Department of Works and Labour,  
56 James Street, Perth,  
29th October, 1931.

Ex. Co. 1991; F. & S. 1333/30.

HIS Excellency the Administrator in Council has been pleased to approve of the following Regulations under "The Factories and Shops Act, 1920":—

1. These Regulations may be cited as "The Electric Accumulator Regulations, 1931," and shall have application to those factories or parts thereof in which electric accumulators are manufactured or repaired.

Provided, that these Regulations shall not apply to the manufacture or repair of electric accumulators or parts thereof not containing lead or any compound accumulator forming part of a stationary battery.

2. In these Regulations, subject to the context—

"Lead process" means the melting of lead or any other material containing lead, casting, pasting, lead burning, or any other work, including trimming, or any other abrading or cutting of pasted plates, involving the use, movement, or manipulation of, or contact with, any oxide of lead;

"Manipulation of raw oxide of lead" means any lead process involving any manipulation or movement of raw oxide of lead other than its conveyance in a receptacle or by means of an implement from one operation to another;

and where any term which is defined in the Act is used in these Regulations, such term shall have the same meaning as that given to it in the Act.

#### Duties.

3. It shall be the duty of the occupier to observe Part I. of these Regulations.

It shall be the duty of every person employed to observe Part II. of these Regulations.

#### Part I.—Duties of Occupiers.

4. Each of the following processes shall be carried on in such a manner and under such conditions as to secure effectual separation from one another and from any other process:—

- (b) pasting;
- (c) drying of pasted plates;
- (d) formation with lead burning ("Tacking");
- (e) melting down of pasted plates.

6. Every workroom shall be provided with inlets and outlets of adequate size, so placed and used as to secure and maintain efficient ventilation in all parts of the room.

7. In every pasting room the distance between the centre of the working position of any paster and that of the paster working nearest to him shall not be less than five feet.

8. The floor of every room in which a lead process is carried on shall be—

- (a) of cement or similar material, so as to be smooth and impervious to water;
- (b) maintained in sound condition;
- (c) kept free from materials, plant, or other obstruction not required for or produced in the process carried on in the room;

and in all such rooms other than grid-castings, shops shall be—

- (d) cleansed throughout daily after being thoroughly sprayed with water at a time when no other work is being carried on in the room;

Such exhaust draught shall be effected by appliances approved by the Chief Inspector of Factories, and shall operate on the dust or fume given off as nearly as may be at its point of origin, so as to prevent it entering the air of any room in which persons work.

Provided that, at pots containing molten lead, the exhaust draught may be effected by natural means, but, if so effected, shall not be deemed to be efficient unless it produces through the working opening over the pot an average air velocity measured across the plane of the opening of at least 120 linear feet per minute.

11. The products of combustion produced in the heating of any melting pot shall not be allowed to escape into a room in which persons work.

12. A suitable receptacle with tightly-fitting cover shall be provided and used for dross as it is removed from every melting pot.

14. The racks or shelves provided in any drying room shall not be more than eight feet from the floor nor more than two feet in width.

Provided that, as regards racks or shelves set or drawn from both sides, the total width shall not exceed four feet.

Such racks or shelves shall be cleansed only after being thoroughly damped, unless an efficient suction-cleaning apparatus is used for this purpose.

15. The Health Register kept in pursuance of this Regulation shall, upon demand being made by an Inspector of Factories at reasonable times, be produced for examination.

16. The occupier shall, within 24 hours of any entry being made in the Health Register, notify in writing to the Chief Inspector of Factories that such entry has been made.

17. Protective clothing shall be provided and maintained in good repair for all persons employed in—

- (a) manipulating of raw oxide of lead;
- (b) pasting;
- (c) the formation room.

Such protective clothing shall consist of an overall, an apron made of material impervious to water, and clogs or other suitable footwear; and, also, as regards persons employed in the manipulation of raw oxide of lead or in pasting, head covering.

The overalls and head coverings provided for the persons employed in the manipulation of raw oxide of lead or in pasting shall be washed or renewed weekly.

18. There shall be provided and maintained for the use of all persons employed in a lead process—

- (a) a cloakroom for clothing put off during working hours.

Such accommodation shall be separate from any mess room.

- (b) Separate and suitable arrangements for the storage of protective clothing provided under Regulation 17.

19. There shall be provided and maintained in a cleanly state and in good repair for the use of all persons employed in a lead process—

- (ii) at least one lavatory basin for every five such persons employed at any one time, fitted with a waste pipe and plug, and having either a constant supply of hot and cold water or warm water laid on, or (if a constant supply of heated water be not reasonably practicable), a constant supply of cold water laid on, and a supply of hot water always at hand when required by such persons for use; and

a sufficient supply of clean towels made of suitable material renewed daily; which supply in the case of pasters and persons employed in the manipulation of raw oxide of lead, shall include a separate marked towel for each such worker; and

a sufficient supply of soap or other cleansing material and of nail brushes.

- (b) There shall, in addition, be provided means of washing in close proximity to the rooms in which manipulation of raw oxide of lead or pasting is carried on, if required by notice in writing from the Chief Inspector of Factories.

20. Sufficient bath or shower-bath accommodation shall be provided for all persons engaged in the manipulation of raw oxide of lead, or in pasting, with hot and cold water laid on, and a sufficient supply of soap and clean towels.

#### Part II.—Duties of Persons Employed.

21. (a) Every person employed in a lead process shall deposit in the cloakroom provided in pursuance of Regulation 18 (a) all clothing put off during working hours.

(b) Every person employed in the manipulation of raw oxide of lead, in pasting, or in the formation room, shall wear the protective clothing provided under Regulation 17. The protective clothing, when not being worn, shall be deposited in the place provided under Regulation 18 (b).

22. No person shall introduce, keep, prepare, or partake of any food or drink, nor make use of tobacco in any place in which a lead process is carried on.
