*Colonial Secretary's Office,
Perth, 21st January, 1885.*

HIS Excellency the Administrator has been pleased to appoint the following gentlemen to be Visiting Justices of the Peace for the Perth and Rottnest Gaols, and the Fremantle Lunatic Asylum, during the year 1885, viz.:—

Perth Gaol:—G. W. Leake, Esq.; G. B. Phillips, Esq.; S. E. Burges, Esq.

Rottnest Gaol:—J. G. Slade, Esq.; J. F. Stone, Esq.; W. E. Marmion, Esq.; G. Shenton, Esq.

Fremantle Lunatic Asylum:—J. G. Slade, Esq.; J. F. Stone, Esq.; Major R. M. Sutherland; J. Manning, Esq.; W. E. Marmion, Esq.

By Command,
MALCOLM FRASER,
Colonial Secretary.

No. 2086.—C.S.O.

Erratum.

IN the List (No. 2069.—C.S.O.) of persons registered under "The Medical Ordinance, 1869," published in Gazette No. 2, of the 8th inst., the qualification of Mr. NATHANIEL WHEATCROFT HOLMES should read as follows:—

Registered under the Imperial Medical Act, 23rd November, 1878. Licentiate, Licentiate of Midwifery, Royal College of Physicians, Edinburgh, 1878. Licentiate, Licentiate of Midwifery, Royal College of Surgeons, Edinburgh, 1878.

By Command,
MALCOLM FRASER,
Colonial Secretary.

No. 2089.—C.S.O.

118
85

*Colonial Secretary's Office,
Perth, 19th January, 1885.*

HIS Excellency the Administrator has been pleased to appoint the undermentioned person to be a vendor of Internal Revenue Stamps under the 21st Section of "The Stamp Act of 1882," viz.:—

S. ADAMS, Postmistress, Harvey.

By Command,
MALCOLM FRASER,
Colonial Secretary.

No. 2088.—C.S.O.

*Colonial Secretary's Office,
Perth, 17th January, 1885.*

HIS Excellency the Administrator directs it to be notified that he has received the following Returns of persons elected to serve on the under-mentioned Roads Boards during 1885, viz. :—

$\frac{180}{85}$

PERTH ROADS BOARD.

MEMBERS.—G. Shenton, Esq., M.L.C.
Mr. D. W. Harwood.
„ A. G. Clifton.
AUDITORS.— „ B. Smith.
„ G. Dent.

$\frac{136}{85}$

NORTHAMPTON ROADS BOARD.

CHAIRMAN.—Mr. Samuel Mitchell.
MEMBERS.—Mr. F. Hall.
„ James More.

$\frac{204}{85}$

WILLIAMS ROADS BOARD.

CHAIRMAN.—Mr. F. H. Piesse.
MEMBERS.—Mr. Henry Sherry.
„ W. Lavender.
„ George Dyson.
„ P. G. Hoghton.
AUDITOR.— „ R. E. Warburton.

$\frac{236}{85}$

VASSE ROADS BOARD.

MEMBERS.—Mr. Thos. Thurkle.
„ Chas. Layman.
„ Henry Gadd.

$\frac{267}{85}$

MURCHISON AND TALLERING ROADS BOARD.

CHAIRMAN.—Mr. A. G. Lacy.
MEMBERS.—Mr. J. Wilton.
„ E. Wittenoom.
„ F. Wittenoom.
„ Chas. Davis.
„ T. Little.
„ R. Wilton.

$\frac{91}{85}$

IRWIN ROADS BOARD.

MEMBERS.—Mr. S. E. Burges, Jun.
„ F. Pearse.
„ W. E. Wass.

By Command,
MALCOLM FRASER,
Colonial Secretary.

No. 2092.—C.S.O.

TENDER ACCEPTED FOR 1885.

*Colonial Secretary's Office,
Perth, 21st January, 1885.*

FOR the supply of bedding to and the removal of the manure from the undermentioned Police Station :—

Name.	Station.	Amounts to be paid by Contractor.
Graves, W. E.	Northam ...	For the manure.

By Command,
MALCOLM FRASER,
Colonial Secretary.

*Central Board Education,
Perth, 15th January, 1885.*

AS no Election of five persons to form a District Board of Education, at Carnarvon, took place on the day appointed by His Excellency the Governor, the Central Board of Education have, in accordance with the provisions of the 15th Section of 35th Vict., No. 14, duly appointed

Mr. C. D. V. Foss, J.P.
Mr. Chas. Crowther
Mrs. Chas. Crowther
Mr. Jas. E. Townshend
Mr. R. Cleveland

to form the District Board of Education for the Gascoyne District; to date from 3rd December, 1884.

MALCOLM FRASER,
Chairman Central Board of Education.

$\frac{213}{85}$

NOTICE.

ON the 1st February, 1885, a Police Station will be established at the Mount Eliza Barracks, and near the Causeway at the Junction of Adelaide Terrace and Plain Street, in the City of Perth.

M. S. SMITH,
Superintendent of Police.
19-1-85.

No. 2090.—C.S.O.

$\frac{232}{85}$

*Colonial Secretary's Office,
Perth, 20th January, 1885.*

HIS Excellency the Administrator directs the publication of the following Report by the Government Geologist attached to the Kimberley Survey Party of last year.

By Command,
MALCOLM FRASER,
Colonial Secretary.

REPORT

*On the Geological work accomplished during the Kimberley Survey of 1884, by
Edward T. Hardman, F.R.G.S.I., A.R.C.S.D., &c., Government Geologist.*

SIR,

Survey Office, Perth, January 13th, 1885.

I have the honor to submit, for the information of His Excellency the Governor, the following Preliminary Report on the Geological work done by me while accompanying the Kimberley Survey Party in 1884.

Soon after landing in April, I accompanied Mr. Johnston to Point Torment, and examined several wells, then in progress of being sunk in search of water, giving Mr. Fairbairn my opinion as to the possibilities of obtaining fresh water. The search, however, proved abortive, yet I consider that fresh water may be found at some further distance from the coast.

On returning to Derby preparations were made for our expedition to the upper reaches of the River Margaret, and to the Ord River; and these being finally completed at the Yeeda Station by the 21st April, we on that day started up the Fitzroy. As it was apparent that Mr. Johnston's duties would oblige him to visit a much greater extent of country than Mr. Turner's, whose work would lie almost wholly along the rivers, I determined to attach myself to the party of the former officer, and I accompanied him during the whole of his journey.

We travelled up the river to Mt. Campbell, and there commenced work, visiting many of the outlying hills and ranges, and obtaining several interesting cross-sections elucidating the Geology of the country; and, by the 21st May, we had reached the river Margaret, where it enters the Leopold Ranges, about 250 miles above the mouth of the Fitzroy.

We now proceeded up the Margaret, following principally one of the minor branches—the Mary River—and visiting and examining many hills and ranges not hitherto mapped. On the 24th June we crossed the watershed of the Margaret and Ord Rivers, at an estimated elevation (by barometer) of about 1,215 feet above the sea. Soon after this we came upon a small creek, which in a short distance widened out into a large and important river, flowing North-easterly. There can be little hesitation in regarding this river, which we named the Elvira, as the head-waters of the river Ord. Following this branch down, we after some weeks reached the Panton River, and Mr. Johnston having selected a suitable site for a base line some 10 miles below the junction, we remained there for 10 days, while the necessary clearings and measurements were being proceeded with.

On the 21st July we left for the Ord, and proceeded along it until the 1st August, when we camped a few miles below the junction of the Ord and Negri Rivers, where we remained for some days in order to visit and examine various localities in the neighborhood.

On the 6th August we left for the Negri, up which we passed for some 35 miles, finally camping near Mt. Panton, and remaining there until the 11th, having visited and examined Mt. Napier, a part of a basaltic range south of the Negri.

We then commenced our return journey, which necessarily lay chiefly over the same ground we had traversed on our course up, and we arrived at Derby on the 17th November; leaving for Fremantle by steamer of 5th December.

During this journey I travelled about 1,900 miles on horseback, and the observations I made will enable me to furnish a sketch map showing the Geology of about 10,000 square miles of country.

The following are the Geological formations ascertained to occur in this district, comprising a section extending from the South-western extremity of the Leopold Ranges, North-easterly to the boundaries of the South Australian territory.

GEOLOGICAL AGE.	CLASSIFICATION OF ROCKS.
<i>Recent.</i>	{ <i>Alluvium.</i> —Wide plains along the rivers often extending some distance into the interior. <i>River Gravels.</i> —Along the banks and in the beds of rivers.
<i>Recent or Pliocene.</i>	
<i>Carboniferous.</i>	{ <i>Pindan sands and gravels</i> , with consolidated beds of ironstone conglomerates. <i>Boulder Beds.</i> —Great masses of boulder gravel covering extensive areas in the neighborhood of the Leopold Ranges. <i>Sandstone.</i> —Sandstones, grits, conglomerates, and shales, with numerous bands and nodules of ironstone. <i>Limestone.</i> —Variously colored hard compact limestones. Very fossiliferous in places and containing Gypsum, Calcite, Lead and Zinc Ores, and Carbonate of Copper.
<i>Devonian.</i>	
<i>Lower Silurian.</i>	{ Coarse Grits and Sandstones; Limestones and shales; all showing more or less traces of Metamorphic action. <i>Metamorphic</i> { Quartzite and Altered Grits Mica Schist Talc Schist and Slate, Chlorite Schist Andalusite Schist Hornblendic Schist, Quartz Schist Gneiss Granite Porphyritic Diorite
<i>Igneous—Volcanic Of Devonian Age.</i>	{ Basalt, Dolerite Trachy-dolerite, Lava, Ferruginous-Wackenite Volcanic Brecia, &c.
<i>Igneous-Plutonic (Post Silurian)</i>	{ Granite Syenitic-Granite Syenite Syenite Porphyry
<i>Intrusive.</i>	Diorite and Basalt in Dykes.

The wide-spread area occupied by the carboniferous rocks in Kimberley cannot but be of the highest interest to Geologists. These I last year traced out over a considerable tract of country, and have now been enabled to follow them out for a still greater extent.

Besides this, I have been fortunate enough to discover a formation hitherto unknown in Western Australia—namely, the Devonian. These rocks, resting on the metamorphic beds of the Silurian, cover a very large space in the district.

One of the most interesting discoveries made during the trip, however, is that of a great mass of basaltic rock which was traced for more than 100 miles. It forms a very extensive plateau rising in places more than 1000 feet above the river plains, and is probably at least 2000 feet above sea level; its area, so far as observed, is at least 3000 square miles. Its age is Devonian.

Apart from the scientific interest attaching to the discovery of such an extensive flow of volcanic rock of that Period, there is the practical importance due to the fact that although this great plateau is for the most part composed of almost bare rock, it is well covered with various varieties of soft grasses, and edible shrubs, even to the summits of the hills; and will afford excellent pasturage. This is due to the fertile nature of the soils produced through the decomposition of basaltic rocks; a fact which is well exemplified in other parts of this Colony, and is so well known that it need not here be enlarged on.

Minerals, &c. (Gold).—I am glad to be able to report that I have discovered a large area of country which I believe will prove to be auriferous to a payable degree. This country is traversed by the Margaret, Mary, Elvira, Panton, and Ord Rivers, and comprises an area of at least 2000 square miles so far as observed, but it doubtless continues over a much greater extent of country. The formation is principally Lower Silurian slate and schist of various kinds traversed by an enormous number of quartz reefs. In some localities many of these occur in the space of a few hundred yards, and it was quite usual to notice 25 or 30 large reefs while riding over a mile of ground, without taking into account the smaller reefs or veins. The quartz constituting these reefs is of a very promising character. It is a dull yellowish and grey quartz, very cellular and vuggy, containing quantities of black and other oxides of iron, together with casts of, and often crystals of iron pyrites. From most of the surface quartz the enclosed minerals have been washed away however, although their traces are still apparent. Minute specks of gold have been noticed in a few cases, and I have very little doubt that many of these reefs, when properly examined and tested, will prove to be auriferous.

These quartz reefs have a general bearing of N. 10 E. to N.E. Many run due N. & S. Some of them can be traced for several miles.

It is most probable that these quartziferous rocks are a spur or continuation of the gold-bearing Metamorphic rocks of the Northern Territory, now being worked with some success.

Alluvial Gold.—The river valleys and flats are in many places covered with deposits, sometimes very extensive, of quartz-gravel, and drift; the quartz being derived from denudation of the reefs referred to above. I have prospected these gravels over many miles of country, and I have rarely failed to obtain good colors of gold; in many localities of a very encouraging character. Very often good colors were obtained in every pan washed, in different trials in the same locality. I have thus found gold to be distributed over about 140 miles along the Elvira, Panton, and Ord Rivers, &c.; as well as on the Mary and Margaret Rivers, where the indications were very good, and the appearance of the country most favorable.

In several instances I obtained good colors of gold at considerable distances from the quartz-bearing rocks from which the gold could only have been derived. This to my mind seems to indicate that there must be large quantities of gold in the quartz-bearing rocks, and in the drifts immediately underlying them.

The gold yielding country is well watered by numerous rivers, creeks, and gullies, which even in the driest part of the year are never wholly without water. And although during the dry season water is scarce, there would be no difficulty in conserving water anywhere in sufficient quantity for all mining purposes.

On the whole, the indications I have met with point, as I believe, to the great probability of payable gold being obtained in this part of Kimberley, and are I consider sufficient to justify the expenditure, either by the Government or private individuals, of a reasonable sum of money in fitting out a party to thoroughly test the country, and I should strongly recommend such an undertaking. I would also suggest the advisability of parties going up for this purpose providing themselves with some simple apparatus for crushing and washing some of the reef quartz, as in one very rudely conducted experiment of this kind I obtained a small quantity of gold.

I cannot but regret that on this expedition no special assistance was provided for the Geological department of the survey. Consequently I could only undertake prospecting on such occasions as a man could be spared (and often only for a few hours) from the ordinary duties of the camp. Thus many very promising localities had to be entirely passed over, while on the other hand where I obtained good results I was quite unable to follow them up, being obliged to move on with the main party. This was very disappointing, for in many places I found such indications as would warrant a careful search for some days in the neighborhood. Of course, under such circumstances, no very satisfactory result could be hoped for. But had I had even two men to assist me, and render me independent, for a few days at a time, of the camp, I believe I should now be able to report definitely as to the existence of payable gold in Kimberley; whereas I can at present only point out the strong probability of this. I would therefore strongly urge the necessity, in future expeditions of this kind, of the Geologist being placed on a sufficiently independent footing as to enable him to visit, or remain for a time at, such localities as, in his judgment, it is important should be examined.

Other Minerals obtained are:—*Lead Ores*: Galena and Carbonate of Lead. *Zinc*: Blende. *Copper*: Native Copper, Green Carbonate, and Grey Copper. *Iron*: Brown Hematite, Magnetic Iron Ore, Titaniferous Iron Sand. Asbestos.

From the general character of the rocks, I have no doubt that good veins of metalliferous mineral will be discovered.

Amongst gems and precious stones are Opal, Cats-eye, Chalcedony, Moss Agates, Carnelian, Onyx, &c., and Yellow and Pink Topaz, Ruby and Garnet in small grains in the river sands.

Agates and Jaspers of various kinds sometimes form whole hill ranges and may hereafter prove valuable.

Building Stones of all varieties abound, and many of the igneous and metamorphic rocks are highly ornamental.

I have collected a large number of rock and fossil specimens which are now in the Museum at Fremantle for arrangement. I have also obtained many photographs, sketches, and sections for the illustration of my detailed Report.

This, together with a Geological map, I hope to be able to submit to you shortly—that is, so soon as I shall have obtained the necessary topographical data and map from the Surveyors.

To J. S. Brooking, Esq.,
Acting for Surveyor General
and Commissioner of Crown Lands.

I have, &c.,
EDWARD T. HARDMAN,
Government Geologist.

HIS Excellency The Administrator directs the publication of the following Returns of the Revenue and Expenditure of the Colony of Western Australia, for general information.

By Command, MALCOLM FRASER, Colonial Secretary.

NOTICE.

In the matter of the Ordinance 36 Victoria, No. 1.

NOTICE is hereby given that Richard Bowyer Smith, of Perth, in the Colony of Western Australia, machinist, has petitioned His Excellency the Administrator for the grant of Letters Patent for an invention styled "An improved Grubbing and Stump extracting Machine for cheapening and expediting the clearing of scrub, forest, and other lands." And has also sent to the Colonial Secretary a written specification of the said invention, together with drawings and a model of the same, which may be inspected at the office of the Colonial Secretary upon due application. And it is hereby required that any person or persons who may conceive that he or they would be prejudiced by the granting of such Letters Patent shall send, within two months from the date of this notice, to the office of the Colonial Secretary, a statement in writing, setting forth the grounds of such objection, subscribed with his or their proper name or names and addresses.

By Command,
MALCOLM FRASER,
Colonial Secretary.

Colonial Secretary's Office,
Perth, 31st December, 1884.

Appointment.

(Under the Act 35th Vict., No. 3.)

HIS Honor the Chief Justice has been pleased to appoint COBYNDON MATTHEWS, of No. 6 Frankfort Street, Plymouth, in the County of Devon, England, Solicitor, a Commissioner to administer Oaths, and to take and receive Affidavits, Declarations, etc., to be used in the Supreme Court of Western Australia; also to take Acknowledgments of Deeds executed by married women.

JAMES COWAN,
Master Supreme Court.

Supreme Court Office,
Perth, 15th January, 1885.

Appointment.

(Under the Act 35th Vic., No. 3.)

HIS Honor the Chief Justice has been pleased to appoint ALFRED JAMES ROBERTSON, of Stone Buildings, Hobart, Tasmania, Solicitor, a Commissioner to administer Oaths, and to take and receive Affidavits, Declarations, &c., to be used in the Supreme Court of Western Australia; also to take acknowledgments of Deeds executed by Married Women.

JAMES COWAN,
Master Supreme Court.

Supreme Court Office,
Perth, 19th Jan., 1885. }
