3.—Work carried out under System of Deferred Payment.

If any owner wishes to avail himself of the provisions of the Act regarding deferred payments and the Local Authority has approved of his doing so, he shall sign an agreement to pay the costs incurred by the Local Authority in relation to such works, in not more than sixty quarterly instalments, with interest at the prescribed rate per annum on the amount remaining to be paid added to each instalment. But the said owner may at any time pay to the Local Authority such portion as then remains unpaid of such costs and expenses, together with interest thereon, at the said rate, to the date of such payment. In the event of any of the instalments or interest not being paid within fourteen days after the due date thereof, the whole amount then unpaid shall, if the Local Authority so desires, become due, payable, and recoverable with interest as prescribed by the said principal or any amending Act.

4.—Maintenance by Local Authority.

In the event of the Local Authority carrying out the work of providing such water-closet or water-closets and such drains, appliances, apparatus, and connections, the owner or occupier is legally liable for the cost of repairs and maintenance, but the Local Authority will, for a period of twelve months from the date of completion of the said work, and without charging the owner or occupier therefor, carry out any work of maintenance and repair which in the opinion of the Local Authority is necessary, and which is not in the opinion of the Local Authority occasioned by any neglect or wilful act of the owner or occupier.

8.—When House Drains shall be Trapped from Sewer.

The owner or occupier of every house or tenement shall, where an internal closet is installed, or where ordered, cause every house-drain of such house or tenement to be provided with a suitable interceptor trap at a point as distant as may be practicable from such house or tenement, and as near as may be practicable to the point at which such drain may be connected with the public sewer or other means of drainage, but, if possible, within the boundaries of the property.

Connections.

Every owner or occupier of any house, tenement, or lands where an internal closet has been installed shall comply with the following requirements, viz.:—

Untrapped Openings.

- (a) At least two untrapped openings to the drains of such house, tenement, or lands shall be provided, and in the provisions of such openings such one of the two arrangements hereinafter specified shall be adopted as the circumstances of the case may render the more suitable and effectual, that is to say—

Inlet and Outlet.

- (b) One opening, being at or near the level of the surface of the ground adjoining such opening, shall communicate with the drains by means of a suitable pipe, shaft, or disconnecting chamber, and shall be situated as near as may be practicable to the trap which, in pursuance of the By-law or Regulation in that behalf, shall be provided between the main drain or other drain of the building and the sewer or other means of drainage with which such drain may lawfully communicate. Such opening shall also in every case be situated on that side of the trap which is nearer to the building. The second opening shall be obtained by carrying up from a point in the drains, as far distant as may be practicable from the point at which the first-mentioned opening shall be situated, a pipe or shaft vertically to such a height and in such a manner as effectually to prevent any escape of foul air from such pipe or shaft into any building in the vicinity thereof.

Reversal of Ventilation.

- (c) If drains cannot be ventilated as provided for in Clause (b) of this By-law, the system of ventilation may be reversed by authority from the Local Authority.

Direct Ventilation.

- (e) Where an interceptor trap is not provided the ventilators specified in Clauses (a), (b), (c), and (d) of this By-law need not be installed, but from the highest of such other points of the house drains as the Local Authority may direct exhaust or induct ventilators of the sizes and heights ordered shall be erected.

Gratings over Ventilators.

- (f) Every opening provided in accordance with either of the arrangements before-mentioned, or for any other purpose in accordance with these By-laws or Regulations, shall be furnished with a suitable grating or other suitable cover for the purpose of preventing any obstruction in or injury to any pipe or drain by the introduction of any substance through any such opening, and such grating or cover shall be constructed and fitted so as to secure the free passage of air through such grating or cover by means of a sufficient number of apertures of which the aggregate extent shall not be less than the sectional area of the pipe or drain to which such grating may be fitted.

Size of Ventilators.

- (g) Every pipe or shaft which may be used in connection with either of the arrangements hereinbefore specified shall be of a sectional area

not less than that of the drain with which such pipe or shaft may communicate, and not less in any case than the sectional area of a pipe or shaft of the diameter of four inches. Such ventilator shall be secured with stays as directed by the Local Authority.

Soil Pipe as Vent.

- (j) Provided always, that for the purpose of either of the arrangements hereinbefore specified, the soil pipe of any water closet, in every case where the situation, sectional area, height, and mode of construction of such soil pipe shall be in accordance with the requirements applicable to the pipe or shaft to be carried up from the drains, may be deemed to provide the necessary opening for ventilation which would otherwise be obtained by means of such last-mentioned pipe shaft.

24.—Material for and Support of Vent Pipes.

Material for and the erection of vent pipes shall comply with the following conditions:—

- (a) Pipes used solely as ventilating pipes and situated wholly outside buildings may be of cast-iron, galvanised-iron, or lead, and of stoneware beneath the surface of the ground. As far as possible all ventilating pipes shall be fixed outside buildings; rainwater pipes shall not be used as ventilators.
- (b) Vent pipes shall be supported by means of clips fastened to plugs in brick, stone, or concrete walls, or by screws to wooden buildings; there shall be one clip to each six feet and the top clip shall in all cases be bolted through or into the wall.
- (c) Where vent pipes are within 30 feet of any window they shall be carried up at least six feet above such window. Vent pipes shall be two feet above any adjoining parapet or ridge, and if within 10 feet of any chimney are to be two feet below the chimney opening or of the height directed.

Where the heights given are exceeded, the vent pipe shall be supported by galvanised bolted clips with galvanised pipe stays.

25.—Ventilating Opening shall be kept Free.

The owner or occupier of every house or tenement shall cause all openings for ventilation or other purposes made in accordance with the By-laws or Regulations to be kept open and perfectly free from obstruction, and shall at all times keep all openings to the drains upon his premises, whether for ventilation or otherwise, and all traps and other fittings in good order, clean, and free from obstruction.

26.—Lowest Storey of Building shall be at level above Sewer.

Every person who shall erect a new building shall construct the lower storey of such building at such level as will allow of the construction of a drain sufficient for

the effectual drainage of such building, and of the provision of the requisite communication with any sewer into which such drain may lawfully empty, at a point in the upper diameter of such sewer, or with any other means of drainage with which such drains may lawfully communicate. The Local Authority may in any case in which it thinks proper exempt any person from the provisions of this By-law or Regulation, upon application by the owner and an undertaking providing that it is solely at the owner's risk.

27.—Fittings in Basement.

Fittings shall not be placed in a cellar or basement, except with the permission of the Local Authority, and where necessary approved reflux traps shall be fixed.

Solid or liquid discharge from patients suffering from typhoid fever or any other infectious or contagious disease shall not be emptied into any sewer or drain from any hospital, institution, or other private or public building, unless such discharge has been thoroughly disinfected.

31.—Discharge from Area below Flood Level.

(a) No water closet, urinal, washtrough, bath, sink or other appliance from which liquid wastes are discharged will be connected to the Local Authority's sewers unless the floor level of the building in which they are situated is at least six feet above the crest of the present Weir over the Avon river, unless the Local Authority otherwise decides.

(b) All connections to tenements situated below the flood level must be fitted with such appliance or appliances as the Local Authority may from time to time consider necessary to prevent the discharge of flood waters into the sewers.

32.—Sewerage work shall be done only by Licensed Plumbers.

(a) No person shall do or cause to be done any work in connection with sewerage on any premises, or in connection with any fitting or apparatus connected therewith, unless he shall have been licensed by the Metropolitan Water Supply, Sewerage, and Drainage Department as a "Sanitary Plumber," and be in possession of a permit from the Local Authority.

Any officer of the Local Authority may at all reasonable times enter any house or premises connected, or intended to be connected with the sewers, in order to examine whether the pipes, drains, and other fittings in such house or premises are in proper order. Any person refusing such admission or in any way hindering such officer in the execution of his duty shall be guilty of an offence and liable to a penalty, as hereinafter prescribed.

35.—Standard Fittings and Drawings.

Approved standard fittings and type drawings will be exhibited at the office of the Local Authority. Due consideration will be given by the Local Authority to the claims of any other fittings which may be presented for approval, and, if considered satisfactory, the same may be placed among and become one of the approved standard fittings. Work shall not be undertaken in connection with sewerage or drainage, or in the extension or alteration thereof, until such time as the necessary printed permit is obtained. One week's notice shall in all cases be given by the licensed plumber before work is intended to be commenced, unless the officer of the Local Authority duly appointed to issue permits expressly accepts shorter notice. In no case shall any pipes, drains, or apparatus in connection with sewerage be used until the said work shall have been inspected, and, if necessary, tested by the said officer, and certified by him on the prescribed form. No underground or enclosed work shall be covered up or concealed from view until the same shall have been duly inspected and passed by the inspector, and for this purpose the person to whom the permit has been issued shall immediately report any work which is ready for inspection or test, and every facility shall be afforded to such officer for making such inspection or test.

38.—Owner or Occupier responsible for Cleaning Private Drains.

(a) All drains and fittings connected with any sewer shall from time to time be repaired and cleansed under the inspection or direction of the Local Authority, at the expense of the owner or occupier of the land in respect of which the said drain shall be constructed, and in case any such owner or occupier shall neglect to repair or cleanse any such drain according to the direction of the Local Authority, he shall on conviction for every such offence forfeit and pay a penalty not exceeding Ten pounds.

(b) Subject to any agreement between the owner and occupier of any premises, the cost of repairing drains and fittings shall, as between the owner and occupier, be payable by the owner, and the cost of cleansing drains shall, as between the owner and occupier, be payable by the occupier.

(2) The Local Authority may cause any building, structure, material or thing erected, placed, maintained, or kept over any such pipe, sewer, drain, or fitting in contravention of this By-law to be altered, pulled down, removed, or otherwise dealt with, as it shall think fit.
