**H**IS Excellency the Governor directs the publication of the following notice for general information.

By His Excellency's Command,  
 FRED. P. BARLEE,  
 Colonial Secretary.

#### NOTICE TO MARINERS.

"Pelorus" at Sea,  
 Lat. 18° 40' South, Long. 172° 53' East,  
 26th July, 1861.

**S**IR.—I have the honor to acquaint your Excellency that at 9.15 a.m. on the 12th instant, while on her passage from New Zealand to the Fiji's, Pylstant Island in sight, bearing N. 23° E. (true), 37 miles, Her Majesty's ship under my command passed within 650 yards of a reef not laid down in any chart in our possession.

2. It is about a quarter of a mile in length from East to West. There does not appear to be more than one or two fathoms water on the Western end, at the extremity of which breakers were visible, it lies in Latitude 22° 55' 15" S., and Longitude 176° 27' 50" W., and being situated directly in the track of vessels bound from New Zealand to the windward islands of the Fiji group, is very dangerous to the navigation of these seas.

3. I have further to acquaint you that after dark on the evening of the 12th instant, while steering N.W. under reduced sail, the leadsman in the fore chains reported soundings in 7 fathoms followed by two casts of 6½ fathoms and 6 fathoms respectively. The ship was immediately brought to the wind and tacked, but no soundings having afterwards been obtained either with the hand lead or the deep sea line with 63 fathoms out, she was brought to her former course. This bank, if it exist, is situated in Latitude 21° 43' 00" S., Longitude 176° 42' 00" W.

4. On my arrival at Ovalau I was informed by H.B.M. Consul for the Fiji's that the natives of the Tonga Islands, who maintain much intercourse with the Fiji group, by means of their large canoes, are aware of the existence of many shoals between Tongatabu and the Ono Islands, but are unable to define their position. The only bank of which any reliable information could be procured was one of some extent, having 22 fathoms of water on it which was discovered in August, 1860, by three American Whalers cruising in company, and which by the mean of their observations lies in Latitude 22° 43' 00" S., Longitude 176° 11' 0" W.

I have, &c.,  
 F. BEAUCHAMP SEYMOUR,  
 Commodore Commanding the Australian  
 Station.
