Government Notice, No. 122, 1866.

HIS Excellency the Administrator of the Government directs the publication, for general information, of the following Notice of the Erection of a Lighthouse on the Bluff at the south side of the entrance at Port Natal.

By His Excellency's command,
D. ERSKINE,
Colonial Secretary.

*Colonial Office, Natal,
October 20th, 1866.*

NOTICE TO MARINERS.

A Lighthouse has been erected on the Bluff at the south side of the entrance of Port Natal, at an elevation of 292 feet above high water, a light from which will be exhibited on the 23rd January, 1867.

The Lighthouse is in Latitude $29^{\circ} 52' 50''$ S., and Longitude $31^{\circ} 3' 35''$ E.

The building is an iron tower, in the form of a frustrum of a cone, 81 feet high, painted white; centre of light being 70 feet above the base, exhibiting a revolving white light of the second class (dioptric), attaining its greatest brilliancy once every minute.

It is visible in all directions from North (round by East and South), to $S. 59^{\circ} W.$; and can be seen from a ship's deck 24 miles in clear weather.

The above light is not visible from the Aliwal Shoal, which is 25 miles S., $53^{\circ} W.$, from the Lighthouse: vessels should not, therefore, when coming from the southward and westward, approach the shore nearer than 4 miles, or shoal their water under $4\frac{1}{2}$ fathoms, using the lead freely until they make the light well out from the deck, when they may stand in until it bears $N. 59^{\circ} E.$,—which bearing will keep them outside all known danger—until they are abreast of the Umlazi River (about $9\frac{1}{2}$ miles below the Lighthouse), when they must keep it more to the northward, as the land trends more to the eastward, giving the shore a good berth of a mile, and when the light bears about E.N.E., they can haul in to the northward for the anchorage: anchoring in $8\frac{1}{2}$ to 10 fathoms, with the Lighthouse bearing S.W. to S.W. $\frac{1}{2} S.$, distant 1 mile.
