9. If the number of persons nominated is not greater than the number required to fill the vacancies, the returning officer shall forthwith make a return to the Registrar, and declare such person or persons to be elected as members. If the number of persons declared elected as aforesaid is insufficient to fill the vacancies, the retiring President of the Council shall report such fact to the Governor in Council, who may thereupon nominate one or more qualified persons to fill such vacancy or vacancies.

10. (1) If the number of persons nominated is greater than the number required to fill the vacancies, a poll shall be taken by the returning officer, who shall cause voting papers to be printed in the Form 2 in the Appendix A to these Regulations. (2) A voter shall indicate the candidate or candidates for whom he votes by striking out clearly and distinctly the names of the candidate or candidates for whom he does not vote but leaving untouched the same number of names on the ballot paper as there are vacancies to be filled.

11. (1) The returning officer shall, between the hours of 2 and 4 o'clock in the afternoon on the day appointed for the election, and at the place as specified in the advertisement aforesaid, proceed, in the presence of the Registrar and of the scrutineers (if any) appointed by any of the candidates, to open all the printed envelopes received by him, and to remove the voting papers therefrom and, if satisfied upon making a comparison of each of the signatures on the counterfoils of such voting papers with the signatures of the voters in the Signature Book that each vote has been regularly and properly given, and that no person entitled to vote has voted twice, he shall, after rejecting any informal ballot papers, proceed to ascertain the number of votes cast in favour of the respective candidates, and as soon as conveniently may be thereafter shall give notice thereof to the Council, and shall duly declare elected the candidates (not exceeding the number of vacancies) who have received the greatest number of votes or, in the event of an equal number of votes being received by two or more candidates, the candidate or candidates in whose favour he exercises his casting vote or votes.

(2) In the case of an equality of votes, the returning officer shall have a casting vote.

12. Any voting paper on which the names of candidates not struck out does not equal the number of members to be elected, or which has not been signed by the voter, or which is enclosed in an envelope other than the printed one aforesaid, shall be deemed informal and shall not be counted by the returning officer. Provided that, where a candidate withdraws his nomination between the date of nomination and the date of the election, no voting paper shall be deemed to be invalid by reason of a vote cast in favour of such retiring candidate.

13. Any candidate for election desirous of retiring before the day of election shall, not later than seven clear days before the day of election, sign and deliver to the returning officer a notice in the Form 3 in Appendix A to these regulations, and if the number of candidates is reduced by such retirement to the number of members to be elected, the returning officer shall declare such remaining members duly elected.

## WEIGHTS AND MEASURES ACT, 1915-1941.

The Office of the Commissioner of Police,  
 Perth, 4th October, 1951.

Ex. Co. No. 1815.

HIS Excellency the Administrator in Executive Council, acting under the pro-  
 visions of the Weights and Measures Act, 1915-1941, has been pleased to amend  
 in the manner mentioned in the Schedule hereunder the Weights and Measures  
 Regulations, 1927, as published in the *Government Gazette*, on the 3rd day  
 of June, 1927, and amended from time to time thereafter.

T. ANDERSEN,  
 Commissioner of Police.

## Schedule.

The abovementioned regulations are amended as follows:—

1. Regulation 3 of Part I is amended by including therein after the  
 definition of "Flow Meter" new definitions as follows:—  
 "Retail Flow Meter" means any flow meter obviously designed for  
 retailed deliveries to individual consumers which has a maximum  
 indicating capacity (excluding any totalizer mechanism) not  
 exceeding 100 gallons.  
 "Wholesale Flow Meter" means any flow meter of the type not defined  
 as a "Retail Flow Meter".
2. Regulation 113B (*Government Gazette*, 24/2/1950) is amended by insert-  
 ing the word "wholesale" after the word "Every" in line 1.
3. Regulation 113B paragraph (5) subparagraph (b) is amended by adding  
 after the word "ounces" in line 4 the following:—  
 "and on retail flow meters the error shall not exceed 2½ ounces".
4. Regulation 113C (*Government Gazette*, 24/2/1950) is amended by insert-  
 ing the word "wholesale" immediately preceding the words "Flow Meter" in  
 line 1.
5. Insert after regulation 113D new regulations 113E and 113F as follows:—  
 113E. Every retail flow meter shall—  
  - (1) be firmly set on a solid foundation such as a cement block of a  
 size and shape approved by the Commissioner, and shall be bolted,  
 or otherwise secured thereto, in a manner approved by the Com-  
 missioner, and the instrument as a whole shall be stable and suf-  
 ficiently rigid to satisfy the Commissioner;
  - (2) be installed plumb and level;
  - (3) be equipped with a device which shall automatically indicate  
 whether or not the system is properly filled with liquid before  
 delivery is begun;
  - (4) be so designed and constructed that the initial zero condition and  
 the quantity of liquid delivered up to the maximum capacity of  
 the indicating elements of the device, shall be clearly and definitely  
 indicated by automatic means;
  - (5) be so designed and constructed that it can readily be operated to  
 deliver each quantity for which a graduation or other indicating  
 means is provided, within the tolerance on such amount herein-  
 after provided;
  - (6) be so designed and constructed that the indicating elements used  
 to indicate the quantity of liquid delivered and the total price  
 thereof or the quantity of liquid delivered when any portion of the  
 cycle or stroke has been completed shall be returnable readily to  
 a definite and clear zero indication before the next delivery is  
 begun;

- (7) be equipped with a hose hook switch control so designed and constructed that the replacement of the hose nozzle on such hook automatically shuts off the motor: Provided, that this clause shall not preclude the use of any other motor switch control if in the opinion of the Commissioner such switch shall not facilitate fraud;
  - (8) be equipped with an interlocking device so designed and constructed that, when the power unit has been shut off, it shall automatically prevent the operation of the instrument until the indicating elements have been zeroized;
  - (9) be so designed that the indicating elements may be advanced only by the mechanical operation of the device itself. Provided that this paragraph shall not preclude the use of any zeroizing device which conflicts therewith, if, in the opinion of the Commissioner such zeroizing device shall not facilitate fraud;
  - (10) when equipped with money-value computing charts, be made in accordance with one of the following principles—
    - (a) If the device is so designed and constructed that it purports to compute for one or for a series of unit prices the total price for every delivery within the range of the device, then the device shall be equipped with a value pointer or indicator and value graduation marks and the figures; and in any position which the indicator or pointer and the value graduation marks and figures may assume, the price of the amount delivered shall be clearly, definitely, and correctly indicated. The value graduations shall not exceed one penny.
    - (b) If the device is so designed and constructed that it purports automatically to compute only for deliveries corresponding to a definite series of quantity graduations, then one of the following alternatives shall be complied with.
      - (i) There shall be a value computation for each quantity graduation throughout the range of the device, or
      - (ii) no value indication may be exposed to view except at such time that the device registers a quantity indication for which a correct value indication is provided, or
      - (iii) each value graduation or each column or row of such graduations shall be clearly and conspicuously marked with the quantity graduation to which the value corresponds and the device shall be marked with the character and limitations of the computations made. All money values corresponding to definite quantity graduations shall be mathematically correct.
    - (c) the tolerance in excess or in deficiency of the money value corresponding to a definite quantity of liquid shall be one half-penny;
  - (11) be of such design and construction that, in use for trade it does not facilitate the perpetration of fraud;
  - (12) be so designed and constructed that the quantity indications or the price computing and quantity indications are clearly and accurately readable from any position within a field of 120 degrees, defined by two vertical planes each passing through the centre of the face of the instrument at an angle of 30 degrees;
  - (13) be operated in accordance with the method which is obviously indicated by its construction or which is indicated by the manufacturer through the medium of instructions contained on the device itself;
  - (14) have its lowest indicating element at least three feet above the normal level upon which the receiving vehicle or vessel stands;
  - (15) comply with the following regulations—
 

Regulation 3 or Part I.  
Regulation 113B (1), (3), (4), (5), (6), (11), (12), (13), (14) and (15) and  
Regulation 113C (2), (3), (4) and (6) (a).
  - (16) be correct within the tolerances for error specified in Table (V) for measures of capacity on verification.
- 113F. A retail flow meter shall not—
- (1) be used to make a delivery to a purchaser unless its indicating elements have been returned to the zero position before such delivery;
  - (2) have any delivery hose of a length exceeding 12 feet including the nozzle;
  - (3) have its highest indicating element more than 6 feet above the normal level upon which the receiving vehicle or vessel stands;
  - (4) have its smallest unit of indicated delivery exceeding 1/20th gallon: Provided that this paragraph shall not apply—
    - (a) to an instrument of the price-computing type when the computing mechanism of such instrument is performing its function of accurately indicating the price of each delivery;
    - (b) to an instrument of the preset type if in the opinion of the Commissioner such provision is unnecessary.

6. Table V of Part XI (*Government Gazette*, 24/2/1950) is amended by inserting the word "wholesale" immediately preceding the words "Flow Meter".

Approved by His Excellency the Administrator in Executive Council, 26th September, 1951.

R. H. DOIG,  
Clerk of the Council.
