(In the event of an applicant other than a Discharged Soldier under subparagraph (1) obtaining a block within a Repurchased Estate, the term of the lease and conditions of payment will be subject to re-adjustment in accordance with the provisions of "The Agricultural Land Purchase Act, 1909.")

The areas marked "B" are not subject to such order of preference.

The areas marked thus * are open under Part VI.

Applications must be lodged at the Local Land Office for the district in which the land is situated, and should be lodged on or before the date specified.

Should any lands remain unselected such will continue available until applied for or otherwise dealt with.

2. No person shall build any structure intended to be used for human habitation or occupation or capable of being used as such, or shall alter or add to any such existing structure, without having obtained a Building License from the Board and paying the fees prescribed herein, namely:—

- (a.) The fee for Building License.
- (b.) The fee for the use of the portion of the street abutting on the building during building operations and deposit as security for the re-instatement and repair of such portion of such street.
- (c.) The charge of the Local Health Authority for providing the necessary pans and lids for the privy.

3. Before such Building License is issued, plans and specifications in the form prescribed herein shall be submitted to the Surveyor, and a license will not be granted before seven days after the submission of such plans and specifications, unless in special circumstances, of which special circumstances the Surveyor shall be the sole judge.

4. Plans shall be in ink, on tracing linen or on paper sufficiently strong to stand the erasure of "H" pencil marks without injury to the paper; and specifications shall be in typewriting or in ink manuscript clearly written and on strong paper.

5. Plans shall show clearly such ground plans, elevations, and sections as are sufficient to make plain the construction and dimensions of the proposed structure. The sizes of rooms and thicknesses of walls shall be written on, in figures.

Specifications shall show clearly, both as to materials and sizes of same, the construction of the foundations, floors, internal and external walls, ceilings, and roof; also the ventilation of the structure, the number of privies and the construction of same, and shall provide for at least one privy of the prescribed construction provided with the pan supplied by the Local Health Authority.

A block plan signed by the builder or owner shall be supplied, showing clearly the position of the intended structure on the block of land on which it is to be erected, and the position of the privy. Such plan will be retained by the Board.

6. If the plans and specifications submitted are in accordance with these By-laws and the prescribed fees paid, the Surveyor shall sign them on behalf of the Board and issue a Building License in the form prescribed herein and for the period set forth in such license, but if the plans and specifications contain any matter which in the opinion of the Surveyor is contrary to the principles of sound or sanitary construction and such matter is not covered by these By-laws, the Surveyor shall refer such matter to the Board at its next meeting, and the Board shall have power to decide any matter referred to in Clauses A to K of Section 37 of the Building Regulations when such matter is not defined

by these By-laws, and a Building License will not be granted until the Board decides on such matter, provided that such decision will not be unreasonably delayed.

7. No external wall shall be erected on the building line of any street or nearer than eight feet to such building line, unless constructed of brick, stone, or concrete. Where any building is to be used wholly or in part as a shop or warehouse, the Surveyor may authorise, on behalf of the Board, the external walls of such building to be constructed of wood or iron with wooden framing except the walls referred to before in this clause, but if any such building is to be erected nearer than six feet to an existing building, the external wall facing such existing building shall be constructed of brick, stone, or concrete.

8. No building shall be erected nearer than ten feet to the boundary of the block of land on which it stands, unless such boundary is a street or lane, unless the external wall or walls facing such boundary are constructed of brick, stone, or concrete, and the Surveyor may authorise, on behalf of the Board, the construction of any dwelling whereof the external walls are constructed of wood or of iron with wood framing or of other solid material with wood framing, except any walls coming within the distance of ten feet referred to before in this clause.

9. On behalf of the Board, the Surveyor may authorise the internal linings, partitions, and ceiling of any dwelling, if such building is not nearer than ten feet to any boundary of the block of land on which it stands, to be constructed wholly or partly of inflammable material. Such authority shall hold good for not more than twelve months after the date fixed for the expiration of the Building License, but may be extended by the Board from time to time on the application of the then owner. If no such extension of time is granted, such inflammable material shall then have become erected contrary to the provisions of Section 14 of the Building Regulations, within the meaning of the said section, and the Board may at any time proceed in the manner set forth in the said Section 14.

10. No brick, stone, or concrete wall shall be erected nearer than two feet to the boundary of the block of land on which it stands, unless it is a parapet wall rising to a height of not less than one foot above the roof gutter, and the Board will not approve of the subdivision of land which would have the effect of leaving an existing wall in conflict with this provision.

11. No street verandah shall be erected except in accordance with a plan submitted to and approved of by the Board, and every such verandah shall be provided with a suitable gutter to carry the water falling on such verandah. If the water from such gutter discharges into the street, it shall be carried into the street gutter by a cast or wrought iron downpipe of such size as the Board may direct, and such downpipe shall discharge into the street gutter in such manner as the Board may direct.

Any such street verandah, gutter and downpipe shall at all times be kept in repair by the owner of the building in front of which it is built, to the satisfaction of the Board, and the owner shall carry out any repairs in such manner as may be ordered by the Board.

12. No privy shall be erected nearer than six feet to the block of land adjoining that on which it stands. Where a right-of-way adjoins such block, the privy must abut on such right-of-way.

13. Before the construction of any building is commenced, a privy shall be provided on the land for the use of the workmen.

Fees payable.

For a Building License: Two shillings and sixpence for each 1,000 square feet of floor area or part thereof.
