Every owner within the boundaries of the State known as the "South-West Division" shall, between the 1st day of October and the 31st day of December in every year, dip, or cause to be dipped, all sheep running on land whereof he is the occupier: Provided that, on the application of any owner, an Inspector may grant an extension of the time in which such owner shall dip his sheep, but so that such extension shall not exceed sixty days prior to the month of June: Provided also that the sheep shall be dipped in some specific known to be fatal to ticks and lice, and for every sheep not so dipped such owner shall be liable to a fine not exceeding two shillings.

2. If any Inspector is satisfied that any sheep in a flock are affected with ticks or lice, he may give the owner notice to dip such flock forthwith to the satisfaction of the said Inspector, or any other Inspector; but if the Inspector is satisfied that such sheep are intended and fit for slaughter, he may postpone the giving of such notice to dip for a period not exceeding fourteen days: Provided that every owner who refuses, neglects, or fails to comply with such notice on or before the date specified therein is liable, on conviction, to a penalty not exceeding fifty pounds; and if immediately after the date of such conviction such sheep shall not be dipped to the satisfaction of any Inspector, such owner shall, upon conviction, be liable to a further penalty not exceeding fifty pounds, and so on for each and every succeeding conviction.

3. HIS Excellency the Governor in Council has been pleased to approve of the following By-laws made by the North Perth Local Board of Health.

F. D. NORTH,
 Under Secretary.

THE HEALTH ACT, 1898.

BY-LAWS OF THE LOCAL BOARD OF HEALTH OF THE DISTRICT OF NORTH PERTH.

THE Municipal Council of North Perth, being the Local Board of Health for the District of North Perth, in pursuance of the powers vested in it, and by virtue of "The Health Act, 1898," and of every other authority enabling it in that behalf, hereby repeals By-laws Nos. nine (9) to twenty-one (21), gazetted on the 12th day of December, 1902, and hereby, in pursuance of such powers and authorities aforesaid, makes and publishes the following By-laws in lieu thereof:—

PART 1.—INTERPRETATION.

1. The interpretation of words used in these By-laws, unless the context otherwise requires, shall be in accordance with Section 3 of "The Health Act, 1898."

The following words in these By-laws shall be interpreted as follows, viz:—

- (a.) "Cowshed" means any building or premises in which milking cows or goats may be kept;
- (b.) "Cowkeeper" means any person carrying on the trade of a cowkeeper, dairyman, or purveyor of milk.

53.—FOR THE INSPECTION OF ALL DAIRY FARMS AND MILK STORES.

1. Every cowkeeper or occupier of a dairy farm or milk store, which the Officer of Health or Inspector may visit for the purpose of inspection, and every person for the time being having the care or control of any such dairy farm or milk store, shall afford such Officer of Health or Inspector all reasonable assistance that may, for the purpose of inspection, be required of him.

54.—FOR THE INSPECTION OF GRAZING GROUNDS OF DAIRY CATTLE, AND FOR PROHIBITING THE USE OF THE SAME IF LIKELY TO BE PREJUDICIAL TO HEALTH BY AFFECTING THE MILK OR OTHERWISE.

1. Every cowkeeper or occupier of a dairy, and every person in charge of any dairy, which may be visited by an Officer of Health or Inspector for the purpose of ascertaining the position of and inspecting the grazing ground upon which the dairy cattle may be depastured, shall afford such Officer of Health or Inspector all reasonable assistance that may be required of him for such inspection.

2. Every cowkeeper shall, upon being directed so to do by any Medical Officer of Health, forthwith remove his milking cows from any portion of the grazing land upon which they may be depasturing, if such grazing ground has been found or suspected or is likely to be prejudicial to health by affecting the milk of the cows.

- (a.) He shall not, until permission in writing is given him by such Medical Officer of Health, permit or suffer any of his dairy cattle to graze or be depastured upon such prohibited land.

55.—FOR THE INSPECTION OF CATTLE IN DAIRIES, AND FOR PRESCRIBING AND REGULATING THE LIGHTING, VENTILATION, CLEANSING, DRAINAGE, AND WATER SUPPLIES OF HOUSES, DAIRIES, AND COWSHEDS IN THE OCCUPATION OF PERSONS FOLLOWING THE TRADE OF COW-KEEPERS OR DAIRYMEN.

1. Every cowkeeper or occupier of a dairy, or any person in charge of any dairy, which any Officer of Health or Inspector may visit for the purpose of inspecting any cattle therein, shall afford such Officer of Health or Inspector all reasonable assistance that may, for the purpose of inspection, be required of him.

Lighting and Ventilation.

2. In enclosed sheds, windows or openings placed in the walls or roofs at equal distances shall be provided, and the area of such windows or openings shall be at the rate of not less than one square foot to seven feet of the floor area of such shed, and no obstruction to natural light shall be permitted or suffered to be placed opposite or near to any of such openings or windows.

- (a.) Every enclosed cowshed shall be provided with lantern louvred ventilators in roof or louvred ventilators in the sides thereof.

- (b.) No cowkeeper shall permit any cowshed to be occupied by any cow unless a cubic air space of not less than 800 cubic feet is provided therein for each cow: Provided as follows:—In calculating the air space for the purpose of this By-law, no space shall be reckoned which is more than 16 feet above the floor, but if the roof or ceiling is inclined, then the mean height of the same above the floor may be taken as the height thereof for the purpose of this By-law.

Cleansing.

3. Every cowkeeper shall cause every part of the interior of every cowshed in his occupation to be thoroughly cleansed from time to time, as often as may be necessary, to secure that such cowshed shall be at all times reasonably clean and sweet.

- (a.) Such person shall cause the ceiling or interior of the roof and the walls of every cowshed in his occupation to be properly lime-washed at least four times in every year, that is to say—once during each of the months of April, July, October, and January, and at such other times as may be necessary: Provided that this requirement shall not apply to any part of such ceiling, roof, or walls that may be properly painted or varnished, or constructed of or covered with any material such as to render the lime-washing unsuitable or inexpedient, and that may be otherwise properly cleansed.

- (c.) He shall cause every stockyard to be kept in a cleanly condition, and shall from time to time, as often as may be necessary, collect and remove all dung or other offensive matters from such stockyard.

Drainage.

4. For the purpose of efficient drainage, the floors of all cowsheds shall be absolutely watertight, and shall have an even surface and solid foundation. Such floors may either be constructed of hard burnt bricks on edge, of equal quality, laid in cement mortar and grounded in cement or Portland cement concrete, having a thickness of at least 6in., or some similar material, and the floor shall have a fall to the gutter of not less than 1 in 36.

A surface gutter shall be constructed of some durable impervious material, and shall extend the whole length of the building, and shall not be less than 12in. in width, and shall be thoroughly watertight, of sufficient and uniform fall, shallow at its upper extremity and gradually deepening to the outlet, so that no fluid may lodge or stagnate therein. It shall not be less than 3in. deep at its upper extremity, nor more than 9in. deep at its outlet. Such surface gutter shall empty into a watertight receptacle capable of being easily emptied and readily and thoroughly cleansed.

- (a.) No cowkeeper shall cause or suffer any inlet to any drain of such cowshed to be within such cowshed.
- (b.) Every cowkeeper shall cause every stockyard used by him to be well drained.

5. Every cowkeeper shall keep in or in connection with every cowshed in his occupation a supply of water suitable and sufficient for all such purposes as may from time to time be reasonably necessary.

- (a.) He shall cause every receptacle which may be provided for such water to be emptied and thoroughly cleansed from time to time, as often as may be necessary to prevent the pollution of any water that may be stored therein, and where such receptacle is used for the storage only of water, he shall cause it to be properly covered and ventilated, and so placed as to be at all times readily accessible.
- (b.) If the water used for such purposes is obtained from a well, spring, stream, or other source of supply, he shall adopt every precaution to prevent any such source of supply being polluted.
- (c.) He shall, when directed to do so by the Local Board of Health, forthwith discontinue using the water for any purpose from any such source of supply, and shall forthwith obtain another supply of water from a source to be approved by such Inspector.

- (d.) He shall, for the purpose of testing the purity or otherwise of the water used by him, assist and permit an Inspector, when so required, to obtain the necessary samples of such water for analysis.

56.—FOR PRESCRIBING THE PRECAUTIONS TO BE TAKEN FOR PROTECTING MILK AGAINST INFECTION OR CONTAMINATION.

1. Every cowkeeper shall cause the two or three jets of milk first drawn at every milking from each teat of any cow milked on his premises to be rejected, and shall not permit or suffer such milk to fall into the milking pail or be mixed into the milk intended for sale.

- (a.) Such cowkeeper shall not cause or suffer any cow belonging to him or under his care or control to be milked for the purpose of obtaining milk for sale, unless at the time of milking the udder and teats of such cow are thoroughly clean, and unless the hands of the person milking such cow are thoroughly clean and free from all infection and contamination.
- (b.) He shall not suffer or permit any milk from a diseased cow to be mixed with other milk, or sold for human consumption.
- (c.) He shall not permit or suffer any milk from a diseased cow to be used as food for pigs or other animals, unless it has been well boiled.
- (d.) - (e.) He shall cause the milk drawn from any cow on his premises (except as hereinbefore mentioned) to be forthwith taken to the milk room and there run through a suitable strainer and cooler.

2. Every cowkeeper, purveyor of milk, and person selling milk by retail, shall take all reasonable and proper precautions in and in connection with the storage and distribution of the milk, and otherwise to prevent the exposure of the milk to any infection or contamination.

- (a.) He shall not deposit or keep any milk intended for sale, or any of the milk vessels used in his trade—
1. In any room or place where it or they would be liable to become infected or contaminated by impure air, or by any offensive, noxious, or deleterious gas or substance, or by any noxious or injurious emanation, exhalation, or effluvia; or
 2. In any room used as a kitchen, or as a living room; or
 3. In any room or building or part of a building communicating directly by door, window, or otherwise with any room used as a sleeping room, or in which there may be any person suffering from any infectious or contagious disease, or which may have been used by any person suffering from any such disease, and may not have been properly disinfected; or
 4. In any room or building or part of a building in which there may be any direct inlet to any drain.
- (b.) He shall not keep milk for sale, or cause or suffer any milk to be placed in any vessel, receptacle, or utensil which is not thoroughly clean.
- (c.) He shall cause every vessel, receptacle, or utensil used by him for containing milk for sale to be thoroughly cleansed with steam or clean boiling water after it shall have been used, and to be maintained in a constant state of cleanliness.
- (d.) He shall cause every wheeled vehicle used by him for the carriage or distribution of the milk to be thoroughly cleansed at least once in every day.

(e.) He shall cause the internal wall surface to be covered with hard, smooth, and impervious material to a height of at least six feet from the floor, and such hard, smooth, and impervious material shall not be covered with cement-wash, lime-wash, or other substance.

(f.) He shall provide suitable apparatus for heating water in close proximity to such room.

(g.) He shall not permit or suffer any such apparatus for heating water to be used for washing or boiling bed or body linen, or for any other purpose which might cause contamination or infection of milk.

(i.) He shall at all times maintain such room in good order and repair, dust and fly proof, and scrupulously clean in every part, externally as well as internally, and in all its fittings.

(j.) He shall not suffer or permit any dog, fowl, or other animal to have access to such room.

THE MINING DEVELOPMENT ACT, 1902.

REGULATIONS UNDER WHICH STONE WILL BE CRUSHED AND TAILINGS TREATED AT THE STATE BATTERIES AFTER 1ST JULY, 1903.

Department of Mines,
Perth, 13th August, 1903.

HIS Excellency the Governor in Executive Council, under the powers conferred upon him by Section 29 of "The Mining Development Act, 1902," has been pleased to make the following Regulations under which Stone will be crushed and Tailings treated at the State Batteries after 1st July, 1903.

H. GREGORY,
Minister for Mines.

1. All stone accepted for treatment at the State batteries shall be estimated at 21 cubic feet per ton, except where weighing machines are provided, when stone must pass over same to ascertain weight.

2. The manager of the battery may refuse any stone considered too poor to pay crushing charges, unless a deposit is paid in advance.

3. The charge for crushing, as determined from time to time by the Hon. the Minister for Mines, shall be posted up at each battery and strictly adhered to while in force.

4. A minimum charge will be made for all parcels of less tonnage than will return £5 on the rate charged per ton.

5. Payment for crushing shall be made to the manager on completion of treatment, or sufficient gold will be retained to pay for the amount due.

6. Where no cyanide plant has been erected at a battery, any person desirous of claiming tailings, the proceeds of his crushing, shall remove them from the battery site immediately the crushing is completed, otherwise they will be treated as abandoned tailings.

7. Where a cyanide plant has been erected at a battery, tailings resulting from stone crushed at that battery will be treated, but the manager may, in his discretion, refuse to treat any tailings should he consider them unsuitable for treatment by cyanide.

8. The number of tons of tailings suitable for cyanide treatment by the ordinary leaching vat plant installed at the battery shall be determined by the manager, whose decision shall be final; provided that in no case shall such tonnage exceed eighty per cent. of the number of tons milled. Where a slimes plant is working in conjunction with the ordinary vat system, the combined tonnage of sand and slimes shall not exceed 90 per cent. of the tons milled.

9. The manager shall take samples of the tailings as they pass through the battery, or from the pit into which the tailings may be deposited. The tailings collected shall be thoroughly mixed and divided into three samples, one for assay by the manager, one for the owner, and one sealed and kept by the manager for reference. The assay of the manager's sample will be available on application within fourteen days from the completion of any crushing, and should the owner dispute such assay, he shall within six weeks of the completion of the crushing notify the manager to that effect, in writing, and shall at the same time forward a certificate from a competent assayer. On receipt of such certificate the results of the two assays will be averaged, provided that the difference between them does not exceed six grains; but should the difference in the assay exceed six grains, and should the owner still refuse to accept the manager's assay, the manager shall forward the sealed sample previously referred to, to the Government assayer, Perth, and the result of the assay as furnished by him shall be considered as final. The cost of such assay (fifteen shillings) shall be borne by the party whose assay differs most widely from the referee assay.

10. A clean-up will be made about every two months, when the Department will make a *pro rata* distribution, based upon the original assay value of the tailings, the estimated extraction therefrom, and the actual extraction. After the deduction of ten shillings per ton for cost of treatment, the owners of tailings treated will receive the amount due to them within 14 days after the value of the bullion has been ascertained.

11. All tailings assaying less than 3dwts. 3grs. per ton shall become the property of the Government.

12. A charge of ten shillings per ton for treatment shall be the first charge on all tailings treated, and the gold contents of tailings will be paid for at the rate of Four pounds per ounce.

13. All tailings collected for treatment by the owner will be treated at the rate of 27 cubic feet per ton.

14. The Department reserves the right to suspend operations from any cause whatsoever, and will accept no responsibility for delays in treatment.

15. At every battery there will be kept a book in which shall be recorded the number of tons in each parcel lodged for treatment, the name, locality and number of the lease or holding from which it was obtained, and the name of the person for whom the stone is to be crushed.

A copy of the foregoing rules shall be inserted in the said book, and every person sending stone for treatment shall sign opposite the entry relating to the stone lodged by him, and such signature shall be sufficient evidence that he is cognisant of the foregoing rules, and agrees to be bound by them.
