NOTICE TO MARINERS.

Australia—West Coast.

Denham Channel—Shark Bay.

MARINERS and others are hereby notified that the positions of the three A.G.A. Flashing Light Buoys, situated in Denham Channel, Shark Bay, have been checked and found to be in accordance with the positions as originally advertised in the *Government Gazette* of 19th August, 1927.

Charts affected:

- No. 518, Shark Bay.
- No. 1056, Cape Cuvier to Champion Bay.

Publication:

Australia Pilot, Volume V.

J. HARRIS,  
Chief Harbour Master.

Harbour and Light Department,  
Fremantle, 19th July, 1928.

As it evidently is the existence of this bank that caused the tendency to sheer, which had been reported, mariners are advised to keep as far away from it as possible, and to watch carefully the actions of their ships when passing it.

The compass bearing of this channel has again been checked, and it is found to be 170° True, corresponding with South 5° East Magnetic.

Chart affected—

No. 1058—Rottnest Island to Warnbro' Sound.

Dated at Fremantle this 11th day of July, 1928.

Channel across Success Bank.

NOTICE TO MARINERS.

FURTHER to notice to Mariners issued by the Fremantle Harbour Trust Commissioners dated 28th March, 1927, and published in the *Government Gazette* of 1st April, 1927, and to Notice issued similarly dated 22nd June, 1928, and published in the *Government Gazette* of 6th July, 1928, the channel across Success Bank has again been sounded and compass bearings of the channel checked.

Navigators have reported that their vessels tended to sheer in the channel about 2,000 feet distant from the Northern entrance buoys. Soundings taken over this spot have revealed a bank, apparently of sand, extending for some 600 feet along the Western edge of the channel, from about 2,000 feet from the Northern entrance buoys to about 2,600 feet along the channel, and extending into the channel to about half-way between its Western edge and the centre line. The least water found on this bank was 18 feet 6 inches at low water.

§Subject to the payment of £60 for improvements by the purchaser immediately after the sale if purchased by other than the owner of same.

¶Subject to the payment of £250 for improvements by the purchaser immediately after the sale if purchased by other than the owner of same.

The purchaser will have the option of taking, in lieu of a grant of the fee simple, a lease under the Regulations at the scheduled capital value nearest the upset

price for the term of 99 years, on payment of a premium equal to the amount of his bid in excess of the upset price.

All improvements on the land offered for sale are the property of the Crown, and shall be paid for as the Minister may direct, whose valuation shall be final and binding on the purchaser.

Plans and further particulars of these sales may be obtained at this office. Land sold to a depth of 200 feet below the natural surface, except in mining districts, where it is granted to a depth of 40 feet only.

C. G. MORRIS,  
Under Secretary for Lands.

## TENDERS FOR LEASING RESERVE No. 16273.

*Geraldton Land Agency.*

Warriedar Common.

Grazing Purposes.

Section 41a of "The Land Act, 1898," and its amendments.

Corr. 1007/15.

TENDERS for the leasing of the land comprised within Common Reserve 16273, at Warriedar, containing about 18,420 acres, are invited.

The above Reserve will be available for leasing under Section 41a of "The Land Act, 1898," and its amendments (for Grazing purposes only), for a term of one year, renewable at the will of the Hon. the Minister for Lands and terminable at three months' notice, rent being apportioned accordingly, and no compensation will be paid for improvements effected at the expiration of the lease or the sooner determination thereof; excluding all existing mining areas, and subject to the condition that prospectors have the right at all times to depasture and water their stock on this Reserve.

Tenders for the above, accompanied by one year's rent (the minimum amount being fixed at the rate of Twenty-five pounds (£25) per annum), endorsed "Tender for Common Reserve 16273," shown on Public Plans 41/300 and 129/80, and addressed, "Under Secretary for Lands," must be lodged at the Lands Office, Geraldton, on or before Wednesday, 15th August, 1928.

All tenders lodged on or before that date will be treated as having been received on that date.

The highest or any tender will not necessarily be accepted. (Plans 41/300 and 129/80.)

C. G. MORRIS,  
Under Secretary for Lands.

## LAND OPEN FOR SELECTION.

IT is hereby notified, for general information, that the areas scheduled hereunder are available for selection under and subject to "The Land Act, 1898," and its amendments, including such further amendments as may be made by Parliament during the current year.

All approvals shall be subject to the residence conditions as prescribed by Section 55 of the said Act.

The areas marked "A" shall be open for selection by the special classes of selectors hereinafter named in the following order of preference:—

- (1) Under "The Discharged Soldiers' Settlement Act, 1918," by "Discharged Soldiers" within the meaning of paragraphs (a), (b), and (c) of the interpretation of the term in Section 3 of that Act, and "Dependants" within the meaning of that term in the said section.
- (2) Under "The Land Act, 1898," by ex-British Soldiers who were on active service in the late war.
- (3) Under "The Land Act, 1898," by Munition Workers in the late war.
- (4) Under "The Land Act, 1898," by ordinary selectors.

(In the event of an applicant other than a Discharged Soldier under subparagraph (1) obtaining a block within a Repurchased Estate, the term of the lease and conditions of payment will be subject to re-adjustment in accordance with the provisions of "The Agricultural Lands Purchase Act, 1909.")

The areas marked "B" are not subject to such order of preference.

Applications must be lodged at the Local Land Office for the district in which the land is situated, not later than the date specified, but may be lodged before such date if so desired.

All applications lodged on or before such date will be treated as having been received on the closing day, and if there are more applicants than one for any block, the application to be granted will be determined by the Land Board, except in cases where it is already determined by the order of preference set out above under "A." Should any lands remain unselected such will continue available until applied for or otherwise dealt with.

If a Land Board sitting becomes necessary, the applicants for the blocks will be duly notified of the date, time, and place of the meeting of the Board, and there shall be an interval of at least three days between the closing date and the sitting of the Board.

If an applicant wishes to appear before the Land Board in person he may apply to the Head Office or to the Clerk in Charge of any of the District or Branch Land Offices for a certificate to the Railway Department, which, on presentation at the nearest Railway Station, will entitle him to a Return Ticket, at Excursion Rates, to the place where the Board will sit, available for seven days from the date of issue.

The selector of a Homestead Farm from any location available under Part VIII. must take the balance thereof, if any, under Conditional Purchase.

The prices quoted hereunder (exclusive of the value of improvements, if any, and survey fees, and land acquired by the Crown under "The Agricultural Lands Purchase Act, 1909," or otherwise for settlement) are reduced by one-half to Discharged A.I.F. Soldiers only.

## THE ROAD DISTRICTS ACT, 1919.

Claremont Road Board—By-laws relating to Buildings.

P.W. 6526/21.

WHEREAS by "The Road Districts Act, 1919," the Road Board of any District is empowered to make By-laws for all or any purpose in the said Act mentioned, the Claremont Road Board, in pursuance of the powers vested in the said Board, under and by virtue of the said Act and of every other authority enabling it in that behalf, doth hereby make and publish the following By-laws:—

## Interpretation.

"Act" means "The Road Districts Act, 1919."

"Basement" means a storey or portion of a storey partly below the level of the ground, the ceiling of which is not less than five feet above the adjoining ground (irrespective of any excavation made to comply with these By-laws).

"Board" means the Claremont Road Board.

"Cellar" means a storey or portion of a storey below the ground level, the ceiling of which is less than five feet above the adjoining ground.

"Cement mortar" means a mortar composed of one part of cement to three or fewer than three parts of sand.

"Commercial building" means a building used or constructed or adapted to be used wholly or in part for commercial purposes.

"Dwelling-house" means a building used, constructed, or adapted to be used wholly or in part for human habitation, but does not include other than the dwelling-house portion (if any) of a commercial building.

"District" means the Claremont Road District.

"Habitable room" means any living room, and includes all rooms intended or adapted to be used for the purpose of sleeping or eating or the cooking of food.

"Surveyor" means the person appointed by the Board for the time being as Building Surveyor or acting Building Surveyor for the Claremont Road Board.

"Wall":—

"Divisional wall" means a wall (other than an external or party wall) which subdivides any floor of a building and which carries any load in addition to its dead weight.

"External wall" means an outer wall of a building, not being a party wall, even though adjoining a wall of another building.

"Partition wall" means a wall subdividing any floor and not carrying any load other than its own dead weight.

## 1.—Applications, Plans, and Notices.

Before the erection of a building is commenced two copies of the plans and specifications, together with the cost of such building, and an application in writing for approval thereof, shall be submitted to the Board.

Provided that the Board may, if it see fit, dispense with the necessity for the submission of plans and specifications, and reduce or dispense with the payment of a fee with any application for approval to make minor alterations in an existing building, or to erect a building to be used exclusively for the purpose of a greenhouse, conservatory, summerhouse, private boathouse, fuel shed, tool house, cycle shed, aviary, verandah, or the like: Provided also, that any building (other than a verandah or aviary) used or intended to be used for the keeping of domestic animals shall be wholly detached from any dwelling-house: Provided also, that where it is desired to make some minor alterations to a building not materially affecting its stability, lighting, ventilation, or size of rooms, the application may, in the first place, be made without submitting plans and specifications, which shall, however, be submitted if the Board so requires.

The application shall describe the building and show the purpose for which the building is to be used.

The plans shall consist of a general plan and elevations and a block plan. The block plan shall show the relation of the building to the boundaries of the site and to other buildings or structures thereon.

The specifications shall describe the construction and materials of which the building is to be built, and the method of drainage, sewerage, and water supply, and state whether the materials will be new or second-hand, and, if second-hand materials are to be used, shall give particulars.

When giving approval the Board may impose a condition that forty-eight hours' notice shall be given prior to the covering of any or all of the following works, in

order that they may be inspected, that is to say: trenches before foundations are laid, foundations before trenches are filled in, and drains before they are covered in.

## 2.—Fees and Permits.

No person shall commence any building, erection, or structure, or any addition or alteration to any building, erection, or structure, without having first obtained from the Surveyor a written permit for the commencement of same, and without having first paid to the Board the fees in respect thereof set forth in these By-laws.

Each building, erection, or structure must be completed within the undermentioned specified time from the date of issue by the Board of the permit therefor:—

- (a) Brick, stone, or concrete, six months
- (b) All other buildings, three months.

The fees payable in respect to buildings, erections, or structures shall be as follows:—

(a) The expression "floor area" applied to building shall mean the aggregate superficial areas of so many horizontal sections thereof as there are floors in the said building. The horizontal section of each floor shall be made at the point of its greatest surface dimensions, inclusive of external walls and of such portions of the party walls as belong to the building, and also of all verandah and balcony floors, covered ways, and light courts.

(b) The expression "square" applied to the measurement of the area of a building means the area of 100 superficial feet.

For the first five squares in every building, 2s. 6d. per square.

All squares or part of a square over the first five squares, 3s. per square.

Minimum charge for every building, 3s.

## 3.—General Provisions.

Each building in a terrace of buildings or in a pair of semi-detached buildings shall be deemed to be a separate building for the purpose of this By-law.

Every building shall be provided with one or more proper manholes in the ceilings so as to give access for electrical and other fittings.

## 4.—Site, Healthiness of.

A person shall not, without the written permission of the Board, erect a building upon any site which shall have been filled with any material impregnated with faecal or with animal or vegetable matter, or upon which any such matter may have been deposited, unless and until such matter shall have been properly removed by excavation or otherwise from such site and depressions filled in with clean soil.

Every person who shall erect a building shall cause the subsoil of the site of such building to be effectually drained, wherever in the opinion of the Board the dampness of the site renders such a precaution necessary.

No person shall commence to build any structure without having first provided proper and sufficient sanitary accommodation to the satisfaction of the Board for all persons engaged or employed upon such structure.

Motor garages not exceeding three hundred square feet in floor area may be built in iron, brick, stone, or concrete, or other non-inflammable material anywhere in the district; provided that the Board may require—

- (a) that any such motor garage be fifty feet distant from the frontage of any other road or street (except in special cases where the physical configuration of the ground precludes such distance being observed);
- (b) that any such motor garage be five feet distant from the frontage of any other road or street;
- (c) that any such motor garage be ten feet distant from any building used as a dwelling-house on the same allotment or on any allotment adjoining;
- (d) that the motor garage complies otherwise with all the conditions and limitations of this By-law in regard to buildings.

Fowl-houses of not more than two hundred square feet in area and not more than six feet in height may be erected at rear of any dwelling; provided that the nearest portion of such fowl-house is at least 30 feet from any building used as or intended for a dwelling, and at least four feet from the boundary of land not in the same occupation.

Fowl-houses of larger area may be erected if at a distance of at least 50 feet from any street and 40 feet from any dwelling-house and at least four feet from the

boundary of land not in the same occupation: Provided that the roof and walls are covered with galvanised iron or other fire-resisting material, approved by the Surveyor, and that the building shall not be more than seven feet high.

The Board may refuse or postpone approval to build upon a site which is unhealthy by reason of its liability to dampness, unless and until the site has been rendered dry, sound, and well-drained to the satisfaction of the Board.

If the Board so direct in any particular case, the whole or part of the ground surface or site of a dwelling shall be covered with a layer of good cement concrete or tarred metal, rammed solid and at least four inches thick.

#### 5.—Position of Building Site.

No building which is intended to be used or which shall be used as a dwelling-house, and no addition to any such building shall be built, constructed, or erected within a distance of thirty feet measured horizontally from the building line of the street or road the building is intended to or shall front, unless with approval of the Board.

Except as hereinafter provided no building with an external wall of wood which is intended to be used or which shall be used as a dwelling-house, and no addition with an external wall of wood to any building which is intended to be used or which shall be used as a dwelling-house shall be built, constructed, or erected—

- (a) within a distance of four feet six inches, measured horizontally, off any street, road, land, or right-of-way at the side of any such building; or
- (b) within a distance of four feet six inches, measured horizontally, of any land not in the same possession or occupation. Provided always, that any such building or addition may abut on the building line of any street, road, lane, or right-of-way at the side of such building, or be less than the prescribed distance therefrom; or from a building or erection with an external wall of wood: Provided that the wall or walls which abut on or face within the prescribed distance such street, road, lane, or right-of-way or land or building or erection, as the case may be, shall be of concrete at least six inches in thickness, or of brick or stones at least 8½ inches in thickness, projecting in all cases at least one inch beyond the woodwork front and back and at least one foot six inches through the roof covering of gutter adjoining the same.

#### 6.—Access to Rear.

Where there is no public and convenient access to the rear of the site of any building for the removal of nightsoil, the building shall be so designed as to leave outside the building a way of access at least four feet wide from a public road to the privy closet, and for the removal of garbage and refuse.

#### 7.—Outbuildings.

In the case of an application to erect (as appurtenant to any building) any outbuilding from the use of which unpleasant noises, unpleasant odours, or unusual risk of fire may reasonably be expected to arise, the Board may determine in what position upon the allotment such outbuilding may be erected.

#### 8.—Brick Areas.

Within the areas as set out hereunder no building plan shall be approved and no building erected the materials of the walls and party walls of which are deemed by the Board to be inferior to brick, stone, concrete, or re-inforced concrete—

- (a) the whole of the East and South Wards as defined in the *Government Gazette* of the 26th October, 1923, page 2081;
- (b) all that portion of the North Ward bounded on the North by Aberdare Road, on the East by University Avenue and Hampden Road, and on the South by Perth-Fremantle Road and on the West by Prowse Avenue from Perth-Fremantle Road to Slater Avenue; thence along Slater Avenue to a point midway between Barron Avenue and Kinninmont Avenue; thence Northwards by the alignment of the rear of the subdivisional blocks between Barron Avenue and Kinninmont Avenue and its prolongation Northwards to Aberdare Road;

(c) all that portion of the Central Ward bounded on the North by Bedford Street, on the East by Prowse Avenue and Dalkeith Road, on the South by Alice Road, on the West by Loch Street and the rear of the subdivisional blocks situated between Rockton Road and Bay Road and its prolongation Southwards to Alice Road, and including all allotments abutting upon Loch Street;

(d) all that portion of the district bounded on the North by Wood Street, on the East by Servetus Street, on the South by Walpole Street, and including all allotments fronting Walpole and Wood Streets.

#### 9.—Tents, Canvas Buildings.

The Board may grant, subject to conditions, or refuse permission to erect a structure of calico, canvas, or other textile material, and, if any such structure is erected without the Board's permission, may order its demolition.

#### 10.—Materials and Workmanship.

Materials which have been used in the construction of any cesspit, drain, or sewer, or which for any other reason are dangerous to health, shall not be used in the erection of any building.

Faulty or unsuitable materials shall not be used in any building.

Every part of a building shall be erected and finished off in a good and workmanlike manner.

Bricks used in any building shall be good, hard, and well burnt, and if old or second-hand shall be thoroughly cleaned and approved by the Board in writing before being so used.

All brick or stone chimneys shall be constructed of ample flue, to be well plastered or pargetted inside for the full height, and no timber of any description will be allowed to be built into the brickwork. The Board may give authority to erect iron chimneys, but in the erection they shall be laid on either stone or concrete base and free from all woodwork.

Hearths of stone, brick, cement, or iron of approved dimensions shall be placed in front of all fireplaces.

#### 11.—Testing Materials.

The Board may test any building materials, and prohibit the use of such materials as are proved unfitted for the purpose for which they were intended to be used.

#### 12.—Timber Construction.

All timbers used in any building shall be perfectly sound, free from rot, shakes, large or loose knots, or any other imperfections whereby the strength of the material may be impaired.

The following conditions shall apply as to the spacings and scantlings of timber:—

- (i) Stumps shall not be less than 4in. x 4in. jarrah or other approved timber, spaced 5ft. centre to centre, and fixed on 6in. x 1½in. sole-plates. Stumps shall be tarred and sunk at least half their exposed length in the ground; provided that no stump shall be less than 2ft. in the ground. Tarring is to extend for 6in. above the ground surface.
- (ii) Studs and ceiling joists shall not be less than 4in. x 4in. spaced not more than 2ft. apart, centre to centre, properly secured and braced. Studs and ceiling joists of 3in. x 2in. may be used; provided they are spaced 18in. apart, centre to centre, properly braced and secured. Where studs of 3in. x 2in. are used the angle or corner studs shall be of 3in. x 3in.; where 4in. x 2in. studs are used, the angle studs shall be of 4in. x 4in.
- (iii) Rafters shall not be less than 3in. x 2in., spaced not more than 3ft. centre to centre, in the case of iron roofs, and 18in., centre to centre, in the case of slate, tile, or other similar roofs; 4in. x 2in. rafters may be used, but must be spaced at 2ft. centres for slates or tiles, and not more than 3ft. apart for any type of roof. All rafters must be securely braced with purlins and collar ties.
- (iv) Floor joists shall not be less than 4in. x 2in., spaced 18in. apart, centre to centre.
- (v) Floor bearers shall not be less than 4in. x 3in., spaced not more than 5ft. apart.

In addition to the bearers required for this spacing, an additional bearer of 4in. x 3in. must be placed under each wall or partition.

No framing timber in any building shall be notched or checked out to receive bracing or otherwise so as to reduce its cross-sectional area more than one-sixth.

## 13.—Awnings and Verandahs.

The Board may require that any or all awnings or verandahs proposed to be erected over a public place shall be of the cantilever type. No verandah shall be enclosed for living or sleeping purposes without the Board's written consent.

## 14.—Footings.

Every person who shall erect a building of brick, stone, or the like shall construct every wall of such building, unless built upon a hard rock foundation, to rest upon proper footings, or upon a sufficient beam.

He shall cause the projection of the bottom of the footings on each side of such wall to be at least equal to one-half the thickness of the wall at its base, unless an adjoining wall interferes, or unless the wall is upon the boundary of the land, in which case the projection may be omitted on the side of the boundary or where the wall adjoins.

He shall also cause the diminution of the footings to be in regular offsets, unless the footings be of concrete. The height from the bottom of such footings to the base of the wall shall at least equal to two-thirds of the thickness of the wall at its base: Provided, that when the footings are of reinforced concrete the Board may permit the height to be less; and, provided further, that it shall not in any case be less than 12in.

Footings to walls of brick in cement mortar (3 to 1) shall be the same width and height as those to walls of the same thickness not built in cement mortar.

Vermis plates shall be provided to all walls other than brick, stone, or concrete.

## 15.—Damp Course.

Every person who shall erect a building shall provide and insert damp-proof courses of lead, slate bedded in cement, or natural asphalt: Provided that the Board may permit the omission of damp-proof courses from closets, outbuildings, and the like structures.

Where material which is not slate, natural asphalt, or lead, of a minimum weight of two pounds per square foot under walls not exceeding 40ft. in height, or three pounds per square foot under walls exceeding 40ft. in height is desired to be used, the applicant shall submit to the Board evidence that the material to be used has been approved by the Board of Health, or, failing such evidence, that the material is a good and effective damp-proof course.

Damp-proof courses shall be inserted in walls to their full width and in such manner that there shall be no open spaces, cracks, or gaps in the damp-proof courses along the full length of the walls.

Damp-proof courses shall be inserted in walls in such positions and in such manner that—

- (a) moisture from the earth shall be prevented from reaching the lowest floor timbers or the walls above the underside of the lowest floor joists, or, where solid floors are laid, shall be prevented from reaching higher than 3½in. above such floors;
- (b) where floors are below outside ground level, moisture shall be prevented from reaching inner face of outer walls;
- (c) where cavity walls are used, moisture penetrating outer portion of walls shall be prevented from reaching the floor timbers, or the inner portion or face of all walls above the underside of the lowest floor timbers, or, where solid floors are laid, shall be prevented from reaching higher than 3½in. above such floors;
- (d) moisture penetrating the chimney, parapet, or other walls above the roof shall be prevented from reaching in any part of the inner walls or the inner portion of inner face of outside walls below the upper side of the ceiling joists in either case;
- (e) moisture penetrating the outer portion of cavity walls shall be prevented from reaching the inner portion or inner face of such walls above or about window, door, and other frames or openings.

In cavity walls the cavity shall extend not less than 4½ inches below damp-proof course.

This clause shall apply to walls constructed of brick, stone, or concrete, and to walls of any material readily permeable by water.

## 16.—External Walls—Structure.

Every person who shall erect a building shall cause the external walls thereof to be constructed of brick, stone, concrete, timber, or other material approved by the Board.

If built of brick, stone, concrete, or the like the external wall shall, except where herein provided to the contrary, be not less than 9in. in thickness. Provided that the walls of sheds, laundries, outhouses, and the like, not exceeding 10ft. in height, may, if the Board so permits, be of 4½in. thickness.

Cavity walls may be built, provided that two sections are securely tied together by a sufficient number of wire ties or other effective method, and when used the combined thickness of the inner and outer parts shall be deemed to be the thickness of the wall.

Bottoms of all cavities shall be carefully raked out before the completion of the building, and all ties kept free from mortar droppings.

Where cavity walls are used weep-holes shall be left at foot of cavity not more than six feet apart, and over all damp-proof courses inserted to protect walls weep-holes shall be left not more than three feet apart.

Notwithstanding anything to the contrary in this clause, the Board may permit the erection of dwellings not more than two storeys in height of concrete with walls of less than the prescribed thickness, if satisfied that such proposed dwellings will be hygienic and structurally sound.

## 17.—Party Walls.

Two, but not more, residences may be erected together in one block, provided that they shall be separated from each other by a wall of concrete or of brick or stone at least six inches in thickness, properly reinforced to the satisfaction of the Surveyor, projecting, in the case of wooden houses, at least one inch through the wood-work front and back, and in all cases projecting one foot six inches at least through the roof covering or gutter adjoining the same, whether belonging to the same owner or not. Each building or dwelling-house in a block shall be subject to the provisions of the By-laws applicable to its class, save that the site or curtilage of each of such buildings shall have a superficial area of at least four thousand square feet and a frontage of at least 33 lineal feet to a street or road.

## 18.—Rooms (size)—Cubic space.

Every person who shall erect a building shall provide that—

- (a) the areas of the floors of all the habitable rooms in such building shall, taken together, average not less than 100 square feet per habitable room;
- (b) a habitable room shall not in any case have a floor area of less than 80 square feet; and
- (c) a habitable room shall not, in any case, have a cubic space of less than 840 cubic feet: Provided that, in each dwelling-house and in each flat of a residential flat building there shall be at least one habitable room, the cubic space of which shall not be less than 1,296 cubic feet; no main room in any building shall be less than 10 feet 6 inches in height from floor to ceiling;
- (d) all shops shall have a clear space of 12ft. 6in. from floor to ceiling.

## 19.—Height—Rooms in Roof.

Every habitable room which is wholly or partly in the roof of a building shall, in the case of an attic room above the ground floor, be for at least two-thirds of the area of the floor not less than nine feet in height, and shall not, in any part, be less than five feet in height, and, in the case of any other room, shall be for at least three-fourths of the area of the floor not less than nine feet in height, and shall not in any part be less than seven feet four inches in height.

## 20.—Other Rooms.

Every habitable room which is not a room wholly or partly in the roof of a building shall be not less than nine feet in height. Provided that bays, inglenooks, and recesses for furniture may be added to such rooms with ceilings of a less height than nine feet, but the ceilings of such bays and inglenooks shall not be less than six feet eight inches in height.

## 21.—Rooms for places of Assembly.

A building in which there is a room designed, intended or adapted to be used for the assembling of person for any purpose, such room being situated upon the first or any higher floor above the ground floor, and having a floor area of 450 or more superficial feet, shall be de-

signed and constructed in compliance with the following provisions in addition to the general provisions in this part:—

If the room be on the first floor, it shall be provided with at least two exits. If the room be on the second or any higher floor above the ground floor, it shall be provided with at least two exits, and there shall also be provided two staircases leading from the ground floor to the floor on which the room is situated or one such staircase and a fire escape.

Such exits and staircases and the passages connecting them shall be of a total width calculated in the proportion of 20 inches for every 600 superficial feet of floor area, or fraction thereof, in such room; but no passage, stair, or exit shall be less than three feet six inches in width nor more than 10 feet in width.

Such stairs shall be uniform throughout, with risers not more than seven inches high and treads not less than 10 inches wide, exclusive of nosings, if any. Each flight of stairs shall contain not less than three nor more than fifteen risers. There shall be hand-rails on each side, securely fixed, and staircases over six feet in width shall have a centre hand rail.

The stairs and landing shall be of such strength as to be capable of carrying with absolute safety the largest number of people who may be reasonably expected to use them at one time.

All doors used as exit doors from any such room shall, except where otherwise approved, be hung in two folds, fitted with "panic" bolts, and be made to open outwards towards the thoroughfare or way. All doors between such rooms and the open air shall be hung so as not to obstruct, when open, any gangway, passage, staircase, or landing. A door shall not open immediately upon a flight of steps, but a landing of at least equal depth to the width of the door shall be provided between such steps and such doorway.

#### 22.—Lighting and Ventilation—Under Floors.

For the purpose of ventilation, every building shall be so erected that there shall be, between the underside of every joist upon which the lowest floor of such building is laid and the ground surface or upper surface of the asphalt or concrete with which the ground or site of the building may be covered, a clear space of 12in. at least in every part; and such space shall be thoroughly ventilated and cross-ventilated by means of suitable and sufficient air-bricks or other effectual method: Provided that where the lowest floor is so constructed (by filling with concrete, asphalt, or other approved material) as not to permit the harbouring of rats, this provision shall not apply.

#### 23.—Rooms—Air-bricks, Louvres, etc.

Every room of a building shall be so constructed that for every 1,000 cubic feet or part thereof of air space in the room there shall be 24 square inches at the least of unobstructed ventilation to the outer air by means of airbricks situated at or near the level of the ceiling or any other efficient means.

#### 24.—Rooms—Windows.

Every habitable room, or room or alcove, in which food is intended or likely to be stored or prepared, and every bathroom, enclosed laundry, and privy-closet shall have at least one vertical window opening directly to the outside air. One-half at least of such window shall be constructed to open to its full extent, and so that the opening may extend to the top of the window: Provided that in a pantry any other system of ventilation may be substituted for windows if the Board be satisfied that such system is equally efficient.

#### 25.—Bedrooms—Additional Ventilation.

In every bedroom or room intended or adapted to be used for sleeping and having only one window, there shall be provided cross-ventilation by means of at least 48 square inches of unobstructed opening in some wall of the room other than that in which the window is situated. Such opening may be by an additional window, fire-place, faulight, airbrick, or any suitable means.

#### 26.—Height of Windows.

The top of a window of an enclosed laundry or of a kitchen, or alcove, or room in which food is intended or likely to be stored or prepared shall not be less than six feet eight inches from the floor.

#### 27.—Size of Windows.

The window or windows of any room shall have a superficial area (clear of the sash frame) not less than one-tenth of the floor area of the room, or (if the following size be greater than one-tenth of the floor area) not less than 10 square feet for the windows of a kitchen or alcove or room in which food is intended or

likely to be prepared, not less than six square feet for the windows of an enclosed laundry, not less than 3½ square feet for the windows of a bathroom, not less than two square feet for the windows of a privy-closet, and not less than 1½ square feet for any other room.

#### 28.—Laundries and Kitchens.

A dwelling of any kind shall not be erected with the kitchen and laundry combined in one room.

#### 29.—Windows.

Any windows, the top of which is more than 12ft. above either the ground or any external flat surface or slightly sloping roof sufficient for safety, shall be so constructed that it can be cleaned from the interior of the building.

#### 30.—Drainage—Levels.

Every person who shall erect a building shall construct the lower storey of such building at such a level that, in the opinion of the Board, it may be practicable to construct a drain sufficient for the effectual drainage of such building.

No person shall build or erect or cause or permit to be built, or erected, any building, erection, tent, or addition to any building, erection, or tent on any land unless and until such building, erection, tent, or addition and the site and curtilage thereof can be properly drained, and the Board may refuse permission to build and erect any building, erection, or tent, or addition, unless and until it is satisfied that the proposed building, erection, tent, or addition and the site and curtilage thereof can be properly drained. No water is to be discharged on to the surface of any footpath.

#### 31.—Miscellaneous.

The Board may permit the enclosure and use of any public place in connection with the building or taking down of a building, or the alteration or repair of a building.

#### 32.—Skylights.

The Board may order the alteration or repair or both of any skylight in any building if such skylight be, in the opinion of the Board, in such a condition as to be detrimental to health or dangerous.

#### 33.—Existing Buildings.

If, in the opinion of the Board, any building has been allowed to fall into an unsafe or insanitary condition either by faulty construction or any other cause, the Board may give notice in writing to the owner or occupier to repair said building, and in the event of no action being taken within seven days by the said owner or occupier to remedy any defect complained of in the said notice, the said owner or occupier shall be liable to a fine, as hereinafter provided, until such time as the building shall be placed in a safe and sanitary condition, and the owner or occupier shall be liable for all charges incurred in doing the necessary works, and, moreover, if, in the opinion of the Board, any building does not warrant the expense of repairing, the owner, after receiving notice, shall remove the building within seven (7) days; failing this he will be liable to a fine, as hereinafter mentioned, to remove the building after receiving the notice; the Board may remove same and charge the owners with the cost of so doing, and recover the same in any Court of competent jurisdiction and/or sell the material to cover the cost of taking down.

#### 34.—Removal of Buildings.

No building or erection shall be removed into and erected or re-erected in the Road District, or removed from one part of the district to and erected or re-erected in another part thereof, unless the owner or person carrying out the removal first obtain written permission from the Board to do so. Before such permission shall be granted not less than seven (7) clear days' notice in writing shall be given to the Board or the Surveyor of the desire to remove and erect or re-erect such building or erection.

Such notice shall contain or be accompanied by the following:—

- (a) particulars of the situation of building which it is proposed to remove;
- (b) particulars of the situation of and plan of the land upon which it is proposed to erect or re-erect or place such building thereon, and a tracing copy of such plan to be retained by the Board;
- (c) a plan giving the dimensions of the building and any proposed alterations or additions thereto, and a tracing copy of such plan to be retained by the Board;

- (d) a specification giving particulars of the construction of the existing building and of the alterations and additions (if any) which it is intended to make when the building is erected or re-erected;
- (e) evidence satisfactory to the Board that such house has not been condemned as dilapidated, insanitary, or unfit for human habitation, and a certificate from the Health Officer of the Road District from which the building is proposed to be removed that within a reasonable time prior to date of removal no case of disease of an infectious or contagious nature has occurred therein;
- (f) such further particulars in writing regarding the same as shall be sufficient to enable the Board or its Surveyor to determine if all the provisions of any Act of Parliament, By-law, or regulation applicable thereto are or will be complied with.

No written permission shall be given unless such removed building when erected or re-erected shall comply with the provisions of this By-law as applicable to new buildings.

No building or erection that has been condemned as dilapidated, insanitary, or unfit for human habitation shall be removed into or re-erected within the Road District.

No building or erection in which any case of infectious or contagious disease has occurred during the preceding six months shall be removed into or re-erected within the Road District.

No removed building shall be occupied until the Surveyor shall have certified in writing that all the provisions of this By-law have been observed and complied with in respect of such building.

Nothing herein contained shall prevent the alteration of the position of any building within the boundaries of the land on which the same stands: Provided, that in its altered position it shall comply in all respects with this By-law, and that in the progress of such removal the building be not taken on to any street, road, or public place.

No dwelling shall consist of less than three main rooms of a total of not less than 300 square feet, and no building or rooms thereof shall be occupied for living purposes until at least three main rooms shall have been completed according to the plans and specifications submitted to and approved by the Board.

The Board may, in special cases, grant permission for the erection of a dwelling-house containing not less than two rooms.

### 35.—Proportion of Site which may be covered.

A dwelling-house, together with its appurtenances to be erected on an allotment, shall not occupy more than two-thirds of such allotment, and the minimum of unoccupied area shall not be less than 500 superficial feet: Provided, that this shall not prevent the Board from granting approval to the erection of a dwelling-house occupying more than two-thirds of an allotment or with a minimum of unoccupied area of less than 500 superficial feet, in replacement of an existing dwelling-house which occupies more than two-thirds of that allotment, or has a minimum of unoccupied area of less than 500 superficial feet as the case may be.

Provided also, that where situated on a site considered by the Board to be an established shopping locality, the Board may permit a building which is to be a shop and dwelling combined to occupy not more than four-fifths of the allotment, subject to the unbuilt upon area being not less than 500 square feet.

Provided also, that a garage erected at a low level, the roof of which serves as a portion of the garden, yard, or court, shall not be included as a building in calculating the proportion of the area of the allotment that may be occupied by a building.

After the adoption of this By-law all subdivisions or re-subdivisions of allotments must be such as to have a frontage to a street or road of not less than 66 lineal feet and a depth of not less than 165 lineal feet, or with such measurements to equal one quarter of an acre in area. Such subdivisions and re-subdivisions must be lodged with the Board for approval before commencing to build, and shall apply throughout the whole of the Claremont Road District, without special approval of the Board.

A shop shall not be built on land having a frontage of less than 18 feet to a street or road and an average depth of 130 feet. There shall be back access from right-of-way 10 feet wide at least. For the purposes of this clause the Board may agree to a subdivision with frontages less than 66 feet, but notwithstanding any

such approval no dwelling shall be erected upon the subdivided land except in accordance with these By-laws.

No land upon which any dwelling-house has been erected shall thereafter be reduced in area below the minimum area prescribed by this By-law. Provided always, that notwithstanding anything hereinbefore provided to the contrary the Board may, on application in writing setting forth the grounds of the application, under special circumstances, and for special causes, and at a meeting of which due notice has been given to each member, declare that the provisions of the By-law either in whole or in part shall not apply to any particular area of land.

No building shall be erected in such a position that it shall lie between another building or any part thereof and street unless such other building has a direct and unobstructed access to some other street at least 16 feet wide.

### 36.—Space outside Windows on side Land.

If there be any side wall of a dwelling-house in which it is proposed to provide a window or door opening, that wall shall be set back (throughout its whole length) from the side-line of the allotment to a distance of three feet, in the case of a dwelling-house of one or two storeys, or to a distance of five feet, in the case of a dwelling of more than two storeys.

### 37.—Kitchen, Laundry, and Bathroom Fittings.

Every dwelling-house shall be provided with a completely enclosed bathroom or combined bathroom and laundry, and with wash tubs and copper or other means of washing clothes, and the water laid thereto. The floor surfaces of bathrooms on any floor, and of laundries when above the ground floor, shall be of impervious material, properly graded and drained. The wash tubs, copper, and bath shall not be placed in the kitchen.

One bathroom in each dwelling-house shall have at least 30 square feet of floor area; and a combined bathroom and laundry shall have at least 56 square feet of floor area: Provided, that the Board may in any case where it considers that a bathroom or laundry could be dispensed with, exempt any building from the above provisions, but such exemption shall be given by resolution of the Board.

### 38.—Enforcement—Inspection—Cutting into Building.

The Board may order the opening or cutting into, or pulling down of any work where the Board has reason to believe or suspect that any thing has been done in contravention of the Act or of any By-law, and in the event of the work being found to have been done in contravention of the Act or of the By-laws, the person doing the work shall be required to comply with the Act or the By-laws, and shall bear the full cost of such pulling down, opening, or cutting into and of compliance with the Act or the By-laws.

In the event of the work being found to have been done in accordance with the requirements of the Act and the By-laws, the cost of such pulling down, opening, or cutting into, as well as the cost of reinstatement, shall be borne by the Board.

The Surveyor or his representative shall have power to enter, at any time, upon any building in course of erection for the purpose of inspecting the said building, and may require the production of the approved plans thereof, which are to be available on the building during ordinary working hours whilst the building is in the course of construction.

### 39.—Inspection before Occupation.

Before permitting any person to occupy or use any uncompleted building, and forthwith upon completion of any unoccupied building, the person by or in consequence of whose order the building is being erected shall give notice to the Board.

Forthwith upon receipt of notice as aforesaid, the Board shall instruct the Building Surveyor to make an inspection, and such Surveyor shall inspect and report to the Board whether or not the building has been erected in accordance with this By-law and without material deviation from the approved plans and specifications, but this shall not be read to permit any alteration whatever in the position of the building on the site.

Such report shall not be deemed to be evidence (in the event of any prosecution hereunder) that this By-law has been complied with.

### 40.—House Numbering.

(a) The Board, its officers, or other person appointed, shall have power to number all houses, camps, buildings, tenements, or other structures within the district of the said Board by placing a metal or tin plate thereon, or by painting.

(b) The cost of such house numbering to be paid by the householder or owner, and such cost not to exceed the sum of two shillings.

(c) No person shall remove, deface, damage, or injure in any way any number or set of numbers placed or painted on any portion of such house, camp, building, tenement, or other structure.

#### 41.—Penalties.

Any person who erects a building in contravention of this By-law, or any person who neglects to comply with any provision set forth herein, shall be liable to a penalty not exceeding ten pounds, and also a daily penalty of one pound per day for any continuance of the offence.

### MIDLAND JUNCTION MUNICIPALITY.

#### *By-law No. 58.*

P.W. 5580/21.

By-law of the Municipality of Midland Junction, made under "The Electric Light Act, 1892."

IN pursuance of the powers conferred by the said Act, the Mayor and Councillors of the Municipality of Midland Junction order as follows:—

#### ELECTRICITY SUPPLY DEPARTMENT.

*Service Rules and Regulations for Supply of Electricity.*

##### 1.—Applications for Connections.

Application for service connections must be made on the Department's application form and filed at the office of the Department at least three clear days before the connection is required. (The making of the application or paying of deposit will not bind the Department to give the supply until the application is approved on behalf of the Department.)

The Department will make every effort to make the connection at the time desired by the applicant, but will not be bound to any particular date in case of shortage of labour or material.

##### 2.—Security.

The Department will require a security deposit with each application, or may do so at any time after the service is connected, in such an amount as the Department may consider sufficient security, with a minimum of 15s.

##### 3.—Accounts.

Accounts will be rendered weekly, monthly, bi-monthly, or quarterly, at the option of the Department, and at the Department's ruling rates for the district in which the service is rendered, and must be paid on or before the prescribed date. If not paid at the Department's office on or before that date, the right is reserved to cut off and discontinue the supply without further notice.

##### 4.—System.

Electric current will be supplied, except where special arrangements may be made, from the Department's alternating current system, at a frequency of 40 cycles. All lighting will be, and motors up to 2 h.p. may be, supplied at nominally 250 volts, single-phase. All motors over 2 h.p., except with special written permission of the Department, must be connected to the nominal 440 volts 3-phase circuits.

##### 5.—Wiring of Installations.

All wiring of installations to be connected shall be in accordance with the standard wiring rules of the Institution of Engineers, Australia, the rules of the Fire Underwriters' Association of Western Australia, and the requirements of the Department of Public Health, and the Public Works Department, for the time being in force, and no connection will be made without a certifi-

cate that the installation is in order and on such form as may be from time to time prescribed by the Department.

##### 6.—Position of Service Leads, Fuses, etc.

The Department will decide as to the most suitable positions for its fuses, circuit breakers, indicators, meters, and termination of service leads. The position of service fuses will be as near as possible to the point where the mains touch the building but one in which they may be reached by a short ladder for replacing fuses. Fuses may be fixed in any suitable position, and unless of weather-proof type shall be sheltered from the weather. Where service fuses are within a building they will be placed within ten feet of the point of entrance of the supply leads.

##### 7.—Consumer's Main Switch and Fuses.

The Department will provide and fix the meter board and meter at the position agreed upon, to which point the consumer must bring his mains and provide on his side of the meter—(a) double pole linked switch for single-phase circuits; (b) three-pole switch for three-phase circuits.

In cases where the consumer's main switches and fuses are, with the Department's consent, fixed on the supply side of the meter, they shall be ironclad and suitable for sealing with the Department's seal.

##### 8.—Capacity of Main Switches.

The foregoing switches shall be of ample capacity and of a design approved by the Department. Sufficient length of wire shall be left by the consumer to connect to the Department's meter. In all cases the line wires are at the left and the consumer's wires at the right of the meter.

##### 9.—Consumer's Terminals and Leads.

The point of termination of the Department's service leads shall be deemed to be the position of the consumer's terminals, which position in the case of an overhead supply shall be on the outside of the building, and is hereinafter designated "the point of entry," and shall be as high as convenient on the building but not higher than two storeys, unless especially approved.

The consumer's leads shall be of sufficient length to allow of their ends being properly connected to the service conductors at the consumer's terminals. Loops shall be left in the leads for the insertion by the Department of its meters, service cut-outs, or other apparatus.

At the point of entry to buildings the consumer's leads shall be provided with a suitable bell-mouthed bend or other approved terminal fitting of the watershed type. Porcelain bushings through roofs, etc., will not be permitted.

##### 10.—Meters and Meter Boards.

(a) The consumer or contractor shall consult the Department as to the position of the meter-board, which must be fixed in a position approved by the Department, protected from the weather, out-of-doors, or elsewhere accessible to the Department at all reasonable times.

(b) In large buildings all circuits must be brought to one or more central points, as may be arranged with the Department, where the Department's circuits will enter and the necessary meter or meters be placed. The Department will not supply meters promiscuously throughout buildings.

(c) In cases where a building is let in single rooms or groups of offices or flats, the Department will only instal one set of meters and supply current to the building as a whole with the landlord or chief tenant as consumer.

(d) The Department will, if requested in such cases, supply to the landlord at a rental meters required by the landlord for metering the supply to the various tenants, and will, if desired, without extra charge, read such meters at the same time as the master meters are read, and supply the readings to the landlord so that he can bill the current up to his various tenants. In all such cases the landlord must charge the tenants the same meter rental and tariff for the electricity used as the tenants would pay if supplied direct by the Department.

##### 11.—Fixing of Leads in Fuses, Meters, etc.

Only an employee of the Department may insert the ends of the consumer's leads into any service fuse, meter, indicator, current limiter, or other device, the property of the Department.

##### 12.—Department's Property.

The service mains and fuses, meters and other apparatus fixed by the Department on the consumer's premises shall remain the property of the Department, and the consumer will be held responsible for any interference whatsoever with any such property.

## 13.—Nature and Protection of Consumer's Leads.

The consumer's main switchboard may be placed in any convenient position on his premises. The conductors between the point of entry and the consumer's main switch shall be of best quality V.I.R. insulation, and without joints, enclosed in steel conduit screwed if exposed to weather, shall be stranded and of adequate sectional area, which in no case shall be less than that of a 7/036in. cable.

## 14.—Department's Service Fuses.

The service fuses fixed by the Department on the mains side of the meter may or may not be sealed by the Department but they shall not in any case be interfered with by the consumer, who must provide suitable fuses on the load side of the consumer's main switch.

## 15.—Testing Insulation.

Before any installation is connected to the supply mains, and before alterations or additions to an installation are connected, they may be tested by the Department once, free of charge. If defective, connection will not be made until the defect is remedied, and a minimum charge of 5s. will be made for the second test, and 10s. each for any subsequent tests, to be paid by consumer before connection is made.

## 16.—Service Connection.

The Department will run the overhead service wire to insulators attached to the outside of the consumer's premises at the point of entry, when the distance from the street in which the mains are located does not exceed 66 feet. Above that distance, or if special or underground cables are required, the cost may be charged to the consumer.

## 17.—Conductors not to be earthed.

No conductor in a consumer's installation shall be connected to earth, and all conductors shall be equally insulated, as provided in the Wiring Rules of the Institution of Engineers, Australia.

No supply will be given to premises wired on the concentric system using an uninsulated "outer" conductor.

## 18.—Wall Plugs for Lighting and Power.

Where it is required to provide for the separate metering of current supplied at different rates, the installation shall be divided into separate and distinct circuits, which must not be bunched, and all wall plugs, connectors, and the like shall be of such different types that it shall not be possible to connect apparatus chargeable at a certain rate to any part of the installation conveying current chargeable at a lower rate.

No lamp-holder shall be connected to any circuit, the supply to which is given at power or heating rates, except as provided in the Wiring Rule No. 105, in the case of pilot lamps, which, however, shall be so installed as to render it impossible to use them for general illuminating purposes.

## 19.—Switches to be on Non-earthed Conductors.

The ends of the non-earthed conductors to which all single pole switches must be connected in accordance with Rule 26 of the Wiring Rules of the Institution of Engineers, Australia, shall be labelled "Switchwire," in order that the Department may correctly connect the consumer's leads to the service leads.

## 20.—Balancing Circuits.

Circuits must be arranged as follows:—

Circuits taking less than 15 amps may be taken off one phase (two wires).

Circuits taking more than 15 amps must be divided into two approximately equal circuits and taken off two phases (three wires).

Circuits taking more than 30 amps must be divided into three approximately equal parts and taken off three phases (four wires).

In all cases a separate double-pole linked switch must be provided on each circuit.

Lighting load on one phase must not be balanced against the power load on another, unless lighting power load are each less than 15 amps.

The Department should be consulted as to the number of phases to be used.

All applications must state clearly the nature and number of the consuming devices and the current taken by each, such as—

1. Number of lamps and candle-power of each;
2. Number of motors and horse-power of each;
3. Number of other current-consuming devices, radiators, toasters, kettles, ovens, cooking ranges, vacuum cleaners, etc., and current rating of each.

## 21.—Motors.

Motors up to 2 h.p. may be single-phase, and with special permission from the Department larger single-phase motors of approved type may be installed, but the Department reserves the right not to connect any single-phase motor larger than 1 h.p.

All motors over 2 h.p., unless approved as above, must be three-phase.

## 22.—Starting Current of A.C. Motors.

Motors shall be of such type and provided with suitable starting gear so that the maximum starting currents as measured by a damped ammeter shall not exceed the following:—

(a) Single-phase 250 volt motors up to and including 2 b.h.p.—18 amps.

(b) Three-phase motors, 440 volts—

Motors not exceeding 2 b.h.p.—11 amps.

Motors exceeding 2 but not exceeding 8 b.h.p.—5.6 amps per b.h.p.

Motors exceeding 8 but not exceeding 12 b.h.p.—4.6 amps per b.h.p.

Motors exceeding 12 but not exceeding 25 b.h.p.—3.7 amps per b.h.p.

Motors exceeding 25 b.h.p.—2.75 amps per b.h.p.

## 23.—Power Factor of Motors.

The power factor of A.C. motors shall, at full load, be not less than the following:—

|                                   | 3-phase. | Single-phase. |
|-----------------------------------|----------|---------------|
|                                   | %        | %             |
| Motors not exceeding 2 b.h.p. . . | 75       | 70            |
| Motors 2 b.h.p. to 8 b.h.p. . .   | 80       | —             |
| Motors 8 b.h.p. to 25 b.h.p. . .  | 84       | —             |
| Motors exceeding 25 b.h.p. . .    | 86       | —             |

## 24.—Heating and Cooking Apparatus.

Proposed installations and apparatus for use in heating and cooking, including water heating, must be approved by the Department before installation, and will not be connected unless so approved, and, if connected without such approval, the consumer will be disconnected.

Water heaters in which the heating element is in direct contact with the water, will not be connected except through a double wound transformer, if the resistance between the heating element and earth is less than 10,000 ohms with the water running. The water shall not leave the heater at above earth potential.

Water heaters will not be connected if the current required is greater than, or connections to—

The 250 volt service—15 amperes.

The three-phase 440 volt service—12 amperes.

The heater must be arranged so the current can be metered by one meter if required, and three-phase heaters must have the three-phases balanced as nearly as possible, and in any case the current in any other phase must not be out of balance by more than two (2) amperes.

The maximum current taken by any electric cooker, heater, or radiator, shall not exceed:—

When connected to a single-phase (2 wire service)—15 amps.

When connected to two phases (3 wire service)—30 amps.

If the maximum current can exceed 30 amps it must be connected to a 3-phase (4-wire) circuit, and balanced as nearly as practicable.

Such apparatus will only be connected where the mains are large enough to carry the current required without adversely affecting the supply to other consumers, and inquiry should be made as to whether apparatus will be connected before it is purchased or installed, to avoid disappointment.

## 25.—Interference with the Supply to other Consumers. Welders, Furnaces, etc.

Before a consumer purchases any special apparatus with a view to having it connected to the Department's mains, such as welding apparatus, furnaces, X-ray outfits, rapidly fluctuating motor or other loads, he is strongly recommended to submit full particulars to and ascertain from the Department whether such apparatus will be connected and under what particular conditions, otherwise the Department may refuse to connect.

Such apparatus will only be connected where the mains are large enough to carry the current required without adversely affecting the supply to other consumers, and provided such apparatus has been approved by the Department.

In the event of a consumer operating any such apparatus aforesaid, or any lift or motor in such a manner as shall, in the opinion of the Department, interfere

with the supply to other consumers, the Department may call upon him to make such necessary adjustments or alterations and to so operate the apparatus as shall, in the opinion of the Department, ensure that the supply to other consumers be not interfered with, and in the event of his failing to do so the Department may cut off the supply of electricity to him. The fact that the Department shall have connected and approved of the apparatus aforesaid shall not be taken to exempt the consumer from the operation of this clause.

#### 26.—Special Lighting and Power for Temporary or Special Services.

Special lighting or power, such as ovens, wet premises, outdoor displays, illuminations, lighting or power of a temporary nature, or where the conditions are unusual, must be discussed with the Department before the installation is made and approval obtained before the work will be connected.

#### 27.—Additions to Installations.

When first connected the consumer shall supply the Department with full details of all apparatus connected to the circuits. No additions of lamps, motors, cookers, or other apparatus shall be made until the Department has been notified of such intended addition and the consent of the Department has been obtained, and the consumer shall be fully responsible for any damage to meters or other apparatus which may occur through failure to comply with this regulation, in addition to being liable to disconnection.

#### 28.—Meter Rental.

A rental charge at the Department's fixed rates will be made for all meters supplied.

#### 29.—Minimum Charge.

A minimum charge of 2s. 6d. per month in addition to meter rental will be made whether electricity to that amount is used or not.

#### 30.—Meter Readings.

The reading of the meter or other measuring device provided by the Department shall be taken as *prima facie* evidence of the quantity of electricity consumed. If the meter or other measuring device fails to register or is found to be inaccurate, the account for the period since the last account was rendered shall be adjusted, at the option of the Department, upon the basis of:—

- (a) The account rendered to the consumer for the corresponding period of the previous year;
- (b) The account for the last preceding period; a reasonable allowance being made for any known variations in the demand.

#### 31.—Testing of Meters.

The Department shall have the right to test meters at any time and adjust the consumption for the current period on such test. The cost of testing such meter shall be borne by the Department, unless the meter is tested on the complaint or at the request of the consumer, in which case a testing fee of 5s. shall be paid before the meter is tested. If it is found on testing that the meter is more than (2) two per cent. fast, a refund of the testing fee above will be made to the consumer.

Meters will be considered correct if, on testing, they are found to register within two per cent. of the Department's standards, and no adjustments of accounts will be made. All outstanding accounts must be paid before the test is made.

#### 32.—Department's Apparatus, Interruptions, Responsibility.

The Department—

- (a) shall have the right at all reasonable times to enter the premises of the consumer to inspect and test the installation and the Department's meter and to remove any of the Department's property;
- (b) may at any time interrupt the supply to make tests, alterations or repairs to the Department's system, or for any other purpose;
- (c) shall not be responsible or liable for any injury, damage, or loss of any kind to the person, property, or business of the consumer, or to the consumer's lamps or apparatus, resulting from fire or otherwise, through the supply of electricity, or through interruptions or defects of supply due to storm, accident, or breakdown of plant or mains or *force majeure*.

#### 33.—Disconnection.

The Department shall have the right to disconnect the consumer without notice if—

- the consumer is in arrears in payment of account;
- the consumer's installations are faulty;
- the consumer uses the service in a way that interferes with the general supply to other consumers;
- the consumer uses apparatus not authorised by the Department;
- the consumer connects increased load without first obtaining the consent of the Department;
- the consumer interferes with the seals, fuses, meters, or other apparatus, the property of the Department;
- the consumer becomes bankrupt or assigns his estate for the benefit of his creditors;
- the consumer fails to conform to the Department's regulations in any way.

#### 34.—Charge for Reconnection.

If the supply is disconnected for any of the above reasons, a charge of 5s. will be made and must be paid before reconnection.

#### 35.—Termination of Connection.

The consumer shall give the Department at least three days' notice in writing of desire to terminate, and shall be responsible for all current used until the expiration of such notice.

#### 36.—Consumer's Liability for Loss.

The consumer will be held responsible for loss by fire damage, or theft of the meters or other apparatus hired from or loaned by the Department on the consumer's premises in connection with the supply of current to the consumer. The consumer should insure all the Department's property on the consumer's premises against fire.

#### 37.—Complaints.

All complaints as to defective service or accounts must be made to the Department's office and every effort will be made to rectify same as promptly as possible, but the Department will not be held responsible for any delay which may occur as it is sometimes impossible to attend to all complaints immediately they are received. Although every attention will be given to telephone or verbal complaints, as these often miscarry, the Department requests that all complaints should be made in writing.

#### 38.—Extension of Mains.

If the supply to a consumer necessitates extending the street mains, the right is reserved by the Department to refuse such extension, but arrangements may be made in such cases to extend the mains, if the Department approves, by the consumer paying the cost or a portion thereof.

#### 39.—Altering System.

The Department shall not be liable for any expense that the consumer may have to incur in altering or replacing lamps, motors, or other apparatus to suit any change of voltage, frequency, or system, which may at any time hereafter be introduced by the Department.

#### 40.—Penalties, etc.

Any person or persons offending against any of the provisions of these By-laws shall for every such offence be liable to a penalty not exceeding (£20) Twenty pounds.

Passed by the Council of the Midland Junction Municipality at a meeting held on 5th March, 1928.

[L.S.] W. R. CROSBIE,  
Mayor.  
G. A. JAMIESON,  
Town Clerk.

Recommended—  
(Sgd.) JAS. CUNNINGHAM,  
Acting Minister for Works and Labour.

Approved by His Excellency the Governor in Executive Council this 1st day of August, 1928.

## THE ROAD DISTRICTS ACT, 1919.

*Collie Road Board.*

P.W. 712/28.

WHEREAS, under the provisions of "The Road Districts Act, 1919," the Board of any Road District is empowered to make By-laws for all or any purposes in the said Act; the Collie Road Board doth, in exercise of the powers aforesaid and every other authority enabling it in this behalf, hereby make the following By-law:—

By-law for regulating the Ordinary Meetings of the Board.

The By-law published in the *Government Gazette* of the 1st December, 1916, page 2174, is hereby amended by inserting the word "Monday" in lieu of the word "Tuesday" in the second line thereof.

Passed by resolution of the Collie Road Board at a meeting held on the 29th day of May, 1928.

R. McVEE,  
Chairman.

JOHN JOHNS,  
Secretary.

Recommended—

(Sgd.) JAS. CUNNINGHAM,  
Acting Minister for Works and Labour.

Approved by His Excellency the Governor in Executive Council this 18th day of July, 1928.

(Sgd.) L. E. SHAPCOTT,  
Clerk of the Council.

## THE ROAD DISTRICTS ACT, 1919.

*Gosnells District Road Board.*

Proposed Loan of £1,250.

NOTICE is hereby given that the Gosnells District Road Board proposes to borrow the amount of Twelve hundred and fifty pounds (£1,250). This amount is proposed to be raised by the sale of debentures repayable twenty (20) years after the date of issue thereof, and bearing interest at the rate of Six pounds per cent. (£6 per cent.) per annum. The amount of the said debentures and the interest thereon is to be paid at the Treasury Office, Perth half-yearly on due date.

The purpose for which the Loan is to be applied is the demolition of the old offices and the erection of new offices on the old site at Maddington, as set out in the plans and specifications covering the proposed work.

The plans, specifications, and an estimate of the cost of such work are open for inspection of Ratepayers at the office of the Board, Maddington, for one month after the last publication of this notice.

The hours during which such inspection may be made are 9 a.m. to 12 noon and 1 p.m. to 4 p.m. on week days and 9 a.m. to 11.30 a.m. on Saturdays.

Dated this the 1st day of August, 1928.

W. R. ORR,  
Chairman.

RICHARD RUSHTON,  
Secretary.

## THE WATER ACT, 1904.

*The Broome Water Board.*

NOTICE is hereby given that the Rate Book for the year ending 30th June, 1929, of all lands in the Broome Water District now liable to be rated under the abovementioned Act has been made up, and the Rate Book may be inspected at the office of the Broome Road Board.

Dated this 3rd day of July, 1928.

(Sgd.) W. J. HILL,  
Secretary.

*Notice.*

Notice is hereby given that, under the powers conferred by the abovementioned Act, the Broome Water Board has ordered a Water Rate of Two shillings in the pound for the Broome Water District to be made and levied for the year ending 30th June, 1929, upon all rateable land entered in the said book. The said Rate shall become due and payable in accordance with the By-laws made under the aforesaid Act.

By order of the Board,

(Sgd.) A. C. GREGORY,  
Chairman.

Dated this 3rd day of July, 1928.

## IN THE COURT OF ARBITRATION OF WESTERN AUSTRALIA.

No. 452 of 1926.

Between the Federated Moulders' (Metals) Union of Workers, Perth, Applicant, and the Metropolitan Ironmasters' Industrial Union of Employers and others, Respondents.

*Award.*

IN pursuance of the powers contained in "The Industrial Arbitration Act, 1912-1925," and Award No. 3 of 1924, the Court of Arbitration of Western Australia doth hereby make the following amendment to the said Award:—

Clause 3 (Hours):

Strike out this clause and substitute therefor:—

"The ordinary working hours for all workers shall not exceed forty-four in any one week. Such ordinary working hours shall, except as hereinafter provided, not exceed eight hours on Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays, and four hours on Saturdays: Provided, however, that the present working hours shall continue in operation until the 17th day of August, 1928.

Provided further, that at the option of the respondents the forty-four hours may be worked in five days."

In witness whereof the foregoing amendment has been signed by the President of the Court, and the seal of the Court has been hereto affixed this 2nd day of August, One thousand nine hundred and twenty-eight.

President.

## IN THE COURT OF ARBITRATION OF WESTERN AUSTRALIA.

Nos. 451 and 460 of 1926.

Between Coastal District Committee Amalgamated Engineering Union Association of Workers, and State Executive Australasian Society of Engineers' Industrial Association of Workers, Applicants, and Metropolitan Ironmasters' Industrial Union of Employers and others, Respondents.

*Award.*

IN pursuance of the powers contained in "The Industrial Arbitration Act, 1912-1925," and Award No. 10 of 1923, the Court of Arbitration of Western Australia doth hereby make the following amendments to the said Award:—

1. Clause 3 (Hours):

(a) Strike out the following words:—

"Forty-eight hours shall constitute a week's work, except in the case of aeroplane mechanics, whose weekly hours of work shall be forty-four (44). No day's work shall exceed eight and three-quarter hours."

and substitute in lieu thereof the following:—

"The ordinary working hours for all workers shall not exceed forty-four in any one week. Such ordinary working hours shall, except as hereinafter provided, not exceed eight hours on Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays, and four hours on Saturdays (or, in the case of workers on the 'task' system at Monteath's Foundry, five hours on Saturdays): Provided, however, that the present working hours shall continue in operation until the 17th day of August, 1928.

Provided further, that at the option of the respondents the forty-four hours may be worked in five days."

(b) Strike out the words "forty-eight" in the second paragraph and substitute "forty-four" in lieu thereof.

2. Clause 8 (Wages):

Strike out the following:—

"Oxy-acetylene operator, electrical welder £5 11s. 4d. (£5 13s. 0d.)."

A worker engaged for less than one week as oxy-acetylene operator or electrical welder shall be paid eightpence (8d.) per day over fitter's rate for each day upon which he is so employed."

and substitute therefor the following:—

"Extra pay.—Workers on oxy-acetylene and electrical welding plants shall be paid one shilling per day in addition to the ordinary rate of pay whilst so engaged."

3. Clause 19 (Apprentices):

Strike out subclause (j) and substitute therefor the following:—

"(j) The minimum wage payable to an apprentice shall be:—

|                                    | Per cent. | Per week. |
