**LAND OPEN FOR SELECTION.**

Department of Lands and Surveys,

Perth, 28th November, 1913.

IT is hereby notified, for general information, that His Excellency the Governor in Executive Council has been pleased to approve of the areas scheduled hereunder being made available for selection under "The Land Act, 1898," and its amendments. The selector of a Homestead Farm from any location available under Part VIII. must take the balance thereof under Conditional Purchase, and a selector of a portion of any location available under Part VI. must take the balance of same under Grazing Lease conditions.

The areas which are open under Part V. are open under Section 55 (Residential Conditions), and only under Section 56 (Non-residential Conditions) to those persons already holding their full complement under Section 55 in the immediate vicinity.

The lands marked with an asterisk are available under Part VI.

Applications must be lodged at the Local Land Office for the District in which the land is situated.

Any application may be lodged before the fixed date, but will be treated as having been received on that day; if there are more applicants than one for any lot, the application to be granted will be determined by the Land Board, and should any lands remain unselected such will continue available until applied for or otherwise dealt with.

If a Land Board sitting becomes necessary, after the closing of the date for receiving applications, notice will be given in the *Government Gazette* and at least one newspaper advising the applicants for the blocks of the date, time, and place of the meeting of the Board, to deal with the matter; but it shall not be obligatory on the Department to give any other notice.

If an applicant wishes to appear before the Land Board in person, he may apply to the Head Office or to the Clerk in Charge of any of the District or Branch Land Offices for a certificate to the Railway Department, which, on presentation at the nearest Railway Station, will entitle him to a Return Ticket, at Excursion Rates, to the place where the Board will sit, available for seven days from the date of issue.

Land specified as carrying an Agricultural Bank advance which is situated within 15 miles of a railway or authorised railway is available subject to the special conditions that an expenditure of not less than one-fourth of the amount set out shall be made on prescribed improvements in each of the first four years of the lease; but this shall not release the holder from any covenant in the Agricultural Bank Mortgage requiring the improvements to be made at an earlier date. Such advance is subject to the usual condition governing a loan from the Agricultural Bank, particulars of which may be had on application to the Managing Trustee. Applications for advance must be accompanied by a fee of one per cent.

# RULES AND DIRECTIONS FOR THE GUIDANCE OF SURVEYORS UNDER THE DEPARTMENT OF LANDS AND SURVEYS.

*Amendment of Regulations 89 to 96 inclusive, 112, and 168.*

Department of Lands and Surveys,  
7027/02. Perth, 28th November, 1913.

HIS Excellency the Governor in Executive Council, under Section 161 of "The Land Act, 1898," has been pleased to cancel Clauses 89 to 96 inclusive, 112, and Sub-clause C of Clause 168 of the Rules and Directions for the Guidance of Surveyors under the Department of Lands and Surveys, and to substitute the following:—

89. Extreme care must be exercised in the selection of sites for Town and Suburban lands. The natural features and general topography should be such as to provide for the efficient surface drainage of the allotments and streets. Where practicable, streets should be located on the lower levels, in order that surface water may drain from the allotments into the street channels. The nature of the sub-soil and geological structure of the site will have an important bearing on the health of the town, and consequently impervious low-lying ground should be avoided wherever possible.

The probable extent of population and settlement in the surrounding district must be duly considered, and provision made for any extension that may be required in the future.

90. Whenever the nature of the country and other conditions will admit of it, townsites should be laid out in rectangular sections 8 chains by 5 chains 25 links, each section to be intersected centrally by a lane 25 links wide parallel to its longer side, and subdivided into allotments, of a quarter of an acre each, with the exception of the corner lots with a frontage of 100 links and depth of 250 links.

In subdivisions of town allotments of an area of one acre and under all angles of 95deg. and under at intersections of streets, shall be excised from the allotments by chords laid off at right angles to the lines bisecting the angles, and of the following lengths:—

Angles between 95deg. and 85deg., length of chord 14.16 links.

Angles between 85deg. and 75deg., length of chord 24 links.

Angles between 75deg. and 60deg., length of chord 36 links.

Angles under 60deg., length of chord 48 links.

The acute angles of rights-of-way must be similarly excised. See Appendix No. 10.

91. The streets which are likely to become the main thoroughfares of a large and populous centre should have a width of not less than 150 links, but others should be 100 links wide.

92. Before the permanent work on any survey of town or suburban lands is commenced, a design of the proposed arrangements of streets and allotments shall (unless otherwise instructed) be submitted for the approval of the Surveyor General. The dimensions and approximate areas of the proposed lots must be indicated thereon.

In order to insure well graded streets and efficient drainage, sufficient data should be obtained by the surveyor to enable approximate contour lines to be plotted on the plan of the site. A report on the suitability and general characteristics of the site selected shall accompany the design, and if a departure from the before-mentioned directions relating to the manner of laying out the townsite is necessary, the reason for such departure must be given.

93. Open spaces should be reserved where necessary, and sites suggested for schools (about 5 acres), public buildings, educational endowments (about 8 or 10 acres), recreation grounds, and other public purposes, but not surveyed without special instructions.

Townsites adjoining railway sidings are to be marked where practicable on the platform side of the line with a reservation for shelter purposes 150 links wide fronting the station yard.

94. The quarter acre lots should be confined to the portions of the townsite deemed likely to become the business or more thickly populated centres. Sufficient space having been provided for these, the sizes of the allotments should be increased to afford sites for residences, etc., away from the central parts. The size of allotments and width of streets in the out-lying portions must be determined by the physical features, nature of soil, climatic conditions, and probable increase of population.

During the progress of the subdivision sufficient permanent levels shall be taken over that portion of the townsite which is subdivided into allotments of one acre and under, to enable accurate contour lines to be plotted on the plan. The vertical intervals between contour lines will vary according to the nature of the country and should not exceed five feet.

Contour levels to be connected to railway or water supply levels when within a reasonable distance thereof, and reduced to a mean sea level datum. Not less than two bench marks shall be provided in each town in localities free from probable disturbance branded thus

$$\begin{array}{c} \wedge \\ \text{L} \ \& \ \text{S} \end{array}$$
 connected to the town survey and shown on the 2 plan.

Contour lines shall be shown on the original plan of the townsite in broken red lines and red figures.

All contour levelling performed by a Contract Surveyor will be paid for at daily rates as provided for under Departmental Regulations 160 and 171.

95. Where conditions are favourable, provision should be made for park lands within, or in the immediate vicinity of, the town.

96. Suitable sites should be selected in the vicinity of the town for hospitals, cemeteries, camping places, commons, abattoirs, sanitary depôts, etc., but not surveyed without special instructions.

112. Subject to the provisions of Departmental Regulation No. 32, a Surveyor shall not remove, obliterate, or alter the positions of any marks of an authorised survey without special instructions from the Surveyor General.

When issuing instructions for a survey to be amended, the Surveyor General will specify the portions of the old survey to be obliterated, and the Surveyor shall

record in his field notes the positions of all old marks, etc., that he has removed or obliterated.

168c. Two shillings and sixpence for each permanent reference mark referred to in Clause 47 of the General Regulations.

R. CECIL CLIFTON,  
Under Secretary for Lands.
