IMPROVEMENT AND REFORESTATION OF STATE FORESTS.

WORKING PLAN No. 1.

Covering all that country within the prime Jarrah Belt south of the Eastern Railway to the southern boundary of the Jarrahdale Concession, the portion to be taken in hand first being the destroyed forests on the Goldfields Water Supply Catchment Area near Mundaring. The work for 1919-1920 to include—

Sylvicultural operations over the destroyed forests, and road-making to enable the marketing of firewood which will be cut under the sylvicultural operations. The erection of a forest station and the necessary quarters for the returned soldiers who are to be engaged on the work. The establishment of a Nursery for raising plants for the above work.

WORKING PLAN No. 2.

Covering all that country within the prime Tuart Belt between the Capel and Sabina River. The work for 1919-1920 to include:—

Sylvicultural operations to assure the regeneration of Tuart. The utilisation of the over-mature standing timber, and the timber in the limbs of trees already felled. For this purpose a small wood-working industry will be established. The fencing of such reserves as are not already protected from stock will also be done if wire is available at reasonable cost.

FORESTS PRODUCTS LABORATORY.

The State Government has agreed to co-operate with the Commonwealth Government in the erection of a Forests Products Laboratory in Western Australia, and to devote a sum of £5,000 to this purpose.

RESEARCH WORK.

It is probable that the Forests Products Laboratory will not be completed during the coming financial year, and it is important that research work should be carried on as far as possible, particularly in connection with Tan Barks, the Powell Process, Fungus Diseases, the Physical Properties of the Timbers, Kiln-drying, and Paper-making.

## FOREST PUBLICITY AND EDUCATION.

The area under forest in Western Australia is very small indeed in comparison with the area of the whole country capable of agricultural development, and it is necessary to awaken in the minds of all persons on the land a true consciousness of the situation in order that one and all may aid by conserving existing timber reserves, and by establishing new woods by means of private plantations. This can only be done by a wide publicity campaign.
