## Guide for using this reprint

### *What the reprint includes*

### *Endnotes, Compilation table, and Table of provisions that have not come into operation*

1. Details about the original regulations and legislation that has amended its text are shown in the Compilation table in endnote 1, at the back of the reprint. The table also shows any previous reprint.
2. Transitional, savings, or other provisions identified in the Compilation table may be important. The table may refer to another endnote setting out the text of these provisions in full.
3. A table of provisions that have not come into operation, to be found in endnote 1a if it is needed, lists any provisions of the regulations being reprinted that have not come into operation and any amendments that have not come into operation. The full text is set out in another endnote that is referred to in the table.

### *Notes amongst text (italicised and within square brackets)*

1. If the reprint includes a regulation that was inserted, or has been amended, since the regulations being reprinted were made, editorial notes at the foot of the regulation give some history of how the regulation came to be as it is. If the regulation replaced an earlier regulation, no history of the earlier regulation is given (the full history of the regulations is in the Compilation table).

Notes of this kind may also be at the foot of Schedules or headings.

2. The other kind of editorial note shows something has been —
  - removed (because it was repealed or deleted from the law); or
  - omitted under the *Reprints Act 1984* s. 7(4) (because, although still technically part of the text, it no longer has any effect).

The text of anything removed or omitted can be found in an earlier reprint (if there is one) or one of the written laws identified in the Compilation table.

### *Reprint numbering and date*

1. The reprint number (in the footer of each page of the document) shows how many times the regulations have been reprinted. For example, numbering a reprint as “Reprint 3” would mean that the reprint was the 3<sup>rd</sup> reprint since the regulations were published. Reprint numbering was implemented as from 1 January 2003.
2. The information in the reprint is current on the date shown as the date as at which the regulations are reprinted. That date is not the date when the reprint was published by the State Law Publisher and it is probably not the date when the most recent amendment had effect.

*[Regulation 5 amended in Gazette 29 Jun 1984 p. 1782.]*

**6. Apprehension and detention following report**

If, in the opinion of the Executive Director, Public Health, a report of examination is such as, in accordance with the provisions of section 307 of the Act, justifies the apprehension and detention of the person named in such report, the Executive Director, Public Health may issue his warrant accordingly and the warrant shall be in the form numbered 4 in the appendix.

*[Regulation 6 amended in Gazette 29 Jun 1984 p. 1782.]*

—————  
This certificate is not to be regarded as a guarantee of cure, for the reason that it is frequently impossible to definitely detect evidence of sexual disease. By it, the medical attendant implies that as a result of his observations he can no longer detect signs or symptoms of sexual disease.

No one should regard himself cured of syphilis unless he has been under active treatment for at least 2 years.

In the case of gonorrhoea, the cessation of all visible discharge does not of itself definitely indicate that the patient is non-infectious.
