WHEREAS by "The Transfer of Land Act, 1893, Amendment Act, 1896" (60 Vict., No. 22), the Governor is empowered, by Proclamation in the *Government Gazette*, to revest in His Majesty, as of his former estate, all or any lands whereof His Majesty may be

come the registered proprietor: And whereas His Majesty is now the registered proprietor of Busselton Lot 225, registered in the Office of Titles in Volume IX., Folio 234: Now therefore I, the said Governor, with the advice and consent of the Executive Council, do by this Proclamation revest in His Majesty, his heirs and successors, Busselton Lot 225 aforesaid, as of his former estate.

Given under my hand and the Public Seal of the said State, at Perth, this 6th day of October, 1909.

By His Excellency's Command,
JAMES MITCHELL,
Minister for Lands.

GOD SAVE THE KING !!!

Eastern Goldfields Circuit District.

Appointment of Fourth Wednesday in November, in lieu of the Fourth Monday in November, as a time for the Sitting of the Circuit Court at Kalgoorlie.

PROCLAMATION

WESTERN AUSTRALIA, } By His Excellency Sir Gerald Strickland,
TO WIT. } Count della Catena, Knight Commander of
G. STRICKLAND, } the Most Distinguished Order of St.
Governor. } Michael and St. George, Governor in and
[L.S.] } over the State of Western Australia and
its Dependencies, etc., etc., etc.

WHEREAS under and by virtue of the provisions of "The Circuit Courts Act, 1897," the Governor may from time to time, by Proclamation published in the *Government Gazette*, declare that such portions of the State of Western Australia as he thinks fit shall form Circuit Districts, and shall assign a name to each of such districts and define the boundaries of the same respectively; and further, that a sitting of the Supreme Court shall be held in every such district once at least every three months, at a time and place to be appointed by the Governor by the like or any subsequent Proclamation: And whereas by a Proclamation dated the 22nd day of May, 1902, the then Governor declared, by and with the advice of the Executive Council, that a portion of the State contained within the boundaries defined in the said Proclamation be constituted a Circuit District, to be known as the Eastern Goldfields Circuit District, and appointed the third Wednesday in March, June, September, and December (starting in the June then next following) as the time, and Kalgoorlie as the place at which a sitting of the Supreme Court shall be held in the said District: And whereas by subsequent Proclamation the then Governor appointed the fourth Monday in November, in lieu of the third Wednesday in December, as the time at which a sitting of the Supreme Court in the said District should be held: Now therefore I, the Governor of the State, with the advice of the Executive Council, do hereby appoint the fourth Wednesday in November, in lieu of the fourth Monday in November, as the time at which a sitting of the Supreme Court shall be held at Kalgoorlie in the said District.

Given under my hand and the Public Seal of the said State, at Perth, this 6th day of October, 1909.

By His Excellency's Command,
J. L. NANSON,
Attorney General.

GOD SAVE THE KING !!!

Contraction of the Area of the District of Moora Local Board of Health.

ORDER IN COUNCIL.

At the Executive Council Chamber, at Perth, the 6th day of October, 1909.

Present:

His Excellency the Governor.
The Honourables—The Minister for Works.
The Colonial Secretary.

4395/09.

WHEREAS by Section 17 of "The Health Act, 1898," the area of any district defined for the purpose of a Local Board of Health may from time to time be extended or contracted by the Governor in Council; and whereas it is desired to contract the District of the Moora Local Board of Health: Now, therefore, His Excellency the Governor of Western Australia, on the recommendation of the Central Board of Health, and by and with the advice and consent of the Executive Council, does hereby contract the District of the Moora Local Board of Health by amending the boundaries thereof; such amended boundaries to embrace all lands within a radius of fifteen miles of the Post Office, Moora.

BERNARD PARKER,
Clerk of the Executive Council.

The Land Act, 1898.

ORDER IN COUNCIL.

At the Executive Council Chamber, at Perth, this 30th day of September, 1909.

Present:

His Excellency the Governor.
The Honourables—The Premier.
The Colonial Secretary.

3589/07.

WHEREAS by Section 43 of "The Land Act, 1898," it is made lawful for the Governor, by Order in Council, without issuing any deed of grant to place any Reserve under the Control of any Municipality, Road Board, or other person or persons, as a Board of Management, and to empower such Board to make, repeal, and alter by-laws for the control and management of such Reserves, and prescribe fees for depasturing thereon, and for other purposes, such by-laws to be approved by the Governor and published in the *Government Gazette*: And whereas it is deemed expedient that Reserve 11342 for Commonage, at Mt. Magnet, should be placed under the control of Mount Magnet Road Board as a Board of Management: Now, therefore, His Excellency the Governor, by and with the advice and consent of the Executive Council, doth hereby place the before-mentioned Reserve under the control of Mount Magnet Road Board for the aforesaid purpose as a Board of Management, and doth empower such Board to make, repeal, or alter by-laws for the control and management of the said Reserve, for prescribing fees for depasturing thereon, for directing the manner in which such fees shall be imposed, paid, collected, and disposed of, and to impose penalties not exceeding in any case £5 for any breach thereof, and £2 a day for a continuing breach, but not more than £20 in the aggregate.

BERNARD PARKER,
Clerk of the Council.

MUNICIPAL BY-LAWS.

Colonial Secretary's Office,
Perth, 8th October, 1909.

3881/09.

HIS Excellency the Governor in Council has been pleased to confirm the following By-laws, made by the Council of the Municipality of Leederville.

F. D. NORTH,
Under Secretary.

LEEDERVILLE MUNICIPALITY.

*Building By-law.**Preamble.*

In pursuance of the powers in that behalf contained in "The Municipal Corporations Act, 1906," the Municipal Council doth hereby make the following By-Law:—

Repeal.

1. All By-Laws heretofore made by the Municipal Council of Leederville, with reference to the matters hereinafter contained, are hereby repealed.

Interpretation Clause.

2. In the construction of this By-law, unless otherwise the context requires:—

- (a.) The several words mentioned in part XV. of "The Municipal Corporations Act, 1906," with the exception of the words "Public Building," shall have the same meaning as is attached by the said part.
- (b.) The expression "Building" shall mean any building or erection of whatsoever nature hereafter erected or wholly or substantially re-erected.
- (c.) The expression "level of ground" shall mean the level of the ground as determined by the Surveyor.
- (d.) The expression "foundation" applied to a wall having footings shall mean the solid ground or artificially formed support on which the footings of the wall shall rest.
- (e.) The expression "footings" shall mean the extra spread of wall between the base of the wall and the foundation.
- (f.) The expression "base" applied to a wall having footings shall mean the underside of the course immediately above the footings or in the case of the wall carried by a bressummer, above such bressummer.
- (g.) The expression "bressummer" shall mean a metallic or trussed or flitched wooden girder, which girder carries a wall.
- (h.) The expression "ground storey" shall mean the storey of a building to which there is an entrance from the outside on or near the level of the ground, and where there are two such storeys then the lower of the two.

Provided that no storey of which the upper surface of the floor is more than four (4) feet below the level of the adjoining pavement shall be deemed to be the ground storey.

- (i.) The expression "basement storey" shall mean any storey of a building which is under the ground storey.
- (j.) The expression "First storey" shall mean that storey of a building which is next above the ground storey, the successive storeys above the first storey being the second storey, the third storey, and so on to the topmost storey.
- (k.) The expression "topmost storey" shall mean the uppermost storey in a building, whether constructed wholly or partly in the roof or not, and whether used or constructed or adapted for human habitation or not.
- (l.) The expression "external wall" shall mean the outer wall when under the main roof, or the outside wall of a habitable room, or the outer wall of the main building.
- (m.) The expression "party wall" shall apply to every wall used or built as a separation of any building from any building, such other building being occupied by different persons.
- (n.) The expression "cross wall" shall mean a wall used or constructed to be used in any part of its height as an inner wall of a building for a separation of one part from another part of the building, that building being

wholly in or being constructed or adapted to be wholly in one occupation.

- (o.) The expression "party fence wall" shall mean a wall used or constructed to be used as a separation of adjoining lands of different owners, and not being part of a building, but does not include a wall constructed on the land of one owner the footings of which project into the land of the other.
- (p.) The expression "party arch" shall mean an arch separating adjoining buildings, storeys, or rooms belonging to different owners, or occupied, or constructed, or adapted to be occupied by different persons, or separating a building from a public way or a private way leading to premises in other occupation.
- (q.) The expression "party structure" shall mean a party wall, or other structure separating two buildings, when occupied as separate tenements and approached by separate staircases or separate entrances from without.
- (r.) The expression "height" in relation to any wall shall mean the measurement taken from the level of the base of such wall to the level of the top of the parapet, or where there is no parapet to the level of the top of the external wall, or, in the case of gabled buildings to a level half-way between the base and the apex of the gable.

Provided that where pediments are constructed above the top of the parapet or above the top of the wall, as the case may be, the height of the wall for the whole width of the pediment shall be measured from the base of the wall to a level half-way between the base and the top of such pediment.

- (s.) The expression "floor area" applied to a building shall mean the aggregate superficial areas of so many horizontal sections thereof as there are floors in such buildings. The horizontal section of each floor shall be made at the point of its greatest superficial dimensions, inclusive of external walls and of such portions of the party walls as belong to the building and also of all verandah and balcony floors, covered ways, and light courts.
- (t.) The expression "square" applied to the measurement of the area of a building shall mean the space of (100) superficial feet.
- (u.) The expression "cubical" contents applied to the measurement of a building shall mean the space contained within the external surfaces of the walls and the ceilings of the topmost storey, or where there is no such ceiling, the roof and the upper surface of the floor of its lowest storey.
- (v.) The expression "dwelling house" shall mean a building used or constructed or adapted to be used wholly or in part or principally for human habitation, not being a building the property of His Majesty's Government, or any Department thereof.
- (w.) The expression "domestic building" includes a dwelling house, suite of offices, or any other building not being a public building or building of the warehouse class, or a building the property of, or occupied by or under the control or management of His Majesty's Government, or any Department thereof.
- (x.) The expression "public building" shall mean and include every building used as a church, chapel, or other place of public worship; also every building used for the purposes of public instruction, also every building used as a college, public hall, hospital, theatre, public concert room, public exhibition room, or for any other public purposes, not being a building the property of or occupied by or under the control of His Majesty's Government, or any Department thereof.
- (y.) The expression "building of the warehouse class" shall mean a warehouse, factory, manufactory, brewery, distillery, and any other building exceeding in cubical contents one hundred and fifty thousand (150,000) cubic feet, which is neither a public building nor a domestic building, nor a building the property of or occupied by or under the control of His Majesty's Government, or any Department thereof.

- (z.) The expression "inhabited" applied to a room shall mean a room in which some person passes the night, or which is used as a living room, including a room in respect of which there is a probable presumption (until the contrary is known) that some person passes the night therein, or that it is used as a living room.
- (aa.) The expression "habitable" applied to a room shall mean a room constructed or adapted to be inhabited.
- (bb.) The expression "building owner" shall mean such one of the owners of adjoining land as is desirous of building, or such one of the owners of buildings, storeys, or rooms separated from one another by a party wall or party structure as does or is desirous of doing a work affecting that party wall or party structure.
- (cc.) The expression "adjoining owner" shall mean the owner or owners or one of the owners, and "adjoining occupier" shall mean the occupiers or one of the occupiers of land, buildings, storeys, or rooms adjoining those of the building owner.

Application for a Building License.

3. Every person intending to erect any building, or alter, or add to any building within the Municipality of Leederville, shall, three days before commencing to erect, add to, or alter the same, make application in the form provided in Schedule I. to this By-law, and deposit for a period of three days with the surveyor, for his approval, a copy of the drawings showing the plan, elevation, and sections of such proposed building, addition to, or alteration, together with full and complete specifications of the work proposed to be done. A locality plan showing the position of such building shall also be deposited with the surveyor, to remain permanently in his possession. No person shall commence to erect, add to, or alter, such building until the Surveyor shall have signified his approval of such plans and specifications by the issue to such person of a certificate of such approval, to be called a "Building License."

(a.) Drawings.—All drawings shall be in ink, on drawing paper, or cartridge paper, or tracing cloth, at least 15in. x 22in. in size. The drawings shall consist of a complete plan of every storey, elevations of external fronts, and one or more sections transverse or longitudinal, showing heights of storeys, depths of foundations, level of ground, construction of floors, walls, roofs, etc.; all clearly figured and dimensioned in feet and inches; also a locality plan showing the locality of proposed building, with cardinal or north point, position of proposed buildings, and any existing buildings on the site or on the allotment, the position of any existing drains, and the position, size, depth, and gradient of proposed drains, and the position of inlets, traps, and ventilators. The distance from the boundaries of the allotment of the proposed buildings shall be figured in feet and inches.

(b.) Distinctive colouring shall be used on the locality plan for new and old buildings.

(c.) The locality plan shall be drawn to a scale of 16 feet to an inch, and all other drawings to scale of not less than 8 feet to an inch.

(d.) All plans, drawings, and specifications shall be signed by the building owner or his duly authorised agent.

Departure from deposited plans.

4. No person who shall have obtained a building license in respect of any building shall, in the construction of such building, depart from the plans or specifications which have been approved by the Surveyor, without his consent being first obtained in writing, and such alterations and departures from approved plans and specifications shall be drawn, inscribed, and endorsed on and in the plans and specifications.

Sites and foundations of buildings.

5. No person who shall hereafter erect any house or building shall construct the foundations of any such house or building upon any site or any portion of any site, which shall have been filled in or covered with any material impregnated or mixed with faecal matter, animal or vegetable matter, or which shall have been filled up or covered with dust or slop or other refuse or upon which any such matter or refuse has been deposited, unless and until such matter or refuse shall have been

properly removed by excavation or otherwise from such site. Any holes caused by such excavation shall, if not used for a basement or a cellar, be filled in with hard brick, or dry rubbish, or concrete, sand, or other material to be approved by the Surveyor.

The provisions of Section 296 of "The Municipal Corporations Act, 1906," shall be observed by intending builders in regard to the laying out of the site of any building.

Foundations.

6. Every person who shall hereafter erect a building shall cause the foundations of the walls of such building to be formed of a bed of good concrete, not less than 9in. thick, and projecting at least 4in. from each side of the lowest course of footings of such wall. If the site be upon a natural bed of sand or gravel, concrete may be omitted from the foundations of the walls.

The concrete shall be formed of clean gravel, broken hard brick, properly burnt ballast, or other hard material, well mixed with freshly burnt lime or cement, in the following proportions:—In the case of lime, not less than one part of lime to four parts of other material; in the case of cement, one part of cement to two parts of sand and four parts of stone.

GENERAL.

Brick and stone walls.

7. With regard to the component parts of any external walls of buildings in Newcastle Street, Oxford and Sanders Streets, Railway Parade from Kimberley to Monger Street, Monger Street to Cambridge Street from Railway Parade, Cambridge Street from Monger Street to Kimberley Street, Kimberley Street from Cambridge Street to Railway Parade, and Short Street, every such wall must be built of either brick or stone or artificial stone together laid in, with mortar or cement in such manner as to produce solid work. No weatherboard buildings shall be allowed in any street within the boundaries of the Leederville Municipality unless of a plan approved by the Committee appointed by the Council for such purpose.

Walls to be properly bonded.

8. Any person who shall erect, add to, or alter any building shall cause every wall erected in the course of such work, which shall be constructed of brick, stone, or other similar substances to be properly bonded, and solidly put together with mortar or cement, and shall not suffer the external surface of any pier bay between piers, or any other main walls of a building to be carried up otherwise than truly vertical, without any overhang whatsoever except as may be permitted under this By-law, clause 30, "Projections."

Return walls.

9. Every person who shall hereafter erect, add to, or alter any building shall cause every such wall of such building erected in the course of such work, and which may be built at an angle with another wall, to be properly bonded therewith.

Footings.

10. Every person who shall hereafter erect, add to, or alter any building shall construct every such wall of such building erected in the course of such work (other than a wall carried on a bressummer) so as to rest upon proper footings. He shall cause the projection of the bottom of every such wall on each side of the wall to be at least equal to one half of the thickness of the wall at its base, unless an adjoining wall interferes, in which case the projection may be omitted where that wall adjoins. He shall also cause the diminution of the footing of every wall to be formed in regular offsets, and he shall cause the height from the bottom of such footing to the base of the wall to be at least equal to two-thirds of the thickness of the wall at its base. Provided that in the case of domestic buildings of one storey, in the event of a wall being thickened four inches or more to carry a wall plate, the footings need not project in proportion to, or in respect of such thickening.

Heights of storeys, etc.

11. For the purposes of this By-law the measurement of height of storeys and of height and length of walls shall be determined by the following rules:—

(1.) The height of storeys shall be measured as follows:—

(a.) The height of a topmost storey shall be measured from the level of the underside of its floor joists up to the level of the top of the

parapet, or, if there is no parapet, up to the level of the under surface of the tie of the roof or other covering, or, if there is no tie, or in the case of gables, then up to the level of half the vertical height of the rafters or other support of the roof.

(b.) Pediments constructed on top of walls, or on top of parapets shall be included in the topmost storey, and the measurements of the same shall be made in accordance with the rule laid down in subsection (r) of the interpretation clause.

(c.) Lower storeys.—The height of every storey other than the topmost storey shall be measured from the level of the underside of the floor joists of the storey up to the level of the underside of the floor joists of the storey next above it.

(2.) Length of walls.—Walls shall be deemed to be divided into distinct lengths by return walls. The length of every wall shall be measured from the centre of one return wall to the centre of another, provided that such walls are external, party, or cross walls of the thickness required under this By-law, and are bonded into the walls so deemed to be divided.

Underpinning.

12. Every person who shall cause the underpinning of walls and chimneys shall cause such underpinning to be built with bricks or stone bedded in cement to the full thickness of the old wall or work if underpinned in brick, one-third thicker if underpinned in stone, and with proper footings, or to an additional thickness if the increased height of the wall so requires, and shall cause such underpinning to rest on the solid ground, or on concrete, or on other solid substructure as a foundation, and shall cause the whole to be executed to the satisfaction of the Surveyor.

Thickening of walls.

13. Every person who shall thicken a wall shall cause such thickening to be executed with brick or stone work in cement properly bonded to the old work to the satisfaction of the Surveyor. Provided that in no case shall any person thicken any wall except after notice served on the Surveyor of his intention so to do.

Domestic buildings.

14. Thickness of walls.—Every person who shall hereafter erect, alter, or add to any building shall construct every external wall and every party wall erected in the course of such work in accordance with the following rules, and in every case of the thickness prescribed shall be the minimum thickness of which any such wall may be constructed, provided that the several rules shall apply only to walls built of bricks or of suitable stone, or of other blocks of hard and incombustible substance, the beds or courses being horizontal:—

(a.) Where the wall does not exceed twenty-five feet in height its thickness shall be as follows:—

If the wall does not exceed thirty feet in length, and does not comprise more than two storeys, it shall be 8½ in. thick for its whole height.

If the wall exceeds thirty feet in length or comprises more than two storeys, it shall be thirteen inches thick below the topmost storey, and eight and a half inches thick for the rest of its height.

(b.) Where the wall exceeds twenty-five feet but does not exceed forty feet in height, its thickness shall be as follows:—

If the wall does not exceed thirty-five feet in length it shall be thirteen inches thick below the topmost storey, and eight and a half inches for the rest of its height.

If the wall exceeds thirty-five feet in length, it shall be seventeen and a half inches thick for the height of one storey; then thirteen inches thick for the rest of its height below the topmost storey, and eight and a half inches for the rest of its height.

(c.) Where the wall exceeds forty feet but does not exceed fifty feet in height, its thickness shall be as follows:—

If the wall does not exceed thirty-five feet in length, it shall be seventeen and a half inches thick for the height of one storey, then thirteen inches for the rest of its height below the topmost storey, and eight and a half inches for the rest of its height.

If the wall exceeds thirty-five feet in length, but does not exceed forty-five feet, it shall be seventeen and a half inches thick for the height of two storeys, then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be twenty-one and a half inches thick for the height of one storey, then seventeen and a half inches thick for the height of the next storey, and then thirteen inches thick for the rest of its height.

(d.) Where the wall exceeds fifty feet, but does not exceed sixty feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length it shall be seventeen and a half inches thick for the height of two storeys, and thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be twenty-one and a half inches thick for the height of one storey, then seventeen and a half inches thick for the height of the next two storeys, and then thirteen inches thick for the rest of its height.

(e.) Where the wall exceeds sixty feet but does not exceed seventy feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length, it shall be twenty-one and a half inches thick for the height of one storey, and then seventeen and a half inches thick for the height of the next two storeys, then thirteen inches for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a half inches (subject to the provisions hereinafter contained respecting distribution of piers).

(f.) Where the wall exceeds seventy feet, but does not exceed eighty feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length, it shall be twenty-one and a half inches thick for the height of one storey, then seventeen and a half inches thick for the height of the next three storeys, then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a half inches (subject to the provision hereinafter contained respecting the distributing of piers).

(g.) Where the wall exceeds eighty feet, but does not exceed ninety feet in length, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length, it shall be twenty-six inches thick for the height of one storey, then twenty-one and a half inches thick for the height of the next storey, then seventeen and a half inches thick for the height of the next three storeys, and then thirteen inches for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a half inches (subject to the provisions respecting the distributing of piers).

(h.) Where the wall exceeds ninety feet in height, but does not exceed one hundred feet, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length, it shall be twenty-six inches thick for the height of one storey, then twenty-one and a half inches thick for the height of the next two storeys, then seventeen and a half inches thick for the next three storeys, then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a half inches (subject to the provisions hereinafter contained for the distribution of piers).

(i.) Where the wall exceeds one hundred feet in height, but does not exceed one hundred and twenty feet, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length, it shall be thirty inches thick for the height of one storey, then twenty-six inches thick for the height of the two next storeys, then twenty-one and a half inches for the height of the

next two storeys, then seventeen and a half inches thick for the height of the three next storeys, then thirteen inches for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a half inches (subject to the provisions hereinafter contained for the distribution of piers).

(j.) Increased thickness of walls.—If any storey exceeds in height sixteen times the thickness prescribed for its walls by the foregoing rules, the thickness of each external and party wall throughout such storey shall be increased to one-sixteenth part of the height of the storey, and the thickness of each external or party wall below that storey shall be increased to a like extent (subject to the provision hereinafter contained for the distribution of piers).

(k.) Piers.—Where by any of the foregoing rules relating to the thickness of external and party walls of domestic buildings an increase of thickness is required in each case of a wall exceeding sixty feet in height and forty-five feet in length, or in the case of a storey exceeding in height sixteen times the thickness prescribed for its walls, or in the case of a wall below that storey the increased thickness may be confined to piers properly distributed, of which the collective widths amount to one-fourth part of the length of the wall.

(l.) Crosswalls.—In buildings four storeys high where the cross walls are supported from the ground, and where the cross wall in the highest storey is four and a half inches thick, the cross walls in the two lower storeys shall be at least eight and a half inches thick, and the lowest storey thirteen inches thick. In three storey buildings similar cross walls which are four and a half inches thick in the highest storey, shall be at least eight and a half inches thick in the two lower storeys. In buildings of two storeys having cross walls running both storeys, such walls in the lower storey shall be not less than eight and a half inches thick.

Cross walls in upper storeys not supported from the ground shall be carried on bresssummers.

Cavity Walls.

15. The external walls of domestic buildings not exceeding two storeys in height and the external walls of the two topmost storeys of domestic buildings exceeding two storeys, may be built with a cavity not exceeding two inches wide, provided—

- (a.) That the collective thickness of the walling on the two sides of the cavity shall not be less than if the wall were built without a cavity.
- (b.) That the walling on each side of the cavity shall have a minimum thickness of four and a half inches.
- (c.) That the walls on each side of such cavity be tied with galvanised iron or other non-corrosive metal, or by earthenware tie blocks, in the proportion of at least four ties to every square yard of wall surface.
- (d.) That the walls of all storeys below the cavity walls shall be thickened beyond the thickness specified for similar walls in the preceding clause, if required, in order to seat such cavity walls so that the same shall not overhang.

Public Buildings.

16. If a public building conforms or corresponds in form or structure or disposition with a domestic building, then the rules which obtain for domestic buildings shall apply to public buildings, provided that the thickness of all external and party walls, and the width of their footings, be at least four inches more than is required for similar walls of domestic buildings; but should such public building correspond in form or structure or disposition with a building of the warehouse class, then the rules which obtain for buildings of the warehouse class shall apply to such public buildings, provided that the thickness of all external and party walls with the width of their footings be at least four inches more than is required for similar walls of a building of the warehouse class.

Should, however, such public building not correspond with in form or structure to either a domestic building or to a building of the warehouse class, then such building shall be subject to the special approval of the Building Surveyor as to its walls and its other construction.

Buildings of the Warehouse class.

17. Thickness of walls.—Every person who shall hereafter erect, alter, or add to any building of the warehouse class shall construct every external wall, party wall, or cross wall, erected in the course of such work, in accordance with the following rules, and in every case the thickness prescribed shall be the minimum thickness of which any such wall shall be constructed, provided that the several rules shall apply only to walls built of bricks or of suitable stone, or other hard and incombustible substance, the beds or courses being horizontal:—

(a.) Where the wall does not exceed twenty-five feet in height (whatever its length), it shall be thirteen inches thick at its base.

(b.) Where the wall exceeds twenty-five feet, but does not exceed thirty feet in height, it shall be at its base the thickness following:—

If the wall does not exceed forty-five feet in length it shall be thirteen inches thick at its base.

If the wall exceeds forty-five feet in length it shall be seventeen and a half inches at its base.

(c.) Where the wall exceeds thirty feet, but does not exceed forty feet in height, it shall be at its base the thickness following:—

If the wall does not exceed thirty-five feet in length it shall be thirteen inches thick at its base.

If the wall exceeds thirty-five feet, but does not exceed forty-five feet in length, it shall be seventeen and a half inches thick at its base.

If the wall exceeds forty-five feet in length it shall be twenty-one and a half inches thick at its base.

(d.) Where the wall exceeds forty feet, but does not exceed fifty feet in height, it shall be at its base of the thickness following:—

If the wall does not exceed thirty feet in length it shall be seventeen inches thick at its base.

If the wall exceeds thirty feet, but does not exceed forty-five feet in length, it shall be twenty-one and a half inches thick at its base.

If the wall exceeds forty-five feet in length it shall be twenty-six inches at its base.

(e.) Where the wall exceeds fifty feet, but does not exceed sixty feet in height, it shall be at its base of the following thickness:—

If the wall does not exceed forty-five feet in length it shall be twenty-one and a half inches thick at its base.

If the wall exceeds forty-five feet at its base it shall be twenty-six inches thick.

(f.) Where the wall exceeds sixty feet, but does not exceed seventy feet in height, it shall be at its base of the thickness following:—

If the wall does not exceed forty-five feet in length it shall be at its base twenty-one and a half inches thick.

If the wall exceeds forty-five feet in length it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a half inches (subject to the provision hereinafter contained for the distribution of piers).

(g.) Where the wall exceeds seventy feet, but does not exceed eighty feet in height, it shall be at its base of the thickness following:—

If the wall does not exceed forty-five feet in length it shall be twenty-one and a half inches thick at its base.

If the wall exceeds forty-five feet in length it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a half inches (subject to the provisions hereinafter contained for the distribution of piers).

(h.) Where the wall exceeds eighty feet, but does not exceed ninety feet in height, it shall be at its base of the thickness following:—

If the wall does not exceed forty-five feet in length it shall be twenty-six inches thick at its base.

If the wall exceeds forty-five feet in length it shall be increased from the base up to within sixteen feet from the top of the wall by four and a half inches (subject to the provisions hereinafter contained for the distribution of piers).

(i.) Where the wall exceeds ninety but does not exceed one hundred feet in height, it shall be at its base the thickness following:—

If the wall does not exceed forty-five feet in length it shall be twenty-six inches thick at its base.

If the wall exceeds forty-five feet in length it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a half inches (subject to the provisions hereinafter contained for the distribution of piers).

(j.) Where the walls exceed one hundred feet, and do not exceed one hundred and twenty feet in height, it shall be at its base of the thickness following:—

If the wall does not exceed forty-five feet in length it shall be thirty-one inches thick at its base.

If the wall exceeds forty-five feet in length it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a half inches (subject to the provisions hereinafter contained for the distribution of piers).

(k.) The thickness of the wall for sixteen feet from the top to the top shall be thirteen and a half inches, and the intermediate parts of the wall between the base and sixteen feet below the top shall be built solid throughout the space between straight lines drawn on each side of the wall and joining the thickness at the base to the thickness at sixteen feet below the top.

Nevertheless, in walls not exceeding thirty feet in height the walls of the topmost storey may be nine inches thick, provided the height of that storey does not exceed ten feet.

(l.) If any storey exceeds in height fourteen times the thickness prescribed for its walls in the foregoing rules, the thickness of such external or party wall throughout such storey shall be increased to one-fourteenth part of the height of the storey, and the thickness of each external and party wall below that storey shall be increased to a like extent.

(m.) Piers.—Where by any of the foregoing rules relating to the thickness of walls—external and party—of buildings of the warehouse class an increase of thickness is required, in the case of a wall exceeding sixty feet in height and forty-five feet in length, or in the case of a storey exceeding in height fourteen times the thickness of its walls, or in the case of a wall below that storey, the increased thickness may be confined to piers, properly distributed, of which the collective widths amount to one-fourth part of the length of the wall.

(n.) Cross Walls.—The thickness of every cross wall shall be at least two-thirds of the thickness herebefore described for an external or party wall of the same height and length, but shall in no case be less than eight and a half inches, and no wall subdividing any building shall be deemed to be a cross wall unless it is carried up to the floor of the topmost storey, and unless in each storey the aggregate extent of the vertical faces or elevations of all the recesses and that of all the openings taken together does not exceed one-half of the whole extent of the vertical face or elevation of the wall.

Wherever a cross wall becomes in any part an external wall, such cross wall shall be of the thickness required for an external wall of the same height and length.

Rubble Stone Walls.

18. Every person who shall hereafter use stone in coursed or random coursed rubble for the construction of any walls in the erection of any building shall cause the thickness of such stone walls to be at least one-third greater than is prescribed for brick, and such walls shall not in any case exceed twenty-five (25) feet in height, nor be less than fourteen inches (14in.) in thickness.

Party Walls.

19. Every person who shall hereafter construct a party wall shall cause such wall, if in a public building or a building of the warehouse class, to be carried up of a thickness equal to a thickness of such wall in the topmost storey, and if any other building, to be carried up of a thickness of at least eight and a half inches—

(a.) Above the roof, flat, or gutter of the highest building adjoining thereto, to such a height as will give a distance in a public building or a building of the warehouse class exceeding thirty feet in height of at least three feet, and in any other building of fifteen inches measured to right angles from the slope of the roof, or fifteen inches above the highest part of any flat or gutter, as the case may be; provided that in the case of

dwelling built semi-detached in pairs, the party wall may be made to finish on the underside of the roof covering, which shall be bedded in mortar to the top of such party wall.

(b.) Above any turret, dormer, lantern light, or other erection of combustible material fixed upon the roof or flat of any building within four feet of such party wall, so as to extend at least twelve inches higher and wider on each side of such erection.

(c.) Above any part of any roof opposite thereto and within four feet therefrom.

Chases in Party Walls.

20. No person who shall hereafter erect a building shall make in any party wall any chase which shall be wider than fourteen inches nor more than four and a half inches deep from the face of such wall, nor shall leave less than eight and a half inches in thickness at the back or opposite side thereof, or which shall be within a distance of seven feet from any other chase on the same side of the wall, or within thirteen inches of an external wall. No person shall make any chase in a wall of less thickness than thirteen inches.

Open and Closed Areas.

21. Protection of Gratings.—In the construction of gratings and frames over areas, no person shall cause or allow the maximum projection of any such gratings or frames, whether they be open frames or filled with slabs of glass or lenses, to exceed eighteen inches, measuring from the general line of the front of the walls at one foot above the ground level, or in the maximum length thereof to exceed six feet; provided that—

(a.) Where more than one area grating, or such other covering is permitted in the front of one house or building the division between each shall be not less than nine inches, and shall be formed by a solid piece of hard stone not less than nine inches wide and nine inches deep, such stone to be securely pinned into or rest upon the brickwork not less than six inches at each end; such stone curbs shall be fixed to the level of the footway; the gratings and frames shall be securely let into the kerbs, and be run with lead, and not be permitted to open.

(b.) Description of Gratings.—Where covered with open iron gratings, the gratings shall be made with frames or borders, the bars of the gratings shall be fixed at right angles with the house, and the space or width between each bar shall not exceed one inch and a half; each bar shall not be more than three-quarters of an inch on the surface, and not less than one square inch in transverse sectional area.

(c.) Description of Light Gratings.—The coverings over areas, where intended to be closed or filled with glass slabs, shall be formed by iron gratings or frames, the bars shall be not more than three inches apart, and fixed at right angles with each other; each bar shall have at least one square inch of sectional area and the spaces between the bars shall be filled with glass at least one inch in thickness.

(d.) Permissible Covering over Openings.—No covering of any material or description shall be permitted over any area openings, except those formed by open iron gratings or by frames filled with slabs of glass or lenses as before described; or Yorkshire flagging four inches thick.

Cellar Flaps.

22. Projections of Openings.—In the construction of openings to cellars or cellar flaps, no person shall cause or allow the maximum projection of such openings or cellar flaps to exceed eighteen inches, measuring from the front line of the wall of the house at twelve inches above the ground level, or the maximum width of the openings to exceed four feet; such openings shall be surrounded at the footway level by curbs made of hard stone not less than nine inches on the face; such flaps shall be securely fastened from the underside and be made to shut on to ledges, or rabbeted into the stone curbs and to open outwards. All cellar flaps shall be made of jarrah wood, or iron or steel, or iron grating with wooden fillings, or of artificial stone.

Stairs not permitted.—No staircase or steps shall be allowed to be fixed beneath the cellar flaps, and no openings to basements shall be allowed or used for the purpose of constant access, but only for the purpose of occasionally raising or lowering goods, or removing dust, etc., and such openings shall be closed immediately after such operations are completed.

Coal Plates.

23. Every person who shall construct coal plates shall cause the same to be made circular, and not more than twelve inches in diameter, and to be securely let into rabbets let flush into the footpath; such coal plates shall be made of iron not less than three-quarters of an inch thick, and deeply chequered on the surface; or, if necessary, for the purpose of giving light to the cellar, of iron frames, the space or width between the bars shall be not more than one and a half inches at any point, and shall be filled with glass slabs or lenses.

Description of the Quality of the Substances of the Walls.

24. Materials on Walls.—Every person who shall hereafter erect a building shall cause:—

- (a.) The external wall and party walls of every such building, except in the case of concrete buildings, to be constructed of bricks or of stone, save and except as allowed for in clause 7 of these By-laws.
- (b.) Bricks shall be at least eight and a half inches by four and one-quarter inches by two and three-quarter inches of good, hard, sound, well burnt quality; stone shall be free from vents, cracks, or large sand holes, and laid on its natural bed.
- (c.) Similar material to be used in the portions of party walls and cross walls below the surface or level of the ground, and above the road, including the chimney stack. Cut brick may be used in arches over recesses and openings in, or for the facing of external walls.
- (d.) Mortar.—All brick or stone work to be put together with lime or cement mortar. Lime mortar to be composed of freshly burnt lime and clean sharp sand, free from earthy matter, and mixed in the proportion of one part of lime to three parts of sand. Cement mortar to be composed of Portland cement, or other cement of equal quality, and clean sharp sand, free from earthy matter, mixed in the proportion of at least one part of cement to three parts of sand.
- (e.) Damp Courses.—Every wall of such building to have a damp course composed of materials impervious to moisture, extending throughout its whole thickness at the level of the lowest floor above ground level. Every external wall or enclosing wall of all habitable rooms and their appurtenances, and of all cellars and areas which abut against the earth, to be protected by materials impervious to moisture.
- (f.) Tops of Party Walls.—The top of every party wall and parapet wall to be finished with one course of bricks set on edge in cement mortar, or by a coping of any other water-proof or fire-resisting material properly secured.
- (g.) Concrete Walls.—All concrete used in the construction of walls to be composed of Portland cement, or other cement of equal quality, clean sharp sand, and clean gravel or broken bricks or stone or furnace clinkers, and clean water, mixed in the following proportions:—One part of cement to two parts of sand and four of the coarse material broken sufficiently small to pass through a two inch diameter ring. The proportions of the materials to be ascertained by careful measurement, and the first mixing either by machinery or hand to be done before the water is added. The walls to be carried up regularly and in parallel frames of equal height, the surface of the concrete to be well rammed, and to be properly cleaned for the next layer of concrete. The thickness of concrete walls to be equal at least to the thickness prescribed for brick walls. Such portions of concrete party walls and chimney stacks as are carried above the roofs of buildings to be rendered externally with cement and mortar.

Enforcement of the foregoing By-laws.

It shall be lawful for the Surveyor, with the authority of the Mayor, without reference to the Council, to take immediate steps to enforce any and all of the foregoing By-laws, and he may cause any hoarding or other obstruction which has been erected without his license, or which has been erected or continued in breach of the conditions of any such license, to be removed, or any such excavations to be filled in, or injuries to the public street to be repaired, at the cost and expense of the person erecting or making the same, and such costs and expenses shall be recoverable from the person so making the same, as well as the penalties herein imposed in these By-laws, before Justices.

Recesses and Openings in External Walls.

25. No person who shall hereafter erect a building shall make any recess or opening in any external wall of such building unless:—

- (a.) The back of such recess or opening be at least eight and a half inches thick, and
- (b.) The aggregate area of recesses or openings above the ground storey does not exceed the one-half of the whole area of the wall of the storey in which they are made.

Recesses and Openings in Party Walls.

26. No person who shall hereafter erect a building shall make any recess or opening in any party wall of such building unless:—

- (a.) The back of such opening or recess be at least eight and a half inches thick, and
- (b.) Over every recess so formed an arch of at least two rings of brickwork of the full depth of the recess be turned on every storey except in the case of recesses formed for lifts; but where such recess does not exceed five inches in depth, corbelling in brick or stone may be substituted for the arching, and
- (c.) The aggregate area of all such recesses does not exceed one-half of the whole area of the wall of the storey in which they are made, and
- (d.) Such recesses or openings do not come within thirteen inches of the inner face of the external walls.

United Buildings.

27. No person shall cause any buildings to be united except where such buildings are wholly in one occupation, or are constructed or adapted to be so.

(a.) No person shall cause any buildings to be united, if, when so united, and considered as one building only, such buildings would not be in conformity with this By-law.

(b.) No person shall make an opening in any party wall, or in two external walls dividing buildings, which buildings, if taken together, would contain more than two hundred and fifty thousand cubic feet, except under the following conditions:—

- (1.) Such opening shall not exceed in width seven feet, or in height eight feet, and such opening or openings taken together shall not exceed one-half of the length of such party wall, or such external walls on each floor of the building in which they occur.
- (2.) Such opening shall have the door jambs and head formed of brick, stone, or iron, and be closed by two wrought iron doors, each one-quarter of an inch thick in the panel, at a distance from each other of the full thickness of the wall, fitted to rabbeted frames without woodwork of any kind, or by wrought iron sliding doors, or shutters properly constructed, fitted into grooved or rabbeted iron frames.
- (3.) If the thickness of the wall be not less than twenty-four inches, or the doors be placed at a distance from each other of not less than twenty-four inches, such opening may be nine feet six inches in height.

(c.) Whenever any buildings which have been united cease to be in one occupation, the owner or owners thereof shall give notice to the Surveyor, and shall cause all openings in any party wall, or in any external walls uniting such buildings, to be stopped up with brick or

stone work not less than thirteen inches in thickness (except in the case of a wall eight and a half inches thick, in which case eight and a half inches shall be sufficient), and properly bonded with such wall, and any timber not in conformity with this By-law placed in the wall shall be removed.

Bressummers.

28. Every person who shall hereafter erect a building shall cause every bressummer in any external, internal, or party wall, to be of rolled steel or iron, or trussed or flitched wooden girder of approved strength, and to have a bearing in the direction of its length of at least six inches at each end upon a sufficient pier of brick or stone, or upon an iron storey post fixed on a solid foundation, in addition to its bearing upon any party wall or external wall, and he shall also cause such bressummer to have such other storey posts, iron columns, stanchions, or piers of brick or stone, or corbels, as may be sufficient to carry the superstructure. The ends of such bressummer shall not be placed nearer to each other or the opposite face of the party walls than four inches; provided that:—

- (a.) At each end of every metallic bressummer a space shall be left equal to one-quarter of an inch for every ten feet, and also for any fractional part of ten feet of the length of such bressummer to allow for expansion.
- (b.) Every bressummer bearing upon a party wall shall be borne by a templet or corbel of stone or iron tailed through at least half the thickness of the wall, and of the full breadth of the bressummer.
- (c.) Bressummers consisting of more than one joist shall be solidly bolted together with packing pieces filling in the vacant spaces between the webs of the joists, and shall have such additional plates of sufficient strength, calculated in accordance with recognised formula, rivetted on to the top or bottom boom. Bressummers shall in no case have a less factor of safety than three feet for dead loads and five feet for live loads.

Timber in Walls.

29. Every person who shall hereafter erect, alter, or add to any building shall comply with the following regulations:—

- (a.) No bond timber or wood plate shall be built into any party wall, and the ends of any wooden beams or joists bearing on such wall shall be at least four and a half inches from each other, or from the opposite face of the wall.
- (b.) The end of any timber not permitted to be placed in or to have a bearing upon a party wall may be carried on a corbel or templet of stone or iron, or vitrified stoneware, tailed into the wall to a distance of at least eight and a half inches, or otherwise supported to the satisfaction of the Surveyor.
- (c.) All woodwork fixed in any external wall and frames of doors and windows of shops on the ground storey of any building (except loophole frames or bressummer) shall be set back at the least four inches from the external face of such wall.
- (d.) If any gutter, any part of which is formed of combustible materials, adjoins an external wall, such wall shall be carried up so as to form a parapet one foot at the least above the highest part of the gutter, and the thickness of the parapet so carried up shall be at least eight and a half inches throughout.
- (e.) No fascia or projecting eave constructed of inflammable materials shall be erected at a less distance than two feet six inches from the boundary of an adjoining property.

Projections.

30. Every person who shall hereafter erect, alter, or add to any building shall cause:—

- (a.) All copings, cornices, stringcourses whatsoever, and corbelled projections of party walls to be of brick, tile, stone, artificial stone, slate, cement, or other fire-proof material.
- (b.) Every cornice or other projection to be tailed into the wall of the building, and where the projection thereof exceeds the thickness of the wall, to be weighed or tied down. No

cornice to project more than two feet six inches over the public way or beyond the face of the external wall.

31. No person shall cause the plinth of any building to project beyond the surveyed building line except as follows, that is to say:—Plinths not exceeding two feet in height may project two and a half inches into the streets beyond the surveyed building line. Where streets are constructed on a gradient the height of the plinth may be varied if approved by the Surveyor.

32. No person shall cause the cornice of any shop front, the piers of which have been built on the surveyed building line, to project beyond such piers and beyond such surveyed building line, except as follows:—In a street or way of width not greater than thirty-three feet, such projection shall not exceed thirteen inches; in a street or way of width greater than thirty-three feet, such projections shall not exceed eighteen inches.

33. No person who shall hereafter erect, alter, or add to any building shall cause any part of the woodwork of any shop-front to be fixed higher than twenty-five feet above the pavement of the public footpath in front of the shop, or nearer than four and a half inches to the centre of the party wall, where the adjoining premises are separated by a party wall, or nearer than four and a half inches to the face of the wall of the adjoining premises, where the adjoining premises have a separate wall, unless a pier or corbel of stone, brick, or other incombustible material, at least four and a half inches wide, be placed as high as, and alongside such woodwork, and projecting throughout at the least one inch in front thereof, between such woodwork and the centre of the party wall or the separate wall, as the case may be.

34. Bay windows to any dwelling house may be erected on the land of the owner of such house, provided that no such bay window shall be erected except subject to the following conditions, viz.:—

- (1.) Such windows shall not exceed three storeys in height above the level of the footway.
- (2.) Shall be in no part nearer to the centre of the nearest party wall than the extreme amount of their projection from the main.

35. Every person who shall hereafter erect, alter, or add to any building shall cause:—

- (a.) An arch of brick or stone to be built over the opening of every chimney constructed in the course of such work to support the breast thereof, and shall support all such arches, except semi-circular ones, upon wrought iron bars of sufficient strength, to be built eight and a half inches into the chimney jambs.
- (b.) All the flues in such building, constructed in the course of such work, which may be intended for use in connection with any oven, furnace, cockle, steam boiler, or close fire, constructed for any purpose of trade or business, or which may be intended for use in connection with any range or cooking apparatus of such building, when occupied as an hotel or eating house, to be surrounded with brickwork at least eight and a half inches thick from the floor on which such oven, furnace, cockle, steam boiler, or close fire may be constructed or placed to a point eighteen inches clear of the outside of the roof.
- (c.) The inside of every flue, constructed in the course of such work, to be pargeted, or lined with fire resisting glazed piping or stoneware.
- (d.) The position and course of every flue which is being constructed in a party wall, if the construction of the building or of the flues and fireplaces on both sides of such party wall be not carried on contemporaneously, to be distinguished in some durable manner by outline marks on the outside of the work as it is carried up.
- (e.) The jambs of every fireplace opening constructed in the course of such work to be at least eight and a half inches thick.
- (f.) The breast of every chimney and the brickwork surrounding every smoke flue constructed in the course of such work, except where otherwise provided in this By-law, to be at least four and a half inches thick.
- (g.) The back of every fireplace opening constructed in the course of such work in a party wall to be at least eight and a half inches thick from the hearth to the height of twelve inches above the mantel.

- (h.) The upper side of every flue constructed in a cross wall, and carried from the fireplace to an external wall, to be at least eight and a half inches thick.
- (i.) Every chimney shaft or smoke flue constructed in the course of such work, not otherwise provided for in this By-law, to be carried up in brickwork at least four inches thick throughout, to a height of not less than three feet above the roof, flat, or gutter adjoining thereto, measured at the highest point in the line of junction with such roof, flat, or gutter.
- (j.) The highest six courses of every chimney stack or shaft constructed in the work to be built in cement mortar.
- (k.) An outer hearth to be constructed before every fireplace opening, which hearth shall consist of a slab of stone or other incombustible material at least fourteen inches wide, and six inches longer on each side than the width of such opening. Except on the lowest floor such slab shall be laid on iron bearers or brick trimmer arches, supported by the floor joists, but on the lowest floor may be bedded on a solid built up foundation.
- (l.) The inner hearth of every chimney erected in the course of such work to be constructed wholly of brick, stone, or other incombustible material, and such hearth, except on the lowest floor, or unless inset in the brickwork of a chimney breast, to be supported by corbelling of brick or stone, or by slate or stone slabs, or by iron girders or other incombustible material: Provided that on the lowest floor such hearth shall be bedded on a solid built foundation. In no case shall the least thickness of such inner hearth be less than six inches.

36. No person who shall hereafter erect, alter, or add to any building shall cause or allow:—

- (a.) The brickwork or stonework of any chimney shaft erected in the course of such work, other than a chimney shaft of the furnace of any steam engine, brewery, distillery, or manufactory, to be built higher above the roof, flat, or gutter adjoining thereto, than a height equal to six times the least width of such chimney shaft, taken at the level of the highest point in the line of junction, unless such chimney shaft shall be built with or bonded to another chimney shaft not less in the same line with the first-mentioned chimney shaft or shall be otherwise rendered secure.
- (b.) Any flue to be built in or against any party wall, unless it be surrounded with new brickwork at least four inches thick, properly bonded into the old work.

37. No person shall cause or allow:—

(a.) Any chimney shaft, jamb, breast, or flue, to be cut into, except for the purpose of repair, or for some one or more the following purposes:—

- (1.) For letting in or altering or removing flues, pipes, or funnels, for the conveyance of hot air, smoke, or steam, or for letting in, removing or altering smoke jacks.
- (2.) For forming openings for soot doors, in which case such openings shall be fitted with a close iron door and frame.
- (3.) For making openings for the insertion of ventilating valves, provided that such openings shall not be made nearer than twelve inches to any timber or combustible substance.

(b.) Any timber or woodwork to be placed:—

- (1.) In any wall or chimney breast nearer than four and a half inches to the inside of any flue or chimney opening.
- (2.) Under any chimney opening within six inches from the upper surface of the hearth thereof.

38. No person shall drive any wooden plug into any wall nearer than four and a half inches to the inside of any flue or chimney opening, nor shall any iron hold-fasts or other iron fastenings be placed nearer than two inches thereto.

Factory Chimneys.

39. Every person who shall hereafter construct a chimney shaft which may be intended for use in connection with the furnace of a steam engine, brewery,

distillery, or manufactory, shall construct such shaft in conformity with the following rules:—

- (a.) The foundation of such shaft shall be made of concrete or other sufficient foundation.
- (b.) The footings of such shaft shall be spread all round the base thereof by regular offsets to a projection equal to the thickness of the enclosing brickwork at the base of such shaft, and the space enclosed by such footings shall be filled in solid as the work progresses.
- (c.) The width of the base of such shaft, if square, shall be at least one-tenth of the proposed height thereof, or if such shaft is round, octagonal, or other many and equal sided and angled, then at least one-twelfth of the height thereof.
- (d.) Every such shaft shall be carried up throughout in brickwork and mortar of the best quality, and if detached shall be tapered gradually from the base to the top, and on all faces or sides of such shaft, at the rate of at least two and a half inches for every ten feet of height.
- (e.) The brickwork at the top of such shaft, and for twenty feet below the top, shall be at least eight and a half inches thick, and such thickness shall be increased at least four inches for every additional twenty feet, measured downwards.
- (f.) Every cap, cornice, pedestal, stringcourse, or other variation from the plain brickwork in connection with such shaft shall be as additional to the thickness of brickwork required under this By-law, and every such cap shall be constructed and secured to the satisfaction of the Surveyor.
- (g.) All fire-brick lining built inside the lower portion of such shaft shall be additional to, and independent of, the thickness of the brickwork thereof prescribed by this By-law, and shall not be bonded therewith.

General Restrictions relating to Steam Boilers, etc.

40. No person shall cause or allow:—

- (a.) The floor under any oven, copper, steam boiler, or stove, which is not heated by gas, or the floor under the same for a space of eighteen inches, to be constructed of materials of a combustible or heat-conducting nature, or less than six inches thick.
- (b.) Any pipe for conveying smoke or other products of combustion, heated air, steam, or hot water, to be fixed against any building on the face adjoining to any street or public way.
- (c.) Any pipe for conveying smoke or other products of combustion, to be fixed nearer than six inches to any combustible materials.
- (d.) Any pipe for conveying heated air or steam to be fixed nearer than six inches to any combustible materials.
- (e.) Any pipe for conveying hot water to be fixed nearer than three inches to any combustible materials, provided that the restriction imposed by this clause, and by sub-clause (d), with respect to the distance at which pipes for conveying steam and hot water shall be fixed from any combustible materials, shall not apply in the case of pipes provided with a free blow-off.
- (f.) The floor over any room or enclosed space in which a furnace is fixed, or any floor within eighteen inches from the crown of an oven, to be constructed of combustible materials.

Staircases.

41. Every person who shall hereafter construct or adapt any building for occupation in separate tenements by more than two families, shall cause the principal staircases of such building, which may be used by several families in common, to be ventilated upon every storey by means of windows or skylights, opening directly into the external air, or to be otherwise adequately ventilated.

42. Every person concerned in the erection of any dwelling-house, not subject to the provisions of the last preceding clause, shall cause the principal staircase in such dwelling-house to be ventilated by means of a window or skylight opening directly into the external air.

43. Every person concerned in the erection of a building of more than 150,000 cubic feet, which is constructed or adapted to be used as a dwelling house for separate families, shall cause the floor of the lobbies, corridors, passages, landings, and also the stairs, to be of fire-resisting materials, and, when over three storeys exclusive of basement, to be carried by supports of fire-resisting materials.

Habitable Rooms.

44. Every person concerned in the erection of any building containing a habitable room or rooms shall cause:—

- (a.) Every such room to have a capacity not less than eight hundred cubic feet.
- (b.) Every such room wholly or partly in the roof of such building to be at least feet in height from the floor to the ceiling throughout not less than one-half the floor area of such room.
- (c.) Every such room, not being wholly or partly in the roof, to be in every part at least eight feet six inches in height from the floor to the ceiling.
- (d.) Every such room to have one or more windows opening directly into the external air or into a conservatory with a total superficies clear of the sash frames and free from any obstruction to the light, equal to at least one-twelfth the floor area of such room, and so constructed that a portion equal to at least one twenty-fourth of such floor area can be opened, and that the opening in each case shall extend to at least seven feet above the floor level; provided that such room may be lighted by a lantern light which shall be hung to open with rods or lines and levers, of which a portion equal to at least one twenty-fourth of the floor area can be opened.
- (e.) Every such room constructed over a stable to be separated from the stable by a floor, which shall have in every part not occupied by a joist or girder a layer of concrete or clay pugging of good quality, or of other solid construction three inches in thickness, finished smooth upon the upper surface and properly supported, and the underside of such floor to be ceiled with lath and plaster of good quality, or of other solid construction; and every staircase, gallery, or structure by which such rooms shall be approached to be separated from the stable which it adjoins by a brick wall not less than eight and a half inches in thickness.
- (f.) Every such room, whether used for the purpose of habitation or for the assemblage of people for any purpose whatever, to be well and properly ventilated by the insertion of air bricks below the floor, and by openings in the sleeper walls, and by outlet ventilators in the ceilings, or at the top of the walls, of such room, with sufficient flues and pipes thereto, according to the position and size of such room.
- (g.) Every basement room having a wooden floor other than a floor constructed of solid wood bedded on concrete to have a sufficient space between the ground and the underside of the floor to admit of ventilation by means of air flues formed in the wall connected with air bricks or otherwise above ground level.

45. No person shall cause or allow to be constructed in any dwelling any habitable room, unless every window thereof opening directly into the external air at the side of such dwelling is provided with a clear air space, in the case of a single storied dwelling, of at least two feet and six inches, and in any other case of at least three feet wide, measured square on to the exterior face of the wall in which the window is situate, such air space being in the same ownership as the dwelling.

Light Courts.

46. No person shall cause or allow:—

- (a.) A habitable room, not having a window directly opening into the external air, otherwise than into a court enclosed on every side, to be constructed in any building, unless the width of such court, measured from such window to the opposite wall, shall be equal to half the height measured from the sill of such window to the eaves or top of the para-

pet of the opposite wall: Provided that a court of which the greater dimension does not exceed twice the lesser dimension shall be held to comply with this clause if a court of the same area, but square in shape, would comply therewith.

- (b.) No person shall cause or allow to be constructed in any building, other than a dwelling house, any habitable room, unless every window of such room opening directly into an external light court at the side of such building is provided with a clear space of at least four feet, measured square on to the external face of the wall in which such window is situate, such air space being in the same ownership as the said building.
- (c.) Any light court, wholly or in part open at the top, but enclosed on every side, and constructed and used for admitting light and air to a domestic building, to be constructed unless adequate provision shall have been made for the ventilation of such court by means of a communication capable of admitting fresh air to the lower end of such court.
- (d.) Any light court enclosed on every side, to be constructed in any building, unless means of access is given to such court by a doorway leading out from the ground storey of such building.
- (e.) Any light court, enclosed on every side, to be constructed, unless adequate provision for the proper drainage of such court shall first have been made.

Back Buildings.

47. No person shall cause or allow any habitable room to be constructed in any back building when the only window or windows of such room opening into the external air is or are situate in the wall which faces the front building, unless every window of such room be placed not nearer to the opposite wall of the front building than a distance of twelve feet.

Conversion of Buildings.

48. No person shall convert into, or use as a dwelling house, any building or part thereof not originally built as and for a dwelling within the limits of the municipality, whether built before or after the making of this By-law, without the previous consent of the Council.

Signboards, Signs, etc.

49. No person shall erect, put up, or place any signboard, sign, awning, blind, overhanging lamp, or other thing, over or near any footway or roadway within the municipality without first having obtained the written consent of the Council therefor. Permission to erect a signboard shall only be given where there is a verandah to which to affix such signboard, and every person who shall have obtained permission to erect a signboard shall cause the same to be securely fastened to such verandah at such a height in the clear of not less than eight feet from the footpath. No signboard shall be fixed to any covering of the verandah roof, or to any roof guttering, nor shall it project beyond the footway into the roadway.

Verandahs and Balconies.

50. No person shall erect any verandah or balcony over any public footpath within the limits of the Municipality of Leederville, unless he shall have obtained a license in accordance with Schedule IV. or V., and except in accordance with plans approved by the Council, nor shall he cause or allow any portion of any verandah or balcony, now or hereafter to be erected, to be enclosed.

Miscellaneous.

51. The owner of any building or premises shall fill up, secure, or remove any cellar-ways or openings which may be in or under any footway, and are used in connection with, or are appurtenant to such building or premises, whenever ordered by the Council to do so.

52. The owner of any building or premises shall, when ordered by the Council so to do, at his own expense, remove any verandah, balcony, or other obstruction used in connection with, or appurtenant to such building or premises, which shall obstruct the footway or street, or are dangerous, whether such verandah, bal-

cony, or other obstruction shall have been erected before or after the commencement of "The Municipal Corporations Act, 1906."

53. The owner of any lamp-post, telegraph, telephone, electric lighting, or tramway pole shall, when ordered by the Council so to do, at his own expense paint the same during such hours, and in such manner, as the Surveyor shall direct, and shall, at such like expense and when so ordered, remove any such posts or poles as shall be bent, dangerous, unsightly, or not in use.

54. No person shall erect any dangerous fence, or shall use barbed wire in the construction of any fence abutting on any public place.

55. The owner or occupier of any building occupied or used as a workshop, workroom, or office, which shall be partially or wholly constructed of iron zinc, or tin, shall, once in every three years, or oftener, when so ordered by the Council, cause such iron, zinc, or tin to be coated with refrigerating paint.

56. No person shall cause or allow any iron spike or other projection, broken glass, or barbed wire to be placed or fixed on any premises abutting upon a street or way.

57. No person shall construct any building without providing convenient means of access to the roof, by manholes or otherwise.

58. Timber framed gables to any bay window may be constructed in buildings of the domestic class, and in buildings of such classes, if approved and consented to by the Council, and endorsed on the drawings by the Building Surveyor.

59. All sky-lights in verandahs and buildings, and the sloping sides of all lantern lights, shall be protected by galvanised iron wire guards, securely fixed to the inside thereof.

Penalties.

60. This By-law shall apply to every part of the Municipality of Leederville, and any person who contravenes or does not comply with any one of the provisions of this By-law shall be deemed guilty of an offence against this By-law, and for every such offence shall be liable to a penalty not exceeding £20.

SCHEDULE II.

Fire Resisting Material

The following materials shall for the purposes of this By-law be deemed to be fire-resisting materials:—

1. Brickwork, constructed of good bricks, well burnt, hard and sound, properly bonded, and solidly put together with:—

(a.) Good mortar, composed of fresh burnt lime, and sharp clean sand; or

(b.) Good neat cement; or

(c.) Good cement, mixed with sharp clean sand.

2. Granite and other stone suitable for building purposes by reason of its solidity and durability.

3. Iron, steel, and copper.

4. Jarrah and other hard timber when used for beams, posts, or in combination with iron, the timber and iron, if in beams, being protected with plastering, or other incombustible or non-conducting external coating.

In the case of doors—Jarrah or other hard timber not less than two inches thick.

In the case of stairs—Jarrah or other hard timber with treads, strings, and risers not less than two inches thick.

5. Slate, tiles, brick, and terra cotta when used for coverings for corbels.

6. Flagstones when used for floors over arches, but not exposed on the under side and not supported at the ends only.

7. Concrete composed of broken stone, chippings, or ballast, and lime, cement, or calcined gypsum when used for filling in between joists and floors.

8. Any material from time to time approved by the Council as fire-resisting.

SCHEDULE III.

I,....., Building Surveyor of Leederville, under the powers invested in me by Part XV. of "The Municipal Corporations Act, 1906," hereby give you notice that the building situated in.....Street and numbered No....., of which you are the, is in a dangerous condition, and you are hereby required within.....days from the receipt of this notice to remove said building to my satisfaction.

Specifications and Conditions.

1. Any person wishing to erect a verandah must previous to commencing such erection, obtain from the Leederville Building Surveyor a license, in the form above set forth, and he will be required to deposit with the Surveyor a plan, elevation, section, and specification, showing in detail the construction of such verandah and the manner in which it is proposed to secure same to the building to which it is attached.

2. The blocks supporting the columns are to be sound sawn jarrah, 2 feet in length and 8 inches by 8 inches in section, placed with their outer faces close to the inside line of the kerbing, the blocks to be plumb, and the earth well rammed down around them.

3. The columns are to be best wrought or cast metal, or jarrah if approved by the Council, ornamental in design, sound, clean, and free from defects; the shafts of metal columns to be not less than 4 inches in diameter, nor less than $\frac{3}{4}$ of an inch thick in any part, the columns to be of approved design, and securely fixed to the blocks and superstructure. Jarrah posts to be not less than 5 inches square and chamfered, or 6 inches in diameter if round.

(Sgd.) A. SCOTT,
Secretary.

I approve of the arrears in this Schedule being written off, in accordance with the provisions of "The Roads Act, 1902."

FRANK WILSON,
Minister for Works.

THE GOLDFIELDS WATER SUPPLY ACT, 1902.

Notice.

BY virtue of the provisions of "The Goldfields Water Supply Act, 1902," notice is hereby given to all parties interested, and whose names are hereunder mentioned, that the sums set forth opposite their respective names in the schedule annexed have now been due and unpaid for twelve months in respect of rates made and assessed by the Goldfields Water Supply Board upon land situated and described in the certificate of title and containing the measurements, more or less, all as set forth in the said schedule, and payment of the said sums is now required; and the owners of the said properties, and all other persons interested therein, are warned that in default of payment of the said sums, together with all expenses caused by the non-payment of the same, on or before the twenty-fifth day of October, 1909, to the Secretary of the Goldfields Water Supply, or an officer duly authorised by him to receive moneys on his behalf, a petition will be presented by the said Board to the Supreme Court praying the said Court to order the said properties, or a competent part thereof, to be sold, pursuant to the provisions of the said Act.

Dated this twenty-seventh day of September, 1909.

FRANK WILSON,
Minister for Works,
Administering "The Goldfields Water Supply Act, 1902."
