1. Every owner within the boundaries of the State known as the "South-West Division" shall, between the 1st day of October and the 31st day of December in every year, dip, or cause to be dipped, all sheep running on land whereof he is the occupier: Provided that, on the application of any owner, an Inspector may grant an extension of the time in which such owner shall dip his sheep, but so that such extension shall not exceed sixty days prior to the month of June: Provided also that the sheep shall be dipped in some specific known to be fatal to ticks and lice, and for every sheep not so dipped such owner shall be liable to a fine not exceeding two shillings.

2. If any Inspector is satisfied that any sheep in a flock are affected with ticks or lice, he may give the owner notice to dip such flock forthwith to the satisfaction of the said Inspector, or any other Inspector; but if the Inspector is satisfied that such sheep are intended and fit for slaughter, he may postpone the giving of such notice to dip for a period not exceeding fourteen days: Provided that every owner who refuses, neglects, or fails to comply with such notice on or before the date specified therein is liable, on conviction, to a penalty not exceeding fifty pounds; and if immediately after the date of such conviction such sheep shall not be dipped to the satisfaction of any Inspector, such owner shall, upon conviction, be liable to a further penalty not exceeding fifty pounds, and so on for each and every succeeding conviction.

But if the Inspector is satisfied that such sheep are intended for immediate slaughter, he may withhold such notice to dip.

Exemptions.

3. Nothing in these By-laws shall apply to any ship having on board, exclusively, explosives of the following kind or kinds, or to the loading or unloading into, or out of, or conveyance to or from any such ship of the same (that is to say):—

THE MINING DEVELOPMENT ACT, 1902.

REGULATIONS UNDER WHICH STONE WILL BE CRUSHED AND TAILINGS TREATED AT THE STATE BATTERIES AFTER 1ST JULY, 1903.

Department of Mines,
Perth, 13th August, 1903.

¹¹³³₁₉₀₃
HIS Excellency the Governor in Executive Council, under the powers conferred upon him by Section 29 of "The Mining Development Act, 1902," has been pleased to make the following Regulations under which Stone will be crushed and Tailings treated at the State Batteries after 1st July, 1903.

H. GREGORY,
Minister for Mines.

1. All stone accepted for treatment at the State batteries shall be estimated at 21 cubic feet per ton, except where weighing machines are provided, when stone must pass over same to ascertain weight.

2. The manager of the battery may refuse any stone considered too poor to pay crushing charges, unless a deposit is paid in advance.

3. The charge for crushing, as determined from time to time by the Hon. the Minister for Mines, shall be posted up at each battery and strictly adhered to while in force.

4. A minimum charge will be made for all parcels of less tonnage than will return £5 on the rate charged per ton.

5. Payment for crushing shall be made to the manager on completion of treatment, or sufficient gold will be retained to pay for the amount due.

6. Where no cyanide plant has been erected at a battery, any person desirous of claiming tailings, the proceeds of his crushing, shall remove them from the battery site immediately the crushing is completed, otherwise they will be treated as abandoned tailings.

7. Where a cyanide plant has been erected at a battery, tailings resulting from stone crushed at that battery will be treated, but the manager may, in his discretion, refuse to treat any tailings should he consider them unsuitable for treatment by cyanide.

8. The number of tons of tailings suitable for cyanide treatment by the ordinary leaching vat plant installed at the battery shall be determined by the manager, whose decision shall be final; provided that in no case shall such tonnage exceed eighty per cent. of the number of tons milled. Where a slimes plant is working in conjunction with the ordinary vat system, the combined tonnage of sand and slimes shall not exceed 90 per cent. of the tons milled.

9. The manager shall take samples of the tailings as they pass through the battery, or from the pit into which the tailings may be deposited. The tailings collected shall be thoroughly mixed and divided into three samples, one for assay by the manager, one for the owner, and one sealed and kept by the manager for reference. The assay of the manager's sample will be available on application within fourteen days from the completion of any crushing, and should the owner dispute such assay, he shall within six weeks of the completion of the crushing notify the manager to that effect, in writing, and shall at the same time forward a certificate from a competent assayer. On receipt of such certificate the results of the two assays will be averaged, provided that the difference between them does not exceed six grains; but should the difference in the assay exceed six grains, and should the owner still refuse to accept the manager's assay, the manager shall forward the sealed sample previously referred to, to the Government assayer, Perth, and the result of the assay as furnished by him shall be considered as final. The cost of such assay (fifteen shillings) shall be borne by the party whose assay differs most widely from the referee assay.

10. A clean-up will be made about every two months, when the Department will make a *pro rata* distribution, based upon the original assay value of the tailings, the estimated extraction therefrom, and the actual extraction. After the deduction of ten shillings per ton for cost of treatment, the owners of tailings treated will receive the amount due to them within 14 days after the value of the bullion has been ascertained.

11. All tailings assaying less than 3dwts. 3grs. per ton shall become the property of the Government.

12. A charge of ten shillings per ton for treatment shall be the first charge on all tailings treated, and the gold contents of tailings will be paid for at the rate of Four pounds per ounce.

13. All tailings collected for treatment by the owner will be treated at the rate of 27 cubic feet per ton.

14. The Department reserves the right to suspend operations from any cause whatsoever, and will accept no responsibility for delays in treatment.

15. At every battery there will be kept a book in which shall be recorded the number of tons in each parcel lodged for treatment, the name, locality and number of the lease or holding from which it was obtained, and the name of the person for whom the stone is to be crushed.

A copy of the foregoing rules shall be inserted in the said book, and every person sending stone for treatment shall sign opposite the entry relating to the stone lodged by him, and such signature shall be sufficient evidence that he is cognisant of the foregoing rules, and agrees to be bound by them.

- (c.) The exact locality where the sample was found must be disclosed.

- (e.) Free assays will not be made of samples showing free gold, or of tailings or other metallurgical products, or of umpire samples.
- (f.) Samples to be assayed for gold should weigh about 1 or 2lbs. Other samples should be as large as circumstances will permit, up to 2lbs.
- (g.) Each sample must be properly marked, and securely fastened in a separate bag, along with the name and address of the sender.
