(L.S.)

By His Excellency Lieut.-Colonel Sir
GERARD SMITH, Knight Commander
of the Most Distinguished Order of
Saint Michael and Saint George,
Governor and Commander-in-Chief
in and over the Colony of Western
Australia and its Dependencies, &c.,
&c., &c.

WHEREAS by "The Municipal Institutions Act, 1895" (59 Vic., No. 10), the Governor is empowered, by Proclamation, to declare any Town or locality containing rateable property capable of yielding, upon a rate not exceeding One shilling in the pound on the annual value thereof calculated under the provisions of the said Act, a sum of Three hundred pounds, to be a Municipality, and to define the boundaries of such Municipality; AND WHEREAS it is necessary, in order to determine the constitution of the Municipal Council, that the population of the town or locality to be proclaimed a Municipality shall be declared by the Governor; AND WHEREAS it is made to appear to the Governor in Executive Council that the town of Nannine (hereinafter described) contains rateable property capable of yielding the required amount levied as aforesaid, and should be proclaimed a Municipality; Now THEREFORE I, the Governor aforesaid, with the advice of the Executive Council, in pursuance of the powers so vested in me by the said Act, do hereby declare the population of the said town of Nannine to be under One thousand: And I do, with the like advice, by this my Proclamation declare and proclaim the said Town to be a Municipality, under the name, style, and title of "The Council and Burgesses of the Town of Nannine," and do also declare and proclaim the boundaries of the said Municipality to be as follows:—

BOUNDARIES OF NANNINE MUNICIPALITY.

THE following Hydrographic Notices are published for general information.

OCT. BURT,
Under Secretary.

AUSTRALIAN STATION.

"Orlando," at Suva,
21th June, 1896.

Hydrographic Notice No. 20.

The following Hydrographic notice is promulgated for general information and guidance:—

I.—ROCHE DE VAR SHOAL, HAVANNAH PASSAGE, NEW CALEDONIA.

It has been decided to remove this shoal from Admiralty Charts, and the necessary correction is to be made in any charts or Sailing Directions which show its existence.

Charts affected:—9366, 1330, 2306.

Sailing Directions:—Pacific Islands, Vol. I., Part II., page 93.

(M
3116, No. 112 of 16 April, 1896: Office No. ^{5 3 5}
3 1.)

2.—TASMAN PENINSULA, TASMANIA.

(a) There is a shoal patch about 2 cables in extent, with least depth 13 fathoms, (true) at low water, springs, with 17 to 19 fathoms close round, with S.W. extreme of Cape Raoul S. 82½° E., distance 4½ miles, and summit of Wedge Island N. 23½° W., 4½ miles.

Chart affected:—1079.

Sailing Directions:—Australian Directory, Vol. I., page 523.

(b) A rock with 21 feet of water over it at low water, springs, and with 7 to 9 fathoms close round, lies with Mount Communication N. 50° W., 2½ miles, and summit of Betsey Island N. 82° W., 7½ miles.

Charts affected:—960, 1079.

Sailing Directions:—Australian Directory, Vol. I., page 524.

(c) A rock with 21 feet of water over it at low water, springs, and 9 to 10 fathoms close round it, lies with Mount Communication N. 50° E., 1½ miles, and the summit of Wedge Island S. 39° E., 4½ miles.

Charts affected:—809, 960, 1079.

Sailing Directions:—Australian Directory, Vol. I., page 524.

("Dart," Note No. 1, 20 May, 1896: Office No. ^{5 3 5}

3.—CALLIOPE DOCK, AUCKLAND, NEW ZEALAND.

The position of the dock appears to be incorrectly placed on Chart No. 1970. The following angles and bearings have been taken:—

I. From capstan at head of dock.—Point between Sentinel Rock and Acheron Head 39° 44', Chimney on Britomart Point 16° 26', East extreme of General Hospital.

II. From centre of caisson,—the same point 37° Chimney 55° Resolution Point.

III. From Southern Dolphin at end of pier—the same point 34° 54' Chimney 57° 18' Resolution Point.

The two shapes, or beacons, on high ground above the dock, which form the leading marks for entering it, are in line S. 47° 40' E.

("Orlando," Note No. 4, 12 June, 1896: Office No. ^{5 3 5}
6.)

4.—SUVA, FIJI.

The coal hulk shown on Admiralty Chart No. 1757 has been moored N. 25° W., 2 cables, from light on extremity of pier as shown on chart.

Hydrographic Notice No. 21.

The following Hydrographic notice is promulgated for general information and guidance:—

1.—TONGATABU.

Information has been received that the red buoy in the Narrows in Biha Channel, and also the red buoy on Campbell Rock, Egeria Channel, were not in position in June, 1896.

Also, that a new flagstaff from which the Tongan ensign flies, has been put up to replace the old one N. 83½° E. 236 feet from the observation point.

Charts affected:—2363, 1385.

CONDITIONS.

The thickness of the walls at the top for this class of buildings, and for 16 feet below the top, shall equal 13 inches, and the intermediate parts of the wall between the base and such 16 feet below the top to be solid throughout the space between straight lines drawn on each side of the wall from the base to the part 16 feet below the top as above determined; but in walls not exceeding 30 feet in height those of the topmost story may be $8\frac{1}{2}$ inches thick.

The thickness of internal walls of brick, not being party walls, to be two-thirds of the thickness of the external or party walls, but never less than $8\frac{1}{2}$ inches.

Foundations of Walls.

6. *With regard to the foundations of walls.*—Every external wall and every party wall and every party fence wall must be built upon a constructed footing based upon solid ground or upon other sufficient foundation.

- (a.) With regard to footings of walls in reference to the materials thereof, every footing must be built of brick or stone or artificial stone, or of such bricks and stone together laid in with mortar or cement in such manner as to produce solid work.
- (b.) In reference to the width thereof, the bottom of the footing of every external wall and party wall of the first rate must be at the least 8in. wider than the wall standing thereon; and the bottom of every footing of every external wall and party wall of the second rate must be at the least 6in. wider than the wall standing thereon; and the bottom of the footing of every external wall and party wall of the third rate, and of every party fence wall, must be at the least 4in. wider than the wall standing thereon; and the top of the footing of every party fence wall and of every external wall and party wall must be at least 4in. wider than the wall standing thereon.
- (c.) In reference to the height above the foundation, the footing of every external wall and party wall must not be brought up nearer to the surface of the ground area or footway adjoining thereto than 3in. The footing of every external wall and party wall of the first rate must be at the least 11in. high above the foundation. The footing of every external wall and party wall of the second and third rates must be at the least 8in. high above the foundation. The footing of every party fence wall, and of every external wall and party wall of the fourth rate, must be at least 5in. high above the foundation.
- (d.) In reference to the depth thereof below the surface of the lowest floor adjoining or intended to adjoin thereto, the top of the footing of every external wall must be at the least 6in. below such surface, and in any buildings of the first class the surface of the earth or of any paving on the outside, except the pavement of any public way, must not at any time be raised to within 6in. of the surface of the lowest or first floor of such building.

Rubble, &c.

7. The thickness of rubble stone walls to be one-third greater than those for brick and in no case to exceed 25ft. in height nor to be less than 14in. thick and in basement and retaining walls the minimum thickness at ground level is to be 20in., and in all cases to increase 1in. in thickness for every foot below the street level.

Wood, &c., in external walls.

8. *With regard to other substances than the component materials of external walls.*—There may be such wood and iron as shall be necessary, and every plate, lentel, bond, corbel, being of wood, and every wood brick laid into any external wall, and all the ends of joists, of girders, and of the heads of sills and partitions running into any external wall must be fixed at a distance from the external face of the wall of 4in. at the least, except ceiling joists, which may go through the wall provided a sufficient corbel be formed to separate one building from another at the line of the party and external walls: And the frames of doors and windows must be fixed in reveals at a distance from the external face of the wall of 4in. at the least: And shop fronts must be built in such manner as is herein specially directed: And the tiers of door cases to warehouses must be fixed in the opening left in such wall, at a distance from the external face of the wall of 2in. at the least: But no timber must be laid into any external wall in such manner or of such length as to render the part of the wall above it wholly or in great part dependent upon the wood for support, or so that any such wood might not be withdrawn without endangering the safety of the superincumbent structure.

Height and thickness of parapets.

9. *With regard to external walls in reference to the height and thickness of any parapet thereon.*—If an external wall adjoin a gutter, then such external wall must be carried up and remain 1ft. at the least above the highest part of such gutter, and the thickness of an external wall so carried up above the level of the underside of the gutter plate, and forming a parapet, must be at the least in every such wall of the first rate of the second class 13in. thick, and in every other external wall, of whatever rate or whichever class, 8½in. thick.

Materials to be used in re-building.

10. *With regard to old external walls or other external enclosures of any building already built in reference to the materials used in the repair thereof.*—If any such wall or enclosure be not built of the materials required by this Act for external walls or other external enclosures hereafter to be built, then every part of such wall or other external enclosure (except the enclosure of roofs and the flats, gutters, dormers, turrets, lantern lights, and other erections thereon) may be at all times thereafter repaired with materials of the same sort as those of which such external wall or enclosure has been already built.

Materials to be used in repair.

11. But if any such external wall or enclosure be at any time hereafter taken down or otherwise demolished for the height of one story, or for a space equal to one-fourth of the whole surface of such external wall, then every part thereof not built in the manner and of the several materials by these By-laws directed for external walls must be taken down, and the same must be re-built in such manner and of such materials for and in all respects as by these By-laws directed for external walls hereafter to be built, according to the class and rate of the building to which such external wall or enclosure shall belong.

External wall used as party wall.

12. *With regard to external walls used as party walls to any building adjoining thereto (except an attached building or office, as is hereinbefore described).*—If the external wall of any building have not such footings, and be not of such height and thicknesses, or be not built in such manner and of such materials as are herein directed for party walls of buildings of the highest rate to which such wall shall adjoin, then such external wall must not be used as a party wall for any such building, but there must be a distinct external wall built as herein described for external walls of the rate to which it shall belong: But if such external wall to any building already built be at the least 8½in. in thickness in every part, and be of sound and proper materials and in good condition, then such wall may be used as a party wall; but if the house of which such wall forms a part be re-built within five years from the time at which such wall shall have been so first used as a party wall, then such wall must become subject to the provisions of these By-laws in respect of party walls, according to the class and rate to which the said wall did first belong.

Dividing walls.

13. *With regard to walls used to divide single buildings into two or more.*—If it be intended to divide any building into two or more distinct parts, then every wall for that purpose must be built as a party wall in the manner and of the materials and of the several heights and thicknesses for party walls of the highest rate of building to which such party wall shall belong or adjoin, as prescribed in reference to the thickness of party walls in the conditions set forth in the Schedule hereto: And if any building already built, or which shall be hereafter built, be converted, used, or occupied as two or more separate buildings, each having a separate entrance or staircase, such conversion, use, or occupation not having been made or not having taken place prior to this By-law coming into operation, then every such building shall be deemed to be two or more separate houses, and such separate houses must be divided from each other by a party wall or party arch or arches, built in the manner and of the materials required for party walls or for party arches for the class and rate to which the largest of the buildings so divided shall belong.

Party walls, with reference to site thereof.

14. *With regard to party walls, with reference to the site thereof.*—If the buildings be of equal rate, then such party walls must be built on the line of junction of such buildings—one half on the ground of the owner of one of such buildings and one half on the ground of the owner of the other of such buildings. If such buildings be of different rates, then such wall must be built on the line of junction thereof as follows:—That is to say, one-half of the thickness of the wall required for the building of the lower rate on the ground of each of the adjoining owners, and the whole of the additional thickness of the wall required for the building of the higher rate on the ground of the owner of such building of the higher rate: And if such building of the lower rate be thereafter enlarged or altered so as to become a building of the higher rate, then the owner of such first-mentioned building of the higher rate for the time being shall be entitled to receive from the owner of such building of the lower rate such sum of money as shall be sufficient compensation for the ground occupied by that portion of the party wall which, according to the rate of the building enlarged, ought to have been built by its owner on his own ground as well as the value of so much of the wall itself as may be more than the owner of such building of the lower rate had already paid for.

Materials of party walls.

15. *Party walls in reference to the component materials thereof.*—Every part of such party wall must be built of sound bricks or stone or artificial stone, or of such bricks or stone or artificial stone together laid in and with mortar or cement, and in such manner as to produce solid work: And as to the woodwork which it may be desired to connect with the party walls of any building, the bearing ends of wooden beams, brestsummers, girders, trimming joists, and the ends of partitions, heads and sills, and the bearing ends of the main timbers of any roof and wood bricks may be laid into the substance of a party wall; but no such beam, brestsummer, girder, joist, partition, head, or sill, nor any part of a roof being wood, nor any wood bricks, must be laid or placed within 2in. of the centre of any party wall; and no other woodwork of any kind must be laid into, placed upon, or be run or driven into any part of the substance of any party wall: But if the ends of timbers be carried in iron shoes or stone corbels, then such iron shoes or stone corbels must be built into the wall at least one-half the thickness of such wall; and the top of every such party wall must be finished with one course of sound, hard bricks, set on edge in good mortar or cement, or by a coping of any other properly secured and sufficiently water-proof and fire-proof covering.

Height of party walls.

16. *With regard to the party walls, with reference to the height thereof.*—If a party wall adjoin any roof, then such party wall must be carried up and remain 12in. at the least above the part where the party wall and roof adjoin, measured at a right angle with the back of the rafters of such roof: And if any party wall in any building of the first class adjoin a gutter, then such party wall must be carried up and remain 2ft. at the least above the highest part of any such gutter: And if any party wall in any building of the second class adjoin a gutter, then such party wall must be carried up and remain 3ft. at least above the highest part of any such gutter. If there be fixed within 2ft. 6in. of a party wall, upon the flat or roof of a building, any turret, dormer, lantern light, or other erection of combustible materials, then every such party wall must be carried up next to every such turret, dormer, lantern light, or other erection, and must extend 1ft. 6in. higher and 1ft. 6in. wider than any such erection on each side thereof.

Openings in party walls.

17. For the purpose of regulating the making of openings through any party wall between one dwelling-house and another, whereby two or more dwelling-houses shall be united with regard to any dwelling-houses of any rate, such dwelling-houses may be united by openings in the party walls, and with regard to any such dwelling-houses which, when so united, shall be and continue to be in the same occupation, then, upon its being declared by the Surveyor that, in his opinion, the stability and security from fire of any or either of such dwelling-houses will not be endangered by such opening, they may be made accordingly.

Recesses, &c., in party walls.

18. *With regard to recesses and chases in any party wall.*—In every story recesses may be formed, but only with the consent and authority of the Surveyor first had and obtained, and so that such recesses be arched over, and so that the back of any such recess be not nearer than 7 inches to the centre of the party wall in the first or lowest story, or nearer than 4 inches to the centre of the party wall in any other story, and so that the stability and sufficiency of such party wall be not injuriously affected thereby. If any chases be required for the insertion of ends of walls, of piers, of chimney jambs, of withes, of flues, of metal pipes, or of iron story posts, then every chase for any such purpose must not be left or cut nearer than 4 inches at the least to the centre of a party wall, nor within a distance of 9 inches at the least from any front or back wall, and no such chases must be made within a distance of 7ft. 6in. at the least from each other on the same side of a wall, and no such chase must be formed wider than 9 inches.

Party walls in buildings about to be altered.

19. *With regard to any building already built having rooms, the property of different owners, which lie intermixed without being separated by any party wall.*—If any such building be altogether rebuilt, or to the extent of quarter of the cubical contents thereof, then such intermixed properties must be separated from each other by a party wall constructed in conformity to these By-laws.

Projections from Buildings.

20. *With regard to buildings hereafter to be built or rebuilt.*—In reference to projections therefrom as to copings, parapets, cornices to overhanging roofs, blocking courses, piers, columns, pilasters, entablatures, door, and window dressings, or other architectural decorations, forming part of an external wall; all such must be built of the same

materials as are by these By-laws directed to be used for building external walls, to which such projections belong or of such other proper and sufficient materials as the Surveyor may approve and permit, and as to all verandahs, porches, porticoes, shop fronts, open enclosures of open areas, and steps and waterpipes, and to all other projections from external walls, not forming part thereof, every such projection must be built of brick, tile, stone, artificial stone, slate, cement, or metal, or other fireproof material, and such projections must be so built as not to overhang the ground belonging to any other owner nor to obstruct the light or air, or to be otherwise injurious to the owner or occupier of the buildings adjoining thereto on any side thereof, nor shall any such projections extend beyond the building line at any height less than 10ft. from the level of the public footway, nor encroach upon the building line of any public footway, except that the base or plinth thereof may project beyond the building line to an extent of 4in. in streets of 99ft. width, and 2½in. in streets of less width, and no projections, including steps, cellar doors, and area enclosure, are to encroach upon the building line of any public footway, and no verandah must approach nearer to the end of the house to which it belongs than 2 feet, unless built wholly of fireproof material or separated from any adjoining verandah or premises by putting walls at least 8½in. in thickness, and with regard to the projecting eaves of any building built of brick or stone, such eaves may project beyond the face of the external wall, provided such eaves be at least 5ft. from the ground, not in the same occupation, and be at least 10 feet clear from the eaves of any other building built of brick or stone, and 18 feet from the eaves and walls of any wooden building.

Shop fronts, &c.

21. *With regard to shop fronts and their entablatures, their shutters and stall boards made of wood.*—If the street or alley in which such front is situate be of less width than 33ft., then no such shop front must be higher in any part thereof than 15ft.; nor must any part, except the cornice, project from the face of the wall, whether there be an area or not more than 2in.; nor must the cornice project therefrom more than 8in. If the street or alley be of greater width than 33ft., then no part of such shop front, except the cornice, must project from the face of the wall, whether there be an area or not, more than 4in.; nor must the cornice project therefrom more than 12in.: And the woodwork of any shop front must not be fixed nearer than 9in. to the face of an external wall, or nearer than 4½in. to the centre line of a party wall: And with regard to such woodwork, if it be put up at such distance of 4½in., then a pier or corbel, built of stone or brick or incombustible material, to commence at the level of the underside of the plinth or bottom of the wood pilaster, and to be of the width of 8½in. at the least, must be fixed in the line of the party wall so as to be as high as such woodwork, and so as to project 1in. at the least in front of the face thereof: And the height of every shop front must be ascertained by measuring from the level of the public footway or pavement in front of the building: And no showboard or signboard shall be affixed to the front of any building so as to extend over any public footway or nearer than 2ft. to the end of such building, unless such showboard or signboard abut against a brick or stone corbel, pier, or pilaster, 9in. in thickness and projecting 1in. beyond the face of such showboard or signboard and carried up to the full height of the same.

Chimneys.

22. *With regard to chimneys and chimney stacks (except angle chimneys) with reference to the construction.*—The foundation and footings of every such chimney and chimney stack must be built similar to those of the wall in or adjoining to which it shall be, and every such chimney and chimney stack must be built from the foundation to the top thereof without any corbelling over, whereby any upper part of the brickwork of such chimney or chimney stack shall overhang any lower part of the brickwork on the front thereof. Nevertheless, with regard to buildings of the first or dwelling-house class, the jambs, breast, and flue in any single chimney may be built upon stone or iron corbels above the ceiling of the 2nd story of every such building; but the projection of both of such jambs and breasts must not in any case exceed 14in. before the face of the wall or stack to which the same shall adjoin: And with regard to angle chimneys, such chimneys may be built in the internal angle of any building, so that the width of the breast thereof does not exceed 8ft., and so that it be properly supported on iron girders with brick arches, or on strong stone landings not less than 4in. thick, and tailed at least 9in. into each of the two walls forming such angle.

Chimney Jambs.

23. *In regard to chimneys with reference to the dimensions of the jambs thereof.*—The jambs of every chimney shall not be less than 8½in. wide on each side of such opening: And

with regard to chimneys and flues in reference to the thickness of the brickwork thereof, the breast of every chimney and the front, back, width, or partition of every flue must be at the least 4in. in thickness of bricks, and the joints of the work must be filled in with good mortar or cement, and all the inside thereof, and also the outside or face thereof next the interior of any building, must be rendered or pargetted: And with regard to flues in reference to the dimensions thereof, no flue may be used for a smoke flue which is of less internal diameter in any section than 8½in.

Timber in Chimneys.

24. *With regard to chimneys in reference to timber.*—No timber must be placed over any opening for supporting the breast of any chimney; but there must be an arch of brick or stone over the opening of every such chimney to support the breast thereof; and an iron bar must be built into the jambs at the least 9in. on each side, to tie in the abutments whenever the breast projects more than 4½in. from the face of the wall, and the jamb on either side is of less width than two-thirds of the opening: And no timber or woodwork must be placed or laid in any wall under any chimney-opening within 18in. at least of the surface of the hearth to the fire-place of such chimney-opening: And as to the timber or woodwork in reference to the fixing thereof in or against any wall containing flues, or against any chimney breast or chimney jamb, if timber or woodwork be affixed to the front of any jamb or mantel, or to the front or back of any chimney or flue, then it must be fixed by iron nails or holdfasts, or other iron fastenings, which must not be or be driven nearer than 4in. to the inside of any flue or to the opening of any chimney, and such timber or woodwork must not be nearer than 2in. to the opening of any chimney, and no timber must be laid or placed within 3in. of the face or breast, back, side, or jamb of any flue, or of any chimney-opening where the substance of brickwork or stonework shall be less than 8½in. thick; nor must any flooring, batten, ground skirting or other lining or fitting of wood, nor any wood staircase or anything else of wood, be fixed or placed against or near to the face or breast, back, side, or jamb of any flue, fire-place, or chimney-opening unless and until the brick or stone work constituting the same shall have been well and sufficiently rendered or pargetted with proper mortar or stucco, and such rendering must be in every case in addition to 4in. at least of solid fire-proof structure.

Hearthstone.

25. A slab or slabs of brick, tile, stone, slate, marble, or other proper and sufficient substance at the least 18in. longer than the opening of every chimney when finished, and at the least 18in. in front of the arch over the same must be laid before the opening of every chimney: And in every floor, except the lowest floor, such slab or slabs must be laid wholly upon stone or iron bearers or upon brick trimmers; but in the lowest floor they may be laid on a brick fender or bedded on the solid ground: And the hearth of every chimney must be laid and bedded wholly on brick or stone or other incombustible substance, which must be solid for a thickness of 9in. at least beneath the surface of any such hearth.

Backs of Chimneys.

26. *As to the back of any chimney-opening of every building (except backs of chimneys of the lowest story of buildings of the 3rd rate).*—Every such back in the lowest story must be at the least 8½in. thick from the hearth to the height of 12in. above the mantel, and in every other story at the least 8½in. thick up to the same relative height: And as to the backs of chimney-openings in the lowest story of buildings of the fourth rate, such backs must be at the least 8½in. thick to the height of 12in. at the least above the level of the mantel. If two chimneys be built back to back, then the thickness between the same must be at the least of the thickness hereinbefore described for the back of one chimney-opening.

Flues in Chimneys.

27. *As to flues in reference to the angles thereof.*—If any flue be built with sufficient openings in it of not less size than 9in. square, and proper close iron doors and frames inserted in such openings, so that every part of such flue may be swept by machinery, then every angle of such flue may be of any degree; but if it is not so built, then every such angle must be 135 degrees at the least.

Ovens, furnaces, &c.

28. *As to every oven, furnace, cokel, or close fire used for the purpose of trade or manufacture.*—It must be at the least 6in. distant from any party wall, and must not be upon or within a distance of 18in. of any timber or woodwork; and the floor on or above which such oven, furnace, cokel, or close fire shall be built or fixed, must be formed and paved under and for a distance of 2ft. all round the same with stone, brick, tile, or slate at the least 2in. thick, or other proper incombustible and non-conducting materials.

Height of chimneys, &c.

29. Every chimney, shaft, or flue hereafter built, raised or repaired, must be carried up in brick or stonework all round at least 4in. thick, to a height of not less than 3ft. above the highest part of such portion of the roof, flat, or gutter adjoining thereto, measured at the point of junction: And as to any chimney, shaft (except that of a steam engine, brewery, distillery or manufactory), the brick or stonework of such shaft or flue must not be built higher than 8ft. above the slope, flat, or gutter of the roof which it adjoins, measured from the highest point of junction, unless such chimney shaft shall be built of increased thickness, or be built with and bonded to another chimney shaft, or be otherwise rendered secure: And as to the chimney shaft for the boiler furnace of any steam engine, or for any brewery, distillery or manufactory, such shaft may be erected of any height so that it be built in such manner and of such strength and dimensions as shall be satisfactory to the Surveyor upon special application in each case.

And be it enacted that every owner or user of any chimney shaft of any mill, manufactory, or other similar building shall, if the Surveyor deem it necessary, construct the fireplace or furnace to such chimney shaft in such manner as effectually to consume the carbonaceous matters or gases arising from the fuel used therein, or shall affix proper and suitable apparatus to such fireplace or furnace so as to cause the same to consume such carbonaceous matter or gases as aforesaid; and any such owner or user who shall neglect or refuse to construct such fireplace or furnace in the manner hereinbefore prescribed, or who, being thereto required in writing by the Surveyor shall, after the lapse of 10 days, neglect or refuse to affix such proper and suitable apparatus to such fireplace or furnace as aforesaid shall, on conviction thereof before any Justice of the Peace, forfeit and pay a penalty of not less than Five pounds.

And be it enacted that if any such owner or occupier or any fire stoker or other person in charge of such fireplace or furnace shall not well and properly use such fireplace or furnace, or any apparatus put up or affixed to such fireplace or furnace for the purpose of causing such carbonaceous matters or gases to be consumed, or shall use the same or any of them negligently so as to permit or suffer such carbonaceous matters or gases of an opaque colour (ordinarily called smoke) to issue therefrom except for the period of Thirty minutes after the commencement of lighting such fires on any day, every person so offending shall, on conviction thereof before any Justice of the Peace be liable to a penalty not exceeding Twenty pounds.

Chimney Pots.

30. *As to earthen or metal chimney pots, tubes, funnels, or cowls of any description whatsoever.*—If such pot, tube, funnel, or cowl be higher than 4ft. above the brick or stone work of the flue upon which the same shall be placed then it must be fixed 2ft. at the least into the brick or stone work of the flue on which it shall be placed.

Metal, Steam, &c., Pipes.

31. *As to any metal or other pipe or funnel for conveying smoke, heated air, or steam.*—Such pipe or funnel must not be fixed against or in front of the face of any building in any street or alley, nor on the inside of any building nearer than 14in. to any pipe or other combustible material.

Cutting Chimney Shafts, &c.

32. *As to every chimney shaft, jamb, breast, or flue already built, or which shall be hereafter built, in reference to cutting the same.*—No such erection shall be cut into for any other purpose than the repair thereof, or for the formation of soot doors, or for letting in, removing, or altering stove pipes or smoke jacks, except as directed for building an external wall against an old sound party wall, and except for inserting a ventilating valve, such cutting not to be nearer than 6in. to any timber or other combustible substance, and that every part of such valve be made and fixed with incombustible materials.

Roof Coverings, &c.

33. *With regard to roof coverings in reference to the materials thereof.*—If the external parts of any roof, flat, or gutter of any building, or of any projection therefrom, or of any dormer, turret, lantern light, or other erection on the roof or flat of any building be hereafter built or rebuilt, stripped, ripped, or uncovered, then every such part (except the door frames and doors, window frames and sashes of such turrets, dormers, lantern lights, or other erections) must be covered with slates, tiles, or hardwood, shingles, metal, glass, artificial stone, or cement, and such excepted parts shall be made of such wood as shall be necessary.

Roofs to Buildings.

34. *With regard to the roof, flat, and gutter of any building, and of any projection therefrom, and also balconies, verandahs,*

and shop fronts.—They must be so arranged and constructed, and so supplied with gutters and pipes as to prevent the water therefrom dropping on, out, or running over any public way, or to any adjoining premises, and all such rain pipes, eaves, and gutters are to be made of metal.

Drains to Buildings.

35. *With regard to the drains of buildings of any class, and of every addition thereto.*—Before the several walls of any such buildings shall have been built to the height of 10ft. from their foundations, the drains thereof must have been properly built and made good; that is to say, if there be within 100ft. from any front of the building a common sewer into which it is lawful and practicable to drain, then into such common sewer, and if there be not in such situation and within such distance any such common sewer, then to the best outlet that can be obtained so as to render, in either case, drains available for the drainage of the lowest floor of such building or addition thereto, and also of its areas, water closets, privies, and offices, if any, and the inside of the main drains under and from every building for carrying off soil must be in a transverse section at the least equal to a circular area of 9in. in diameter, and every such drain must be laid to at least 1 foot in 40 feet, so as that the whole of every such drain within the walls of such building shall be wholly covered over under the lowest floor independently thereof, and every such drain within the walls of such building must be built and covered over with bricks, stone, or slate, and so as to render the drain air tight, and generally all drains shall be laid and built to the approval of the Surveyor.

Lowermost Rooms.

36. *And with regard to the lowermost rooms of houses, being rooms of which the surface of the floor is more than 3ft. below the surface of the footway of the nearest street or alley, and to cellars or buildings hereafter to be built or rebuilt.*—If any such room or cellar cannot be otherwise lighted, the same may be lighted by means of apertures or areas extending under the footway: Provided such apertures or areas be enclosed by solid masonry to the satisfaction of the Surveyor, and be covered with an horizontal iron grating or Hayward lights level with the surface of such footway: Provided that no such aperture, area, or grating do extend from the line of building under the footway more than 4ft., nor be more 8ft. in width.

Privies.

37. Every privy, whether already built or hereafter to be built, must have a door and be properly enclosed, secured and fenced from public view, and every house or other building hereafter to be erected shall have attached to it a privy of the following construction, to the satisfaction of the Surveyor, the size above floor internally to be not less than 4 feet by 5 feet, and not less than 7 feet in clear height on the lowest side. It must also be sufficiently ventilated, the walls to be constructed of $4\frac{1}{2}$ brickwork cement rendered, and not to be erected closer than 3 feet to the boundary of the grant, nor nearer than 10 feet to any dwelling house. If the roof is of iron, the ceiling must be matchboarded. The pan must be the regulation pattern, and a metal tray at least 2 inches deep, with sufficient flushing apertures, must be fitted behind the riser for its reception.

Attic Rooms.

38. *And with regard to rooms in the roof of any building hereafter built or re-built in reference to the number of floors of rooms in the roof, and to the height of such rooms.*—There must not be more than one floor of such rooms, and such rooms must not be of a less height than 9ft., except the sloping part thereof, if any, of such roof, which sloping part must not begin less than 3ft. 6in. above the floor, or extend more than 3ft. 6in. on the ceiling of such room.

Rooms in regard to height.

39. *With regard to rooms in other parts of the building in reference to the height thereof.*—Every room used or intended to be used for the purposes of habitation must be at the least the height of 9ft. from floor to ceiling, and no single room shall have a cubical area of less than 800ft.

Ventilation of rooms.

40. Every room used for the purposes of habitation or for the assemblage of people for any purpose whatever, shall be well and properly ventilated to the satisfaction of the Surveyor by the insertion of air bricks below the floor and by openings in the sleeper walls, also by ventilators in the ceilings or at the top of the walls thereof, according to the size of such rooms.

Verandahs.

41. Awnings or verandahs to be erected over the footways in the said city are to be in accordance with specifications approved of by the City Surveyor and accordingly adopted by the Council, to be wholly composed of iron, the pillars and frieze to be of the pattern shown on a plan deposited in the office of the City Surveyor, the

minimum height to be 9ft. from the pavement level, the roof to be of 24 Birmingham wire gauge corrugated galvanised iron, to be painted and kept in repair to the satisfaction of the City Surveyor, who shall have power to order such repairs to the verandahs generally as he may deem necessary. In the event of neglect or of the City Surveyor observing the necessity for removal or repair, it must be commenced within seven days from the receipt of notice from the City Surveyor, and must be completed within fourteen days from such notice, or otherwise the verandahs will be removed as nuisances, the cost of such removal to be borne by the owner or occupier and to be recoverable from him in a summary manner before justices.

Brestsummers.

42. *With regard to every brestsummer fixed to carry any front wall of a building.*—The same shall be of iron or steel. If such brestsummer have a bearing at one end upon a party wall, then it must be laid upon a template or corbel of stone or wood or iron, which template or corbel must be tailed through such wall at least two-thirds of the thickness thereof; and the end of such brestsummer must not be fixed into and must not have its bearing solely upon such party wall, but must be supported by a sufficient pier built of brick or stone or by an iron column or iron or timber story posts, fixed on a solid foundation: And if any such brestsummer have its bearing at each end upon a party wall, then it must be supported by at least two sufficient piers built of brick or stone, or by iron columns, or by iron or timber story posts fixed on solid foundations, and standing within and clear of the party walls. Or any such brestsummer may bear on constructed returns in the direction of the length of the brestsummer of 6in. at the least, coursed and bounded with the substance of the party wall or party walls, and such constructed returns must be increased 1in. at the least for every 6ft. in length that the brestsummer may be otherwise supported; and the ends of every such brestsummer must not be fixed at a less distance than $4\frac{1}{2}$ in. from the centre line of the party wall nor less than 9in. from the face of an external wall: And if the height of the underside of any brestsummer, laid from party wall to party wall to carry any external wall, exceed 15ft. from the surface of the public foot pavement in front of the building, then there must be constructed returns in the direction of the length of the brestsummer from the inside of each party wall of $8\frac{1}{2}$ in. at the least, and at the least of the full thickness of such brestsummer: And every such return must be increased 1in. at the least for every foot or part of a foot the brestsummer may be in height from the surface of the public foot pavement more than 16ft., whether the brestsummer be otherwise supported or not.

Builder to keep responsible man in charge.

43. Any builder or other person erecting any building under these By-laws shall at all times during working hours during the progress of such work be himself or keep a responsible man on the scene of such work to take any orders from the City Surveyor relative to such building, and the plans and specifications of such building shall at all times be thereon in the custody of such person for production to the Surveyor, and any infringement of this By-law shall subject the person guilty thereof to a penalty of £5 for every such offence.

Crossing places.

44. Wherever it shall be necessary to make any crossing over a public footpath in any street into any private premises, such crossing place shall be made by the Council, and shall be properly laid and channelled with wood, stone sets, or other suitable material as the Council may deem fitting, and half the cost of such making shall be borne by the owner of such premises, and shall be paid by him within one month from the completion of the work, and in case of any repairs being necessary to such crossing the same shall be made by the Council, and the cost of same shall be borne and paid by such owner.

Notice to remove dangerous buildings.

45. Where any building shall, in the opinion of the City Surveyor, be ruinous or dangerous under the meaning of Clause 16 of "The Building Act, 1884," the City Surveyor shall or may give notice to the owner thereof to remove or renovate the same, such notice to be in form "D" in the Schedule hereto: And every such owner shall forthwith comply with such order under a penalty of £20.

Disputes.

46. If any dispute shall arise between the Surveyor and any person or persons respecting the meaning or operation of any of the conditions of these By-laws, the question at issue shall be referred by the Surveyor to the City Council for their adjudication.

Prohibiting for human habitation.

47. No building or any part thereof not originally built as and for a dwellinghouse within the limits of the muni-

cipality, whether built before or after the adoption of this By-law shall be converted into, or used as a dwellinghouse without the previous consent of the Council, who may grant such consent upon and subject to such conditions as they may see fit, or in their discretion may refuse the same.

Compulsory Fencing.

48. The Council may at any time order any part of any street boundary not already built upon to be fenced or walled as they may see fit. In such cases the fence must be constructed of iron or jarrah, to a plan that must be submitted to, and obtain the approval of the Surveyor. If walled, the construction thereof must be in accordance with the provisions of By-laws 3 and 6, and should the owner or occupier neglect or refuse to comply, the Council may proceed with the work subject to the provisions contained in By-law 64.

Construction of fences and dimensions.

49. All fences under the provisions of the 123rd section of the Municipalities Institution Act must, if not constructed of stone or brick, be wholly of jarrah, and according to the following specifications, viz.:—Posts not less than 6 feet by 3 feet in section nor less than 4 feet out of the ground, and 2½ feet in the ground, nor more than 6 feet out of the ground, not less than one-third of this total length in the ground and placed 8 feet centres, the tops to be properly aligned, three rails to each panel if not less than 4in. by 2in. in cross section, and covered with pickets 3 inches wide and not less than three-quarters of an inch thick, spaced 2 inches apart; the whole to be constructed to the satisfaction of the Surveyor.

Inflammable materials.

50. Hay, straw, bark, thatch, reeds, firewood, empty cases, crates, waste paper, shavings, and any other inflammable material or combustibles must not be stored within the municipality in larger quantities than may be approved of by the Surveyor, and in all cases must be enclosed within brick walls sufficiently high to protect neighbouring buildings, or, if unenclosed, not nearer to any building than 50 feet, nor must any tent, pavilion, shed, or any other structure of calico, canvas, or other inflammable material be erected without the consent of the Council for such time and on such terms as the Council may impose be first obtained.

Signboards.

51. Signboards, signs, awnings, blinds, overhanging lamps, or other things shall not be placed over or near any footway or roadway within the municipality without the written consent of the Council be first obtained therefor.

Compelling filling of cellars.

52. The Council may at any time order the securing, removing or filling up of any cellar, ways or openings, which may now or hereafter be in or under any footway.

Obstructions.

53. The Council may at any time order the removal at the expense of the owner or occupier of any verandahs or balconies which obstruct the footway or roadway or are dangerous, and all other obstructions to the footways or roadways, whether the same have before the commencement of these By-laws been or may hereafter be erected.

Painting of lamps and other posts.

54. The Council may at any time order the painting at the expense of the owner of all lamp posts, telegraph, telephone, and electric lighting poles, and the painting shall be done in such hours and in such manner as shall be prescribed by the Surveyor, and he may order the removal at the expense of the owner, any poles or posts which, in his opinion, are bent, dangerous, unsightly, or not in use.

Dangerous Fences.

55. The Council may, at any time, prohibit the erection of, or order the removal at the expense of the owner, of any fence which the Surveyor may consider to be dangerous, also of fences with barbed wire abutting on public places.

Deposit of Material.

56. No person or persons whomsoever shall erect, place, set up, or build in any street or public place within the Municipality any board or scaffolding, or place or erect any posts or poles, bars, rails, boards, or other things by way of enclosure for the purpose of making mortar, or of depositing, sifting, screening, or stacking any brick, stone, lime, sand, or any other materials for building or repairing any house or other tenement, or erection or for other works, or for any other purpose, without leave or license first had and obtained under the hand of the Surveyor appointed by the Council in the form set out in the Schedule hereto, specifying therein the length of time for which the same, when so erected and set up, may be continued, the conditions to be observed by the licensee,

and giving such other directions respecting the same as the Surveyor may think necessary; and if any person or persons shall place, set up, erect, or build, or cause or permit to be erected, placed, set up, or built, any such board or scaffolding, or any enclosure, post, poles, bars, or rails, or any other matters or things for the purpose aforesaid, or for any other purpose without the leave or license signed as aforesaid of the said Surveyor so had and obtained; or shall erect, set up, or build, or cause or permit the same to be erected, set up, or built, in any other manner, or to be continued for any longer time than shall be allowed or expressed in such license, then, and in either of the said cases, such person or persons, or the person or persons by whom he or they shall or may be employed, shall forfeit the sum of Ten Shillings for every day that the same shall have been or shall be set up and continued, and also, it shall and may be lawful for the said Surveyor to cause the same to be pulled down and removed, and the same and all materials thereof, and of every part thereof, to be kept and detained until such person or persons shall and do pay the said Surveyor, or to the person or persons in whose custody the same shall be, all the penalties incurred by such person or persons, together with the charges of pulling down, removing, and keeping the same, to be ascertained and determined by the said Surveyor. And in case the same shall not be claimed, and the said penalties and charges aforesaid shall not be paid within the space of five days next after the pulling down and removing thereof, then it shall and may be lawful to and for the said Surveyor to order, or cause the same to be appraised and sold, and the money arising therefrom, after deducting the said charges, shall be appropriated to the uses of the said Council.

Painting Iron Erections.

57. All buildings occupied or used as dwellings, workshops, or workrooms, partially or wholly constructed of iron, shall, if the Council see fit, be coated with refrigerating or non-conducting paint within seven days after a notice under the hand of the Mayor has been served upon the owner or occupier.

Regulating use of Balcony.

58. No portion of any verandah or balcony now or hereafter to be erected shall be enclosed, nor shall any alteration in the construction or design of any verandah or balcony be permitted without the consent of the Council be first had and obtained in writing.

Prohibiting use of spikes, &c.

59. Iron spikes or other projections, broken glass or barbed wire shall not be placed or fixed on any premises abutting upon a street.

Notice and plans.

60. The plans required by Section 174 (1) of "The Municipal Institutions Act, 1895," to be sent to the Clerk of the Municipality, must be prepared by a Licensed Surveyor, and shall give full information respecting the boundaries and contain the prescribed declaration.

Power to City Surveyor to enter and remove.

61. And generally where anything shall have been done or omitted to be done in contravention of these By-laws it shall be lawful for the City Surveyor at his discretion to enter on the premises and to remove or cause to be removed any building or other thing which has been erected in contravention thereof, or to do or cause to be done any act or thing which should have been done in pursuance thereof, and the costs of so doing shall be borne and paid by such owner or other person in addition to any penalty to which he may be liable in respect thereof under these By-laws.

Contractor's Sheds.

62. Nothing in these By-laws shall prevent any contractors' or builders' temporary office, sheds, and workshops from being erected of wood or iron on any building site during building operations, provided that special application be made to and permission granted by the Surveyor.

Wooden Buildings.

63. Outside the area defined by the following boundaries, namely, Colin and Dyer Streets on the West; Newcastle, Ellen, Mangle, and Samson Streets and the Suburban Road on the North, and the river on the East and South, such area to include the houses, buildings, and premises abutting upon the opposite sides of the said streets. For a distance of two chains from the said street alignment wooden buildings may be erected, but in such case subject to such restrictions and regulations as may from time to time be imposed by the Council.

Penal clause.

64. In every case where any person or persons, who, under the foregoing By-laws or any of them, are permitted to do or perform any act or forbidden to so do, and any work

to be done or performed remains undone, it shall be lawful for the Council to perform the same and charge the cost and expenses against such person or persons, and the amount thereof may be summarily recovered. And any person or persons guilty of any offence under these By-laws or any of them, shall be liable for any such offence to a penalty not exceeding £20 in addition to all costs and expenses to which he is hereby liable.

Penalties to be paid to Council.

65. All penalties and other sums recovered under the provisions of these By-laws, or any of them, shall, unless otherwise provided, be paid to the Council, and shall become the property of and part of the ordinary income of the Municipality.

Repeal of previous By-laws.

66. It is hereby provided that Nos. 2 and 3, of By-law No. 1, to abate the nuisance occasioned by the smoke of chimneys, as passed by the Council of the City of Perth on the 9th January, 1885, and appearing in the *Government Gazette* of 28th January, 1885, are hereby repealed.

CITY OF PERTH MUNICIPAL COUNCIL.

*Department of Mines,
Perth, 17th June, 1896.*

HIS Excellency the Governor in Executive Council, under the powers conferred upon him by Section 99 of the Goldfields Act (59 Vic., No. 40), has been pleased to make the following new Regulation thereunder as shown below; to come into force from the 15th inst.

E. H. WITTENOOM,
Minister of Mines.

Regulation No. 6A.—With respect to Crown Lands not within a goldfield but known or presumed to be auriferous, the Minister, or his agent duly authorised in that behalf, shall have all the powers of a Warden of a goldfield so far as necessary or applicable.

Bonus for Tin Smelting and Works.

*Department of Mines,
Perth, 7th November, 1895.*

^{25 0 0}
_{0 2} IT is hereby notified, for general information, that a Bonus of One Thousand Pounds, for the erection of Tin Smelting Works on the Greenbushes Tinfields, is offered by the Government; to be competed for under the following conditions:—

1. The whole of the works, including the smelting hereinafter mentioned, are to be begun and completed within the year 1896.
2. Any person desirous of competing for the Bonus must notify to the Government the commencement of the works, giving such information as to locality, plans, and general details as will enable the Government to have the works inspected and reported upon whenever they think it right to do so.
3. Not less than £3,000 shall be expended, to the satisfaction of the Government, upon the buildings, structures, plant, and machinery, and if a lesser sum than £3,000 be expended the Bonus will be reduced in proportion.
4. Before the Bonus will be paid the applicant will be required to prove, to the satisfaction of the Government, that not less than 100 tons of Tin have been properly smelted at the works.
5. Upon the completion of the works, they will be inspected by an officer appointed by the Government for that purpose, and, if approved by the Government, the Bonus will be paid.
6. Application for the Bonus must be made before the 31st day of January, 1897, and

will be considered by the Government, in Executive Council, whose decision shall be final.

E. H. WITTENOOM,
Minister of Mines.

NOTICE.

Applications on Collie River Coal Mining District.

*Department of Mines,
Perth, 12th March, 1896.*

APPLICATIONS for Leases for Coal Mining on the Collie River Coal Mining District will be received on and after the 23rd inst., at the Head Office of the Department of Mines, Perth. Each application must be accompanied by deposit for rent and survey, as prescribed by Section 23 of "The Mineral Lands Act of 1892," copy of which is annexed.

Applications forwarded by post must be addressed to the Under Secretary for Mines.

HENRY C. PRINSEP,
Under Secretary for Mines.

Rent by way of Royalty.

23. Every application for a lease shall be made to the Registrar in the prescribed form, and shall be accompanied by the proper survey fee and the required rent. The yearly rent of land leased for the purpose of mining for coal shall be at the rate of sixpence per acre, and there shall also be reserved in the lease a royalty at the rate of threepence for every ton of coal raised from the land during the first ten years of the term of the lease, and at the rate of sixpence for every ton raised during the remainder of the term.

The times and mode of ascertaining the amount of any royalty so payable, and the time for payment thereof, shall be prescribed by the lease.

If land leased for the purpose of mining for coal is used for the purpose of mining for any other mineral, rent shall become payable in respect thereof at the rate of Five shillings per acre in addition to the royalty, if any, payable in respect of coal raised therefrom.

Notice.

Mines Regulation Act, 1895.

THE attention of Mine Managers and the Public is called to the fact that it is required that a printed copy of the General Rules shall be posted at the Office, or in some conspicuous place in connection with every Mine.

This is to notify that copies of the said General Rules, printed in large type on calico, may be obtained at all Warden's or Registrar's Offices on the Goldfields after the 1st of January, 1896, on payment of One shilling each.

HENRY C. PRINSEP,
Under Secretary for Mines.

Notice of Request to amend Specification.

Patent Office, Perth,

24th July, 1896.

A REQUEST to be allowed to amend the under-mentioned specification of Letters Patent has been received, and is open to public inspection at this Office. Any person may, at any time within one month from the date of this "Notice," give me notice in writing, in duplicate, of opposition to the amendment, stating in such notice the particular grounds of objection:—

Application No. 1099, P. $\frac{96}{144}$.—JOSEPH GEORGE NASH, of Hindmarsh Square, Adelaide, in the Province of South Australia, Engineer, "*Improvements in and relating to Apparatus for purifying Water or other liquids.*"

The nature of the proposed amendments is as follows, viz.:—[Reference being had to amended copy of specification lodged in Patent Office, Perth.]

Page 3, line 19.

To insert after words "cut-off or" "threeway."

Page 4, line 6.

To strike out "check valve E³," and insert "threeway cock E²."

Page 4, line 10.

To strike out "to," also the whole of lines 11 and 12, and insert: "*in the loop or pipe of the injector above the threeway cock E², this is opened and the liquid then automatically passed by the check-valve into the boiler for further use. The air which has accumulated in the loop through the starting and stopping of the apparatus is then blown out through the cock E² (when at an angle of 90°), and this cock then returned to permit of the passage of the steam as before.*"

The applicant states as the reason for the request:—"My reason for making these amendments is to make the invention and the manner in which it is worked the better understood."

MALCOLM A. C. FRASER,

Registrar of Patents.
