[No. 260.]

AUSTRALIA—EAST COAST.

FIXED LIGHTS ON ARCHER POINT AND ROCKY ISLET.

The Government of Queensland has given Notice, that on the 9th June 1883, lights would be exhibited from Archer point (about one mile north-west of Rocky islet); and on Rocky islet, about 10 miles southward of Endeavour river entrance:—

ARCHER POINT LIGHT is a fixed light, showing white seaward from the direction of cape Tribulation to the bearing of S.W. $\frac{1}{4}$ S., but is intensified on a N.W. by N. $\frac{1}{4}$ N. bearing when it is in line with Rocky islet light. It is obscured between the bearings of S.W. $\frac{1}{4}$ S. and S. by E., Sly.; a green light is shown from S. by E., Sly. to S. by E. $\frac{1}{4}$ E.; a white light from S. by E. $\frac{1}{4}$ E. to S.S.E.; and a red light from S.S.E. to S.E. by S. $\frac{1}{4}$ S. It is elevated 220 feet above high water, and should be visible in clear weather from a distance of 20 miles.

The illuminating apparatus is holophotal, of the fourth order.

The lighthouse, 45 feet high and circular in shape, is situated on the summit of the point.

Position approximate, lat. 15° 36' 00" S., long. 145° 21' 40" E.

ROCKY ISLET LIGHT is a fixed light, showing a ray of light when bearing N.W. by N. $\frac{1}{4}$ N.; it is elevated 90 feet above high water, and should be visible in clear weather from a distance of 14 miles.

The illuminating apparatus is holophotal.

The lighthouse, 20 feet high, is situated on the western slope of the islet.

Position, lat. 15° 36' 45" S., long. 145° 22' 00" E.

These lights kept in line lead nearly in mid-channel between a reef and Thomas point.

With Archer point light in sight bearing westward of S.W. $\frac{1}{4}$ S., vessels are clear of c and e reefs. The eastern edge of the sector of green light cuts the western extreme of d reef. Vessels within the sector of white light are clear of d reef to the eastward, and Blackbird patch to the westward.

Vessels working to the southward, and having passed Monkhouse point, may stand into Walker bay as far as the western edge of the sector of red light, which leads clear of the rocky ground in the bay.

DIRECTIONS.—Vessels from the northward leaving Endeavour river, will, by night, when steering to the south-eastward, pass through the sector of red light; and those rounding cape Bedford and steering for Monkhouse point, will pass through the green sector and into the white sector of Archer point light, then steering for it till nearly abreast the southern part of Walker bay; they will then cross the green and obscured sectors, rounding Walker and Archer points, and Rocky islet at a safe distance; after passing Rocky islet, the two lights should be brought in line bearing N.W. by N. $\frac{1}{4}$ N., and kept so until past a reef.

Similarly vessels from the southward, having passed a reef with the lights in line, will after rounding Rocky islet and passing Walker point, cross the obscured and green sectors, and keep within the white sector until d reef and Blackbird patch are passed.
