so that a hydro-pneumatic cushioning of the lift is effected, substantially as described.

2. In stamping apparatus, the combination of a positively reciprocated cylinder, a reservoir for liquid communicating therewith, a piston connected to the stamp-head and located in said cylinder, and an air vessel communicating with the cylinder and sealed by the liquid therein, substantially as described.

3. Stamping apparatus of the kind referred to in the preceding claims wherein the air vessel that communicates with the cylinder and is sealed by the liquid therein is arranged externally thereof, substantially as described with reference to and illustrated in Figs. 3 to 6 of the drawings, or wherein the air vessel or chamber is formed in the piston substantially as described with reference to and illustrated in Figs. 14 and 15 of the drawings.

4. In stamping apparatus of the kind specified, the combination with the positively reciprocated cylinder and its liquid reservoir, of separate supply and discharge channels or passages which communicate with the lower and the upper portions respectively of the reservoir, substantially as described.

5. In stamping apparatus of the kind specified to, the combination with the positively reciprocated liquid-containing cylinder of a combined draining and pressure-relieving device, substantially as described.

6. In stamping apparatus of the kind specified, a stamp stem formed in two parts connected together by an adjusting sleeve into which one fits telescopically and is fixed in the desired position by means such as a gib and keys, whereby wear of shoe and die may be compensated for, substantially as described.

7. In stamping apparatus of the kind referred to, the combination with an adjustable stamp stem constructed as specified in the preceding claim and formed with a collar of interlocking washers adapted to prevent the adjustment becoming accidentally altered and to compensate for the loss of weight of the stamp head due to the wear of its shoe, substantially as described.

8. In stamping apparatus of the kind referred to, the combination with the stamp stem of means for holding the same in its raised position substantially as described with reference to and shown in Figs. 7 and 8 of the accompanying drawings.

9. In stamping apparatus of the kind referred to, the combination with the stamp stem of turning mechanism connected thereto by a flexible connector, the arrangement being such that the reciprocating motion of the stem also causes it to be turned by the said mechanism, substantially as described.

10. The combination with the stamp stems of stamping apparatus of the kind referred to, of turning mechanism substantially as hereinbefore described more especially with reference to and shown in Figs. 12 and 13 of the accompanying drawings.

11. Stamping apparatus of the kind specified characterised by the fact that the axis of the shaft is not in the same vertical plane as that containing the axis of the vertically movable part but is so arranged that at the commencement of the lift of each stamp head, its connecting rod will be in a vertical or approximately vertical plane.

12. Stamping apparatus constructed, arranged and operating substantially as described with reference to and shown in the accompanying drawings.

Specifications, 14s. 6d. Drawings on application.

Application No. 3072.—GEORGE WEIR, of 23 Eagle Chambers, King William Street, Adelaide, South Australia, Engineer, "*Improvements in and relating to Ore-dressing Machines.*"—Dated 28th August, 1900.

Claims:—

1. In an inclined ore-dressing table in combination a series of longitudinal riffles of equal length extending portion of the distance between the head and the tail of the table, diagonal stops at the ends of such riffles, and transverse riffles between such stops and the upper and lower edges of the table substantially as described and for the purpose set forth.

2. The combination in an ore-dressing table of a working part filled with longitudinal riffles of equal length and a raised portion or stop at one or both ends of said longitudinal riffles and the whole operated by the specific mechanism herein described all substantially as and for the purpose set forth.

3. An inclined ore-dressing table having a movement whereby the inertia possessed by the particles of mineral under treatment is sufficient to carry them towards the tail of the table said table being provided with a number of riffles extending longitudinally a portion of the distance between the head and the tail, said riffles being of equal length, the table having one or more raised stops at the ends of such riffles together with transverse riffles whereby clear water is distributed and delivered on to the working portion of the table for the purpose specified, the excess water compelled to flow off through various channels and the mineral and gangue guided to predetermined discharge points, substantially as described.

4. An inclined ore-dressing table having a differential movement whereby the particles of mineral that are under treatment carry themselves toward the tail of the table, said table being provided with a number of riffles extending longitudinally a portion of the distance between the head and the tail, said riffles being of equal length, the table having one or more raised portions with grooves cut therein whereby clear water is distributed and delivered on to the working portion of the table for the purpose specified, the excess water together with the very lightest of the gangue being compelled to distribute itself and flow off through several grooves or channels and the mineral and gangue guided to fixed discharge points substantially as described.

5. The combination of a diagonally-inclined ore-dressing table carried on radius bars having an upward or downward movement on the forward stroke, said table having a number of longitudinal riffles of equal length extending portion of the distance between the head and the tail of the table, the table being provided with one or more raised stops at the end of such riffles together with transverse riffles, and means for imparting to the table a longitudinal differential reciprocating movement, comprising a cranked shaft, connecting rod, slipper block sliding against the face of a stationary guide, and radius bar one end of the radius bar engaging the slipper block while the other end engages an adjusting block secured to the moveable bridle which is attached to head of table substantially as described.

6. The combination of a diagonally inclined ore-dressing table carried on radius bars having an upward or downward movement on the forward stroke said table having a number of longitudinal riffles of equal length extending a portion of the distance between the head and the tail of the table, the table being provided with one or more raised portions with grooves cut therein, and means for imparting to the table a longitudinal differential reciprocating movement, comprising a cranked shaft, connecting rod, slipper block sliding against the face of a stationary guide, and radius bar one end of the radius bar engaging the slipper block while the other end engages an adjusting block secured to the moveable bridle which is attached to head of table substantially as described.

7. The combination of a diagonally inclined ore-dressing table carried on radius bars having an upward and downward movement, said table having a series of longitudinal riffles of equal length, the table being provided with one or more raised stops or raised portions situated at the extremities of the longitudinal riffles, means for feeding the material to the upper portion of the table's head, means for discharging water on the raised portion at the upper edge of the table and an operating mechanism, comprising a cranked shaft, connecting rod, slipper block and guide, and radius bar one end of the radius bar engaging the slipper block while the other end engages an adjusting block secured to the moveable bridle which is attached to the head of the table substantially as described.

Specification, 11s. Drawings on application.

Application No. 3073.—ALEXANDER SELLARS, of 14 Q.D. Bank Chambers, Adelaide Street, Brisbane, Queensland, Cyanider, "*Improved Construction of Filter for the Treatment of Auriferous Material, especially Slimes, Sludges, and Concentrates.*"—Dated 28th August, 1900.

Claims:—

1. An improved filter constructed with a false bottom water worn gravel and sand in combination with a metal strainer extending over the area of the vat the whole being as herein described and illustrated.

2. In combination with the filter constructed as covered in the preceding claim and the means for drawing off the liquor as herein described and illustrated.

Specification, 5s. Drawings on application.

Application No. 3075.—WILLIAM HENRY BAXTER, of 71 Gelderd Road, Leeds, York, England, Engineer, "*Improvements in means or Apparatus for Imparting Motion to Machinery.*"—Dated 28th August, 1900.

Claims:—

1. The mechanism for imparting motion to machinery constructed and arranged substantially as herein described, consisting essentially of a shaft mounted in fixed bearings having a lever mounted by its upper end pendantly thereon, arms rigidly connected to and moving with said lever, a shaft carried in bearings on and rising and falling with said arms, an eccentric mounted upon the last named shaft, a connecting rod mounted on said eccentric, and toggle levers connected at their inner ends to the said connecting rod, and at their outer ends respectively to a fixed pedestal, and to the moving end of said lever, all combined substantially as set forth and as illustrated.

2. In mechanism such as herein described and illustrated for imparting motion to machinery, the combination of shaft mounted in fixed bearings, a lever mounted by its upper end pendantly on said shaft, arms rigidly connected to and moving with said lever, a shaft carried in bearings on and rising and falling with said arms, an eccentric mounted upon the last-named shaft, a connecting rod mounted on said eccentric, toggle levers connected at their inner ends to the said connecting rod, and at their outer ends respectively to a fixed pedestal and to the moving end of said lever, fly wheels and driving pulleys mounted upon said eccentric shaft and a rod for connecting said reciprocating lever with the moving or rotating part of the machine, all arranged substantially as herein set forth.

3. The arrangement and combination of the various parts forming the mechanism as a whole, substantially as herein described and illustrated, whereby the weight of the actuating mechanism is utilized for increasing the power or pressure of said mechanism.

Specification, 7s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
14th September, 1900.

NOTICE is hereby given that the undermentioned applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 37, 14th September, 1900.

Application No. 3056.—SAMUEL MARION LISSAU, of Philadelphia, United States of America, Gentleman, "*Improvement in process and apparatus for Concentrating Ores anhydrously.*"—Dated 15th August, 1900.

Specification, 11s. 6d. Drawings on application.

Application No. 3068. — HERBERT SAMUEL RUSSELL, of 62 and 63 Mark Lane, in the City of London, England, Gentleman, "*Improvements in the method of and apparatus for Lining Casks, Barrels, and the like Vessels.*"—Dated 27th August, 1900.

Specification, 12s. 6d. Drawings on application.

Application No. 3074.—WALTER ROSSLYN FRY, of "Como," Norton Street, Ashfield, near Sydney, New South Wales, Gentleman (Assignee of SIDNEY READ BELLINGHAM), "*Improved receptacles for containing Tea and like discrete materials and for measuring predetermined portions of same.*"—Dated 28th August, 1900.

Specification, 8s. Drawings on application.

Application No. 3076. — FREDERIC LIONEL GRAHAM, of Nareen, Victoria, Grazier, "*Improvements in Penholders (nib-ejecting).*"—Dated 28th August, 1900.

Specification, 6s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
7th September, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 36, 7th September, 1900.

Application No. 3053.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Norman Wilson Storer*), "*Improvements in Electric Generators and Motors.*"—Dated 11th August, 1900.

Specification, 4s. Drawings on application.

Application No. 3059.—WILLIAM LAWRENCE VOELKER, of 42 Bernard Street, Russell Square, London, England, Electrician, "*Improvements in the Manufacture of Filaments for Incandescing Electric Lamps.*"—Dated 20th August, 1900.

Specifications, 15s. Drawings on application.

Application No. 3060.—ALEXANDER SPENCER, of 77 Cannon Street, London, England, Engineer, "*Improvements in means for enabling passengers in a Railway Train to Apply the Brakes and attract the attention of the driver and guards.*"—Dated 20th August, 1900.

Specification, 9s. Drawings on application.

Application No. 3063.—VICTOR MOTOR COMPANY, LIMITED, of 156 Pitt Street, Sydney, New South Wales, Engineers (Assignee of GUSTAV EY), "*An Incandescent Tube Igniter for Gas Engines.*"—Dated 22nd August, 1900.

Specification, 5s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
31st August, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 35, 31st August, 1900.

Application No. 2847.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*Egbert Moore Tingley*), "*Improvements in Electric Brakes.*"—Dated 3rd February, 1900.

Specification, 5s. Drawings on application.

Application No. 2848.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*Benjamin Garver Lamme*), "*Improvements in Current Collectors for Electrical Machines.*"—Dated 3rd February, 1900.

Specification, 3s. Drawings on application.

Application No. 2916.—HUGH BULLEN, of 5 Mary Street, Grace Park, Hawthorn, in the Colony of Victoria, Gentleman, "*The Improved Centrifugal Gold Amalgamating Apparatus, usable also for Concentrating Purposes.*"—Dated 2nd April, 1900.

Specification, 4s. Drawings on application.

Application No. 3043.—ANDREW HALL and SIDNEY FRANCIS COOK, both of Cottesloe, Western Australia, Manufacturing Chemists, "*An Improved Method for the Prevention of Incrustation in Boilers.*"—Dated 2nd August, 1900.

Specification 2s.

Application No. 3055.—EDWARD WATERS, junior, of No. 131 William Street, Melbourne, Victoria, Patent Agent (*Spiritine, Limited*), "*Improvements in Fuel for Spirit Stoves and in the method of making the same.*"—Dated 15th August, 1900.

Specification, 3s.

Application No. 3058.—JOHN THOMAS MOATE, of King William Street, Adelaide, South Australia, Insurance Agent, "*An Improvement in Book Leaves.*"—Dated 20th August, 1900.

Specification, 4s. 6d. Drawings on application.

Application No, 3062.—WILLIAM PLAYER BICE and ARTHUR HAROLD GUTHRIDGE, both of 415 and 417 Lonsdale Street, Melbourne, in the Colony of Victoria, Manufacturers and Importers (Assignees of WILLIAM TAYLOR), "*An Improved Fastening for Gaiters or Leggings.*"—Dated 22nd August, 1900.

Specification, 5s. 6d.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
24th August, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 34, 24th August, 1900.

Application No. 2846.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*Ernest Rowland Hill*), "*Improvements in the Electric Lighting of Railway Vehicles.*"—Dated 3rd February, 1900.

Specification, 5s. Drawings on application.

Application No. 3007.—SAMUEL BENJAMIN ALLISON, of S 1/2 and 35th Streets, Galveston, Texas, United States of America, Mechanical Engineer, "*Improvements in Machines for Separating the Fibres of Plants.*"—Dated 19th June, 1900.
Specifications, 9s. Drawings on application.

Application No. 3020.—THE AMERICAN CIGAR MACHINERY COMPANY, of Sharon, Litchfield, Connecticut, United States of America (Assignee of OLUF TYBERG, RUFUS LENOIR PATTERSON, and GEORGE ARENTS, jun.), "*Improvements in Cigar Machines.*"—Dated 7th July, 1900.
Specification, £7. Drawings on application.

Application No. 3025.—GEORGE EDWIN WOODBURY, of 143 First Street, San Francisco, California, United States of America, Machinery Manufacturer, "*Improvements in Ore Concentrating Machines.*"—Dated 10th July, 1900.
Specification, 17s. Drawings on application.

Application No. 3028.—GEORGE JONES ATKINS, of the Laboratory, Ruskin Road, Tottenham, Middlesex, England, Metallurgical Chemist, "*Improvements in the Manufacture of Gases and other Products, and in Apparatus employed therein.*"—Dated 17th July, 1900.
Specification, £1 4s. Drawings on application.

Application No. 3029.—GEORGE HENRY DUNLOP, of 60 Queen Street, Melbourne, Victoria, Civil Engineer, "*Improved method and Machinery for Excavating, Dredging, and Transporting Earth or other Materials.*"—Dated 17th July, 1900.
Specification, £1 9s. Drawings on application.

Application No. 3030. — WILLIAM LAWRENCE VOELKER, of 42 Bernard Street, Russell Square, London, England, Electrician, "*Improvements in the manufacture of Incandescing Electric Lamps.*"—Dated 20th July, 1900.
Specification, 6s. 6d. Drawings on application.

Application No. 3032.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Edwin Ruud*), "*Improvements in Governing Internal Combustion Engines.*"—Dated 20th July, 1900.
Specification, 4s. Drawings on application.

Application No. 3036.—EDWARD CHESTER & COMPANY, LIMITED, of 120 Bishopsgate Street Within, London, England, Mining Machinery Contractors and Manufacturers (Assignee of EDWARD DESCON CHESTER), "*Improvements in Crushers for Ore and other Materials.*"—Dated 28th July, 1900.
Specification, 14s. Drawings on application.

Application No. 3037.—THE GENERAL METAL REDUCTION COMPANY, LIMITED, of 85 Gracechurch Street, London, England (assignee of GUY DE BECHI), "*Improvements in and relating to the Treatment of Complex Ores containing Zinc and Lead.*"—Dated 28th July, 1900.
Specification, 4s.

Application No. 3038.—THE GENERAL METAL REDUCTION COMPANY, LIMITED, of 85 Gracechurch Street, London, England (assignee of GUY DE BECHI), "*Improvements in and relating to the Production of Zinc Oxide for the Manufacture of Spelter.*"—Dated 28th July, 1900.
Specification, 5s.

Application No. 3039.—WILLIAM LAWRENCE VOELKER, of 42 Bernard Street, Russell Square, London, England, Electrican, "*Improvements in the Manufacture of Filaments for Incandescing Electric Lamps and in means applicable for use in such manufacture.*"—Dated 30th July, 1900.
Specification, £1 5s. Drawings on application.

Application No. 3040.—THOMAS HENRY PEARSE of 89 State Street, Boston, Massachusetts, U.S.A., Gentleman (Assignee of MATTHEW PRIOR), "*Improvements in Cotton Gins and Wool Burrers.*"—Dated 1st August, 1900.
Specification, 13s. 6d. Drawings on application.

Application No. 3042.—THE GRENIER ART COMPANY, of 251 Fifth Avenue, Manhattan, New York, U.S.A. (assignee of PROSPER MARIE CONSTANT GRENIER), "*Improvements in Coloured Photographs and Process of producing the same.*"—Dated 1st August, 1900.
Specification, 3s. 6d.

Application No. 3049.—JOSEPH FLOREY, of 136 Grenfell Street, Adelaide, South Australia, Leather Merchant (assignee of JAMES JONES), "*Improvements in the Manufacture of Boots and Shoes.*"—Dated 7th August, 1900.
Specification, 6s. Drawings on application.

Application No. 3050.—WILLIAM KINGSLAND, of 8 Breams Buildings, Chancery Lane, London, England, Electrical Engineer, "*A new or improved Method of and Devices for Regulating or Controlling Electrical Switches.*"—Dated 7th August, 1900.
Specification, £1 16s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
17th August, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 33, 17th August, 1900.

Application No. 2760.—SIEGFRIED GIRONCOLI, of 14 Schiffgasse, Klagenfurt, Carinthia, Empire of Austria, Gentleman, "*A process of Preserving Meat.*"—Dated 6th November, 1899.
Specification, 1s. 6d.

Application No. 3021.—CARL JOHAN KIELBERG, of Hilleröd, in the Kingdom of Denmark, Polytechnic Student, "*Method and Apparatus for making all kinds of articles, with cylindrical cavities, from Cement Mortar, Moulding Sand, Clay, or other substances of similar consistence.*"—Dated 10th July, 1900.
Specification, 7s. Drawings on application.

Application No. 3023.—WILLIAM HENRY MOORE, of Plympton, near Fremantle, Western Australia, Blacksmith, "*Improvements in and connected with the construction of Vehicles.*"—Dated 10th July, 1900.
Specification, 3s. 6d. Drawings on application.

Application No. 3024.—WILLIAM BURGELAND JOHNSON, of Liverpool, Lancaster, England, Engineer, "*Improvements in Ventilators.*"—Dated 10th July, 1900.
Specification, 4s. Drawings on application.

Application No. 3026.—FRANK BROOKS HART, of 62 Barton Arcade, Manchester, Lancaster, England, Civil Engineer, "*An improved overlapping railway rail joint.*"—Dated 10th July, 1900.

Specification, 5s. 6d. Drawings on application.

Application No. 3033.—ROBERT CALDWELL, of Auckland, New Zealand, Engineer, "*A probe instrument for rendering easier the milking of cows and other female animals.*"—Dated 24th July, 1900.

Specification, 7s. 6d. Drawings on application.

Application No. 3035.—DONALD MACPHERSON, of Perth, Western Australia *(David Nable)*, "*Improvements in Detachable Coat Adjustments.*"—Dated 27th July, 1900.

Specification, 3s. 6d. Drawings on application.

Application No. 3041.—KATE HOBSON, of Newry Street, North Carlton, Victoria, Gentlewoman, "*An improved Fuel for household and other purposes.*"—Dated 1st August, 1900.

Specification, 5s.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
10th August, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 32, 10th August, 1900.

Application No. 2875.—JAMES ERNEST TATHAM, of 12 Fairholme Road, Kensington, in the County of London, England, Gas Engineer, "*Improvements in or connected with Gas Burners.*"—Dated 22nd February, 1900.

Specification, 6s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
3rd August, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 31, 3rd August, 1900.

Application No. 2727.—ALEXANDER ALLISON and JAMES ALLISON, both of Wanganui, New Zealand, Settlers, "*An Improved Medicinal Preparation for Sheep and other Animals.*"—Dated 13th October, 1899.

Specification, 3s.

Application No. 2954.—ABEL HARBER and WILLIAM SIVYER, both of Guildford, Western Australia, Brick Manufacturers, "*Improved Roasting Furnace having Travelling Hearths.*"—Dated 8th May, 1900.

Specification, 9s. Drawings on application.

Application No. 3001.—JOHN HERBERT WALKER, of Charters Towers, North Queensland, Pianoforte Importer, "*A combined Syringe or Injector and Reservoir.*"—Dated 19th June, 1900.

Specification, 5s. Drawings on application.

Application No. 3016.—EDWARD WATERS, of No. 131 William Street, Melbourne, Victoria, Patent Agent *(Frederick Ward Wood)*, "*Improvements in Dry Concentrators.*"—Dated 26th June, 1900.

Specification, £1. Drawings on application.

Application No. 3017.—FRASER & CHAMBERS, LIMITED, of 43 Threadneedle Street, London, England, Engineers and Manufacturers (Assignee of JOHANN STUMPF), "*Improvements in Pumps.*"—Dated 30th June, 1900.

Specification, 7s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
27th July, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 30, 27th July, 1900.

Application No. 2695.—JAMES FOX MELLOR, of Franklin Street, Adelaide, South Australia, Machinist (Assignee of JAMES FOX MELLOR and JAMES LESLIE CAMPBELL), "*Improvements in Stripping Machines.*"—Dated 26th September, 1899.

Specification, 6s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Applications for Patents.

SEPTEMBER 1ST—15TH.

Trade Marks.

Patent Office, Trade Marks Branch,
Perth, 21st September, 1900.

IT is hereby notified that I have received the undermentioned Applications for the Registration of Trade Marks.

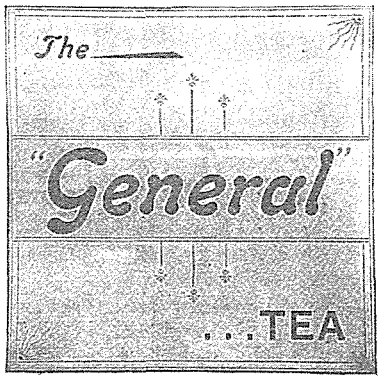
Any person or persons intending to oppose any of such applications must leave particulars in writing, in duplicate (on Form F), of his or their objections thereto, within two months of the first advertisement of the applications in the Western Australian *Government Gazette.*

A fee of £1 is payable with such notice.

In the case of an Application in which have been inserted a statement and disclaimer (or a disclaimer only), a copy of the same is printed in *italics* in connection with the advertisement.

MALCOLM A. C. FRASER,
Registrar of Designs and Trade Marks.

Application No. 1954, dated 4th July, 1900.—FREDERICK JOHN CLARIDGE, of No. 32 Vale Street, St. Kilda, in the Colony of Victoria, Tea Merchant, to register in Class 42, in respect of Tea, a Trade Mark, of which the following is a representation :—



The essential particular of the Trade Mark is the device.

This Mark was first advertised in the Western Australian *Government Gazette* of 27th July, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1960, dated 16th July, 1900.—FREDERICK D. SEWELL, trading as "F. D. Sewell & Co.," Importers and Commission Agents, 416 Hay Street, Perth, to register in Class 50, in respect of Umbrellas and Sunshades, a Trade Mark, of which the following is a representation :—

ARASO.

This Mark was first advertised in the Western Australian *Government Gazette* of 27th July, 1900—*vide* notice at head of Trade Mark advertisements.

Applications Nos. 1961, 1962, 1963, 1964, dated 17th July, 1900.—MAJOR & COMPANY, LIMITED, of 447 Wincolmlee, Kingston-upon-Hull (generally called Hull), England, Chemical Manufacturers. Application No. 1961, to register in Class 2, in respect of Chemical Substances used for agricultural, horticultural, veterinary, and sanitary purposes; Application No. 1962, to register in Class 3, in respect of Chemical Substances prepared for use in medicine and pharmacy; Application No. 1963, to register in Class 47, in respect of Candles, Common Soap, Detergents, Illuminating, Heating, or Lubricating Oils; Matches; and Starch, Blue, and other preparations for laundry purposes; and Application No. 1964, to register in Class 48, in respect of Perfumery (including Toilet Articles, Preparations for the Teeth and Hair, and Perfumed Soap), a Trade Mark, of which the following is a representation :—

SALUBRENE.

This Mark was first advertised in the Western Australian *Government Gazette* of 27th July, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1965, dated 17th July, 1900.—LOUIS DEMEL, Merchant, Dalgety Street, Fremantle, to register in Class 42, in respect of substances used as food, or as ingredients in food, a Trade Mark, of which the following is a representation :—

The essential particular of the above Mark consists of the combination of devices, and the applicant disclaims any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian *Government Gazette* of 27th July, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1952, dated 3rd July, 1900.—ALFRED SPOONER AND COMPANY PROPRIETARY, LIMITED, of No. 4 Brook Street, off Bendigo Street, Richmond, in the Colony of Victoria, Manufacturers of Leather Dressings, Furniture and Plate Polish, Inks, and Disinfectants, to register in Class 50, s.s. 6, in respect of Leather Dressings, Furniture and Plate Polish, a Trade Mark, of which the following is a representation :—

For representation of this Mark
vide Application No. 1946.

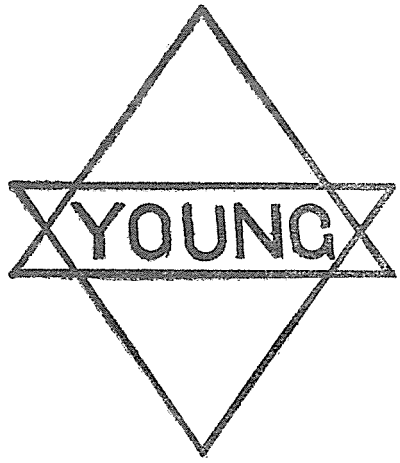
The essential particulars of the Trade Mark are the word "Boot," and the combination of devices, and applicants disclaim any right to the exclusive use of the added matter.

The exclusive right to the use of the word "Boot," in respect of Boot Dressings, is disclaimed.

This Mark was first advertised in the Western Australian *Government Gazette* of the 3rd August, 1900—*vide* notice at head of Trade Mark advertisements.

Applications Nos. 1957, 1958, dated 12th July, 1900.—CHARLES YOUNG, of Mt. Malcolm and Leonora, Western Australia, Aerated Water Manufacturer. Application No. 1957, to register in Class 15, in respect of Glass; Application No

1958, to register in Class 44, in respect of Mineral and Aerated Waters, natural and artificial, including Ginger Beer, a Trade Mark, of which the following is a representation :—



The essential particular of the above Mark consists of the device, and any right to the exclusive use of the added matter is disclaimed.

This Mark was first advertised in the Western Australian *Government Gazette* of the 3rd August, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1966, dated 1st August, 1900.—VIROL, LIMITED, of 152-166 Old Street, in the City of London, England, Manufacturers, to register in Class 42, in respect of Substances used as Food or as Ingredients in Food, a Trade Mark, of which the following is a representation :—

VIROL

This Mark was first advertised in the Western Australian *Government Gazette* of the 10th August, 1900—*vide* notice at head of Trade Mark advertisements.

Applications Nos. 1967 and 1968, dated 3rd August, 1900.—VINOLIA COMPANY, LIMITED, of Malden Crescent, London, England, Manufacturing Chemists, Perfumers, and Soap Makers. Application No. 1967, to register in Class 2, in respect of Chemical Substances used for Agricultural, Horticultural, Veterinary, and Sanitary purposes. Application No. 1968, to register in Class 47, in respect of Candles, Common Soap, Detergents, Illuminating, Heating, or Lubricating Oils; Matches; and Starch, Blue, and other preparations for Laundry purposes, a Trade Mark, of which the following is a representation :—

FIRE-FLY.

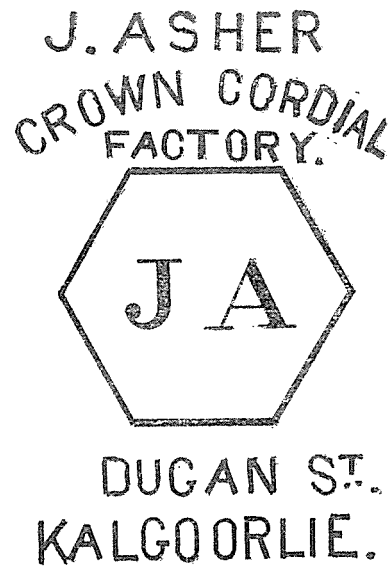
This Mark was first advertised in the Western Australian *Government Gazette* of the 10th August, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1969, dated 3rd August, 1900.—ANTI-KALSOMINE COMPANY, of Grand Rapids, Michigan, United States of America, Manufacturers, to register in Class 17, in respect of Manufactures from Mineral and other substances for Building or Decoration, a Trade Mark, of which the following is a representation :—

ALABASTINE

This Mark was first advertised in the Western Australian *Government Gazette* of the 10th August, 1900—*vide* notice at head of Trade Mark advertisements.

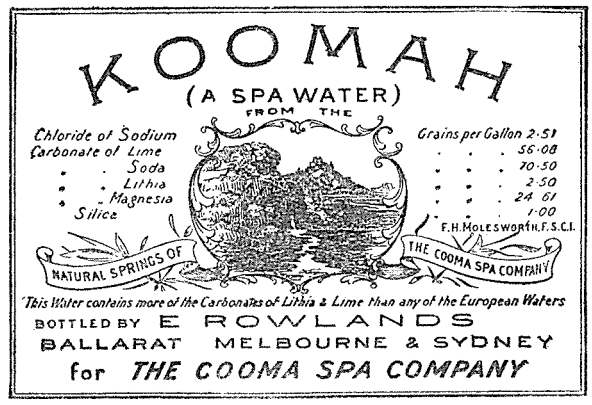
Applications Nos. 1970 and 1971, dated 3rd August, 1900.—JACOB ASHER, of Kalgoorlie, Western Australia, Cordials Manufacturer. Application No. 1970, to register in Class 15, in respect of Glass Bottles. Application No. 1971, to register in Class 44, in respect of Mineral and Aerated Waters, natural and artificial, including Ginger Beer, a Trade Mark, of which the following is a representation :—



The essential particulars of the Mark consist of the device and the word "Crown," and applicant disclaims any right to the exclusive use of the added matter, save and except his own name.

This Mark was first advertised in the Western Australian *Government Gazette* of the 10th August, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1951, dated 3rd July, 1900.—JOHN MARSLAND, of Mutual Life, of New York Buildings, Martin Place, Sydney, in the Colony of New South Wales, Trustee for himself and others, trading as "The Cooma Spa Company," to register in Class 44, in respect of Mineral Waters, a Trade Mark, of which the following is a representation :—



The essential particulars of the above Trade Mark are (1) the special and distinctive and invented word or name "Koomah;" (2) the picture of a spring enclosed within an irregular somewhat shield-shaped border made up of scrolls, and applicant company disclaims any right to the exclusive use of the added matter, save and except their trading name.

This Mark was first advertised in the Western Australian *Government Gazette* of the 17th August, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1959, dated 16th July, 1900.—WELLS & RICHARDSON Co., of Burlington, Vermont, U.S.A., to register in Class 1, in respect of Dry Aniline Dyes, in packages and bulk, for domestic and fancy uses, and Dry Metallic Paints for same purposes, a Trade Mark, of which the following is a representation :—

The essential particulars of the Trade Mark consist of the combination of devices and the word "Diamond," and the applicant company disclaims any right to the exclusive use of the added matter.

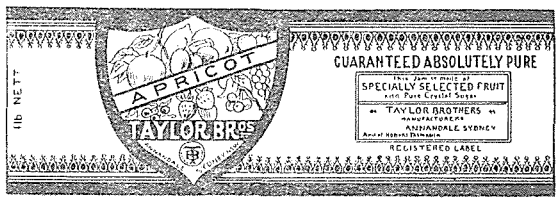
This Mark was first advertised in the Western Australian *Government Gazette* of the 17th August, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1972, dated 6th August, 1900.—ROBINSON AND HIGGINS, Grand Bottlers, King Street, Coolgardie, to register in Class 15, in respect of Glass Bottles, a Trade Mark, of which the following is a representation :—

The essential particular of the above Mark consists of the device of an anchor, and applicants disclaim any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian *Government Gazette* of the 17th August, 1900—*vide* notice at head of Trade Mark advertisements.

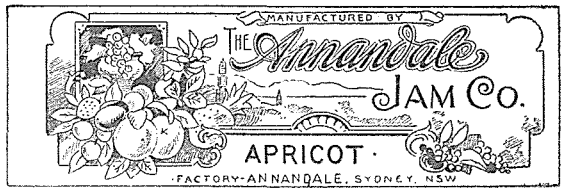
Application No. 1886, dated 18th April, 1900.—HERBERT EDWARD PRATTEN and JOHN PLANT WRIGHT, trading as "Taylor Bros.," at Annandale, Sydney, in the Colony of New South Wales, Jam Manufacturers, to register in Class 42, in respect of Jams and Preserves, a Trade Mark, of which the following is a representation :—



The essential particulars of the above Mark consist of the combination of devices, and applicants disclaim any right to the exclusive use of the added matter, save and except their trading name.

This Mark was first advertised in the Western Australian *Government Gazette* of the 24th August, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1887, dated 18th April, 1900.—HERBERT EDWARD PRATTEN and JOHN PLANT WRIGHT, trading as "Taylor Bros.," at Annandale, Sydney, in the Colony of New South Wales, Jam Manufacturers, to register in Class 42, in respect of Jams and Preserves, a Trade Mark, of which the following is a representation :—



The essential particulars of the above Mark consist of the combination of devices, and applicants disclaim any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian *Government Gazette* of the 24th August, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1974, dated 9th August, 1900.—CAMERON BROTHERS AND COMPANY, of Brunswick Street, Brisbane, in the Colony of Queensland, Manufacturers, to register in Class 45, in respect of Tobacco, whether manufactured or unmanufactured, a Trade Mark, of which the following is a representation :—

IVANHOE.

This Mark was first advertised in the Western Australian *Government Gazette* of the 24th August, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1975, dated 9th August, 1900.—THE JOHN HUNTER COMPANY, LIMITED, of Perth, in the Colony of Western Australia, Manufacturers and Importers, to register in Class 38, in respect of Boots and Shoes, a Trade Mark, of which the following is a representation :—

PALACE BRAND.
