

Preliminary Abstract of the Western Australian Agricultural and Live Stock Returns for the Season 1897-98.

Compiled in the Registrar General's Office, Perth, under the provisions of "The Industrial Statistics Act, 1897" (61 Vict., No. 26).

Areas under various kinds of Crops in Western Australia during each of the Ten Seasons 1888-89 to 1897-98.

Season.	Wheat.	Barley.	Oats.	Maize.	Rye.	Peas.	Beans.	Potatoes.	Onions.	Other Root Crops.	Hay of all kinds.	Green Forage.	Vines.	Orchards and Gardens.	Market Gardens.	Kitchen Gardens.	Total Area under Crop.

* Included under heading "Orchards and Gardens."

** The apparent falling off in 1896-97, as regards the heading "Orchards and Gardens," is explained by the fact that the acreages now separately specified under "Onions," "Other Crops," Root "Market Gardens" etc., were in previous years all included under the one heading.

† The acreages under "Vines" and "Fruit Trees" in 1896-97 and 1897-98 have been compiled on the basis of the actual number of vines and fruit trees planted, according to a standard supplied by the Department of Agriculture, which allows 600 vines and 100 fruit trees to the acre; a comparison between the figures of these years and those of previous years is, therefore, valueless.

‡ "The Total Area under Crop" in 1896-97 was 111,738½ acres, and if there be added to this 4,043½ acres under permanent artificially sown grasses, 24,945½ acres cleared and prepared for immediate use, and 22,561½ acres of land in fallow, the area of arable land at the end of the season will show a total of 163,288½ acres.

§ "The Total Area under Crop" in 1897 was 133,182¾ acres, and if there be added to this 3,316½ acres under permanent artificially sown grasses, 35,424½ acres cleared and prepared for immediate use, 39,898 acres of land in fallow, and 58,703½ acres of cleared land, previously cropped, now used for grazing or not used, the area of arable land at the end of the season will show a total of 270,525½ acres; an increase on the previous year's figures of 107,236½ acres, or 65·67 per cent.

|| Includes 27½ acres miscellaneous crops.

Areas under various kinds of Crops in each District of Western Australia for the Season 1897-98.

* The acreages under "Vines" and "Fruit Trees" have been compiled on the basis of the actual number of vines and fruit trees planted, according to a standard supplied by the Department of Agriculture, which allows 600 vines and 100 fruit trees to the acre.

Actual Yield of the Principal Crops grown in the various Districts of Western Australia during the Season ended 28th February, 1898.
