- (1) A driver turning left at an intersection or a roundabout from a multi-lane carriageway must approach and enter the intersection or roundabout from within the left lane unless —
- (a) the driver is required or permitted to approach and enter the intersection from within another marked lane under regulation 69, 73, or 137; or
 - (b) the driver is turning, at B lights or traffic arrows, in accordance with Part 17; or
 - (c) subregulation (2) applies to the driver.

Points: 2 Modified penalty: 2 PU

Example for subregulation (1)(a)

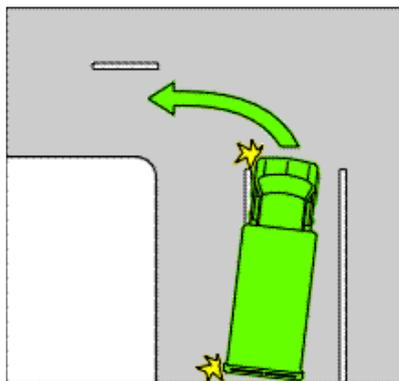

Starting a left turn on a multi-lane carriageway
with traffic lane arrows

- (2A) A driver turning left at an intersection from a multi-lane road that has a slip lane must approach and enter the intersection from within the slip lane, unless an obstruction prevents the driver from entering the intersection from within that slip lane.
Points: 2 Modified Penalty: 2 PU
- (2) A driver may approach and enter the intersection or roundabout from the marked lane next to the left lane as well as, or instead of, the left lane if —
- (a) the driver’s vehicle or combination, together with any load or projection, is 7.5 m long, or longer; and
 - (b) the rearmost part of the vehicle (or of the combination, if that is the case) displays a “do not overtake turning vehicle” sign; and
 - (c) any part of the vehicle is within 50 m of the nearest point of the intersection; and
 - (d) it is not practicable for the driver to turn left from within the left lane; and
 - (e) the driver can safely occupy the next marked lane and can safely turn left at the intersection by occupying the next marked lane, or both lanes.

Division 1 Left turns at intersections

r. 21

- (3A) If there is a bicycle storage area before an intersection that extends across one or more marked lanes of a multi-lane carriageway, a rider of a bicycle turning left must approach and enter the intersection from within the part of the bicycle storage area that is directly in front of the left marked lane, or of a bicycle lane or shoulder that is on the left side of the carriageway.

Modified penalty: 2 PU

- (3) In this regulation —

left lane means —

- (a) the lane nearest to the far left side of the carriageway; or
- (b) if there is an obstruction (*for example, a parked car or roadworks*) in that lane — the lane nearest to that lane that is not obstructed,

but does not include a special purpose lane in which the driver is not permitted to drive.

22. Making left turn as indicated by turn line

- (1) Subject to subregulations (2) and (3), if a driver is turning left at an intersection and there is a turn line indicating how the turn is to be made from the lane the driver is in, the driver must make the turn as indicated by the turn line.

Points: 2 Modified penalty: 2 PU

Example

Making a left turn as indicated by a turn line

- (2) Subregulation (1) does not apply to the driver of a public bus at an intersection if the driver is turning, at B lights or a traffic control signal, in accordance with Part 17.
- (3) A driver may turn left at an intersection in a manner other than that indicated by a turn line if —
- (a) the driver's vehicle or combination, together with any load or projection, is 7.5 m long, or longer; and

- (c) it is not practicable for the driver to turn left in the manner indicated by the turn line; and
- (d) the driver can safely turn left other than by the manner indicated by the turn line.

Division 2 — Right turns (other than hook turns) at intersections

23. Application of Division

This Division applies to a driver making a right turn at an intersection and, where specifically expressed to do so, at a roundabout, but does not apply to —

- (a) the rider of a bicycle or electric rideable device making a hook turn under Division 3; or
- (b) a driver making a U turn.

[Regulation 23 amended: SL 2021/200 r. 9.]

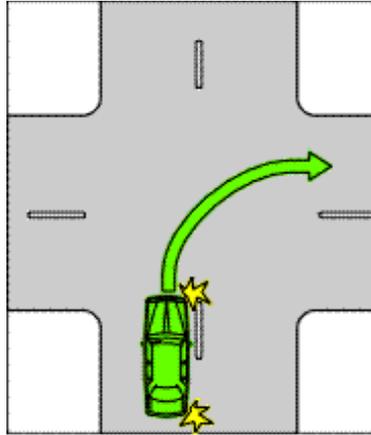

24. Right turns (two-way, single lanes)

- (1) A driver who is about to make a right turn from a two-way carriageway (other than a multi-lane carriageway) at an intersection must approach and enter the intersection —
 - (a) so that the vehicle is to the left of, parallel with, and as near as practicable to, the centre of the carriageway; or
 - (b) if the carriageway has a dividing line or median strip — so that the vehicle is to the left of, parallel to, and as near as practicable to, the dividing line or median strip.

Points: 2 Modified penalty: 2 PU

Example

Starting a right turn from a carriageway
with a dividing line

- (2) A driver making a right turn at an intersection where the carriageway being entered is a two-way carriageway must make the turn —
- (a) so that, wherever practicable, the vehicle passes to his or her right of the centre of the intersection; and
 - (b) so that the vehicle enters the carriageway to his or her left of the centre of the carriageway.

Points: 2 Modified penalty: 2 PU

- (3) For the purposes of subregulations (2) and (4), a vehicle is deemed to enter a carriageway at the point where the front of the vehicle crosses the prolongation of the edge of the carriageway it is leaving.
- (4) Subregulations (1) and (2) also apply to the rider of a bicycle or electric rideable device who approaches and enters an intersection from a bicycle storage area.
- (5) Despite subregulations (1), (2) and (3), if there is space in a bicycle storage area for 2 riders of bicycles or electric rideable devices to be next to each other, the rider on the left may

approach and enter the intersection as near as practicable to the left side of the other rider, but only if that other rider approaches and enters the intersection in accordance with this regulation.

[Regulation 24 amended: Gazette 13 Nov 2009 p. 4567; SL 2020/253 r. 28; SL 2021/200 r. 10.]

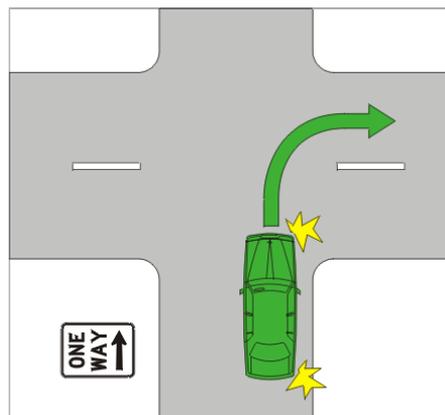

25. Right turns (one-way, single lanes)

- (1) A driver who is about to make a right turn from a one-way carriageway (other than a multi-lane carriageway) at an intersection must approach and enter the intersection so that the vehicle is parallel with, and as near as practicable to, the right boundary of the carriageway.

Points: 2 Modified penalty: 2 PU

Example

Starting a right turn from a one-way carriageway

- (2) A driver making a right turn at an intersection where the carriageway being entered is a one-way carriageway must make the turn so that, wherever practicable, the vehicle passes to his or her right of the centre of the intersection.

Points: 2 Modified penalty: 2 PU

- (3) For the purposes of subregulation (2), a vehicle is deemed to enter a carriageway at the point where the front of the vehicle crosses the prolongation of the edge of the carriageway it is leaving.

[Regulation 25 amended: SL 2020/253 r. 28.]

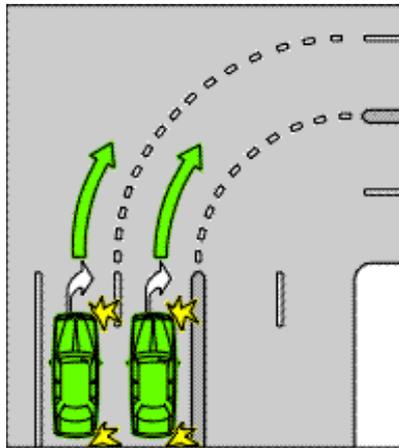

26. Right turns from multi-lane carriageway

- (1) A driver turning right at an intersection or a roundabout from a multi-lane carriageway must approach and enter the intersection or roundabout from within the right lane unless —
- (a) the driver is required or permitted to approach and enter the intersection from within another marked lane in accordance with regulation 70 or 73; or
 - (b) the driver is turning, at B lights or traffic arrows, in accordance with Part 17; and
 - (c) subregulation (2) applies to the driver.

Points: 2 Modified penalty: 2 PU

Example for subregulation (1)(a)

Starting a right turn on a multi-lane carriageway
with traffic lane arrows

- (2) A driver may approach and enter the intersection or roundabout from the marked lane next to the right lane as well as, or instead of, the right lane if —
- (a) the driver’s vehicle or combination, together with any load or projection, is 7.5 m long, or longer; and
 - (b) the rearmost part of the vehicle (or of the combination, if that is the case) displays a “do not overtake turning vehicle” sign; and
 - (c) any part of the vehicle is within 50 m of the nearest point of the intersection; and
 - (d) it is not practicable for the driver to turn right from within the right lane; and
 - (e) the driver can safely occupy the next marked lane and can safely turn right at the intersection by occupying the next marked lane, or both lanes.
- (3A) If there is a bicycle storage area before an intersection that extends across one or more marked lanes of a multi-lane carriageway, a rider of a bicycle turning right (but not making a hook turn) must approach and enter the intersection from within the part of the bicycle storage area that is directly in front of the right marked lane or of a bicycle lane that is on the right side of the carriageway.

Modified penalty: 2 PU

- (3) In this regulation —
- right lane*** means —
- (a) the lane nearest to the dividing line or median strip on the carriageway; or
 - (b) if there is an obstruction (*for example, a parked car or roadworks*) in that lane — the lane nearest to that lane that is not obstructed,

but does not include a special purpose lane in which the driver is not permitted to drive.

27. Making a right turn (generally)

- (1) Despite this Part, a driver who is about to make, or is making, a right turn at an intersection where turn lines or signs are so placed as to indicate that a different course from that specified in this regulation is to be travelled, must not turn the vehicle at the intersection otherwise than as indicated by the turn lines or signs.

Points: 2 Modified penalty: 2 PU

Example

Making a right turn as indicated by a turn line

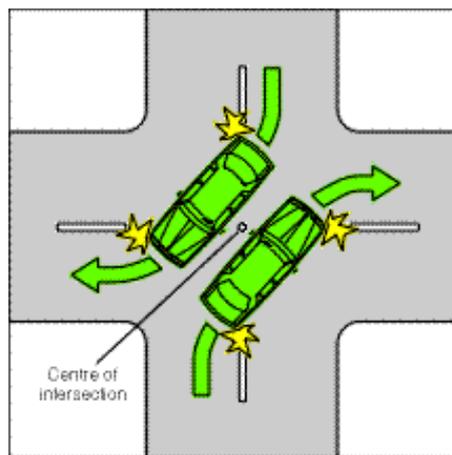

- (2) If there is no road marking indicating how the turn is required to be made, the driver must make the turn so the vehicle passes as near as practicable to the right of the centre of the intersection and into the left side of the carriageway that is being entered (unless that carriageway is a one-way carriageway).

Points: 2 Modified penalty: 2 PU

Example

Making a right turn from a carriageway with no road marking indicating how to make the turn

- (3A) Subregulations (1) and (2) do not apply to the driver of a public bus at an intersection if the driver is turning, at B lights or traffic arrows, in accordance with Part 17.
- (3B) A driver may turn right at an intersection in a manner other than that indicated by a turn line if —
- (a) the driver's vehicle or combination, together with any load or projection, is 7.5 m long, or longer; and
 - (b) the rearmost part of the vehicle (or of the combination, if that is the case) displays a "do not overtake turning vehicle" sign; and

- (c) it is not practicable for the driver to turn right in the manner indicated by the turn line; and
 - (d) the driver can safely turn right other than by the manner indicated by the turn line.
- (3) Despite this Part, a driver who is about to make, or is making, a right turn at an intersection where a police officer is controlling or directing traffic, must make the turn before reaching the middle of the road into which he or she is turning by passing either to the front, or to the rear of, the police officer, as he or she may be directed.

Division 3 — Hook turns by bicycles or electric rideable devices at intersections

[Heading amended: SL 2021/200 r. 11.]

28. Optional hook turn by bicycle or electric rideable device rider

- (1) The rider of a bicycle or electric rideable device turning right at an intersection without a “no hook turn by bicycles” sign, may turn right at the intersection by making a right turn or a hook turn.

No hook turn by bicycles sign

Part 4 Making turns

Division 3 Hook turns by bicycles or electric rideable devices at intersections

r. 28

- (2) A rider of a bicycle or electric rideable device must not make a hook turn under this regulation unless it is made in accordance with subregulations (3) and (4).

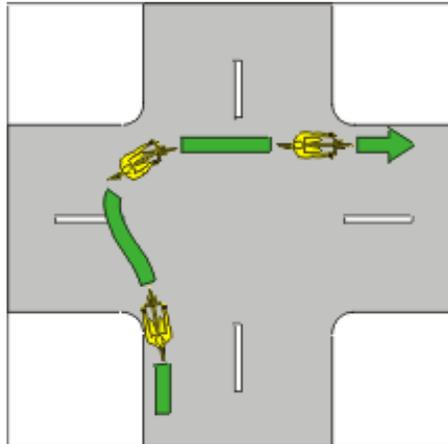

Modified penalty: 2 PU

- (3) To make a hook turn, a rider of a bicycle or electric rideable device must take, in sequence, each of the following steps:

- 1** Approach and enter the intersection in the lane furthest left that allows the rider to ride straight through the intersection and from as near as practicable to the far left side of that lane.
- 2** Move forward —
 - (a) keeping as near as practicable to the far left side of the intersection; and
 - (b) keeping clear of any marked foot crossing; and
 - (c) keeping clear, as far as practicable, of any driver turning left from the left of the intersection,until the rider is as near as practicable to the far side of the carriageway that the rider is entering.
- 3** If there are traffic-control signals at the intersection, remain at the position reached under step 2 until the traffic-control signals on the carriageway that the rider is entering change to green.
- 4** If there are no traffic-control signals at the intersection, remain at the position reached under step 2 until the rider has given way to approaching drivers on the carriageway that the rider is leaving.
- 5** Turn right into the carriageway that the rider is entering.

Example

without traffic-control signals

- (4) If the rider of a bicycle or electric rideable device wants to turn right by making a hook turn at an intersection that has a bicycle hook turn storage area on the left side of the intersection as the rider approaches the intersection, the rider must take the following initial 2 steps instead of the initial 2 steps listed in subregulation (3):
- 1 Approach the intersection from the far left side of the carriageway the rider is leaving and enter the intersection by moving into the bicycle hook turn storage area, keeping clear of any marked foot crossing.
 - 2 Move forward in the bicycle hook turn storage area until the rider is as near as practicable to the far side of the carriageway that the rider is entering.

33. Turns to enter abutting land

- (1) A driver who is about to make a left turn from a carriageway, to enter land abutting that carriageway, must drive the vehicle so that when it reaches the point at which the turn is to be made it is —

Points: 2 Modified penalty: 2 PU

Road Traffic Code 2000

Part 4 Making turns

Division 5 Turns from a carriageway to land abutting the carriageway

r. 33

- (2) Subject to subregulation (3), a driver who is about to make a right turn to enter land abutting a carriageway must —
- (a) where he or she is travelling on a two-way carriageway, approach the point at which the turn is to be made so that the vehicle is to the left of, parallel with, and as near as practicable to, the centre of the carriageway; and
 - (b) where he or she is travelling on a one-way carriageway, approach the point at which the turn is to be made so that the vehicle is parallel with and as near as practicable to, the right boundary of the carriageway.

Points: 2 Modified penalty: 2 PU

- (3) Subregulation (2) does not apply where a vehicle is in a marked lane that has a sign alongside or over it or markings on its surface indicating that a right turn must, or may be, made by vehicles in that lane.

- (2) In this Part, a driver is *turning right* if the driver is doing any of the following:
- (a) turning right;
 - (b) changing marked lanes to the right;
 - (c) diverging to the right, including diverging to the right from a straight line of travel within a marked lane or within a line of traffic;

- (f) turning right into a marked lane, or a line of traffic, from a median strip parking area;
 - (g) making a U turn;
 - (h) at a T-intersection where the continuing road curves to the left — leaving the continuing road to proceed straight ahead onto the terminating road.
- (3) In this Part, a rider is not taken to be **turning right** if the rider is making a hook turn in accordance with regulation 28.

[Regulation 34 amended: SL 2020/253 r. 11.]

35. When drivers are to give signals

A driver must not turn right or left, or stop or suddenly decrease speed, without giving warning of his or her intentions, by a signal as prescribed by this Part.

[Regulation 35 amended: Gazette 1 Dec 2000 p. 6753; SL 2020/253 r. 28.]

36. How drivers are to give signals

- (1) A driver who is required to give a signal of intention to turn right or left, or to drive a public bus out from a bus embayment must, where the vehicle is equipped with the appropriate flashing light signalling device or illuminated indicator in working order, give the signal by means of that flashing light signalling device or illuminated indicator.

Points: 2 Modified penalty: 2 PU

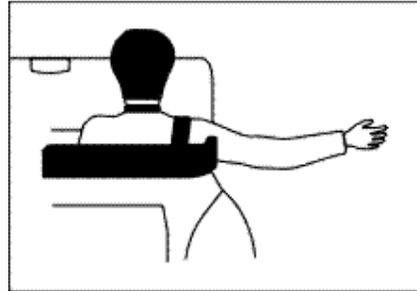

- (2) A driver who is required to give a signal of intention to turn right must, where the vehicle is not equipped with an appropriate flashing light signalling device or illuminated indicator in working order, give the signal —
- (a) by means of a hand-shaped signalling device; or
 - (b) by fully extending his or her right arm and hand horizontally beyond the right side of the vehicle and

approximately at right angles to the centre line of the vehicle.

Points: 2 Modified penalty: 2 PU

Example

Giving a hand signal for turning (inc. diverging) to the right

- (3) A rider of a bicycle or electric rideable device who is required to give a signal of intention to turn left, must give a signal by fully extending his or her left arm and hand horizontally beyond the left side of the vehicle and approximately at right angles to the centre line of the vehicle.

Modified penalty: 2 PU

- (4) A driver who is required to give a signal of intention to stop or to reduce speed suddenly must, where the vehicle is equipped with a stop light or lights in working order, give the signal by means of that stop light or those lights.

Points: 2 Modified penalty: 2 PU

- (5) A driver who is required to give a signal of intention to stop or to reduce speed suddenly must, where the vehicle is not equipped with a stop light or lights in working order, give the signal —

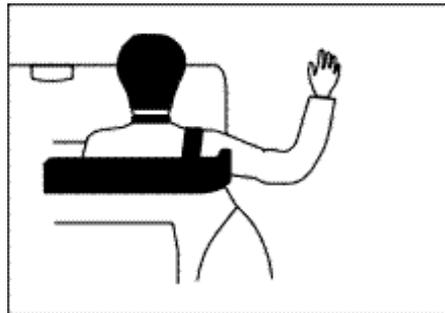

(a) by means of a hand-shaped signalling device; or

- (b) by extending his or her right arm beyond the right side of the vehicle with the upper arm horizontal and the forearm and fingers pointing upwards.

Points: 2 Modified penalty: 2 PU

Example

Giving a hand signal for stopping or reducing speed suddenly

- (6) Despite subregulation (5), the rider of a motor cycle may give the hand signal to stop or to reduce speed suddenly by extending the left arm and hand at right angles from the left side of the motor cycle, with the upper arm horizontal and the forearm and hand pointing upwards, and with the hand open and the palm facing the direction of travel.
- (7) Nothing in this regulation —
 - (a) prevents a driver who complies with subregulation (1) or (4) from also giving the arm and hand signal that he or she would be required to give if the vehicle were not equipped with the appropriate flashing light signalling device, illuminated indicator or stop light or lights as the case may be; or
 - (b) requires the driver of a vehicle, which is not a bicycle or electric rideable device, to give a signal of intention to turn left if the vehicle is not equipped with a flashing

light signalling device or illuminated indicator capable of being used to give such a signal.

[Regulation 36 amended: SL 2020/253 r. 28; SL 2021/200 r. 14.]

37. How long should hand signals be given

- (1) A driver must give —
- (a) a signal to turn right or left; or
 - (b) any signal required to be given where a vehicle is not equipped with a flashing light signalling device or illuminated indicator capable of being used to give such a signal,

for long enough to give sufficient warning to other drivers and pedestrians.

Points: 2 Modified penalty: 2 PU

- (2) In addition to subregulation (1), a driver must give a signal prescribed by this Part, where he or she intends —
- (a) to join a line of traffic and the vehicle is stationary at the side of a carriageway, or in a centre of the road parking area — continuously for 5 seconds before pulling out; and
 - (b) to stop or suddenly reduce speed — while the brakes are being applied; and
 - (c) to drive a public bus away from a bus embayment or from the side of a carriageway — for at least 5 seconds.

Points: 2 Modified penalty: 2 PU

[Regulation 37 amended: SL 2020/253 r. 28.]

38. Use of signalling devices

provisions of these regulations (including operation as part of the vehicle's hazard warning lights).

Modified penalty: 1 PU

- (2) A driver must not permit a signalling device on the vehicle to remain in operation after the completion of the turn in respect of which the device was put into operation.

Modified penalty: 1 PU

- (a) proceed straight ahead; or
 - (b) turn left; or
 - (c) turn right (including making a U turn if permitted).

Modified penalty: 4 PU

- (2) Subregulation (3) applies if a traffic-control signal facing a driver displays a green arrow signal and the driver is turning in the direction indicated by that arrow.

- (3) The driver must, in accordance with these regulations and if it is safe to do so, proceed in the direction indicated by the arrow (including making a U turn if permitted).

- (a) the two vehicles were side by side when they were at the signal; and
 - (b) at least one of the vehicles is a motor cycle; and
 - (c) the vehicles are the first two vehicles in that lane to proceed past the signal since the signal last changed to green.
- (4) If the traffic-control signal does not display a signal, the driver may proceed straight ahead past the signal and any stop line at or near the signal, as if the traffic-control signal and the stop line were not there.

[Regulation 39A inserted: SL 2020/184 r. 9.]

40. Stopping for circular red signal or red arrow

- (1) Except as provided in regulations 42, 43 and 43A, if a traffic-control signal facing a driver displays a circular red signal —
- (a) if there is a stop line at or near the signal, the driver must stop as near as practicable to, but before reaching, the stop line and must not proceed beyond the stop line; or

Points: 1 Modified penalty: 2 PU

- (4) Subregulation (1) does not apply to a central traffic island in a roundabout.

Note A driver must drive to the left of the central traffic island in a roundabout except in certain circumstances.

Example

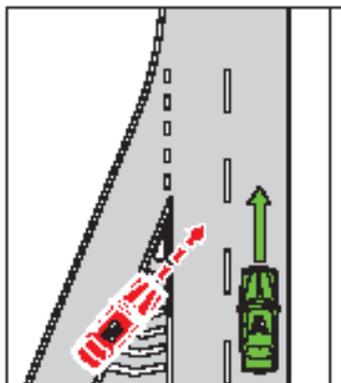

In this example, it is unlawful for vehicle B to have commenced driving on the painted island unless B intends to enter or leave the carriageway, or enter a turning lane, immediately after the painted island. In any case, B cannot drive on the painted island for more than 50 m.

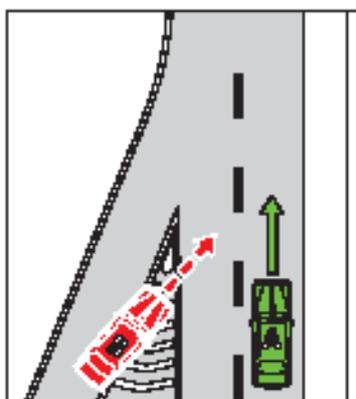

- (5) Subregulation (2)(a) does not apply in the case of a painted island —
- (a) that separates a carriageway that takes vehicles in one direction from another carriageway that takes vehicles in the same direction at a place where the carriageways merge; or
 - (b) that separates one part of a carriageway from other parts of the carriageway to create a slip lane.

Example 2

In these examples, vehicle B is contravening subregulation (2)(a) because of subregulation (5)(a).

120. Avoiding obstructions on carriageway

- (1) A driver on a two-way carriageway without a dividing line or median strip may drive to the right of the carriageway or into the other carriageway to avoid an obstruction if —
 - (a) the driver has a clear view of any approaching traffic; and
 - (b) it is necessary and reasonable, in all the circumstances, for the driver to drive in that manner to avoid the obstruction; and
 - (c) the driver can do so safely.
- (2) A driver on a two-way carriageway with a dividing line may drive to the right of the dividing line to avoid an obstruction if —

 - (c) the driver can do so safely.
- (3) In subregulation (2), if the dividing line is a single continuous dividing line to the left of a broken dividing line, a single continuous dividing line only or 2 parallel continuous dividing lines, the hazard in driving to the right of such a dividing line must be taken into account in deciding whether it is reasonable to drive to the right of the dividing line.
- (4) A driver may drive on a dividing strip, or on or over a single continuous line, or 2 parallel continuous lines, or on or over a painted island, to avoid an obstruction if —
 - (a) the driver has a clear view of any approaching traffic; and

(2A) For the purposes of subregulation (2), if the driver of the motor vehicle is in a speed zone that begins with a variable illuminated speed limit sign, a reference to the speed limit applicable to the length of road is a reference to the speed limit applicable to the speed zone when the driver enters the zone.

(3) For the purposes of subregulation (2), the lateral distance is measured between the following points —

(a) the furthest point to the left on the driver's vehicle or any projection from the vehicle (whether or not attached to the vehicle);

- (c) any part of the vehicle is within 50 m of the nearest point of the intersection; and
 - (d) (where a driver intends to turn right) it is not practicable for the driver to turn right from within the right lane; and
 - (e) (where a driver intends to turn left) it is not practicable for the driver to turn left from within the left lane; and
