THE MINING DEVELOPMENT ACT, 1902.

REGULATIONS FOR THE PURCHASE OF AURIFEROUS COPPER ORES AT THE STATE SMELTING WORKS, PHILLIPS RIVER.

S. 47
1905Department of Mines,
Perth, 4th January, 1906.

HIS Excellency the Governor in Executive Council, under the powers conferred upon him by Section 29 of "The Mining Development Act, 1902," has been pleased to make the following Regulations for the Purchase of Auriferous Copper Ores at the State Smelting Works, Phillips River, to come into effect on the 12th January, 1906.

H. GREGORY,
Minister for Mines.

1. All ores shall be delivered free of charge at the works, on such place as may from time to time be directed by the Manager.

2. The Manager shall be the sole judge as to whether any parcel of ore shall be accepted for purchase or not, and may order the removal of any ore which he thinks unsuitable, whereupon the owner of the ore shall remove it forthwith from the works.

3. As soon as possible after receipt of a parcel of ore it shall be weighed at the works, and the weight so determined shall be taken to be the true gross weight thereof. The percentage of moisture present will be determined by assay, and deducted from the gross weight. A further deduction of one per cent. (1%) will be made for draughtage. The net weight, after these deductions have been made, shall be the weight upon which the ore is purchased.

4. The Vendor or his representative may be present during the weighing and sampling of parcels of ore, but shall take no part in the handling of the same, nor interfere in any way with the weighing and sampling.

5. After sampling any parcel or portion of a parcel of ore, the Manager may use it in any way he thinks fit, by smelting or mixing with other ores, and the purchase of such ore, if so used, shall thereupon be deemed to be completed at the price subsequently determined after agreement of assays.

6. After weighing, the ore shall be sampled according to such method as the Manager shall decide, and three samples shall be drawn, one for assay at the works, one for the Vendor, and the third as an umpire sample. The umpire sample shall be sealed in the presence of the vendor or his representative, and retained at the works.

7. The Vendor and Manager shall compare assays, and if these differ by not more than one per cent. (1%) of copper, $\frac{1}{4}$ dwt. of gold, or 10z. of silver, per ton the mean of the assays shall be accepted as correct. If there should be a greater difference between the assays, the umpire sample shall be sent by the Manager to the Government Assayer, at Perth, or to any other umpire from time to time approved by the Minister, whose assay shall be accepted as final by both parties. The cost of the umpire shall be borne by the party whose assay differs most from the umpire's result. The Works assay shall not be made known to the Vendor until he has produced his assay certificate for comparison of assays or has agreed, in writing, to accept the Works assay. If the Vendor does not produce an assay certificate for comparison of assays within twenty-one days after sampling, the Works assay shall be final.

8. No charge will be made for sampling and assay of any accepted parcel of ore exceeding five tons (5 tons) net weight, but any smaller parcel shall be charged with a fee of One guinea (£1 1s.), except in the case of a *bona fide* first trial parcel from a new working.

9. Assay for copper shall be made by such wet process as the Manager shall determine, and assays for gold and silver by fire methods, or by any combination of wet and fire methods that appear to him most suitable.

10. After agreement of assays, the following deductions shall be made from the agreed assay values, in order to arrive at the amounts of the metals for which payment will be made:—

Copper.—From assays up to ten per cent. (10%) of copper, two and a half units shall be deducted. From assays over ten per cent. (10%) of copper, three units shall be deducted.

Gold.—From all assays up to half an ounce to the ton, three pennyweights shall be deducted. From all assays over half an ounce to the ton, after deducting three pennyweights there shall be a further deduction of five per cent. (5%).

Silver.—No silver shall be paid for unless more than five ounces to the ton are present. From all assays of more than five ounces to the ton, ten per cent. will be deducted, together with the fixed amount of five ounces.

11. A smelting charge of Three pounds per ton (net weight) will be made in all cases.

12. Advances will be made in part payment for the copper, gold, and silver in the ore, less the above deductions and charges, immediately on agreement of assays, at the rate of 75 per cent. of the value, calculated at the following rates:—

Copper.—At one shilling and sixpence per unit below the average price per unit of standard copper in the London Metal Exchange during the week in which the sampling is completed.

Gold.—At four pounds per ounce, fine.

Silver.—At two shillings per ounce, fine.

While regular running of the smelting furnace is in progress at the Works final payment for ore received will be made three months after the completion of the sampling, less the above deductions and charges, and less any advances made under the preceding part of this regulation, at the rate of:—

Copper.—At one shilling and sixpence per unit below the average price per unit of standard copper in the London Metal Exchange during the week preceding that in which the final payment is made.

Gold.—At four pounds per ounce, fine.

Silver.—At two shillings per ounce, fine.

But when ore is received at any time during suspension of smelting operations the final payment will be deferred until three months after the date on which regular smelting is resumed; and should the Manager deem it necessary to suspend smelting operations for more than a week at any time he will give public notice to that effect, and thereafter the date on which final payments may become due for parcels of ore purchased during the running of the smelter shall be postponed for a period equal to that during which smelting operations are so suspended.

13. The Manager may purchase low-grade ores suitable for fluxing purposes, but which would give no return to the sellers under the foregoing regulations, at such prices as from their combined fluxing and metal value may seem to him reasonable, but such purchases shall be final at the prices so fixed and shall not be affected by subsequent changes in the market value of the contained metals.

14. All accounts against the State for payments due on account of ore sold to the Works shall be rendered on the usual forms of accounts against His Majesty's Government, and shall be certified as correct by the Manager of the Works before being forwarded to the Secretary for Mines, Perth, for payment.

15. Any parcels of ore purchased under the regulations of 30th March, 1905, since the beginning of October, 1905, may, with the consent of the sellers, be deemed to have been purchased under these present regulations, and final payments in respect thereof will be made immediately on these regulations coming into effect in the cases of such as have been actually smelted, and in all other cases three months after resumption of regular running of the smelting furnace.
