THE MINING DEVELOPMENT ACT, 1902.

Advances on Alunite.

Department of Mines,
Perth, 12th March, 1919.

HIS Excellency the Governor in Executive Council, under the powers conferred upon him by Section 29 of "The Mining Development Act, 1902," has been pleased to make the following Regulations relative to the development of the Potash deposits and the making of cash advances on Alunite.

C. A. HUDSON,
Minister for Mines.

DEVELOPMENT OF MINING.

Advances on Alunite.

IT is hereby notified, for public information, that in order to assist in the development of the Potash deposits of the State, the Government, until further notice, is prepared to make cash advances on alunite of suitable quality, on the following terms and conditions, viz.:—

1. The alunite shall be the produce of mines in the State of Western Australia, and shall contain not less than 5 per cent. of potash (K_2O) or such other percentage of potash as may be approved from time to time by the Minister.

2. The alunite shall be delivered at such places and to such persons as the Minister from time to time shall appoint.

3. The weight of each parcel delivered shall be determined by actual weighing or by measurement, as the person appointed to receive it shall determine. He shall draw a fair sample for moisture determination, and another for analysis for the potash content, and shall send them to the person or persons appointed by the Minister to assay same. All methods of weighing, measuring, sampling, and assay shall be in accordance with the instructions of the State Mining Engineer. The owner of the alunite, or his representative appointed in writing, may be present at the weighing and sampling, but shall not interfere with the work, or approach nearer than is allowed by the person in charge of the sampling. The weight and moisture deduction as determined at the time of receipt of the parcel shall be final.

4. The sampler shall divide his final sample into three approximately equal portions, one of which he shall give to the owner of the parcel, another which he shall send to the Analyst appointed by the Minister to assay such samples, and the third shall be sealed and preserved by him to be sent to an umpire if necessary.

5. The Analyst shall determine the percentage of potash in each sample which can be extracted by calcining followed by leaching with hot water, and such extractable potash shall be deemed to be the whole of the potash in the sample for the purpose of these conditions, notwithstanding that complete analysis may show that a further portion of potash remains in the insoluble residue.

6. The owner of the parcel, within one week of the date of sampling, may submit to the officer in charge an assay by a qualified analyst of the portion of the final sample taken by him for comparison with that made by the analyst for the Government. If the results do not differ by more than one-half per cent. of potash (K_2O), the mean of both results shall be taken as correct; but if the difference be greater than one-half per cent. potash (K_2O), the parties may agree to a mean result, or either may require an umpire assay. If an umpire assay be required, the umpire sample shall then be sent to the Government Assayer in Perth as umpire, and the mean of his assay and the nearer to it of the two previous ones shall be deemed to be correct. The umpire's fee shall be paid by the party whose result is furthest from that of the umpire. The Government Assayer shall be such officer of the Geological Survey of W.A. or of the Government Analyst's Department as shall be appointed from time to time by the Minister to carry out such duty.

7. Cash advances will be made on agreements of the assays at the rate of three shillings per unit (*i.e.*, 1 per cent.) of potash (K_2O) less such charges towards cost of receiving, sampling, and assaying as the Minister may approve from time to time.

8. The Receiving Officer may require any parcel which he may consider to be of doubtful quality to be de-

posited separately until it has been assayed, and should the assay show that it is unsuitable to be accepted, for any reason, the owner shall remove it at his own cost. (Owners are therefore recommended to have their mineral assayed before carting from their mines, so as to be assured that it will not be refused by the receiver.)

9. After being weighed, sampled, and assayed, parcels of alunite will not be kept separate, but will be heaped together and dealt with in larger combined parcels at the Minister's discretion. They shall be deemed to be the property of the Minister for all purposes of sale, treatment, or other method of realisation, and no person shall have any claim upon the Government on the ground that his mineral has not been realised upon to the best advantage.

10. Any moneys resulting from disposal of the alunite by the Minister will be subject to a first charge upon them of all his expenditure upon the same material, inclusive of interest at $6\frac{1}{4}$ per cent. per annum, or such other rate as may be from time to time fixed by the Minister, on all moneys laid out by him for advances, transport, treatment, and all other realisation charges. Any balance will then be divided among the owners of the mineral, in such manner as may seem to the Minister to be most equitable.

11. Any parcel of less than five (5) tons net dry weight shall be charged with an extra charge of ten shillings, to be deducted from the advance.

12. The total sum to be laid out by the Government in making advances on alunite and necessary expenses connected therewith will be limited to £1,000 in the first instance, pending determination of the possibility of working the mineral profitably.
