PERTH: FRIDAY, JULY 28.

[1916

Executive Council Office,
Perth, Western Australia.

NOTICE is hereby given that at a Special Meeting of the Executive Council held in the Executive Council Chamber, Perth, on Thursday, the 27th day of July, 1916, at 2 o'clock, p.m., His Excellency informed the Council that he had received and accepted the resignation of the following Ministers and Members of the Executive Council:—

The Hon. John Scaddan, M.L.A., Colonial Treasurer, and Minister for Railways.

The Hon. Philip Collier, M.L.A., Minister for Mines and Water Supply.

The Hon. William Dartnell Johnson, M.L.A., Minister for Lands and Agriculture.

The Hon. Thomas Walker, M.L.A., Attorney General and Minister for Education.

The Hon. John Michael Drew, M.L.C., Colonial Secretary.

The Hon. William Charles Angwin, M.L.A., Minister for Public Works.

The Hon. Jabez Edward Dodd, M.L.C.

The Hon. Rufus Henry Underwood, M.L.A.

His Excellency also informed the Council that he had entrusted the Hon. Frank Wilson, C.M.G., M.L.A., with the formation of a new administration, and Mr Wilson had submitted the following appointments, which His Excellency had approved:—

The Hon. Frank Wilson, C.M.G., M.L.A., Colonial Treasurer.

The Hon. H. B. Lefroy, C.M.G., M.L.A., Minister for Lands and Agriculture.

The Hon. James Mitchell, M.L.A., Minister for Railways, Water Supply, and Industries.

The Hon. H. P. Colebatch, M.L.C., Colonial Secretary and Minister for Education.

W. J. George, M.L.A., Minister for Works and Trading Concerns.

R. T. Robinson, K.C., M.L.A., Attorney General and Minister for Mines.

The Hon. J. D. Connolly, M.L.A., Minister without Portfolio.

The Hon. A. J. H. Saw, M.L.C., Minister without Portfolio.

The Members of the new Ministry were then introduced, and His Excellency administered to each the oath of allegiance and the oath prescribed to be taken by members of the Executive Council, and to each of the Ministers holding portfolios the oath of office.

The new Ministers then took their seats at the Council table.

His Excellency the Governor in Council was pleased to designate and declare the following to be the six principal Executive Offices of the Government:—

1. Colonial Treasurer.
2. Minister for Lands and Agriculture.
3. Minister for Railways, Water Supply, and Industries.

4. Colonial Secretary and Minister for Education.
 5. Minister for Works and Trading Concerns.
 6. Attorney General and Minister for Mines.
- The Council afterwards adjourned.
Dated this 27th day of July, 1916.

By Command of His Excellency,
BERNARD PARKER,
Clerk of the Executive Council.

BERNARD PARKER,
Clerk of Executive Council.

THE GOVERNMENT SAVINGS BANK.
The Treasury,

Perth, 20th July, 1916.

IT is hereby notified, for general information, that the Agency of the Government Savings Bank at Dwellingup has been transferred from Mr. J. C. Smart to Mr. John Whologan, Baker, etc., and that business is now being transacted in the premises of the last-named.

(Sgd.) E. A. BLACK,

Under Treasurer and Controller General of Accounts.

No. 15068.—C.S.O.

NOTICE TO MARINERS.

Colonial Secretary's Office,
Perth 7th July, 1916.

THE following Notice to Mariners is published for general information.

F. D. NORTH,
Under Secretary.

FREMANTLE HARBOUR TRUST.

Challenger Rock Buoy Missing.

NOTICE is hereby given, for information and guidance of mariners using the Challenger Passage between Garden and Carnac Islands, Cockburn Sound, Fremantle Harbour, that the buoy marking the position of the Challenger Rock has disappeared, having apparently broken away in heavy weather.

Steps are being taken to replace the buoy, but in the meantime the danger is not marked.

Charts affected: Rottneest Island to Warnbro' Sound Nos. 1058 and 3017.

Dated at Fremantle, 3rd July, 1916.

C. J. IRVINE, Harbour Master.
F. STEVENS, Secretary.

LEGISLATIVE ASSEMBLY.

Coolgardie, By-election.

IT is hereby notified, for public information, that I have this day received from the Honourable the Speaker a Warrant, authorising and directing me to proceed forthwith to issue a Writ for the election of one Member for the Coolgardie Electoral District, and that, pursuant to such Warrant, I have this day issued the Writ accordingly.

The dates connected therewith are as follows:—

Nomination—Wednesday, the 26th July, 1916.

Polling day—Saturday, the 12th August, 1916.

Return of Writ—Saturday, the 19th August, 1916.

E. G. STENBERG,
Clerk of the Writs.

Chief Electoral Office,
18th July, 1916.

Crown Law Department,
Perth, 27th July, 1916.
C.L.D. 3498/1916.
THE Hon. Attorney General has approved of the following appointments and cancellation of Postal Vote Officers, under Section 89 of "The Electoral Act, 1907":—

CANCELLATION.

Nelson District.
Hester—Gould, Ada (Miss).

H. G. HAMPTON,
Under Secretary for Law.

S. 1714/16.

COMMONWEALTH OF AUSTRALIA.

Notification of Vacancies.

The Treasury,
Perth, 24th July, 1916.

APPLICATIONS are invited by the Commonwealth Public Service Commissioner from persons qualified for appointment to the following positions.

Applicants outside the Public Service are eligible for appointment to the Administrative and Professional Divisions, but are not eligible for appointment to Clerical or General Division vacancies unless they were in the service of a State on 1st January, 1901, or have retired from the service of the Commonwealth or of a State.

Applicants who are officers of the Public Service of a State should state the date of their appointment to the service, present position, and salary.

Applicants from outside the service should state their qualifications for the office they seek. Copies only of diplomas, references, testimonials, or certificates should be forwarded. If the originals are required they will be asked for.

Date and year of birth should be stated, and applications must be in applicants' hand-writing.

Applications should be addressed to the "Commonwealth Public Service Inspector" of the State in which the vacancy exists, and in the case of officers of the Commonwealth Service be forwarded through the chief officer of the department to which the applicant belongs.

Minimum and maximum salaries, where shown, indicate the limits of the class or grade in which the position is classified. Subject to the provisions of the Public Service Act, appointments may be made at any salary within those limits. Successful appointees must comply with the life assurance provisions of the Public Service Act and Regulations.

E. A. BLACK,
Under Treasurer and Controller General of Accounts.

Barker).—No. 16447 (Rifle Range).—Location 2840; being the area bounded by lines starting from a point situated 271deg. 1min. 11 chains 89.3 links from the North-East corner of Plantagenet Location 2207, and extending 180deg. 0min. 6 chains 32.4 links; thence 140deg. 15min. 46 chains 81.5 links; thence 136deg. 39min. 45 chains 69 links; thence 146deg. 40min. 55 chains; thence 236deg. 40min. 28 chains 26 links; thence 326deg. 40min. 55 chains; thence 336deg. 41min. 45 chains 69 links; thence 333deg. 5min. 45 chains 54.8 links; thence 0deg. 0min. for a distance of 8 chains 50.4 links; thence 91deg. 1min. 1 chain to the starting point. (Reserve 15290 is hereby cancelled.) (280 acres 2r. 8p.) (Plans 445 and 451/80.)

R. CECIL CLIFTON,
Under Secretary for Lands.

EXTENSION OF TIME FOR RECEIVING APPLICATIONS FOR WELLINGTON LOCATION 2707.

(Near Goodwood.)

Department of Lands and Surveys,
Perth, 21st July, 1916.
Corres. 6687/09.

IT is hereby notified that the date for receiving applications for Wellington Location 2707 has been extended to the 31st July, 1916, and applications for this location may be lodged at the Bridgetown Local Land Office.

R. CECIL CLIFTON,
Under Secretary for Lands.

OPEN FOR LEASING.

Reserve 7640, near Eradu.

Department of Lands and Surveys,
Perth, 21st July, 1916.

IT is hereby notified that Reserve 7640, near Eradu, situated on the Geraldton-Mullewa Railway, will be available for leasing under Section 41a of "The Land Act, 1898," for Pastoral Purposes, on and after the 9th August, 1916, at a rental of £2 per annum; lease to be renewable at the will of the Minister for Lands and subject to determination at three months' notice on either side. (Plan 157/80.)

R. CECIL CLIFTON,
Under Secretary for Lands.

NOTICE OF INTENTION TO LEASE UNDER SECTION 152 OF THE LAND ACT FOR A TERM LONGER THAN 10 YEARS.

Department of Lands and Surveys,
Corres. 4275/03. Perth, 14th July, 1916.

IT is hereby notified that it is proposed to extend the term of the lease of Special Lease 1507/152, at Collie, held by the Proprietary Coal Mines of W.A., Ltd., for residence purposes, to 21 years.

R. CECIL CLIFTON,
Under Secretary for Lands.

LANDS AVAILABLE FOR PASTORAL LEASING.

Department of Lands and Surveys,
Perth, 14th July, 1916.

IT is hereby notified, for general information, that the land comprised within the following forfeited Pastoral Leases will be again available for leasing under Part X. of "The Land Act, 1898," on the 2nd August, 1916. Applications to be lodged at the Local Land Office for the District in which the land is situated:—

R. CECIL CLIFTON,
Under Secretary for Lands.

LOTS OPEN FOR LEASING FOR CULTIVATION.

Department of Lands and Surveys,
Perth, 28th July, 1916.

IT is hereby notified, for general information, that the undermentioned Lots are available for leasing, subject to the Regulations for the Leasing of Town and Suburban Lands for Cultivation, on and after the dates specified in the Schedule below:—

Corr. No.	Town.	Lot Nos.	Capital Value.	Annual Rental.	Open WEDNESDAY.	Applications to be lodged at	Remarks.
2448/15	Kalgoorlie ...	3007, 3008, 3009, and 3010	£50	£1 10s.	1916. 9th August ...	Kalgoorlie	
932/15	Murray Loca- tion	1108... ..	£23 6s. 8d.	14s.	9th August ...	Perth ...	Subject to the payment of £5 for value of well thereon. Reserve 2461 is hereby reduced.
1264/98	Wagerup ...	58 51, 52, 55, 59, and 61 to 64 (incl). 53, 54, 56, and 57	£23 6s. 8d. £20 each £16 13s. 4d. each	14s. 12s. each 10s. each	9th August ...	Bunbury.	

Selection is limited to ONE LOT to each person, unless otherwise stated.

Plans showing the arrangements of the Lots referred to will shortly be obtainable at this office and the various District or Branch Land and Survey Offices.

Applications may be lodged at the offices mentioned at any time prior to the dates specified, and any applications so lodged will be deemed to have been lodged on that day.

In the event of two or more applications for the same lot, priority will be determined as prescribed by Section 17 of "The Land Act, 1898," and Section 2 of "The Land Act Amendment Act, 1900."

In the event of any applicant obtaining a lot on which there are improvements not erected or owned by such applicant, and which have not been included in the valuation of the lot, he shall pay the fair value of such improvements to the Minister for Lands or his agent, within 30 days, at the place mentioned before his application is approved.

Intending applicants are requested to lodge their applications before the date specified, and are reminded that it is unnecessary to employ an agent, as applications may be lodged personally or sent through the post.

Each of the above-mentioned lots will be leased on the condition that the purchaser or his transferees shall not at any time obtain or hold a license for the sale of intoxicating liquor on the lot purchased.

R. CECIL CLIFTON,
Under Secretary for Lands.

FORFEITURES.

Department of Lands and Surveys,
Perth, 28th July, 1916.

THE undermentioned Leases have been forfeited under Section 136 of "The Land Act, 1898," for Non-payment of Rent due to 31st December, 1915:—

Name.	District and Loca- tion No.	Lease No.	Area.	Rent.	Corr. No.

R. CECIL CLIFTON,
Under Secretary for Lands.

OPEN FOR LEASING.

Department of Lands and Surveys,
Perth, 14th July, 1916.
Corres. 1260/12.

Brookton Lots 27 and 28.

IT is hereby notified that Brookton Lots 27 and 28 will be available for leasing, under Section 41a of "The Land Act, 1898," on and after Wednesday, 2nd August, 1916; lease to be renewable at the will of the Minister for Lands and subject to determination at three months' notice on either side.

Rental, 15s. per annum for each lot.
Applications to be lodged at Beverley.

Wagin Agricultural Area Lot 82.

Reserve 2572.

IT is hereby notified that Reserve 2572, being Wagin Agricultural Area Lot 82, will be available for leasing for Grazing Purposes, under Section 41a of "The Land Act, 1898," at a rental of £1 per annum, on and after Wednesday, 2nd August, 1916. Lease to be renewable at the will of the Minister for Lands, but subject to determination at three months' notice on either side, rent being apportioned accordingly. Subject also to the right of picnickers to enter and camp on the ground, and with a proviso that the lessee shall not be allowed to cut any trees down.

Applications to be lodged at the Land Office, Wagin.
(Plan 409B/40.)

R. CECIL CLIFTON,
Under Secretary for Lands.

TOWN LOTS OPEN FOR LEASING.

Department of Lands and Surveys,
Perth, 28th July, 1916.

IT is hereby notified, for general information, that the undermentioned Lots are available for leasing, subject to the Regulations for the Leasing of Town and Suburban Lands, on and after the dates specified below, at the annual rentals shown in brackets:—

OPEN WEDNESDAY, 2nd AUGUST, 1916.

Applications to be lodged at Kalgoorlie:—
13453/04—KALGOORLIE, 2534, £15 (12s.).

Applications to be lodged at Northam:—
3850/13—TAMMIN, 103, £25 (£1).

OPEN WEDNESDAY, 9th AUGUST, 1916.

Applications to be lodged at Kalgoorlie:—
2223/04—BOULDER, 1757, £15 (12s.).

Applications to be lodged at Perth:—
8784/12, Vol. 2—MEEKATHARRA, 550 and 558, £20 each (16s. each); 545 to 549 (incl.), 553 to 557 (incl.), 559, 563, 564, 571, 578, 579, 586, 587, 594, and 602, £15 each (12s. each); 560, 561, 562, 565 to 570 (incl.), 572 to 577 (incl.), 581 to 585 (incl.), 588, 590, 591, 592, 595 to 601 (incl.), £12 10s. each (10s. each).
Improvements: Lot 560, value £35; Lot 561, value £10; Lot 564, value £90; Lot 567, value £86; Lot 569, value £20; Lot 578, to be assessed; Lot 579, value £30; Lot 582, value £25. Lots 543, 544, 551, 552, 580, 589, and 593 have been excepted from leasing and occupation as Reserve 15480.

Applications to be lodged at Northam:—
6683/08—YORK, 384 to 389 (incl.), £75 (£3). To be leased as one lot.

OPEN WEDNESDAY, 16th AUGUST, 1916.

Applications to be lodged at Kalgoorlie:—
12398/00—SOUTH BOULDER, 363F, £12 10s. (10s.).

OPEN WEDNESDAY, 23rd AUGUST, 1916.

Applications to be lodged at Kalgoorlie:—
2657/04—SOUTH BOULDER, F70, £15 (12s.). Subject to value of improvements.
3135/97—KALGOORLIE, 451, £75 (£3).

Applications to be lodged at Kalgoorlie:—
333/01—BOULDER, 1518 and 1519, £15 each (12s. each). Reserve 7919 is hereby cancelled.

Plans showing the arrangements of the Lots referred to are now obtainable at this office and the various District or Branch District Land and Survey offices.

Applications may be lodged at the offices mentioned at any time prior to the dates specified, and any applications so lodged will be deemed to have been lodged on that day.

In the event of two or more applications for the same Lot, priority will be determined as prescribed by Section 17 of "The Land Act, 1898," and Section 2 of "The Land Act Amendment Act, 1900."

In the event of any applicant obtaining a Lot on which there are improvements, not erected or owned by such applicant, he shall pay the fair value of such improvements to the Minister for Lands or his agent within 30 days in the manner provided by Clause 16 of the above Regulations.

Intending applicants are requested to lodge their applications before the date specified, and are reminded that it is unnecessary to employ an agent, as applications may be lodged personally or sent through the post.

*Each of the above-mentioned lots in townsites marked with an asterisk, exclusive of reserves, will be leased on the condition that the purchaser or his transferees shall not at any time obtain or hold a license for the sale of intoxicating liquor on the lot purchased.

†Subject to the condition that the lessee shall not carry on, or permit or suffer to be carried on, on this lot any trade or business whatsoever without the consent in writing of the Minister for Lands being first obtained.

R. CECIL CLIFTON,
Under Secretary for Lands.

LAND OPEN FOR SELECTION.

Department of Lands and Surveys,
Perth, 28th July, 1916.

IT is hereby notified, for general information, that the areas scheduled hereunder will be made available for selection under "The Land Act, 1898," and its amendments, on and after the dates set out in said schedule. The selector of a Homestead Farm from any location available under Part VIII. must take the balance thereof under Conditional Purchase, and a selector of a portion of any location available under Part VI. must take the balance of same under Grazing Lease Conditions.

The lands marked with an asterisk are available under Part VI.

Applications must be lodged at the Local Land Office for the district in which the land is situated.

Any application may be lodged before the fixed date, but will be treated as having been received on that day; if there are more applicants than one for any lot the application to be granted will be determined by the Land Board, and should any lands remain unselected such will continue available until applied for or otherwise dealt with.

If a Land Board sitting becomes necessary, after the closing of the date for receiving applications, notice will be given in the *Government Gazette* and at least one newspaper advising the applicants for the blocks of the date, time, and place of the meeting of the Board, to deal with the matter; but it shall not be obligatory on the Department to give any other notice.

If an applicant wishes to appear before the Land Board in person, he may apply to the Head Office or to the Clerk in Charge of any of the District or Branch Land Offices for a certificate to the Railway Department, which, on presentation at the nearest Railway Station, will entitle him to a Return Ticket, at Excursion Rates, to the place where the Board will sit, available for seven days from the date of issue.

OPEN WEDNESDAY, 2nd AUGUST, 1916.

BRIDGETOWN LOCAL LAND DISTRICT.
Nelson District (near Nannup).

R. CECIL CLIFTON,
Under Secretary for Lands.

LAND FORFEITED AND AGAIN OPEN FOR SELECTION.

Department of Lands and Surveys,
Perth, 28th July, 1916.

IT is hereby notified, for general information, that the undermentioned Leases, Licenses, and Occupation Certificates have been forfeited for non-compliance with the conditions under which they were granted, and the land contained therein will be again open for selection, under "The Land Act, 1898," and its amendments, on and after the dates and at the places mentioned.

The selector of a Homestead Farm from any location available under Part VIII. must take the balance thereof under Conditional Purchase, and a selector of a portion of any location available under Part VI. must take the balance of same under Grazing Lease Conditions.

The lands marked with an asterisk are available under Part VI.

Applications must be lodged at the Local Land Office for the District in which the land is situated.

Any application may be lodged before the fixed date, but will be treated as having been received on that day; if there are more applicants than one for any lot, the application to be granted will be determined by the Land Board, and should any lands remain unselected such will continue available until applied for or otherwise dealt with.

If a Land Board sitting becomes necessary after the closing of the date for receiving applications, notice will be given in the *Government Gazette* and at least one newspaper advising the applicants for the blocks of the date, time, and place of the meeting of the Board, to deal with the matter; but it shall not be obligatory on the Department to give any other notice.

If an applicant wishes to appear before the Land Board in person, he may apply to the Head Office or to the Clerk in Charge of any of the District or Branch Land Offices for a certificate to the Railway Department, which, on presentation at the nearest Railway Station, will entitle him to a Return Ticket at Excursion Rates, to the place where the Board will sit, available for seven days from the date of issue.

SCHEDULES.

OPEN WEDNESDAY, 2nd AUGUST, 1916.

ALBANY LOCAL LAND DISTRICT.

Plantagenet District.

Corr. No. 6426/14.
Open under Parts V. and VIII. (Plan 451/80, B2.)

By order of the Hon. the Minister for Works,

C. A. MUNT,
Under Secretary for Public Works.

THE MUNICIPAL CORPORATIONS ACT, 1906,
AND THE HEALTH ACT, 1911.

The City of Perth.

Ex. Co. 2027; P.W. 2233/16.

IT is hereby notified, for general information, that His Excellency the Governor in Council has approved of the attached By-laws of the City of Perth, in accordance with the provisions of "The Municipal Corporations Act, 1906," and "The Health Act, 1911."

C. A. MUNT,

Under Secretary for Works and Industries.

CITY OF PERTH.

Building By-law.

No. 39.

IN pursuance of the powers in that behalf contained in Parts VIII. and XV. of "The Municipal Corporations Act, 1906," and "The Health Act, 1911," the Municipal Council of the City of Perth doth hereby make the following By-law:—

Repeal.

1. All By-laws heretofore made by the Municipal Council of the City of Perth, with reference to the matters hereinafter contained, are hereby repealed.

Interpretation Clause.

2. In the construction of this By-law, unless the context otherwise requires:—

(a.) The word "Act" shall mean "The Municipal Corporations Act, 1906," and the words "Health Act" shall mean "The Health Act, 1911," and any amendments of either of the said Acts.

(b.) The several words mentioned in the sixth section of "The Municipal Corporations Act, 1906," shall have the same meaning as is attached to such words by the said section, and the several words mentioned in the third section of the Health Act shall have the same meaning as is attached to such words by the said section.

(c.) The word "Building" shall mean any structure erected for the purpose of shelter from the weather either set on the ground or built into the ground, and which is surrounded by walls or supported partially or wholly on posts, and with open sides, provided it remains on the site where it is placed or constructed.

(d.) The expression "Foundation" applied to a wall having footings shall mean the solid ground or artificially formed supports on which the footings of the wall rest.

(e.) The expression "Footings" shall mean the extra spread of wall between the base of the wall and the foundation.

(f.) The expression "Bressummer" shall mean a metallic girder which carries a wall.

(g.) The expression "Base" applied to a wall having footings shall mean the underside of the course immediately above the footings, or in the case of a wall carried by a bressummer, above such bressummer.

(h.) "Main Wall" shall mean that part of an external or party wall which is above the footings.

(i.) "Curtain Wall" shall mean that part of an external wall which is built between the piers, and on the footings or on a bressummer, provided that no curtain wall shall exceed eighteen feet, or more than one storey in height, and on each storey the curtain wall shall be supported independently of the curtain wall below it.

(j.) "Partition Wall" shall mean an interior wall of brick, stone, or concrete, the concrete being either plain or re-inforced.

(k.) "Partition" shall mean an interior wall for dividing spaces constructed of panel work, wood, framing covered with metal, or lath and plaster, either the full height from floor to ceiling or less.

(l.) The expression "Ground Storey" shall mean the storey of a building to which there is an entrance from the outside on or near the level of the ground, and where there are two such storeys, then the lower of the two. Provided that no storey of which the upper surface of the floor is more than four (4) feet below the level of the adjoining pavement shall be deemed to be the ground storey.

(m.) The expression "Basement Storey" shall mean any storey of a building which is under the ground storey.

(n.) The expression "First Storey" shall mean that storey of a building which is next above the ground

storey, the successive storeys above the first storey being the second storey, the third storey, and so on to the topmost storey.

(o.) The expression "Topmost Storey" shall mean the uppermost storey in a building, the ceiling of which is not more than two feet above the lower edge of the tie beam of the roof or the top side of the wall plate.

(p.) "Attic" shall mean a storey either wholly or partly in the roof of which the ceiling is more than two feet above the lower edge of the tie beam of the roof, or the top side of the wall plate.

(q.) The expression "External Wall" shall mean the outer wall when under a main roof, or the outside wall of a habitable room, or the outer wall of the main building.

(r.) The expression "Party Wall" shall apply to every wall used or built as a separation of any building from any other building, such buildings being owned and/or occupied by different persons.

(s.) The expression "Cross Wall" shall mean a wall used or constructed to be used in any part of its height as an inner wall of a building for separation of one part from another part of a building, that building being wholly in or being constructed or adapted to be wholly in one occupation.

(t.) The expression "Party Fence Wall" shall mean a wall used or constructed to be used as a separation of adjoining lands of different owners, and standing on lands of different owners, and not being part of a building, but does not include a wall constructed on the land of one owner, the footings of which project into the land of another owner.

(u.) The expression "Party Arch" shall mean an arch separating adjoining buildings, storeys, or rooms belonging to different owners, or occupied or constructed, or adapted to be occupied by different persons, or separating a building from a public way or a private way leading to premises in other occupation.

(v.) The expression "Party Structure" shall mean a party wall or other structure separating two buildings, when occupied as separate tenements, and approached by different staircases or separate entrances from without.

(w.) The expression "Height" in relation to any wall shall mean the measurement taken from the level of the base of such wall to the level of the top of the parapet, or, where there is no parapet, to the level of the top of the external wall, or, in the case of gabled buildings, to a level half-way between the base and the apex of such gable. Provided that where pediments are constructed above the top of the parapet or above the top of the wall, as the case may be, the height of the wall for the whole width of the pediment shall be measured from the base of the wall to a level half-way between the base and the top of such pediment.

(x.) The expression "Floor Area" applied to a building shall mean the aggregate superficial areas of so many horizontal sections thereof as there are floors in the said building. The horizontal section of each floor shall be made at the point of its greatest surface dimensions, inclusive of external walls and of such portions of the party walls as belong to the building, and also of all verandah and balcony floors, covered ways, and light courts.

(y.) The expression "Square" applied to the measurement of the area of a building shall mean the space of one hundred (100) superficial feet.

(z.) The expression "Cubical Contents" applied to the measurement of a building shall mean the space contained within the external surfaces of the walls and the ceilings of the topmost storey, or, where there is no such ceiling, the roof and upper surface of the floor of its lowest storey.

(aa.) The expression "Dwelling House" shall mean a building used or constructed or adapted to be used wholly or principally for human habitation, not being a building the property of or occupied by or under the control or management of His Majesty's Government or any department thereof.

(bb.) The expression "Domestic Building" includes a dwelling house, suite of offices, or any other building not being a public building or building of the warehouse class, or a building the property of or occupied by or under the control or management of His Majesty's Government or any department thereof.

(cc.) The expression "Public Building" shall mean and include every building used as a church, chapel, or other place of public worship; also every building used for purpose of public instruction; also every building used as a college, public hall, hospital, theatre, public concert room, public exhibition room, or for any other

public purposes, not being a building the property of or occupied by or under the control or management of His Majesty's Government or any department thereof.

(dd.) The expression "Building of the Warehouse Class" shall mean a warehouse, factory, manufactory, brewery or distillery, and any other building exceeding in cubical contents one hundred and fifty thousand (150,000) cubic feet, which is neither a public building, nor a domestic building, nor a building the property of or occupied by or under the control or management of His Majesty's Government or any department thereof.

(ee.) The expression "inhabited" applied to a room shall mean a room in which some person passes the night, or which is used as a living room, including a room with respect to which there is a probable presumption (until the contrary is shown) that some person passes the night therein, or that it is used as a living room.

(ff.) The expression "habitable" applied to a room shall mean a room constructed or adapted to be inhabited.

(gg.) The expression "building owner" shall mean such one of the owners of adjoining land as is desirous of building, or such one of the owners of buildings, storeys, or rooms separated from one another by a party wall or party structure as does or is desirous of doing a work affecting that party wall or party structure.

(hh.) The expression "adjoining owner" shall mean the owner or one of the owners, and "adjoining occupier" shall mean the occupier or one of the occupiers of land, buildings, storeys, or rooms adjoining those of the building owner.

(ii.) "Surveyor" means the City Building Surveyor of the City of Perth, or an officer appointed to act as such for the time being.

(jj.) "Engineer" means the City Engineer of the City of Perth, or any officer appointed to act as such for the time being.

(kk.) "Non-inflammable materials" shall mean the materials specified in Schedule 6 of this By-law.

3. Every person intending to erect any building or alter or add to any building within the Municipality of the City of Perth shall, fourteen days before commencing to erect, alter, or add to the same, make application in the form provided in Schedule 1 to this By-law, and deposit with the Building Surveyor for a period of fourteen days, drawings showing the plans, elevations, and sections of such proposed building, addition, or alteration, together with full and complete specifications of the work proposed to be done. A locality plan showing the position occupied or to be occupied by such building shall at the same time be deposited with the Surveyor, which plan shall remain permanently in his custody. A plan showing the existing and any proposed storm-water drains used or to be used in connection with any new or additional building shall at the same time be deposited with the City Engineer, which plan shall remain permanently in his custody. In the case of buildings or alterations or additions to the buildings specified in paragraphs (b) and (c) of this clause, the said period of fourteen days shall be reduced to periods of three days and seven days respectively. All plans and drawings shall be prepared in the manner hereafter provided:—

(a.) All drawings shall be in ink on drawing paper, tracing cloth, or sun print of at least 15 inches by 22 inches in size. The drawing shall consist of complete plans of every storey, elevations of external fronts, and one or more sections, transverse or longitudinal, showing heights of storeys, depths of foundations, level of ground, construction of walls, roofs, floors, etc., all clearly figured and dimensioned in feet and inches; also a locality plan showing location of proposed site, with cardinal or north point, showing the size and shape of the lot on which it is proposed to erect, alter, or make additions to the building, the position of the proposed building, and any building or buildings already on the lot, the relative levels of the lot with the street or way adjoining, and the position and size of any existing drains or sewers, and the position, size, depth, and gradients of all proposed drains or sewers, and the position of inlet traps and ventilators. All sizes and positions shall be figured and shown on the locality plan. Existing sewers shall be shown in black full lines, and the existing storm-water drains by broken lines thus - - - - -. All proposed drains for sewerage shall be shown in green full lines, and the proposed storm-water drains in red full lines.

- (b.) All plans for single storey brick or stone or plain concrete buildings shall be lodged with the Surveyor for three days before work is commenced.
- (c.) All plans for brick or stone or plain concrete buildings of the value of Ten thousand pounds or over, or that contain more than one storey, shall be lodged for seven days.
- (d.) All plans for steel skeleton buildings, or where the whole of the floor loads above the basement or above the ground floor in buildings having no basement are carried on steel or cast iron work, shall be lodged for fourteen days.
- (e.) All plans for re-inforced concrete buildings, or when re-inforced concrete is used in the construction of floors or walls, shall be lodged for fourteen days.
- (f.) Existing buildings shall be coloured "blue," and proposed new buildings shall be coloured "pink" on the locality plan.
- (g.) The locality plan shall be drawn to a scale of sixteen feet to one inch. General drawings shall be to a scale of not less than eight feet to one inch, and details to a scale of not less than four feet to one inch.
- (h.) When a block plan has already been lodged for the site, the insertion of the new additions or alterations will be sufficient. The existing plan can be seen at the City Building Surveyor's office.
- (i.) All plans, drawings, and specifications must be signed by the building owner or his duly authorised agent.
- (j.) When plans are prepared, the calculated amount of the superimposed or accidental load shall be endorsed on the various floor plans.

4. No person shall commence to erect, alter, or add to any such building until the City Building Surveyor shall have signified his approval of such plans and specifications by stamping the plans and specifications with his official stamp showing the number of the application, the date of his approval, and his written signature.

5. On the approval of the City Building Surveyor being so given, and on payment of the prescribed fees, a license in the form of Schedule 2 to this By-law shall then be issued by the City Building Surveyor to the building owner or his agent.

6. The scale of fees more particularly specified in Schedule No. 3 to the By-law shall be the scale of fees to be paid by owners, builders, or other persons in respect of any orders, licenses, matters, and things required or permitted by the said Act or by this By-law.

7. No person who shall have obtained the approval of the Building Surveyor, as provided for in Section 4 in respect of any building or alteration or addition, shall in the construction of such building or alteration or addition depart from the plans or specifications which have been approved by the Surveyor without his consent in writing first had and obtained, and such alterations or departures from approved plans and specifications shall be drawn, described, and endorsed on and in the plans and specifications.

Sites and Foundations of Buildings.

8. No person who shall hereafter erect any house or building shall construct the foundation of any such house or building upon any site or portion of any site which shall have been filled in or covered with any material impregnated or mixed with faecal, animal, or vegetable matter, or which shall have been filled up or covered with dust or slop or other refuse, or upon which any such matter or refuse shall have been deposited, unless and until such matter or refuse shall have been properly removed by excavation or otherwise from such site. Any holes caused by such excavation shall, if not used for a basement or a cellar, be filled in with hard brick or dry rubbish or concrete, sand, or other material to be approved by the Surveyor.

9. Every person who shall hereafter erect a building shall cause the foundations of the walls of such building to be formed on a bed of good concrete, not less than nine inches thick, and projecting at least four inches on each side of the lowest course of footings of such walls. If the site be upon a natural bed of gravel or sand, concrete may be omitted from the foundations of the walls.

The concrete shall be composed of clean gravel, broken hard brick, properly burnt, ballast or other hard material, well mixed with cement, in the following proportions:— One part of cement to two parts of sand and four parts of stone.

General.

10. Every person who shall hereafter erect any building shall cause the same to be enclosed with walls constructed of brick, stone, or other hard or incombustible substances, with the footings resting on the solid ground or upon concrete or other solid sub-structure.

11. Every person who shall hereafter erect, alter, or add to any building shall cause every wall erected in the course of such work, which shall be constructed of brick, stone, or other similar substance, to be properly bonded, and solidly put together with mortar or cement, and shall not suffer the external face of any pier, bay between piers, or any other main wall of a building to be carried up otherwise than truly vertical, without any overhanging whatsoever, except as may be permitted under this By-law: clause "Projections."

12. Every person who shall hereafter erect, alter, or add to any building shall cause every wall of such building erected in the course of such work, and which may be built at an angle with another wall, to be properly bonded therewith.

13. Every person who shall hereafter erect, alter, or add to any building shall construct every wall of such building erected in the course of such work (other than a wall carried on a bressummer) so as to rest upon proper footings. He shall cause the projection of the bottom of every wall on each side of the wall to be at least equal to one-half of the thickness of the wall at its base, unless an adjoining wall interferes, in which case the projection may be omitted where that wall adjoins. He shall also cause the diminution of the footing of every wall to be formed in regular offsets, and he shall cause the height from the bottom of such footing to the base of the wall to be at least equal to two-thirds of the thickness of the wall at its base. Provided that in the case of domestic buildings of one storey, in the event of a wall being thickened four inches or more to carry a wall plate, the footings need not project in proportion to, or in respect of such thickening. Provided that special arrangements and calculations shall be made for footings in the case of steel skeleton and reinforced concrete buildings, and in cases where the concentrated loads are transmitted directly to the footings. Provided that the provision of this and the three preceding sections shall not apply to buildings erected in pursuance of a license granted under Section 308 of the Act, and specified in Schedule 4 to this By-law.

14. For the purpose of this By-law the measurement of height of storeys and of height and length of walls shall be determined by the following rules:—

(1.) The height of storeys shall be measured as follows:—

(a.) The height of a topmost storey shall be measured from the level of the underside of its floor joists up to the level of the top of the parapet, or if there be no parapet up to the level of the under surface of the tie of the roof or other covering, or if there is no tie, or in the case of gables, then up to the level of half the vertical height of the rafters or other support of the roof.

(b.) Pediments constructed on top of walls or on the top of parapets shall be included in the topmost storey, and the measurements of same shall be made in accordance with the rule laid down in subsection (w) of the Interpretation Clause.

(c.) The height of every storey other than a topmost storey shall be measured from the level of the underside of the floor joists of the storey up to the level of the underside of the floor joists of the storey next above it.

(2.) Walls shall be deemed to be divided into distinct lengths by return walls. The length of every wall shall be measured from the centre of one return wall to the centre of another, provided that such walls are external party or cross walls of the thickness required under this By-law, and are bonded into the walls so deemed to be divided.

15. Every person who shall cause the underpinning of walls and chimneys shall cause such underpinning to be built with bricks or stone bedded in cement to the full thickness of the old wall or work if underpinned in brick, and one-third thicker if underpinned in stone, and with proper footings, or to an additional thickness if the increased height of the wall so requires, and shall cause such underpinning to rest on the solid ground, or on concrete, or on other solid substructure as the foundation, and shall cause the whole to be executed to the satisfaction of the Surveyor.

16. Every person who shall thicken a wall shall cause such thickening to be executed with brick or stone in cement or cement concrete, properly bonded to the old work, to the satisfaction of the Surveyor, provided that in no case shall any person thicken any wall except after notice served on the Surveyor of his intention so to do.

Domestic Buildings.

17. Every person who shall hereafter erect, alter, or add to any domestic building shall construct every external wall, and every party wall erected in the course of such work, in accordance with the following rules, and in every case the thickness prescribed shall be the minimum thickness of which any such wall may be constructed, provided that the several rules shall apply only to walls built of brick or of suitable stone or other blocks of hard and incombustible substance, the beds or courses being horizontal:—

(a.) Where the wall does not exceed twenty-five feet in height, its thickness shall be as follows:—

If the wall does not exceed thirty feet in length, and does not comprise more than two storeys, it shall be eight and a-half inches thick for its whole height.

If the wall exceeds thirty feet in length, or comprises more than two storeys, it shall be thirteen inches thick below the topmost storey, and eight and a-half inches thick for the rest of its height.

(b.) Where the wall exceeds twenty-five feet but does not exceed forty feet in height, its thickness shall be as follows:—

If the wall does not exceed thirty-five feet in length, it shall be thirteen inches thick below the topmost storey, and eight and a-half inches thick for the rest of its height.

If the wall exceeds thirty-five feet in length it shall be seventeen and a-half inches thick for the height of one storey, then thirteen inches thick for the rest of its height below the topmost storey, and eight and a-half inches thick for the rest of its height.

(c.) Where the wall exceeds forty feet but does not exceed fifty feet in height, its thickness shall be as follows:—

If the wall does not exceed thirty-five feet in length, it shall be seventeen and a-half inches thick for the height of one storey, then thirteen inches for the rest of its height below the topmost storey, and eight and a-half inches for the rest of its height.

If the wall exceeds thirty-five feet but does not exceed forty-five feet in length, it shall be seventeen and a-half inches thick for the height of two storeys, then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length it shall be twenty-one and a-half inches thick for the height of one storey, then seventeen and a-half inches thick for the height of the next storey, and then thirteen inches thick for the rest of its height.

(d.) Where the wall exceeds fifty feet but does not exceed sixty feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length, it shall be seventeen and a-half inches thick for the height of two storeys, and thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be twenty-one and a-half inches thick for the height of one storey, then seventeen and a-half inches thick for the height of the next two storeys, and then thirteen inches thick for the rest of its height.

(e.) Where the wall exceeds sixty feet but does not exceed seventy feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick for the height of one storey, then seventeen and a-half inches thick for the height of the next two storeys, and then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys for four and a-half inches (subject to the provision hereinafter contained respecting distribution of piers).

- (f.) Where the wall exceeds seventy feet but does not exceed eighty feet in height, its thickness shall be as follows:—
If the wall does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick for the height of one storey, then seventeen and a-half inches thick for the height of the next three storeys, and then thirteen inches thick for the rest of its height.
If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys, by four and a-half inches (subject to the provision hereinafter contained respecting distribution of piers).
- (g.) Where the wall exceeds eighty feet but does not exceed ninety feet in height, its thickness shall be as follows:—
If the wall does not exceed forty-five feet in length, it shall be twenty-six inches thick for the height of one storey, then twenty-one and a-half inches thick for the height of the next storey, then seventeen and a-half inches thick for the height of the next three storeys, and then thirteen inches thick for the rest of its height.
If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (h.) Where the wall exceeds ninety feet but does not exceed one hundred feet in height, its thickness shall be as follows:—
If the wall does not exceed forty-five feet in length, it shall be twenty-six inches thick for the height of one storey, then twenty-one and a-half inches thick for the height of the next two storeys, and then seventeen and a-half inches thick for the height of the next three storeys, and then thirteen inches thick for the rest of its height.
If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (i.) Where the wall exceeds one hundred feet but does not exceed one hundred and twenty feet in height, its thickness shall be as follows:—
If the wall does not exceed forty-five feet in length, it shall be thirty inches thick for the height of one storey, then twenty-six inches thick for the height of the next two storeys, then twenty-one and a-half inches thick for the height of the next two storeys, then seventeen and a-half inches thick for the height of the next three storeys, and then thirteen inches thick for the rest of its height.
If the wall exceeds forty-five feet in length, it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (j.) If any storey exceeds in height sixteen times the thickness prescribed for its walls by the foregoing rules, the thickness of each external and party wall throughout such storey shall be increased to one-sixteenth part of the height of the storey, and the thickness of each external and party wall below that storey shall be increased to a like extent (subject to the provision hereinafter contained respecting distribution in piers).
- (k.) Where by any of the foregoing rules relating to the thickness of external walls and party walls of domestic buildings, an increase of thickness is required in the case of a wall exceeding sixty feet in height and forty-five feet in length, or in the case of a storey exceeding in height sixteen times the thickness prescribed for its walls, or in the case of a wall below that storey, the increased thickness may be confined to piers properly distributed, of which the collective widths amount to one-fourth part of the length of the wall.
- (1) In buildings four storeys high, where the cross walls are supported from the ground, and where the cross wall in the highest storey is four and a-half inches thick, the cross walls in the two lower storeys shall be at least eight and a-half inches thick, and in the lowest storey thirteen inches thick. In three storey buildings similar cross walls, which are four and a-half inches thick in the highest storey, shall be at least eight and a-half inches in the two lower storeys. In buildings two storeys high having cross walls running through both storeys, such walls in the lower storey shall be not less than eight and a-half inches thick. Cross walls in upper storeys, not supported from the ground, shall be carried on bresssummers.
18. The external walls of domestic buildings not exceeding two storeys, and the external walls of the two topmost storeys of domestic buildings exceeding two storeys, may be built with a cavity not exceeding two inches wide, provided:—
- That the collective thickness of the walling on the two sides of the cavity shall not be less than if the wall were built without a cavity.
 - That the walling on each side of such cavity shall have a minimum thickness of four and a-half inches.
 - That the walls on each side of such cavity be tied with galvanised iron or other non-corrosive metal, or by earthenware tie blocks, in the proportion of at least four ties to every square yard of wall surface.
 - That the walls of all storeys below the cavity walls shall be thickened beyond the thickness specified for similar walls in the preceding clause if required in order to seat such cavity walls so that the same shall not overhang.
- Public Buildings.*
19. If a public building corresponds in form or structure or disposition with a domestic building, then the rules which obtain for domestic buildings shall apply to such public buildings, provided that the thickness of all external and party walls, and the width of their footings be at least four inches more than is required for similar walls of the domestic buildings; but should such public building correspond in form or structure or disposition with a building of the warehouse class, then the rules which obtain for buildings of the warehouse class shall apply to such public buildings; provided that the thickness of all external and party walls, and the width of their footings be at least four inches more than is required for similar walls of a building of the warehouse class.
Should, however, such public building not correspond in form and structure to either a domestic building or to a building of the warehouse class, then such building shall be subject as to its walls and other construction to the special approval of the Building Surveyor.
- Buildings of the Warehouse Class.*
20. Every person who shall hereafter erect, alter, or add to any building of the warehouse class shall construct every external wall, party wall, and cross wall erected in the course of such work in accordance with the following rules, and in every case the thickness prescribed shall be the minimum thickness of which any such wall may be constructed; provided that the several rules shall apply only to walls built of bricks, or of suitable stone, or other hard and incombustible substance, the beds or courses being horizontal:—
- Where the wall does not exceed twenty-five feet in height (whatever is its length), it shall be thirteen inches thick at its base.
 - Where the wall exceeds twenty-five feet but does not exceed thirty feet in height, it shall be at its base of the thickness following:
If the wall does not exceed forty-five feet in length, it shall be thirteen inches thick at its base.
If the wall exceeds forty-five feet in length, it shall be seventeen and a-half inches thick at its base.
 - Where the wall exceeds thirty feet but does not exceed forty feet in height, it shall be at its base of the thickness following:
If the wall does not exceed thirty-five feet in length, it shall be thirteen inches thick at its base.

- If the wall exceeds thirty-five feet but does not exceed forty-five feet in length, it shall be seventeen and a-half inches thick at its base.
- If the wall exceeds forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.
- (d.) Where the wall exceeds forty feet but does not exceed fifty feet in height, it shall be at its base of the thickness following:—
If the wall does not exceed thirty feet in length, it shall be seventeen and a-half inches thick at its base.
If the wall exceeds thirty feet but does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.
If the wall exceeds forty-five feet in length, it shall be twenty-six inches thick at its base.
- (e.) Where the wall exceeds fifty feet but does not exceed sixty feet in height, it shall be at its base of the thickness following:—
If the wall does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.
If the wall exceeds forty-five feet in length, it shall be twenty-six inches thick at its base.
- (f.) Where the wall exceeds sixty feet but does not exceed seventy feet in height, it shall be at its base of the thickness following:—
If the wall does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (g.) Where the wall exceeds seventy feet but does not exceed eighty feet in height, it shall be at its base of the thickness following:—
If the wall does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (h.) Where the wall exceeds eighty feet but does not exceed ninety feet in height, it shall be at its base of the thickness following:—
If the wall does not exceed forty-five feet in length, it shall be twenty-six inches thick at its base.
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (i.) Where the wall exceeds ninety feet but does not exceed one hundred feet in height, it shall be at its base of the thickness following:—
If the wall does not exceed forty-five feet in length, it shall be twenty-six inches thick at its base.
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (j.) Where the wall exceeds one hundred feet and does not exceed one hundred and twenty feet in height, it shall be at its base of the thickness following:—
If the wall does not exceed forty-five feet in length, it shall be thirty-one inches thick at its base.
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (k.) The thickness of the wall at the top, and for sixteen feet below the top, shall be thirteen and a-half inches, and the intermediate parts of the wall between the base and sixteen feet below the top shall be built solid throughout the space between straight lines drawn on each side of the wall and joining the thickness at the base to the thickness at sixteen feet below the top.
- Nevertheless, in walls not exceeding thirty feet in height, the walls of the topmost storey may be nine inches thick, provided the height of that storey does not exceed ten feet.
- (l.) If any storey exceeds in height fourteen times the thickness prescribed for its walls by the foregoing rules, the thickness of each external and party wall throughout such storey shall be increased to one-fourteenth part of the height of the storey, and the thickness of each external and party wall below that storey shall be increased to a like extent.
- (m.) Where by any of the foregoing rules relating to the thickness of external walls and party walls of buildings of the warehouse class an increase of thickness is required in the case of a wall exceeding sixty feet in height and forty-five feet in length, or in the case of a storey exceeding in height fourteen times the thickness prescribed for its walls, or in the case of a wall below that storey, the increased thickness may be confined to piers, properly distributed, of which the collective widths amount to one-fourth part of the length of the wall.
- (n.) The thickness of every cross wall shall be at least two-thirds of the thickness hereinbefore prescribed for an external or party wall of the same height and length, but shall in no case be less than eight and a-half inches, and no wall subdividing any building shall be deemed to be a cross wall unless it is carried up to the floor of the topmost storey, and unless in each storey the aggregate extent of the vertical faces or elevations of all the recesses, and that of all the openings therein taken together does not exceed one-half of the whole extent of the vertical face or elevation of the wall.
- Wherever a cross wall becomes in any part an external wall, such cross wall shall be of the thickness required for an external wall of the same height and length.
21. Notwithstanding anything contained in the four preceding sections, whenever—
- (a.) Brick piers are built capable of carrying the whole of the roof and floor loads and steel girders are inserted and properly braced and connected so as to carry the walls of each floor independently:
- (b.) Steel skeleton buildings are so constructed that the whole of the loads are transmitted to the foundations by the steel frame:
- (c.) The whole of the building is constructed of re-inforced concrete so that the curtain walls have to carry no load but their own weight:
- (d.) Then in any one of the cases mentioned in the three preceding subsections the curtain wall may be reduced in thickness calculated to safely resist a wind pressure of not less than thirty pounds per square foot of surface of the upper two-thirds of such building, and every curtain wall shall be securely bonded into the piers.
- Rubble Stone Walls.*
22. Every person who shall hereafter use stone in coursed or random coursed rubble for the construction of any walls in the erection of any building shall cause the thickness of such stone walls to be at least one-third greater than is prescribed for brick, and such walls shall not in any case exceed twenty-five feet in height, nor be less than fourteen inches in thickness.
- Party Walls.*
23. Every person who shall hereafter construct a party wall shall cause such wall, if in a public building or a building of the warehouse class, to be carried up of a thickness equal to a thickness of such wall in the topmost storey, and if in any other building to be carried up of a thickness of at least eight and a-half inches.
- (a.) Above the roof, flat or gutter, of the highest building adjoining thereto to such a height as will give a distance in a public building or a building of the warehouse class exceeding thirty feet in height of at least three feet, and in any other building of fifteen inches measured at right angles to the slope of the roof or fifteen inches above the highest part of any flat or gutter as the case may be.

- (b.) Above any turret, dormer, lantern light or other erection of combustible material fixed upon the roof or flat of any building within four feet from such party wall, so as to extend at least twelve inches higher and wider on each side than such erection.
- (c.) Above any part of any roof opposite thereto, and within four feet therefrom.
24. No person who shall hereafter erect a building shall make in any party wall any chase which shall be wider than fourteen inches, nor more than four and a-half inches deep from the face of such wall, nor shall leave less than eight and a-half inches in thickness at the back or opposite side thereof, or which shall be within a distance of seven feet from any other chase on the same side of the wall or within thirteen inches from an external wall. No person shall make any chase in a wall of less thickness than thirteen inches.

Open and Closed Areas.

25. In the construction of gratings and frames over areas no person shall cause or allow the maximum projection of any such grating, or frames whether they be open frames or filled with slabs of glass or lenses, to exceed eighteen inches, measuring from the general line of the front of the walls at one foot above the ground level, or the maximum length thereof to exceed six feet; provided that—

- (a.) Where more than one area grating or such other covering is permitted in the front of one house or building the division between each shall be not less than nine inches, and shall be formed by a solid piece of hard stone not less than nine inches wide and nine inches deep, such stone to be securely pinned into or to rest upon the brickwork not less than six inches at each end, or by a slab of cement concrete nine inches wide and four inches deep resting on a steel joist securely fixed at each end or supported on steel brackets to the satisfaction of the surveyor, or by a bearer of re-inforced concrete, the supports in each case to be calculated to carry a superimposed load of one hundred and fifty pounds per square foot over an area of the full width of grating and of half the length of the frame on each side of the supporting beam; such curbs shall be fixed to the level of the footways, the gratings and frames shall be securely let into the kerbs, and be run with neat cement and not be permitted to open.
- (b.) The coverings over areas, where intended to be closed or filled with glass slabs, shall be formed by iron gratings or frames; the bars shall not be more than three inches apart, and fixed at right angles to each other; each bar shall have at least one square inch of sectional area, and the spaces between the bars shall be filled with glass at least one inch in thickness.
- (c.) No covering of any material or description shall be permitted over any area openings, excepting those formed by iron frames filled with slabs of glass or lenses as before described, or Yorkshire flagging four inches thick or re-inforced concrete.

26. Every person who forms an entrance to a cellar or basement opening on to a street or way or public place shall cause the same to be formed in the wall, and no flap shall be open in any part of the footpath or road or way or public place; such opening shall be filled with a door of jarrah properly framed or of iron gratings and shall be hung to open outwards and shall not project when open more than eighteen inches from the building line, and shall be kept closed except during the time that they are in actual use.

27. No person shall construct a staircase which leads from the ground floor to the basement and the entrance to which is from the outside of a building, unless—

- (1.) Such staircase shall be at least four feet from the street or way, or
- (2.) The entrance thereto be protected with a gate closing with a spring and the sides thereof be open and protected to the satisfaction of the Building Surveyor, with a rail on each side,

28. No person shall construct a lift-well in any building unless the same be protected and made safe to the satisfaction of the Building Surveyor.

Description and quality of the substance of walls.

29. Every person who shall hereafter erect a building, unless in compliance with a license granted under Section 308 of the Act, shall cause:—

- (a.) The external and party walls of every such building, except in the case of concrete buildings, to be constructed of bricks or of stone.
- (b.) Bricks shall be at least eight and a-half inches by four and one-quarter inches by two and three-quarter inches of good, hard, sound, well-burnt quality; stone shall be free from vents, cracks or large sand holes, and laid on its natural bed.
- (c.) Similar material to be used in the portions of party and cross walls below the surface or level of the ground, and above the road, including the chimney stack. Cut bricks may be used in arches over recesses and openings in, or for facings of external walls.
- (d.) All brick and stone work to be put together with lime mortar or with cement mortar. Lime mortar to be composed of freshly burnt lime and clean, sharp sand, free from earthy matter, and mixed in the proportion of one part of lime to three parts of sand. Cement mortar to be composed of Portland cement, or other cement of equal quality, and clean, sharp sand, free from earthy matter mixed in the proportion of at least one part of cement to three parts of sand.
- (e.) Every wall of such building to have a damp course composed of materials impervious to moisture, extending throughout its whole thickness at the level of the lowest floor above ground level, and in all parapet walls a similar damp course immediately above the flashing of the gutter.
- (f.) Every external wall or enclosing wall of all habitable rooms and their appurtenances, and of all cellars and areas which abut against the earth, to be protected by materials impervious to moisture.
- (g.) Except as provided for in Section 21 of this By-law, all concrete used in the construction of walls to be composed of Portland cement or other cement of equal quality, clean sharp sand, and of clean gravel or broken bricks or stone or furnace clinkers, and clean water, mixed in the following proportions:—One one part of cement to two parts of sand, and four parts of the coarse material broken sufficiently small to pass through a two-inch diameter ring. The proportions of the materials to be ascertained by careful measurement, and the first mixing either by machine or hand to be done dry before the water is added. The walls to be carried up regularly, and in parallel frames of equal height, the surface of the concrete to be well rammed, and to be properly cleaned for the next layer of concrete. The thickness of concrete walls to be equal at least to the thickness prescribed for brick walls.

Such portions of concrete party walls and chimney stacks as are carried above the roofs of buildings to be rendered externally with cement mortar.

Recesses and Openings in External Walls.

30. No person who shall hereafter erect a building shall make any recess or opening in any external wall of such building, unless:—

- (a.) The back of such recess or opening be at the least eight and a-half inches thick; and
- (b.) The aggregate area of recesses and openings above the ground storey do not exceed one-half of the whole area of the wall of the storey in which they are made.

Recesses and openings in Party Walls.

31. No person who shall hereafter erect a building shall make any recess or opening in any party wall of such building unless:—

- (a.) The back of such recess or opening be at the least eight and a-half inches thick, and

- (b.) Over every recess so formed a R.S. Joist of sufficient strength shall be inserted or an arch of at least two rings of brickwork of the full depth of the recess be turned on every storey except in the case of recesses formed for lifts; but where such recess does not exceed five inches in depth, corbelling in brick or stone may be substituted for the arching, and
- (c.) The aggregate area of all such recesses and openings does not exceed one-half of the whole area of the wall of the storey in which they are made, and
- (d.) Such recesses or openings do not come within thirteen inches of the inner face of the external walls.

United Buildings.

32. No person shall cause any buildings to be united except where such buildings are wholly in one occupation, or are constructed or adapted to be so.

(a.) No person shall cause any buildings to be united, if, when so united, and considered as one building only, such buildings would not be in conformity with this By-law.

(b.) No person shall make an opening in any party wall, or in two external walls dividing building, which buildings, if taken together, would contain more than two hundred and fifty thousand cubic feet, except under the following conditions:—

- (1.) Such opening shall not exceed in width seven feet, or in height eight feet, and such opening or openings, taken together, shall not exceed one-half of the length of such party wall, or such external walls on each floor of the building in which they occur.
- (2.) Such opening shall have the door jambs and head formed of brick, stone, or re-inforced concrete, and be closed by two automatic wrought iron doors, each one-quarter of an inch thick in the panel, at a distance from each other of the full thickness of the wall, fitted to rebated frames without woodwork of any kind, or by wrought iron sliding doors, or shutters properly constructed, fitted into grooved or rebated iron frames, or by other approved automatic fire-resisting doors.
- (3.) If the thickness of the wall be not less than twenty-four inches, or the doors be placed at a distance from each other of not less than twenty-four inches, such opening may be nine feet six inches in height.

(c.) Whenever any buildings which have been united cease to be in one occupation, the owner or owners thereof shall give notice to the Surveyor, and shall cause all openings in any party wall, or in any external walls uniting such buildings, to be stopped up with brick or stone work not less than thirteen inches in thickness (except in the case of a wall eight and a-half inches thick, in which case eight and a-half inches shall be sufficient) and properly bonded with such wall, and any timber not in conformity with this By-law placed in the wall shall be removed.

Bressummers.

33. Every person who shall hereafter erect a building shall cause every bressummer in any external, internal, or party wall to be of rolled steel or iron or re-inforced concrete girder of approved strength, and to have a bearing in the direction of its length of at least six inches at each end upon a sufficient pier of brick or stone, or upon an iron storey post fixed on a solid foundation, in addition its bearing upon any party wall or external wall, and he shall also cause such bressummer to have such other storey posts, iron columns, stanchions, or piers of brick or stone, or corbels, as may be sufficient to carry the super-structure. The ends of such bressummers shall not be placed nearer to each other or the opposite face of the party walls than four inches; provided that—

- (a.) At each end of every metallic bressummer a space shall be left equal to one-quarter of an inch for every ten feet, and also for any fractional part of ten feet of the length of such bressummer to allow for expansion,

- (b.) Every bressummer bearing upon a party wall shall be borne by a templet or corbel of stone or iron tailed through at least half the thickness of the wall, and of the full breadth of the bressummer.
- (c.) Bressummers consisting of more than one joist shall be solidly bolted together with packing pieces filling in the vacant spaces between the webs of the joists, and shall have such additional plates of sufficient strength, calculated in accordance with recognised formula, rivetted on to the top or bottom boom. Bressummers shall in no case have a less factor of safety than three for dead loads and five for live loads.

Timber in Walls.

34. Every person who shall hereafter erect, alter, or add to any building shall comply with the following regulations:—

- (a.) No bond timber or wood plate shall be built into any wall, and the ends of any wooden beam or joists bearing on such wall shall be at least four and a-half inches from each other, or from the opposite face of the wall.
- (b.) The end of any timber not permitted to be placed in or to have a bearing upon a party wall may be carried on a corbel or templet of stone or iron, or vitrified stoneware, tailed into the wall to a distance of at least eight and a-half inches, or otherwise supported to the satisfaction of the Surveyor.
- (c.) All woodwork fixed in any external wall and frames of doors and windows of shops on the ground storey of any building (except loop-hole frames or bressummer) shall be set back at the last four inches from the external face of such wall.
- (d.) When the external wall of a building is erected on the boundary of its allotment or within 2ft. 6in. of such boundary, then—
 - (1.) If such building is a public building or a building of the warehouse class, such external wall shall be carried up of a thickness equal to the thickness of such wall in the topmost storey, to a height of at least three feet above the roof, flat, or gutter of such building; and
 - (2.) If such building is a domestic building, such external wall shall be carried up of a thickness of at least eight and a-half inches, to a height of at least fifteen inches above the flashing of the roof or gutter of such building.

And any person who shall erect an external wall of any building contrary to the foregoing provisions shall be guilty of an offence against this By-law.

Projections.

35. Every person who shall hereafter erect, alter, or add to any building shall cause—

- (a.) All copings, cornices, stringcourses whatsoever, and corbelled projections of party wall to be of brick, tile, stone, artificial stone, slate, cement, or other fire-proof material.
- (b.) Every cornice or other projection to be tailed into the wall of the building and where the projection thereof exceeds the thickness of the wall, to be weighted or tied down. No cornice to project more than two feet six inches over the public way or beyond the face of the external wall.

36. No person shall cause the plinth of any building to project beyond the surveyed building line except as follows, that is to say:—Plinths not exceeding two feet in height may project two and a-half inches into the street beyond the surveyed building line. Where streets are constructed on a gradient the height of the plinth may be varied if approved by the Surveyor.

37. No person shall cause the cornice of any shop front, the piers of which have been built upon the surveyed building line, to project beyond such piers and beyond such surveyed building line, except as follows:—In a street or way of a width not greater than thirty-three feet, such projection shall not exceed thirteen inches, and in a street or way of a width greater than thirty-three feet such projection shall not exceed eighteen inches,

38. No person who shall hereafter erect, alter, or add to any building shall cause any part of the woodwork of any shop front to be fixed higher than twenty-five feet above the pavement of the public footpath in front of the shop, or nearer than four and a-half inches to the centre of the party wall, where the adjoining premises are separated by a party wall, or nearer than four and a-half inches to the face of the wall of the adjoining premises where the adjoining premises have a separate wall, unless a pier or corbel of stone, brick, or other incombustible material at least four and a-half inches wide be placed as high as and alongside such woodwork, and projecting throughout at the least three inches in front thereof between such woodwork and the centre of the party wall or the separate wall, as the case may be.

39. Bay windows to any dwelling house may be erected on the land of the owner of such house, provided that no such bay windows shall be erected except subject to the following conditions, viz.,—

- (a.) Such windows shall not exceed three storeys in height above the level of the footway.
- (b.) Shall be in no part nearer to the centre of the nearest party wall than the extreme amount of their projection from the main wall of the building to which they are attached.
- (c.) Shall not, taken together, exceed in width three-fifths of the frontage of the building towards the street to which such bays face.

40. Oriel windows, turrets, and balconets to a building may be erected in a street of a width of not less than forty feet, or where the front wall of such building is at a distance of not less than forty feet from the opposite boundary of the street, provided that no such oriel window, turret, or balconet shall be erected except subject to the following conditions, viz.:—

- (a.) No part of such window, turret, or balconet shall extend more than three feet from the face of the front wall of such building or more than twelve inches over the public way.
- (b.) No part of such window, turret, or balconet shall be less than ten feet above the level of the footway of the street.
- (c.) No part of such window, turret, or balconet (where same overhangs the public way) shall be within a distance of four feet of the centre of the nearest party wall.
- (d.) On no floor shall the total width of any oriel windows, turrets, or balconets, taken together, exceed three-fifths of the length of the wall of the building of that floor.

41. Every person who shall hereafter erect, alter, or add to a building shall cause the roof, flat, or gutter of such building, and every shop front, bay window, oriel window, turret, balconet, or other similar projection erected in the course of such work to be so arranged and constructed, and so supplied with gutters and pipes as to prevent the water therefrom from dropping upon or running over any public way.

42. Except in so far as is permitted by this By-law in the case of shop-fronts and projecting windows, and with the exception of water pipes and their appurtenances, copings, string-courses, cornices, facias, window dressings, and other like architectural decorations, no person shall cause or allow any projection from any building to extend beyond the surveyed building line in any street.

43. No person shall cause or allow any cornice, string-course, or other projection on any building to be constructed in such manner as to overlap or project in front of any adjoining property, unless with the consent of the owner of the adjoining property expressed in writing and deposited in the hands of the Building Surveyor.

Chimneys.

44. Every person who shall hereafter erect, alter, or add to any building shall cause every chimney of such building erected in the course of such work to be built on solid foundations and with footings similar to the footings of the wall against which such chimney is built unless it is carried upon iron girders, with direct bearings upon any party wall, external or cross walls, to the satisfaction of the Surveyor; provided, nevertheless, that in cases in which it is impracticable to comply with the above provisions, such person may cause any chimney of such building to be built on corbels of stone, or other incombustible materials, if the work so corbelled out does not project from the wall more than the thickness of the wall measured

immediately below such corbel, and such corbel shall be of approved stone nine inches thick or re-inforced concrete six inches thick, or iron or steel one-quarter of an inch thick, and in either case the full length over the chimney breast and tailed back the full thickness of the wall.

45. All chimneys and flues that are inclined at a less angle than forty-five degrees to the horizon shall have proper and sufficient soot doors of not less than forty-nine inches clear area, which shall be at least fifteen inches from any woodwork.

46. Every person who shall hereafter erect a flue from the stove of an eating-house, or restaurant, or any place of business, shall cause such flue to be so constructed as to carry the smoke from the same to such a height above the eaves of any and every adjoining building as will prevent any nuisance.

47. When the eaves of any new building are more than 20ft. above the eaves of the adjoining existing buildings, permission must be given to the adjoining owners to attach and maintain their flues in such a manner as the Building Surveyor shall direct to the walls of the new building.

48. Every person who shall hereafter erect, alter, or add to any building shall cause—

- (a.) An arch of brick or stone to be built over the opening of every chimney constructed in the course of such work to support the breast thereof, and shall support all such arches, except semicircular ones, upon wrought iron bars of sufficient strength, to be built eight and a-half inches into the chimney jambs.
- (b.) All flues in such building constructed in the course of such work, which may be intended for use in connection with any oven, furnace, cockle, steam boiler, or close fire, constructed for any purpose of trade or business, or which may be intended for use in connection with any range or cooking apparatus of such building when occupied as a hotel or eating-house, to be surrounded with brickwork at least eight and a-half inches thick from the floor on which such oven, furnace, cockle, steam boiler, or close fire may be constructed, or place to a point eighteen inches clear of the outside of the roof.
- (c.) The inside of every flue, constructed in the course of such work, to be pargeted, or lined with fire-resisting glazed piping or stoneware.
- (d.) The position and course of every flue which is being constructed in a party wall, if the construction of the building or of the flues and fireplaces on both sides of such party wall be not carried on contemporaneously, to be distinguished in some durable manner by outline marks on the outside of the work as it is carried up.
- (e.) The jambs of every fireplace opening constructed in the course of such work to be at least eight and a-half inches thick.
- (f.) The breast of every chimney and the brickwork surrounding every smoke flue constructed in the course of such work, except where otherwise provided in this By-law, to be at least four and a-half inches thick.
- (g.) The back of every fireplace opening constructed in the course of such work in a party wall to be at least eight and a-half inches thick for the full height of the wall; and between all partition walls from the hearth to the height of twelve inches above the mantel.
- (h.) The upper side of every flue constructed in a cross wall, and carried from the fireplace to an external wall, to be at least eight and a-half inches thick.
- (i.) Every chimney shaft or smoke flue constructed in the course of such work, not otherwise provided for in this By-law, to be carried up in brickwork at least four inches thick throughout to a height of not less than three feet above the roof, flat, or gutter adjoining thereto, measured at the highest point in the line of junction with such roof, flat, or gutter.
- (j.) The highest six courses of every chimney stack or shaft constructed in the course of such work to be built in cement mortar.
- (k.) An outer hearth to be constructed before every fireplace opening, which hearth shall consist of a slab of stone or other incombustible material at least fourteen inches wide, and six inches

longer on each side than the width of such opening. Except on the lowest floor, such slab shall be laid on iron bearers or brick trimmer arches, supported by the floor joists, but on the lower floor may be bedded on a solid built up foundation.

- (1.) The inner hearth of every chimney erected in the course of such work to be constructed wholly of brick, stone, or other incombustible material, and such hearth, except on the lowest floor, or unless inset in the brickwork of a chimney breast, to be supported by corbelling of brick or stone, or by slate or stone slabs, or by iron girders or other incombustible material; provided that on the lowest floor such hearth shall be bedded on a solid built foundation. In no case shall the thickness of such inner hearth be less than six inches.
49. No person who shall hereafter erect, alter, or add to any building shall cause or allow:—
- (a.) The brickwork or stonework of any chimney shaft erected in the course of such work, other than a chimney shaft of the furnace of any steam engine, brewery, distillery, or manufactory to be built higher above the roof, flat, or gutter adjoining thereto than a height equal to six times the least width of such chimney shaft, taken at the level of the highest point in the line of junction, unless such chimney shaft shall be built with or bonded to another chimney shaft not in the same line with the first-mentioned chimney shaft, or shall be otherwise rendered secure.
- (b.) Any flue to be built in or against any party wall unless it be surrounded with new brickwork at least four inches thick, properly bonded into the old work.
50. No person shall cause or allow:—
- (a.) Any chimney shaft, jamb, breast, or flue to be cut into, except for the purpose of repair, or for some one or more of the following purposes:—
- (1.) For letting in or removing or altering flues, pipes, or funnels for the conveyance of hot air, smoke, or steam, or for letting in, removing, or altering smoke-jacks.
 - (2.) For forming openings for soot doors, in which case such openings shall be fitted with a close iron door and frame.
 - (3.) For making openings for the insertion of ventilating valves, provided that such openings shall not be made nearer than twelve inches to any timber or combustible substance.
- (b.) Any timber or woodwork to be placed:—
- (1.) In any wall or chimney breast nearer than four and a-half inches to the inside of any flue or chimney opening;
 - (2.) Under any chimney opening within six inches from the upper surface of the hearth thereof.
51. No person shall drive any wooden plug into any wall nearer than four and a-half inches to the inside of any flue or chimney opening, nor shall any iron hold-fasts or other iron fastenings be placed nearer than two inches thereto.

Factory Chimneys.

52. Every person who shall hereafter construct a chimney shaft which may be intended for use in connection with the furnace of a steam engine, brewery, distillery, or manufactory shall construct such shaft in conformity with the following rules:—
- (a.) The foundation of such shaft shall be made of concrete or other sufficient foundation.
- (b.) The footings of such shaft shall spread all round the base thereof by regular offsets to a projection equal to the thickness of the enclosing brickwork at the base of such shaft, and the space enclosed by such footings shall be filled in solid as the work progresses.
- (c.) The width of the base of such shaft, if square, shall be at least one-tenth of the proposed height thereof, or if such shaft is round, octagonal, or other many and equal sided and angled, then at least one-twelfth of the height thereof.
- (d.) Every such shaft shall be carried up throughout in brickwork and mortar of best quality, and if detached shall be tapered gradually from the base to the top, and on all faces or sides of

- such shaft at the rate of at least two and a-half inches for every ten feet of height.
- (e.) The brickwork at the top of such shaft, and for twenty feet below the top, shall be at least eight and a-half inches thick, and such thickness shall be increased at least four inches for every additional twenty feet, measured downwards.
- (f.) Every cap, cornice, pedestal, string-course, or other variation from plain brickwork in connection with such shaft shall be as additional to the thickness of brickwork required under this By-law, and every such cap shall be constructed and secured to the satisfaction of the Surveyor.
- (g.) All fire-brick lining built inside the lower portion of such shaft shall be additional to and independent of the thickness of the brickwork thereof prescribed by this By-law, and shall not be bonded therewith.

General Restrictions relating to Steam Boilers, etc.

53. No person shall cause or allow:—
- (a.) The floor under any oven, copper, steam boiler or stove which is not heated by gas, or the floor around the same for a space of eighteen inches to be constructed of materials of a combustible or heat-conducting nature, or less than six inches thick.
- (b.) Any pipe for conveying smoke or other products of combustion, heated air, steam, or hot water to be fixed against any building on the face adjoining to any street or public way.
- (c.) Any pipe for conveying smoke or other products of combustion to be fixed nearer than six inches to any combustible materials.
- (d.) Any pipe for conveying heated air or steam to be fixed nearer than six inches to any combustible materials.
- (e.) Any pipe for conveying hot water to be fixed nearer than three inches to any combustible materials, provided that the restrictions imposed by this clause, and by Subclause (d) with respect to the distance at which pipes for conveying steam and hot water shall be fixed from any combustible materials, shall not apply in the case of pipes provided with a free blow-off.
- (f.) The floor over any room or enclosed space in which a furnace is fixed, or any floor within eighteen inches from the crown of an oven, to be constructed of combustible materials.

Staircases.

54. Every person who shall hereafter construct or adapt any building for occupation in separate tenements by more than two families shall cause the principal staircase of such building, which may be used by several families in common, to be ventilated upon every storey above the ground storey by means of windows or skylights, opening directly into the external air, or to be otherwise adequately ventilated.
55. Every person concerned in the erection of any dwelling-house, not subject to the provisions of the last preceding section, shall cause the principal staircase in such dwelling-house to be ventilated by means of a window or skylight opening directly into the external air.

56. Every person concerned in the erection of a building of more than 150,000 cubic feet, which is constructed or adapted to be used as a dwelling-house for separate families, shall cause the floors of the lobbies, corridors, passages, landings, and also the stairs, to be of fire-resisting materials, and, when over three storeys exclusive of basement, to be carried by supports of fire-resisting materials.

Habitable Rooms.

57. Every person concerned in the erection of any building containing a habitable room or rooms shall cause:—
- (a.) Every such room to have a capacity of not less than eight hundred cubic feet.
- (b.) Every attic room of such building to be at least eight feet in height from the floor to the ceiling throughout not less than one-half the floor area of such room.
- (c.) Every such room, not being wholly in the roof, to be in every part at least ten feet six inches in height from the floor to the ceiling.
- (d.) Every such room to have one or more windows opening directly into the external air or into a conservatory with a total superficies clear of

the sash frames and free from any obstruction to the light, equal to at least one-twelfth the floor area of such room, and so constructed that a portion equal to at least one-twenty-fourth of such floor area can be opened, and that the opening in each case shall extend to at least seven feet above the floor level, and every window shall have a clear air space on the outside of at least two feet and six inches in the case of single storey buildings and of three feet in any other case, measured at right angles to the outer face of the wall in which such window is situated, such air space being in the same ownership as the building.

- (c.) Every such room constructed over a stable to be separated from the stable by a floor, which shall have in every part not occupied by a joist or girder a layer of concrete or clay pugging of good quality, or of other solid construction, three inches in thickness, finished smooth upon the upper surface and properly supported, and the underside of such floor to be ceiled with lath and plaster of good quality, or of other solid construction; and every staircase, gallery, or structure by which such rooms shall be approached to be separated from the stable which it adjoins by a brick wall not less than eight and a-half inches in thickness.
- (f.) Every such room, whether used for the purpose of habitation or for the assemblage of people for any purpose whatever, to be well and properly ventilated by the insertion of air bricks below the floor, and by openings in the sleeper walls, also by inlet ventilators in the walls, and by outlet ventilators in the ceilings or at the top of the walls of such room, with sufficient flues and pipes thereto, according to the position and size of such room.
- (g.) Every basement room having a wooden floor other than a floor constructed of solid wood bedded on concrete to have a sufficient space between the ground and the underside of the floor to admit of ventilation by means of air flues formed in the wall, connected with air bricks or otherwise above ground level.

58. No person shall cause or allow to be constructed in any dwelling any habitable room unless every window thereof opening directly into the external air at the side of such dwelling is provided with a clear air space, in the case of single storied dwelling of at least two feet and six inches, and in any other case of at least three feet wide, measured square on to the exterior face of the wall in which such window is situated, such air space being in the same ownership as the dwelling, and no person shall cause or allow any existing building to be altered by the addition of any window opening directly into the external air unless the air space hereinafter specified is provided.

Light Courts.

59. No person shall cause or allow:—
- (a.) A habitable room not having a window directly opening into the external air, otherwise than a court enclosed on every side, to be constructed in any building unless the width of such court measured from such window to the opposite wall shall be equal to half the height measured from the sill of such window to the eaves or top of the parapet of the opposite wall; provided that a court of which the greater dimension does not exceed twice the lesser dimension shall be held to comply with this clause if a court of the same area, but square in shape, would comply therewith.
- (b.) No person shall cause or allow to be constructed in any building, other than a dwelling-house, any habitable room unless every window of such room opening directly into an external light court at the side of such building is provided with a clear air space of at least four feet, measured square on to the external face of the wall in which such window is situated, such air space being in the same ownership as the said building.
- (c.) Any light court, wholly or in part open on to the top, but enclosed on every side, and constructed and used for admitting light and air to a domestic building, to be constructed unless adequate provision shall have been made for the ventilation of such court by means of a communication capable of admitting fresh air to the lower end of such court.

- (d.) Any light court, enclosed on every side, to be constructed unless adequate provision for the proper drainage of such court shall first have been made.

Back Buildings.

60. No person shall cause or allow any habitable room to be constructed in any back building when the only window or windows of such room opening into the external air is or are situate in the wall which faces the front building, unless every window of such room be placed not nearer to the opposite wall of the front building than a distance of twelve feet.

Conversion of Buildings.

61. No person shall convert into, or use as a dwelling-house, any building or any part thereof not originally built as and for a dwelling-house within the limits of the municipality, whether built before or after the making of this By-law, without the previous consent of the Council.

Verandahs.

62. No person shall erect any verandah over any public footway within the limits of the City of Perth without having first obtained the consent of the Council, to be signified by the issue of a license in the form of Schedule 5 hereto.

63. Any person desiring to obtain the consent of the Council to the erection of such a verandah shall deposit with the Building Surveyor a plan, elevation, section, and specification, showing in detail the proposed construction of such verandah, and the manner in which it is proposed to secure it to the building to which it is proposed to be attached.

64. No such verandah shall hereafter be erected unless in accordance with the standard plan settled and approved by the Council and deposited in the office of the Building Surveyor. Provided that the strength of the materials to be used in the construction thereof may, subject to the approval of the Building Surveyor, be varied according to circumstances.

65. The minimum height of any verandah hereafter erected shall be eleven feet from the top of the kerb to the underside of the signboard. In the case of sloping ground the height shall be measured at the centre of the frontage. Provided that if the frontage shall exceed 20 feet, a break shall be made if so directed by the Building Surveyor.

66. All verandahs in a street shall be erected of a uniform height and width. Subject to the last preceding section, the standard height and width of verandahs in each street shall be fixed by the Council.

67. The roof of every such verandah shall be covered with 24 gauge galvanised corrugated iron. The gutters shall not be lighter than 24 gauge galvanised iron, and with sufficient capacity and with proper fall to outlets. Downpipes shall be of 24 gauge galvanised iron, with elbows, bends, connections, and fittings to the satisfaction of the Surveyor. Provided that the lower length of downpipe (6 feet) and the pipe under footpath shall be of cast or wrought iron.

68. The signboard shall be constructed of such materials, sections, and workmanship as, in the opinion of the Surveyor, are of sufficient strength in the particular case, and shall be covered with 24 gauge galvanised flat iron, riveted and soldered at all joints or approved iron lattice work, and properly secured to the framework, and surrounded with a suitable margin.

69. Whenever a proposed verandah will abut on to an existing verandah, it shall be so finished as to prevent rain from falling between such verandahs. Provided that when the existing verandah is shorter than the frontage of the building to which it is attached, the person erecting the new verandah shall make the necessary extension to the existing one.

70. Whenever the end of a verandah abuts on to the end of a right-of-way, street, or public place, the signboard shall be returned along such end, and the space between the signboard and the roof of the verandah shall be filled to the satisfaction of the Building Surveyor.

71. No writing, printing, or trade notice of any description shall be exhibited on any portion of the verandah, except on the outer face of the signboard, and/or under the roof of the verandah, securely and rigidly fixed to the T iron or rafter, and following absolutely the contour of the verandah roof, at right angles to the building line, and of a maximum width of 12 inches. Signs under the verandah may be fixed

to each rib or rafter, provided that the minimum distance between any two such signs shall be twelve feet.

Miscellaneous.

72. The owner of any building or premises shall fill up, secure, or remove any cellar-ways or openings which may be in or under any footway, and are used in connection with, or are appurtenant to such building or premises, whenever ordered by the Council so to do.

73. The owner of any building or premises shall when ordered by the Council so to do, at his own expense remove any verandah, balcony, or other obstruction used in connection with or appurtenant to such building or premises, which shall obstruct the footway or street or is dangerous, whether such verandah, balcony, or other obstruction shall have been erected before or after the commencement of "The Municipal Corporations Act, 1906."

74. The owner of any lamp post, telegraph, telephone, electric lighting or tramway poles shall, when ordered by the Council so to do, at his own expense, paint the same during such hours, and in such manner as the Surveyor shall direct, and shall, at such like expense and when so ordered, remove any of such posts or poles as shall be bent, dangerous, unsightly, or not in use.

75. No person shall erect any dangerous fence, or shall use barbed wire in the construction of any fence abutting on any public place.

76. The owner or occupier of any building occupied or used as a workshop, workroom, or office, which shall be partially or wholly constructed of iron, zinc, or tin shall, once in every three years or oftener when so ordered by the Council, cause such iron, zinc, or tin to be coated with refrigerating paint.

77. No person shall cause or allow any iron spike or other projection, broken glass, or barbed wire to be placed or fixed on any premises abutting upon a street or way.

78. No person shall construct any building without providing convenient means of access to the roof, by manholes or otherwise.

79. Timber-framed gables to any bay window may be constructed in buildings of the domestic class, and in buildings of other classes, if approved and consented to by the Council and endorsed on the drawings by the Building Surveyor.

80. All sky-lights in verandahs and buildings, and the sloping sides of all lantern lights, shall be protected by galvanised iron wire guards, securely fixed to the inside thereof.

Re-inforced Concrete.

81. Every person intending to erect a building of re-inforced concrete shall, in addition to the provision of Section 3 of this By-law, submit detail drawings showing the size and position of re-inforcing bars and specification of the materials and the proportions of the same, together with a copy of all the calculations of strength, and the super-incumbent load for which calculations have been made.

82. All beams and columns shall not have less than two inches in thickness of fireproofing outside the re-inforcing bars, and all floor slabs shall have not less than one inch in thickness.

83. All beams and rectangular columns shall have the exposed angles either chamfered or rounded.

84. All beams shall have shear re-inforcement and such shear members shall—

- (a.) Be spaced according to the distribution and intensity of the shearing stresses, but the distance from C to C of the shear re-inforcement at any part of the beam shall not exceed the effective depth of the beam.
- (b.) At least extend from the centre of the tensile re-inforcement to the centre of pressure in the concrete under compression.
- (c.) Be passed under or round the tensile re-inforcement or be otherwise secured thereto.
- (d.) Have a mechanical bond with the concrete throughout their length or a mechanical anchorage at both ends.

85. Wherever inclined shear members are employed they shall be rigidly fixed to the horizontal re-inforcement.

86. In beams with double horizontal re-inforcements the shear members (or stirrups) shall be attached to both the tensional and compression bars.

87. The following items must be taken into consideration in making calculations:—

- (a.) Weight of the structure.
- (b.) Any other permanent load, such as flooring, plastering, etc.
- (c.) The accidental or super-imposed load.
- (d.) Vibration and shock where they are liable to occur.

88. The calculation for loads must be based on their greatest straining action.

Concrete and steel as used must be estimated at not less than 150 lbs. per cubic foot.

In factories, public halls, or workshops the shock must be calculated at one-half the superimposed load.

In floors carrying machinery or liable to have loads suddenly applied, the allowance for shock must be taken as equal to the accidental load.

In cases of columns or piers of buildings which support three or more floors, the load at different levels may be calculated as follows:—

For the part of roof and top floor supported, the full accidental load must be taken; for the next floor below, 90 per cent.; for the next floor, 80 per cent., and so on until the reduction reaches to 50 per cent., and all floors below 50 per cent. of the load.

The following accidental loads may be taken in making calculations:—

- Ordinary dwellings and living rooms—75 lbs. per square foot.
- Offices, etc.—100 lbs. per square foot.
- Theatres, libraries, banks, and shops—120 lbs. per square foot.
- Ball rooms and drill halls—150 lbs. per square foot.
- Warehouses—220 to 670 lbs. per square foot.
- Factories according to use.
- Roofs generally—50 lbs. per square foot.

89. *Cement.*—Only portland cement complying with the requirements of the specification adopted by the British Engineering Standards Committee shall be employed. Every lot of cement delivered must be tested, and in addition the tests for soundness and time of setting should be applied frequently during construction.

90. *Sand.*—Must be clean, and free from ligneous organic or earthy matter.

91. *Aggregate.*—May be of hard stone, broken bricks, coke breeze, or other suitable materials, and must be clean and angular, varied in size as much as possible between the maximum of ¾ in. and the minimum of ¼ in.

The cement, sand, and aggregate must be kept separate and accurately proportioned in volumes. The proportions generally must be not weaker than 1:2:4, and this under test should have a strength of not less than 1,800 lbs. per square inch.

Steel must have the following qualities:—

- (a.) An ultimate strength of not less than 60,000 lbs. per square inch.
- (b.) A yield point of not less than 32,000 lbs. per square inch.
- (c.) It must stand bending cold 180 deg. to a diameter of the thickness of pieces tested without fracture on outside of bent portion.

With the above standards of strength, the allowable working stresses are:—

- Concrete in compression—600 lbs. per square inch.
- Concrete in shear of beams—60 lbs. per square inch.
- Adhesion or grip of concrete on steel—100 lbs. per square inch.
- Steel in tension—16,000 lbs. per square inch.
- Steel in compression—Fifteen times the stress of surrounding concrete.
- Steel in shear—12,000 lbs. per square inch.

Bending moment for beams and floor slabs continuous over three or more equal spans with

uniformly distributed loads not less than $\frac{wl^2}{12}$ at the centre of the span.

And at intermediate supports = $\frac{wl^2}{12}$

$n = \left[\sqrt{mr^2 + 2mr} - mr \right] d$
where n = neutral axis.

m = modular ratio $\frac{E_s}{E_c} = 15.$

r = A/bd = ratio of area of re-inforcement to the area b.d.

b = breadth of beam in inches.

d = depth of beam in inches.

Steel Skeleton Buildings.

92. Steel skeleton building shall mean any building constructed of steel framework in such a manner that all the external and internal loads and strains are transmitted from every part of the building to the foundations.

93. No part of a steel column or stanchion shall be less than one-quarter of an inch thick, and no such column or stanchion shall have an unsupported length of more than forty times its least lateral dimension or diameter, provided that when cased with concrete having helical re-inforcement the measurement may be taken from the centre of gravity of such re-inforcement.

94. The ends of all columns shall be faced to a true surface at right angles to the axis of the columns, and the connections between them shall be made with splice plates.

95. The joint may be effected by rivets of sufficient size and number to transmit the whole stress, and the splice plates shall be equal in sectional area to the area of the column spliced.

96. When the section of a column to be spliced is such that splice plates cannot be used, a connection formed of plates and angles may be used designed to properly distribute the stress.

97. No material shall be used in a steel column of less thickness than one-thirty-second of its unsupported width measured between the centres of rivets transversely, or one-sixteenth the distance between the centre of rivets in the directions of the stress.

98. Stay plates are to have not less than four rivets and are to be spaced so that the ratio of length to the least radius of gyration of the parts connected does not exceed forty. The distance between the nearest rivets of two stay plates shall in this case be considered as length.

99. Steel columns shall be made in one, two, or three storey lengths so that the connections may be at floor level.

100. Where any section of a column projects beyond the section to which it is jointed the difference shall be made up by filling plates secured to the column by the proper number of rivets.

101. Steel shoes or plates shall be used under the bottom lengths of any column to properly distribute the load on the foundations, and L steel and gusset pieces shall be riveted on of the required strength.

Cast Iron Columns.

102. Cast iron columns shall not have a less diameter than five inches or less thickness of metal than three-quarters of an inch, nor shall they have an unsupported length of more than twenty times their least lateral dimension or diameter except as provided in Section 124, 'Working Stresses.' All cast iron columns shall be of good workmanship and materials.

103. The top and bottom flanges, seats, and lugs shall be of ample strength re-inforced by fillet and brackets. They shall not be less than one inch in thickness when finished.

104. All columns must be faced at the ends of a true surface perpendicular to the axis of the column.

105. Column joints shall be secured by not less than four bolts each not less than three-quarters of an inch in diameter, and the holes for these bolts shall be drilled to a template and the bolts shall fit accurately.

106. When the inside diameter of a lower column is larger than the one above, the internal diameter of the larger column shall be reduced to the smaller size by tapering down at least six inches, or a joint plate may be inserted of sufficient strength to distribute the load.

107. The thickness of the metal shall be not less than one-twelfth of the greatest lateral dimension or diameter but never less than three-quarters of an inch.

108. Cast iron columns shall be drilled with a hole three-eighths of an inch in diameter where required by the Surveyor, and if the thickness of metal is on one side less than the stipulated thickness by one-fourth, notwithstanding that the other side has the extra metal, the strength shall be computed from the thinnest side of the column.

109. Whenever blow holes or imperfections occur so as to reduce the area of the cross section at that point more than one-tenth, such columns shall be condemned.

110. Steel shoe plates to the column shall be used to properly distribute the load on the foundations.

111. Rivets in flanges shall be spaced so that the least value of a rivet for either shear or bearing is equal to or greater than the strain due to the distance between adjoining rivets.

112. The length of rivets between heads shall not exceed four times the diameter.

113. The compression flange or plate girders shall be secured against buckling if its length exceeds thirty times its width.

114. If splices are used, they shall be calculated to make good the members spliced in either tension or compression.

115. Stiffeners shall be provided over supports and under concentrated loads; they shall be of sufficient strength as a column to carry loads, and shall be connected with a sufficient number of rivets to transmit the stresses into the web plate.

116. Stiffeners shall fit so as to support the flanges of the girders.

117. If the unsupported depth of the web plate exceeds sixty times its thickness stiffeners shall be used at intervals not exceeding one hundred and twenty times the thickness of the web.

118. When R.S. joists are used in pairs to form a girder they shall be connected together by bolts and iron separators at intervals of not more than five feet. All beams twelve inches or more in depth shall have at least two bolts in each separator.

119. Wherever brick external walls are built as part of a structure, all steel lintels or girders supported by the brick wall shall rest upon cut granite or other approved hard stone blocks or upon cast iron or steel plates of sufficient size and strength to distribute the load.

120. All steel trimmer beams, girders, and tail beams shall be suitably framed and connected together and all other ironwork of all floors and roofs shall be strapped, bolted, anchored, and connected together and to the walls.

121. All beams framed into and supported by other beams or girders shall be connected thereto by angles or knees of a proper size and strength, and shall have a sufficient number of bolts or rivets in both legs of each connecting angle to transmit the entire weight or load coming on the beam to the supporting beam or girder.

122. Wherever possible, steel work shall be rivetted together; when bolts are used the threads shall be full and clean and the nuts shall be tapped centrally and the bolts shall be threaded to allow for screwing up tight, and where necessary bevil washers shall be used, and the head of bolts and the nuts shall be kept parallel in every case.

123. All rivetting shall be in accordance with the following standard:—The distance from the centre of the rivet hole to the edge of the material shall be equal to two diameters of the rivet, and the rivets shall be, wherever practicable, machine driven.

When the distance of two diameters is not possible the following shall be the minimum distance from the centre of rivet hole to the edge of the material:—

$\frac{3}{4}$ in. for $\frac{1}{2}$ in. rivets.

$\frac{7}{8}$ in. for $\frac{3}{4}$ in. rivets.

$1\frac{1}{4}$ in. for $\frac{3}{4}$ in. rivets.

$1\frac{3}{4}$ in. for $\frac{1}{2}$ in. rivets.

$1\frac{1}{2}$ in. for lin. rivets.

The rivets in connections shall be proportioned and placed to take up the stresses.

The pitch of rivets shall never be less than three diameters nor more than six inches. In the direction of the stress it shall not exceed sixteen times the least thickness of the outside member. At right angles to the stress it shall not exceed thirty-two times the thickness of the outside member. All holes shall be punched accurately so that the rivets or bolts will pass through the whole of the members without straining the material. The rivets shall fill the holes and the heads be concentric to the axis of the rivet. Gussets shall be provided where required of sufficient size and thickness to accom-

modulate the number of rivets necessary to make the connection.

124. Working Stresses per lin. Square of Section.

L.R.	Cast Iron.	Steel.

License to Deposit Building Material on Street.

125. No person shall deposit any materials on or make any excavation near to any street or way or public place unless and until a license in the form of Schedule No. 7 has been obtained from the City Building Surveyor.

Penalties.

126. Where anything by this By-law is directed to be done or forbidden to be done, or where authority is given to any officer to direct anything to be done or to forbid anything to be done, and such act so directed to be done remains undone, or such act forbidden to be done is done, in every such case the person making such default as to such direction and prohibition respectively shall be deemed guilty of a breach of this By-law. And every person guilty of a breach of this By-law shall be liable for every such offence, besides any costs which may be incurred in the taking of proceedings against such person guilty of such offence, as well as any costs or expenses which may be incurred in the execution of the work directed to be so executed and not so executed, to a penalty not exceeding Twenty pounds for every breach of any such By-law, or to a penalty not exceeding Two pounds for each day during which such breach shall be committed or continued.

Schedule 1.

Application Form.

To the City Building Surveyor.

As the builder or person causing and directing the undermentioned work to be executed, I hereby apply for a building license for same.

The following are the particulars of the proposed work:—

Situation of building or structure (or of each if more than one) Ward Street Perth Town Lot..... Subdivision House Number.....

Intended use of building or structure (or of each if more than one) Domestic building...to be used as..... Structure...of the warehouse class to be used as

And number of buildings or structures (if more than one) Public building.....to be used as..... Structure...to be used as Dwelling No..... Rooms No.....

Additions or alterations to building or structure (or to each if more than one if additions or alterations are the subject of notice) and nature of additions or alterations. To.....domestic building: Additions (if any)..... ft. xft. To.....building of warehouse class: Additions (if any)..... ft. xft. To.....public building: Additions (if any)..... ft. xft. To.....structure: Additions (if any)..... ft. xft. To.....dwelling-house: Additions (if any)..... ft. xft.

The nature of the work is..... Estimated value, £.....

Dimensions of building or structure (or of each if more than one):—

Area.....ft.; depth.....ft.; width.....ft.; height.....ft.; No. of storeys.....
 Owner: Name..... Address.....
 Occupier: Name..... Address.....
 Date of commencement of work:.....day of....., 191.....
 Signature of person giving notice:.....
 Address:.....

Schedule 2.

CITY OF PERTH.

Building License.

No..... Date,....., 191.....
 Granted to.....
 Address.....

Authorising the erection of certain buildings in..... Ward,Street, Town Lot....., Subdivision....., as per application No....., and in accordance with the plans and Specifications approved by the Surveyor, and subject to the provisions of the Building Act, and By-laws, and Sanitary By-laws, and all Municipal Regulations relating thereto.

Whenever required so to do by the Building Surveyor, the holder of this license shall produce the approved plans for inspection.

.....
 City Building Surveyor.

Schedule No. 3.

Scale of Fees.

In pursuance of the powers conferred by Section 161, Subsection 2, clause (a) of the Act, the Council of the City of Perth, with the approval of the Governor in Council, hereby directs that the following shall be the scale of fees to be paid by owners or builders in respect of orders, licenses, matters, and things required or permitted by the Act:—

- (a.) The expression "floor area" applied to a building shall mean the aggregate superficial areas of so many horizontal sections thereof as there are floors in the said building. The horizontal section of each floor shall be made at the point of its greatest surface dimensions, inclusive of external walls and of such portions of the party walls as belong to the building, and also of all verandah and balcony floors, covered ways, and light courts.
- (b.) The expression "square" applied to the measurement of the area of a building, means the area of 100 superficial feet.

	£	s.	d.
For application form	0	1	0
For a license for every building of two squares floor area, or less	0	2	6
For a license for every building of more than two, and not exceeding four squares floor area	0	5	0
For a license for every building of more than four, and not exceeding six squares floor area	0	7	6
For a license for every building of more than six, and not exceeding eight squares floor area	0	10	0
For a license for every additional square or fraction of a square	0	2	0
For a license for every addition, per square	0	2	0
For a license for every alteration or other work to which the provisions of the By-laws apply, made or done to or on any building, one-half the fee charged in the case of a new building, but in no case to be less than	0	10	0
For inspecting the arches or fire-resisting floors over or under public ways	0	10	0
For inspecting the formation of openings in party walls	0	10	0
For inspecting the closing of openings in party walls	0	10	0

On Chimneys and Flues.

On the construction of a furnace chimney shaft or similar shaft for ventilation or other purposes, in addition to the fee for any other operation on progress at the same time, if not exceeding 75 feet in height 2 0 0

	£	s.	d.
if exceeding 75 feet and not exceeding 100 feet in height	2	10	0
For every additional 10 feet, or portion of 10 feet, in height	0	10	0
On the carrying of a flue from an oven, stove, steam boiler, furnace, or close fire into an old flue	0	10	0

On Dangerous Structures.

On each dangerous structure—for making a survey of the structure reported as dangerous, and certifying opinion thereon	1	1	0
For each inspection of the structure and report as to progress of the work	0	5	0
For renewal of Special License:			
Where original fee was 2s. 6d.	0	2	6
Where original fee was from 5s. to 20s.	0	5	0
Where original fee was over 20s.—One-fourth of the original fee.			

Schedule 4.

THE CITY OF PERTH.

Special License.

(Issued in pursuance of Section 308, Subsection 4, of "The Municipal Corporations Act, 1906.")

No. Date,, 191

In pursuance of the powers in that behalf contained in Section 308, Subsection 4, of "The Municipal Corporations Act, 1906," the Council of the City of Perth hereby grants permission, subject, however, to the conditions set out hereunder, to to erect and maintain until the day of, 191, on Perth Town Lot, Subdivision, situate in Street, Perth, a building in accordance with the plans and specifications which have been lodged with the City Building Surveyor, and approved by him.

Conditions.

1. The Council may in its discretion on or after the day of next, and on or after the day of in each succeeding year, grant a license, to be called a Special Renewal License, to maintain the above described building for a further period of twelve months upon payment by the above-named of the approximate fee in that behalf contained in the scale of fees fixed by the Council under "The Municipal Corporations Act, 1906."

2. The Council may at any time revoke this license or any special renewal license granted in respect to the above described building, and direct the removal of such building, and in default of such removal may proceed to enforce the provisions of "The Municipal Corporations Act, 1906," in the same manner as if this license had not been granted.

.....
City Building Surveyor.

Schedule 5.

Verandah License.

No. Date,, 191

This is to certify that the Council consents to the erection by of of a verandah in accordance with the standard plan in front of the premises known as situate on part of Perth Town Lot

The verandah shall be in height from the top of the kerb to the underside of the signboard, and shall be in length and in width.

This license is issued subject to the By-laws for the time being in force regulating the erection and construction of verandahs over public footways, and to the conditions appearing hereunder.

.....
City Building Surveyor.

Conditions.

1. The verandah shall be continuously maintained in good order and repair to the satisfaction of the Building Surveyor.

2. The whole of the work, including the underside of the roof iron and gutters, shall be painted with two coats of lead and oil colours, in tints approved by the Building Surveyor.

3. The writing on the signboard, and the colours used therein, must be approved by the Building Surveyor.

4. If any of the above conditions be not complied with, or if at any time the Council shall consider it necessary in the interests of the public that the verandah should be removed, then this license may be cancelled, and the owner, upon receipt of notice to that effect under the hand of the Mayor or Town Clerk, shall, within the period mentioned in such notice, remove the verandah, and in default of his so doing the Council may cause the same to be removed at his risk and expense.

Schedule 6.

Non-inflammable materials

The following materials shall, for the purposes of this By-law, be deemed to be non-inflammable materials:—

1. Brickwork, constructed of good bricks, well burnt, hard and sound, properly bonded, and solidly put together with;
 - (a.) Good mortar, composed of fresh burnt lime with sharp clean sand; or
 - (b.) Good neat cement; or
 - (c.) Good cement, mixed with sharp clean sand.
2. Granite and other stone suitable for building purposes by reason of its solidity and durability.
3. Iron, steel, and copper.
4. Jarrah and other hard timber when used for beams, posts, or in combination with iron, the timber and iron if in beams being protected by plastering, or other incombustible or non-conducting external coating.
 - In the case of doors—jarrah or other hard timber not less than two inches thick.
 - In the case of stairs—jarrah or other hard timber with treads, strings and risers not less than two inches thick.
5. Slate, tiles, brick, and terra-cotta when used for covering corbels.
6. Flagstones when used for floors over arches, but not exposed on the underside and not supported at the ends only.
7. Concrete composed of broken stone, chippings or ballast, and lime, cement, or calcined gypsum when used for filling in between joists or floors.
8. Any material from time to time approved by the Council as fire resisting.

Schedule 7.

THE CITY OF PERTH.

License for Deposit of Building Material on Street.

....., of, is hereby licensed to deposit Building Material on that portion of Street, in the City of Perth, abutting on Town Lot, Subdivision, and to excavate if required on such portion of the said for a period commencing the day of, and ending the day of, 191, subject to the following conditions, and also subject to "The Municipal Corporations Act, 1906," and to all By-laws made in pursuance thereof for the time being in force in Perth.

Conditions.

Every excavation shall be securely fenced off from the street to the satisfaction of the Building Surveyor.

Around that portion of the street on which the building materials are to be deposited a hoarding and gangway shall be strongly and securely constructed of materials and to a design to be approved by the Building Surveyor, and the hoarding and gangway shall be maintained in good order and condition throughout the currency of this license, and at any time during such currency the Building Surveyor may, if he think fit, order any alteration or addition to be made to the hoarding and gangway for the better protection and convenience of the public.

The gangway and all water channels shall at all times during the continuance of the license be kept clear.

A sufficient light shall be displayed and maintained at the exterior angles of the hoarding each night from sunset to sunrise. The fee to be paid for this license shall be the sum of three-pence for each month or part

of a month for each superficial yard of the area of the street enclosed by the hoarding. The license fee shall be paid in advance.

A renewal of the license may be granted at the discretion of the Building Surveyor, and the above-mentioned fee shall be paid for such renewal or a fee of three-halfpence for each superficial yard for each week of such renewal.

The area to be enclosed shall be restricted to a frontage of.....lineal feet, a maximum width of..... feet, height.....feet.

At the expiration of the period for which this license is granted or renewed the hoarding shall be cleared away and all necessary repairs shall be effected by the licensee to the footpath, kerbing, channelling and road, and the same put in good order and condition to the satisfaction of the Building Surveyor.

If default be made by the licensee in complying with the last condition, or any part thereof, the work required may be done by the Council and all expenses thereof may be recovered by the Council from the licensee.

The licensee shall deposit with the Building Surveyor the sum of £..... as a security for the satisfactory performance of these conditions.

Dated this.....day of....., 191
....., Building Surveyor.

Passed by the Council of the City of Perth, on the 23rd day of August, 1915.

FRANK R. REA,
Mayor.

[L.S.]

WM. E. BOLD,
Town Clerk.

Confirmed by the Commissioner of Public Health, this 10th day of July, 1916.

(Sgd.) EVERITT ATKINSON,
Commissioner of Public Health.

Recommended,—

(Sgd.) W. C. ANGWIN,
Minister for Works.

Approved by His Excellency the Governor in Council, this 12th day of July, 1916.

(Sgd.) BERNARD PARKER,
Clerk of the Council.

THE ROADS ACT, 1911.

Esperance Road Board.

Arrears of Rates.

Department of Works and Industries,

P.W. 3420/16. Perth, 15th July, 1916.

IT is hereby notified, for general information, that the Minister for Works and Industries has approved of the Esperance Road Board writing off Arrears of Rates stated in Schedule hereunder, in accordance with Section 240 of "The Roads Act, 1911."

(Sgd.) C. A. MUNT,
Under Secretary for Works and Industries.

THE ROADS ACT, 1911.
(Section 16.)

Moora Road District.

Retirement of Board and fresh Election consequent upon Redivision into Wards.

Department of Works and Industries,
P.W. 1787/16. Perth, 24th July, 1916.

IT is hereby notified, for public information, that in pursuance of the Redivision of the Moora Road District into Wards and the necessity for the Members of the Board to retire in order that a fresh election may be held as provided for by Section 16 of "The Roads Act, 1911," the Minister for Works and Industries, acting under the provisions of the said Act, has been

pleased to appoint the 23rd day of September, 1916, as the date for the retirement of the existing members and the following dates for the various events in connection with the making up of new Electoral Rolls and holding of a fresh Election:—

1. Preparation of lists—19th July.
2. Exhibition of list—26th July.
3. Claims and objections to office—19th August.
4. Claims and objections exhibited—26th August.
5. Revision court—9th September.
6. Signing rolls—12th September.
7. Retirement of members—23rd September.
8. Nominations—2nd October.

(Sgd.) C. A. MUNT,
Under Secretary for Works and Industries.

Perth, 24th July, 1916.
R.G. 1916/469.
IT is hereby notified, for general information, that Mr. James Simpson has been appointed to act, temporarily, as Assistant District Registrar of Births and Deaths for the Murchison Registry District, to reside at Mt. Magnet, *vice* Mr. James Officer; appointment to date from the 24th July, 1916.

MALCOLM A. C. FRASER,
Registrar General.

THE LEGAL PRACTITIONERS ACT, 1893.

Barristers' Board.
Amendment of Rules.

NOTICE is hereby given that at a meeting of the Barristers' Board duly convened for and held on Friday, 21st July, 1916, at the Board Office, Supreme Court, amendments to the Rules of the said Board were made as follows:—

Rules 16, 17, 18, 19, 20, and 21, and Forms "A" and "B" in the Schedule to the Rules, were repealed, and the following Rules and Form, to be known as Rules 16, 17, 18, 19, 20, and 21, and Form "A" in the Schedule, respectively, were made and prescribed in lieu thereof, namely:—

Rule 16.—Every person above the age of sixteen years desiring to be articulated and who has qualified himself in accordance with the requirements of Rules 19 and 20, shall sign and send to the Secretary an application in Form "A" in the Schedule to these Rules, together with the certificates therein referred to, and the sum of £12 12s. No person under the age of sixteen years shall be entitled to be articulated.

Rule 17.—The Board may accept or reject the application or require further evidence or information on any matter relating thereto.

Rule 18.—If the application is rejected, no fresh application shall be made by the same person within three calendar months from such rejection.

Rule 19.—The preliminary examination for applicants for articles shall be the Matriculation examination prescribed by the University of Western Australia for candidates entering upon the University course for the degree of Bachelor of Arts, and shall include the following subjects, namely, Latin and History.

Rule 20.—The Board may dispense with the preliminary examination in favour of any applicant who has passed the preliminary examination for an articulated clerk in Great Britain or Ireland, or any examination which would there be held sufficient to dispense with such examination. Provided that every such examination shall have taken place within two years of the registration of the articles of the candidate.

Rule 21.—If the Board accepts the application, it shall notify the applicant thereof, and within one calendar month from the date of such notification the applicant shall produce to the secretary his articles of clerkship for registration.

(In Schedule.)
FORM "A."

Rule 16.

I (state name and address), being the son of (state name, address, and occupation of father), desire to be articulated, and I agree to abide by the Rules for the time being.

I am of the age of _____ years, having been born at (here state place and country of birth) on the _____ day of _____, 19____, and propose to serve my articles with (stating name and address of practitioner). I enclose herewith a certificate of my birth (see note).

I further enclose a certificate as to my character and fitness signed by Messrs. _____ (see note).

I have passed the matriculation examination prescribed by the University of Western Australia for candidates entering upon the course for the degree of Bachelor of Arts in the following subjects (here specify subjects), and enclose the certificate of the said University thereof (see note).

Dated this _____ day of _____, 19____.

Note.—In the event of an applicant being unable for good cause to produce his certificate of birth or a certified copy of same, he will be required to enclose a statutory declaration by a parent or guardian setting forth the particulars of the applicant's place and date

of birth, or produce to the Board such other evidence as the Board may require.

The certificate of character and fitness in this form referred to must be signed by two practitioners of at least two years' standing and in practice, and must state that having made due inquiry they are of opinion that the applicant is in every respect a person of good fame and character and is fit to be admitted as an articulated clerk. The person with whom the service is proposed to be had must be one of the signatories.

If the applicant is entitled to have the preliminary examination dispensed with in his favour by virtue of having qualified himself in accordance with the provisions of Section 6 of "The Legal Practitioners Act Amendment Act, 1909," or if he desires to have the preliminary examination dispensed with in his favour on the ground that his qualifications fall within the provisions of Rule 20, he should vary the above form by setting out the qualifications relied upon in his application and should forward therewith all papers necessary to prove that his case comes within the provisions either of the said section or of Rule 20.

REGINALD H. GOODMAN,
Secretary of the Barristers' Board.
Supreme Court, Perth,
21st July, 1916.

TRANSFER OF LAND ACT, 1893, AND THE REAL PROPERTY LIMITATION ACT, 1878.

Application No. 737/1915.

TAKE notice that Charles Mountjoy the younger of Middle Swan in the State of Western Australia labourer has made application to be registered as the proprietor of an estate in fee simple in possession in the following parcel of land situate in the Swan District and being:—
Lots 68 and 69 of Swan Location 13 containing together two acres thirty-four perches and six-tenths of a perch

Bounded on the North by 3 chains 89 $\frac{2}{10}$ links of the South boundary of Location 12

On the East by 5 chains 90 links of the road from Midland Junction to Gingin

On the South by 2 chains 96 $\frac{3}{10}$ links of the Middle Swan Road and

On the West by lines measuring 1 chain 64 $\frac{3}{10}$ links 1 chain 59 $\frac{1}{2}$ links and 4 chains 27 $\frac{1}{10}$ links.

The land is more particularly defined on Diagram 4348 deposited in the Office of Titles.

And further take notice that all persons other than the applicant claiming to have any estate right title or interest in the above parcel of land are hereby required to lodge in this Office on or before the 30th day of September next a *caveat* forbidding the same from being brought under the operation of the Act.

ALFRED E. BURT,
Registrar of Titles.

Land Titles Office, Perth,
20th July, 1916.

Stone & Burt, 514 Hay Street, Perth, Solicitors for the Applicant.

THE ROADS ACT, 1911.
Closure of Road.

WE, C. A. Piesse & Sons (estate late C. A. Piesse), being the owners of land over or along which the portion of road hereunder described passes, have applied to the Wagin Road Board to close the said portion of road, viz.:-

WAGIN.

1386/16.

W. 201.—The surveyed road along the North boundary of Williams Location 1932, and the North and an East boundary of Location 5234, from a surveyed road at a North-West corner of the former to Road No. 3405, at a South-East corner of the latter. (Plan 409B/40, D.2.)

C. A. PIESSE & SONS,
for Estate of late C. A. Piesse,
per Robt. Sinclair.

I, Lorenzo Markham, on behalf of the Wagin Road Board, hereby assent to the above application to close the road therein described.

L. MARKHAM,
Chairman Wagin Road Board.

24th July, 1916.

Form No. 63.

CLAREMONT ROAD BOARD.

To whom it may concern.

AT meetings of the Claremont Road Board, held on the 6th and 24th days of July, 1916, it was resolved that the various rates should be levied on the rateable (unimproved) value of all rateable property within the respective Wards of the Claremont Road District as specified in Schedule hereunder, in accordance with the provisions of "The Roads Act, 1911," and "The Health Act, 1911":—

Schedule—Rates levied.

	District Generally.	East and West Wards.	Central and South Wards
General Road Rate ..	2d. in £
Lo in Rate	1d. in £	½ in £
General Health Rate	¼ in £
Sanitary Rate ...	½ in £

And a Sanitary charge of 35s. per pan per annum payable in two moieties, half-yearly in advance, and a minimum rate of 2s. 6d. on any allotment which would not otherwise bear that rate.

J. KINNINMONT,
Chairman.

24th July, 1916.

In the matter of "The Companies Act, 1893," and of the Albany Brewing Company, Limited.

NOTICE is hereby given that at an extraordinary general meeting of the members of the above-named company, duly convened and held at Albany on the 14th day of July, 1916, the following special resolution was duly passed:—

"That the Albany Brewing Company, Limited, be wound up voluntarily, and that Thomas Hinton Barnett and James Samuel Deykin, both of Albany, be and are hereby appointed the Liquidators, for the purpose of winding up the affairs of the company and distributing the property."

T. H. BARNETT,
Chairman.

15th July, 1916.

Edna Queen No. 1 Gold Mining Syndicate, No-Liability.

NOTICE is hereby given that the Registered Office in Western Australia of the above company is situated on Gold Mining Lease No. 2864, on the Yilgarn Goldfield, at Westonia, and that William Rose Grant, of Kalgoorlie, Engineer, is the Attorney in Western Australia for the said company.

Dated 18th July, 1916.

W. ROSE GRANT,
Attorney for the Company.

In the matter of Beigel's Brewery, Limited (in Liquidation).

THE creditors of the above-named company are required, on or before the 30th day of August, 1916, to send their names and addresses, and the particulars of their debts and claims, and the names and addresses of their solicitors (if any), to E. Stephen Hart, of Stephen Street, Bunbury, the Liquidator of the said company, and if so required by notice in writing from the Liquidator are, by their solicitors or otherwise, to prove their said debts or claims, at the office of the said Liquidator, Stephen Street, Bunbury, or at such time as shall be specified in such notice, or in default they will be excluded from the benefit of any distribution made before such debts are proved.

Wednesday, the 14th day of September, 1916, at 11 o'clock in the forenoon, at the said office, is appointed for determining as to the allowance for the debts and claims.

Dated this 26th day of July, 1916.

NOTICE is hereby given that a Meeting of the Creditors of the above-named William Thomas Sparks, of Upper Swan, will be held at our offices, 50-52 Weld Chambers, St. George's Terrace, Perth, on Monday, the 7th day of August, 1916, at the hour of three o'clock in the afternoon, in pursuance of "The Bankruptcy Act Amendment Act, 1898."

Dated the 24th day of July, 1916.

[L.S.] Q. H. JAMES,
Agent for the Debtor.

Q. H. James & Co., Public Accountants, 50-52 Weld
Chambers, St. George's Terrace, Perth.

In the Supreme Court of Western Australia.

In the matter of "The Bankruptcy Act Amendment Act, 1898," and in the matter of Reginald William Bradford, of Pingelly, Farmer, a Debtor.

Chairman's Certificate of Extraordinary Resolution for Acceptance of Scheme of Arrangement, and for Confirmation.

I HEREBY certify that at a Meeting of Creditors of Reginald William Bradford, of Pingelly, farmer, duly convened and held at the office of Cyril G. Tregurtha, Old Commercial Bank Building, Pingelly, on the 14th day of July, 1916, the following extraordinary resolution was duly passed:—

"That the debtor be granted an extension of time to the 28th day of February, 1917, and that Mr. R. J. Pearson be appointed Trustee to take security over all assets and coming season's crop (subject to Mr. O. E. Bodey's claim for rent) for the benefit of the creditors. The said extension of time be subject to any sale of any of the debtor's interests which may be effected by the Trustee, and which the Trustee is hereby empowered to make for the creditors. The Trustee to be empowered to provide stores to the value of Five pounds per month, and necessary bags, labour, and other necessities for the harvesting of the crop, and to make preference payments for these, also to Mr. Bodey for manures, stores, and labour supplied and paid for from the 1st February, 1916, to date. Remuneration of Trustee to be 5 per cent. on amount available for distribution to unsecured creditors. In the event of any such sale and distribution by the Trustee, same to be accepted as a composition in satisfaction of the debts due to creditors."

Dated the 21st day of July, 1916.

[L.S.] R. A. JOHNSON,
Chairman.

I hereby certify that the above extraordinary resolution was confirmed by an extraordinary resolution passed at a meeting of creditors duly convened and held for the purpose at the office of Cyril G. Tregurtha, Old Commercial Bank Building, Pingelly, on the 21st day of July, 1916.

Dated this 21st day of July, 1916.

R. A. JOHNSON,
Chairman.
