**R**ules for Examination for Masters' Certificates under "The Colonial Passengers' Ordinance, 1861" (25 Victoria, No. 9), and Amending Acts.

F. NAPIER BROOME,  
*Governor.*

**W**HEREAS by "The Colonial Passengers' Ordinance, 1861," it is enacted that every Colonial ship or vessel shall be commanded by a competent Master for her intended coasting voyage. AND WHEREAS by "The Colonial Passengers' Amendment Ordinance, 1868," the Governor is empowered from time to time to cause examinations to be held of persons who may be desirous of obtaining Certificates of Competency as Masters, and to lay down rules as to the qualifications of such persons, and generally to do all such acts as he thinks expedient in order to carry into effect such examinations: Now therefore I, Sir Frederick Napier Broome, K.C.M.G., Governor and Commander-in-Chief in and over the territory of Western Australia and its Dependencies, do by virtue of the powers vested in me as aforesaid make and lay down the following Rules.

1.—Candidates must be twenty years of age and bring proof of their having served at least four years at sea, and also produce certificates satisfactory to the examiner, of sobriety, ability, and general good conduct.

2.—A candidate for a Certificate of Competency for small vessels above 15 tons, employed only on the coast trade, must satisfy the examiners that he understands the working of the class of vessels of which he has had or wishes to have charge.

3.—He must understand the rule of the road and be able to describe and show that he understands the Admiralty regulations as to lights.

4.—He must be acquainted with the lights on the coast and be able to take bearings by compass.

5.—He must know the marks on the lead lines and be able to work and heave the log.

6.—He must be able to take a meridian altitude.

7.—A Certificate of Competency issued in respect of the foregoing qualifications only may be granted for vessels of 80 tons register and under, and be available only for voyages between Cape Naturaliste and the North-West Cape or between Albany and Eucla, or between any intermediate ports between Cape Naturaliste and the North-West Cape, or Albany and Eucla.

Gazette Notice of the 23rd June last is hereby cancelled.

Given at Government House, Perth, this 6th July, 1886.

Baobab Wells to Nyulasy lagoon	1½	A permanent lagoon of good brackish water; good grass	Sandstone.
Nyulasy Lagoon to Parry's creek lagoon	9	Permanent fresh water lagoons, wild fowl and fish in abundance; open plains, well grassed	Basaltic.
Parry's lagoon to head of Parry's creek	22	This distance is running up Parry's creek to its head, then over short range to plains, then to Denham river; good water in many places during the distance; good grass	Sandstone.
Head of Parry's creek to lagoons on plains	5	Fresh water lagoons, good grass, large sandy creek one mile off to the left, plenty of water; don't follow creek but follow my tracks through ranges	Sandstone.
Lagoons to Sugar-loaf hill, Denham river	9	This is a remarkable peaked hill, across the river about 1 mile off, river running, good grass	Sandstone.
Sugar loaf hill to river crossing	12	Good crossing for teams, stony ford, good grass ...	Sandstone and basalt in valley.
Crossing to 1st camp on MacPhee's creek	12	This is a large creek (named by me), it runs into the Denham a little way below last camp; plenty of grass	Low basaltic hills and occasionally granite boulders.
MacPhee's creek to and through stony gap	9	Still running up MacPhee's creek; plenty of grass and water; on this stage occurs a gap, short but stony	Here the sandstone and basalt give place to granite, quartz, and conglomerates.
Gap to head of MacPhee's creek	11	Should water be scarce at my former camp a good permanent spring can be found to westward 1½ miles off.	Burnt granite and hungry quartz.
Head of creek to Pompey's pillar	4	Pompey's pillar is a conspicuous huge oblong boulder, stands on end on the top of a high granite hill, can be seen for a long way; no water	Granite and quartz in fragments, occasionally slate.
Pompey's pillar to the 1st branch of Bow river	4	The Bow is a large water-course now running, but later on in season would be in a chain of water holes; good grass. The color of gold has been got here from bed of river	Granite and limestone, chert and trap.
1st to 2nd branch, same river	5	Running when last seen, six weeks ago ... ..	Sandstone and granite.
2nd branch to large water-course	11	This is a third branch of the Bow River, no water between last branch and here; plenty of water here, good grass	Granite.
This branch to and through stony gorge in ranges	12½	The track is wide of river here for 4 miles; plenty of water in places; the travelling through this gorge can be made fairly good with little labor, stony, crossing and recrossing creek to avoid bad places; good grass	Granitic, many quartz lodes cropping out.
Run up creek to 2½ miles to good camp	2½	Travelling wide of the course of creek ... ..	Granitic sandstone, rocks highly micaceous.
Creek to a sandy creek ...	11	The travelling to here is along the windings of the eastern branch of the Bow, is stony in places to a sandy creek which here comes from the west; good grass and water.	Granite, occasionally limestone cropping out.
Sandy creek to next camp on Bow River	7	Good water in several places on this stage and permanent water in springs close to camping place; excellent grass	Granite and limestone.
Last camp to small creek ...	10	After going 4 miles the divide of Bow and Ord River is crossed, one short steep pinch crossing range here; permanent water, good grass	Sandstone, limestone, ironstone, and quartz.
Small creek to a branch of Ord River	7½	This branch is very wide and sandy, was running six weeks ago; do not think water permanent at crossing, good water above and below there; good grass on flats of river	Basalt and limestone.
Ord to Spring creek ...	12	Water between in places, creek running short time since, permanent water 1 mile up creek from my old camp	Basalt resting upon sandstone, broken quartz.
Spring creek to Kangaroo springs	2½	A fine permanent spring here, excellent camping ground	
Kangaroo springs to small creek	6	Should no water be at my old camp, permanent water can be found (from springs) ¼ mile east of north up creek from old camp; this country worthy of being prospected; good grass.	Slate and quartz.
Small creek to head of Panton river	9	Wide sandy water-course, running six weeks ago, is in pools in places during dry season; grass in flats of river only; likely looking country for prospecting	Slate and quartz, rocks highly micaceous.
Panton river to Prospect creek	13	Water in several places on this stage. The whole of this locality may prove auriferous, is well worthy of being prospected. <i>En route</i> my party tried two dishes of stuff from bed of creek, and got good colors of gold; permanent water in Palm creek ¼ mile to westward of Prospect creek; good grass	Basaltic; sometimes limestones, slates, grits, and shales; quartz, showing iron pyrites.

Description of Road to Kimberley Goldfields from Cambridge Gulf—(continued).

Name of Place.	Distance.	Remarks.	Geological formation.
Brought forward ...	Miles. 210½		
From— Prospect creek to Elvire river	11	Passing over some lightly timbered and open plains on the way (Nicholson plains) close to where the river is first come upon, it passes through an impracticable gorge; river must be left here, and take to slate hills close to, then on to Elvire again and cross to Hall's creek; Mount Barrett lay about 15 miles a little to North of West; all parties from Derby bound for Hall's creek must come this way; water in gorge; abundance of grass on the Nicholson plains 2 miles off	Granitic and basalt; red granite.  Grits and shales; many quartz veins and fragmentary quartz.
The Gorge to Hall's creek	3½	This creek is where the first gold was taken from and sold to the W.A. Government by Hall and Slattery; it is the centre of the auriferous country, and parties of prospectors are scattered all around; permanent water close to in Elvire river, grass only in flats of river 2 miles off, spinifex abounding throughout the auriferous country.	Grits, shales, broken quartz.
Total distance ... ..	225		

N.B.—These distances are given as actual travelling; the distance as the crow flies, from point to point, is considerably less.

The route which I have described lays through a succession of grassy valleys, averaging from 1 to 8 miles wide. Through these flow water-courses—the valleys being bounded by a chain of sandstone ranges, which are for the most part impracticable, except at the passes through which the route lay. Patches of stony country are occasionally met with in the valleys and passes. The greater part of the travelling is very good. There is abundance of water the whole of the distance, and good grass can be had in the valleys and flats of water-courses.

JOHN FORREST,  
Commissioner of Crown Lands.

Geraldton Town Council.

£5,000 Loan.

NOTICE is hereby given that the Municipality of Geraldton has determined, in accordance with the provisions of the "Municipal Institutions Act" of 1876, Part VIII., Section 101, to borrow the sum of FIVE THOUSAND POUNDS (£5,000):

"Two thousand pounds (£2,000) for the construction of new Roads, and Two thousand, seven hundred pounds (£2,700) for the erection of a Town Hall within the Municipality, and Three hundred pounds (£300) for the purchase of a Fire Engine."

For this purpose it is proposed to raise the above sum of Five thousand pounds (£5,000) by the sale of Debentures, bearing interest at the rate of not more than Six pounds per centum per annum; such interest to be paid half-yearly at the Municipal Council Office, Geraldton, and the said Debentures to be repayable Twenty years after issue thereof.

A plan showing the proposed works, and all particulars, can be seen at the Municipal Council Office, Geraldton, for one month from this date.

Dated this 25th day of June, one thousand eight hundred and eighty-six.

GEORGE BASTON,  
Mayor.
