LOCAL GOVERNMENT ACT, 1960.
The Municipality of the City of Perth.
By-law No. 73—Verandahs Over Streets.

L.G. 336/56.

IN pursuance of the powers in that behalf contained in the Local Government Act, 1960, the Council of the abovementioned Municipality hereby records having resolved on the 4th day of December, 1961, to make and submit for confirmation by the Governor the following by-law to be numbered 73:—

1. Repeal.—Clauses 57 to 69 inclusive of by-law No. 39 are hereby repealed.
2. In this by-law—
“Council” means the Council of the City of Perth;
“Surveyor” means the Building Surveyor of the City of Perth and includes any acting Surveyor;
“verandah” means any verandah or roof of which any part extends over a street but does not include awnings as described and covered by by-law No. 58 or projections on the front of any building permitted under section 8 of the Uniform Building By-laws.
3. No person shall erect or maintain a verandah without a written license issued by the Council under this by-law.
4. Any person desiring to obtain a license under this by-law shall deposit with the Surveyor two copies of drawings comprising a plan, elevation, and section and a specification showing in detail the proposed construction of the verandah and the manner in which it is proposed to secure it to the building to which it is to be attached. Calculations proving the stability of the structure shall be submitted when required by the Surveyor.
5. A license under this by-law shall be in the form in the First Schedule hereto.
6. (1) The fee prescribed in the Second Schedule hereto shall be paid to the Council for each license under this by-law.
(2) The prescribed fee shall be paid to the Council before a license is issued.
7. Types Permitted.—(a) All verandahs shall be of suspended awning or cantilever form and unless otherwise permitted by the Council, the fascia shall finish two feet closer to the building line than the face of the kerb or nine feet from the building line, whichever is the lesser. Provided that the Council may approve verandahs which finish flush with the kerb if such width conforms with adjoining verandahs or verandahs in close proximity which were erected prior to the gazettal of this by-law.
(b) Every such verandah hereafter erected shall be of a standard design, a plan of which may be seen at the office of the Surveyor, or of such materials and design as shall be, in the opinion of the Surveyor, better for the particular circumstances of the case in accordance with a plan and specification submitted to and approved by the Surveyor.
(c) Subject to subclause (a) of this clause and clause 10 of this by-law, all verandahs in a street shall be erected of a uniform height and width.
8. Construction.—In the construction of every such verandah the following conditions shall be complied with.
(a) All girders, rafters and framing, other than purlins and battens, shall be of steel of dimensions approved by the Surveyor. Purlins and battens for fixing roof covering and fascia may be of timber.
(b) The roof shall be covered with 24-gauge galvanised corrugated iron or other approved non-inflammable roofing material with a fall of not less than half an inch per foot towards the building.
(c) Box gutters shall be formed at or near the building line, lined with galvanised plain iron not lighter than 24-gauge or other approved material and to a capacity sufficient to carry off all rain or storm water. Such gutters shall in no case be less than 27 square inches in cross section.
(d) Downpipes shall be of sufficient capacity to efficiently discharge rain-water falling on roofs and in no case less than one square inch for every 75 square feet or part thereof of roof drained by such downpipes. The bottom six feet length of pipes shall be wrought, cast iron, or copper. Pipes shall be chased into walls or piers to a height of nine feet or set back so as not to project beyond the face of the building, and shall discharge into a drainage connection under the footway provided by the Council, the cost of which is payable by the person obtaining the license.

(e) The ceiling shall be of plain galvanised iron, stamped or pressed metal, or other approved non-inflammable materials securely fixed to metal sections or wood joists at not more than two-foot centres secured to the steel framing. Wood joists shall not be less than four inches by two inches in section. All ceilings to be flat and level.

(f) The hanging bolts are to be not less than one inch diameter, properly attached to the framing and securely anchored or bolted to the building, to the approval of the Surveyor, and provided with a union screw and shall be back-stayed or anchored as may be necessary for stability. Hanging bolts shall be not more than 20 feet apart unless specially designed fascias are provided and computations submitted.

(g) The fascia shall be lined with plain galvanised iron, stamped or pressed metal or other approved non-inflammable material on metal or timber framing. The finished overall depth of fascias for verandahs over footpaths more than nine feet wide shall be 24 inches and for those over footpaths nine feet wide or less shall be 18 inches. Pediments constructed with fascias of verandahs shall, in all cases, be subject to the approval of the Council. Flashing to be four pounds lead where required, to approval.

9. Verandah Ends.—(a) Whenever a proposed verandah will abut on to an existing verandah, it shall be so finished as to prevent rain from falling between such verandahs. Provided that when the existing verandah is not more than six inches shorter than the frontage of the building to which it is attached, the person erecting the new verandah shall make the necessary extension to the existing one. When, however, any such existing verandah is shorter by more than six inches, the owner shall, if required by the Council, continue such verandah up to the building line of such existing building.

(b) Whenever the end of a verandah abuts on to the end of a right-of-way, street or public place, the fascia shall be returned along such end in conformity with the requirements as provided in clause 8 (g).

10. Height above Pavement.—(a) The height of verandah ceilings shall, except in special cases, be 11 feet above the pavement level. Where there are existing verandahs, the new verandah shall conform thereto subject to no verandah ceiling being at a lesser height than 10 feet above the pavement level.

(b) Where necessary, verandahs must be stepped to conform with the grade of the footpaths. Such steps shall not exceed two feet in depth without special permission.

11. Time of Erection of Verandah.—The Surveyor may prescribe the time or hours during which the verandah may be erected.

12. Verandahs to be Kept in Repair.—The owner or occupier for the time being of any building against or in front of which there is any verandah, whether constructed before or after the passing of this by-law, shall keep the verandah clean, painted, watertight and in good repair, and it shall be lawful for the Surveyor to give notice to the owner or occupier of the said building to clean, paint or repair such verandah whenever in his opinion such cleaning, painting or repairing is required; and every owner or occupier who neglects or refuses within seven days after the serving of such notice to effect such cleaning, painting or repair shall be liable to a penalty not exceeding the sum of £50.

13. Blinds and Metal Sun Screens under Verandahs.—Blinds and metal sun screens may be permitted under verandahs subject to the following conditions:—

(a) Such blinds and metal sun screens shall be hung from or near the outer edge of the verandah parallel to the kerb but in no case closer than nine inches to the kerb, measured vertically from the kerb line and when specially approved by the Council may also be at discontinuous ends of verandahs.

(b) Such blinds and metal sun screens shall be so constructed that they cannot hang lower than seven feet six inches above the level of the footway, and when down shall be fixed rigidly in position.

(c) Blinds and metal sun screens shall not have any advertising matter or wording thereon and shall be maintained in a proper state of repair to the satisfaction of the Surveyor.

14. Verandahs may be Prohibited in Certain Streets.—No verandah shall be erected in St. George's Terrace or Adelaide Terrace.

15. Power to Approve Verandahs of Special Design.—Notwithstanding anything contained in this by-law the Council may by special resolution approve verandahs of a design not complying with the provisions of clauses 7 and 8 of this by-law.
