2. A duplicate regulating switch of the kind described, for varying the active length of the two dependent circuits, both parts of the switch being actuated by the same handle, substantially as described.

3. In an electric switch a device for preventing the reversal of the movement of the actuating lever until said lever has completed its stroke, substantially as described with reference to Figure 3 of the accompanying drawings.

4. In an electric switch having a contact arm carried by a ratchet wheel, the arrangement for varying the direction of movement of said ratchet wheel by rotating the operating lever thereof on its longitudinal axis, substantially as described with reference to Figures 3, 4, 8, 9, and 10 of the accompanying drawings.

5. Regulating switches for one or for two circuits, constructed and operating, substantially as described with reference to Figures 1 to 11, or to Figure 12 of the accompanying drawings.

Claims:—

1. Crushing apparatus of the kind referred to, in which the crushing head is carried by a hollow shaft that rests upon and is supported at or near its upper end by an upright pillar, and has the necessary gyratory motion imparted to it by suitable means, substantially as described.

2. Crushing apparatus of the kind specified in Claim 1, in which a wheel having an eccentric boss is so mounted as to be capable of rotation about the upright pillar, and that its eccentric boss will extend upwards within the hollow shaft, the arrangement being such that owing to the eccentricity of its boss, rotation of the wheel will cause the lower end of the hollow shaft to travel in a circular path, and thus impart the necessary gyratory motion to the hollow shaft and its crushing head, substantially as described.

3. Crushing apparatus of the kind specified in the preceding claim, provided with means for vertically adjusting the crushing head for preventing the access of dust to the bearings and for affecting the lubrication thereof, constructed, arranged, and operating, substantially as described with reference to and shown in the drawings annexed.
