Provided that nothing in this clause shall be construed to permit the construction or use of a building for a purpose mentioned in the Building Table nearer to the street alignment than the distance stated in Column 4 of that Table.

39. (1) When a lot in a Residential Zone has a frontage to more than one street a building may be erected nearer to the street alignment of the less important of the streets but not without the special approval of the Council nearer than 15 feet to such street alignment. The Council shall determine in each case which is or are the less important street or streets and shall in no case permit the erection of a building nearer than 10 feet to the less important street where the lot has a frontage of 49 ft. 6 in. or less.

(2) The Council may authorise the erection of a building or an addition to a building in a Residential Zone nearer to a street alignment than the set back distance or nearer than the distance specified in Column 4 of the Building Table in cases where the Council is satisfied that a substantial natural impediment on the site renders it impracticable to erect a building or an addition thereto conforming to Column 4 of the Building Table or Clauses 38 or 39 (1) and it is reasonable in the circumstances that the erection or addition be permitted.

(3) Where a lot used for a shop in a Business Zone has a frontage to more than one street a building may be erected nearer to the street alignment of the less important of the streets but not nearer than 20 feet from front of cantilever verandah to such street alignment and the Council shall in each case determine which is or are the less important of the streets.

(4) Subject to the provision of this paragraph where a lot in a Light Industry or Industry Zone has a frontage to more than one street a building may be erected nearer to the street alignment of the less important of the streets but not nearer than twenty (20) feet to such street alignment and the Council shall in each case determine which is or are the less important street or streets.

In the case of lots of 50 perches or less in a Light Industrial or Industrial Zone the Council may permit a building to be erected less than 20 feet from or on the street alignment of the less important street or streets.

(b) the supports for the canopy are not less than twelve feet from the street alignment; and

(c) no part of the canopy is within two feet six inches of the street alignment.

41. All buildings of a Service Station on land which adjoins a lot within a Residential Zone shall be set back at least ten feet from the common boundary.

42. Area Adjacent to Street: No person shall in any of the Zones following, that is to say—

an Industry Zone;

use the land between the street alignment and the set back distance for any purpose except one or more of the following:—

(a) a means of access;

(b) all Industrial or Light Industrial activities are set back at least 30 feet from the common boundary.

45. Provision for the Parking of Vehicles: In Clauses 45 to 48 the term "parking space" means an area with dimensions of not less than eighteen feet by eight feet and in such a condition and position and with all necessary access ways as to permit its use for the parking of a motor car.

(4) Except as hereinafter mentioned the access way shall be not less than fifteen feet in width; if the size of the lot makes the provision of a fifteen foot wide access way impracticable or unreasonable the Council may permit an access way of a narrower width but in no case less than ten feet in width.

50. Kiosks in Shopping Centres: No person shall without the approval of the Council erect use or occupy a Kiosk in a Shopping Centre. The Council may grant its approval on such terms and conditions as it thinks fit and may withdraw any approval granted by it.

4.3 Change of Non-conforming Use: The Council may permit the use of any land to be changed from one non-conforming use to another non-conforming use, provided the proposed use is, in the opinion of the Council, less detrimental to the amenity of the neighbourhood, than the existing use, or is in the opinion of the Council, closer to the intended uses of the zone.

4.4 Discontinuance of Non-conforming Use:

TOWN PLANNING AND DEVELOPMENT ACT, 1928 (AS AMENDED).

SHIRE OF BELMONT TOWN PLANNING SCHEME No. 6.

THE Council of the Shire of Belmont under and by virtue of the power conferred upon it in that behalf by the Town Planning and Development Act, 1928 (as amended) hereby makes the following Town Planning Scheme for the purpose of—

(a) setting aside land for future public use as reserves;

(b) controlling land development;

(c) other matters authorised by the enabling Act.

PART I.—PRELIMINARY.

1.1 Scheme Title: The Town Planning Scheme may be cited as the Shire of Belmont Town Planning Scheme No. 6 and shall come into operation on the publication of notice of the Minister's final approval thereof in the *Government Gazette*.

1.2 Scheme Area: The Scheme shall apply to the whole of the land within the Shire of Belmont.

1.3 Operation of Scheme: The Scheme is complementary to, and is not a substitute for, the Metropolitan Region Scheme, and the provisions of the Metropolitan Region Scheme, as amended from time to time shall continue to have effect.

1.4 General Intent: The intent of this Scheme is to direct and control the development of the Scheme Area (hereinafter referred to as the District) in such a way as shall promote and safeguard the health, safety and convenience and economic and general welfare of its inhabitants and the amenities of every part of the District.

1.5 Revocation of Town Planning Scheme:

(a) Town Planning Scheme No. 4 of the Belmont Shire District which was published in the *Government Gazette* on the 1st November, 1957, and subsequently amended from time to time is hereby revoked.

(b) Town Planning Scheme No. 5 for a prescribed area of the Shire of Belmont which was published in the *Government Gazette* on the 7th April, 1967 is hereby revoked.

1.6 Responsible Authority: The responsible authority for carrying out the Scheme is the Council of the Shire of Belmont except that where land is shown on the Scheme Map marked 'MRS' the responsible authority is deemed to be the Metropolitan Region Planning Authority and the provisions of the Metropolitan Region Planning Scheme shall apply to such reservations.

1.7 Arrangement of Scheme: The Scheme Text is divided into the following parts:

Part I.—Preliminary.
Part II.—Reserved Land.
Part III.—Zones.
Part IV.—Non-Conforming Uses.
Part V.—General Provisions.
Part VI.—Finance and Administration.

The remaining documents of the Scheme are as follows:—

1. Land Use Map.
2. Scheme Map.

1.8 General Obligations: Subject to the provisions of the Act and all regulations made thereunder and to Section 4 of this Scheme, no persons shall depart or permit or suffer any departure from the requirements and provisions of the Scheme, nor shall any person use or permit the use of any land or building or undertake or permit any new work if the use, new work, reconstruction, alteration or modification does not conform with the Scheme or would tend to delay the effective operation of the Scheme.

1.9 Relationship of Scheme to By-laws: The provisions of this Scheme shall have effect, notwithstanding any by-law for the time being in force in the District and where the provisions of the Scheme are inconsistent with the provisions of any by-law, the provisions of this Scheme shall prevail.

1.10 Appeal Rights: The procedure for the lodgement and determination of appeals shall be as laid down in Part V of the Town Planning and Development Act and the Regulations made under that Act.

1.11 Interpretation: In this Scheme the terms used will have the respective interpretations set out in Appendix D of the Town Planning Regulations 1967 and the Metropolitan Region Town Planning Scheme Act, 1959 (as amended) unless otherwise specified by this Scheme.

Definitions:

"Effective Frontage" shall be calculated for lots having parallel side boundaries as the length of a line drawn perpendicular from one side boundary so as to meet the opposite side boundary and, in the case of other lots, as the length of a line drawn parallel to the street frontage between the two side boundaries at one third of the mean depth of the lot measured from the main street frontage.

Provided that nothing herein contained shall prevent the Council from deciding by other means, the effective frontage of lots of such irregular proportions that it considers the above formulae cannot be appropriately applied.

"Plot Ratio" shall be calculated in accordance with the provisions of the Uniform Building By-laws.

"Site Coverage" Shall be calculated in accordance with the provisions of the Uniform Building Bylaws. Setback for Lots with Multiple Street Frontages shall be determined in accordance with the provisions of the Uniform Building By-laws.

"Triplex" means a building comprising three complete and self-contained dwellings.

PART II.—RESERVED LAND.

2.1 Land set aside under this Scheme for the purposes of a reservation is deemed to be reserved for the purposes indicated on the approved Planning Scheme Map, and the reservations of the Metropolitan Region Scheme are shown in the Scheme to comply with the provisions of the Metropolitan Region Town Planning Scheme Act.

2.2 Development on Reserved Land: Except as otherwise provided in this Part, a person shall not carry out any development on land reserved under or on land abutting a reserve defined in this Scheme other than the erection of a boundary fence, without first applying for and obtaining the written approval of the Council in the form prescribed as Form 1 of the Metropolitan Region Scheme.

2.3 Approval of Development on Reserved Land: In giving its approval the Council shall have regard to the ultimate purpose intended for the reserves, and shall in the case of land reserved for the purpose of a public authority, confer with that Authority before giving its approval.

2.4 Reservations Under the Metropolitan Region Scheme: Any application for development on land reserved or abutting a reserve defined in the Metropolitan Region Planning Scheme shall be referred to the Metropolitan Region Planning Authority for determination in accordance with Clause 29 of the Metropolitan Region Scheme.

2.5 Existing Use Rights on Reserved Land: No provision of this Part shall prevent the continued use of land for the use for which it was being lawfully used immediately prior to the Scheme having the force of law, or the repair and maintenance of buildings or works lawfully existing on the land.

2.6 Compensation for Injurious Affection: Where the Council refuses approval for the development of land reserved under the Scheme on the ground that the land is reserved for public purposes, or grants approval subject to conditions, the owner of the land may, if the land is injuriously affected thereby, claim compensation for such injurious affection.

2.7 Compensation Claim Procedure: Claims for compensation shall be lodged at the Office of the Council not later than six months after the date of the decision of the Council refusing approval or granting it subject to conditions that are unacceptable to the applicant.

2.8 Council may Purchase: In lieu of paying compensation the Council may purchase the land affected by the decision of the Council at a price not exceeding the value of the land at the time of refusal of approval, or of the grant of approval subject to conditions that are unacceptable to the applicant.

PART III.—ZONES.

3.1 Notwithstanding anything to the contrary in this Scheme and without affecting the generality of Clause 1.6 of Part I, the Council may with the consent of the Minister, or when required by the Metropolitan Region Planning Authority so to do, shall require that the development of any land within the District, however zoned, shall be subject to the provisions of Clauses 10, 24 and 30 of the Metropolitan Region Scheme.

3.6 Proposed Town Centre Zone: The uses which the Council may permit within this zone are described in Table No. 1—Zoning Table. The Council will only exercise its power to lift deferment on development within the zone after its consideration of submissions made by intending developers showing how it is proposed to stage development and to integrate buildings, parking area, access, services and pedestrian and planting areas throughout the whole of the zone to achieve high standards of safety, appearance, convenience and service.

3.7 Business Zone: The uses permitted in this zone are described in Table No. 1—Zoning Table. The Council may as a condition of approval insist upon integration of building layout and design, parking layout and vehicular access and pedestrian circulation, with adjoining development. Lots 82 to 86 inclusive fronting Belmont Avenue, between Laurie Street and Wright Street are zoned for business purposes but the uses which the Council may allow on those lots exclude retail shops, licensed premises or service stations. Otherwise, the conditions which relate to other sites zoned for business purposes within the Scheme apply to these lots.

3.8 Highway Development Zone:

3.8.1 Intention: The Highway Development Zone is intended to provide for the development of property along and adjoining the Great Eastern Highway in commercial and industrial usage which does not generate nuisances detrimental to the amenities of the District or to the health, welfare and safety of its residents, and which are characterised by permanent, architecturally designed buildings set in pleasant garden surrounds and by limited vehicular access from properties to major roads.

3.8.2 Use Controls: The uses permitted in this Zone with the approval of Council are described in Table No. 1—Zoning Table.

3.8.3 Bulk and Location Controls:

(a) Lot Area and Dimensions: The minimum lot area shall be half an acre with a minimum effective frontage of 100 feet. However, the Council may approve a site with a lesser area or a lesser effective frontage in circumstances where the site existed prior to the approval of this Scheme and where it can clearly be shown that that site cannot be amalgamated with any other site within the zone to aggregate a minimum site area of half an acre and/or a minimum effective frontage of 100 feet so as to permit highway development usage.

(b) Lot Coverage: Building including accessory buildings shall not cover a total of more than 60 per cent. of the area of any lot.

(c) Setbacks of Buildings from Site Boundaries. No part of any building shall be built upon that area of land between the street alignment and the building setback line drawn parallel thereto an average distance of 50 feet within the site.

Provided that: in regard to any site having more than one street frontage the minimum setback from the street alignment shall apply to the frontage of the site to the road or roads of higher category as determined by Council and the setback from the lesser roads shall be not less than an average distance of 25 feet.

Providing further that: the Council will only permit averaging of building setbacks in those cases where it is satisfied that the functioning of any proposed use will be improved without detriment to the appearance of the development or the street scene or to the safe movement of traffic on or about the site and in no case will the Council permit a part of any building to be built closer to the street than one half of an average building setback.

(d) Setback Areas: No use of the area between the street alignment and building setback lines shall be permitted other than for planting or for pedestrian and vehicular circulation and vehicle parking in accordance with the provisions of this ordinance, except that: not more than 25 per

cent. of the set back area may be used for trade displays with the approval of Council.

(e) Pedestrian and Garden Areas: Not less than 25 per cent. of the building setback area shall be set aside, developed and maintained as garden space of pedestrian use only.

3.8.4 Parking and Loading Requirements: The Council shall require as a condition of its approval of any proposed use that adequate off-street parking shall be provided for on the site pursuant to the provisions of this ordinance and generally based on a ratio of not less than one parking space for each two employees together with adequate parking space for customers and visitors as required by Council. The Council shall also require adequate space for parking, loading and unloading of trade vehicles to be provided on-site.

3.9 Industrial Zone:

3.9.1 Intention: The Industrial Zone is established to provide for the industrial development of the Kewdale Industrial Estate and other industrial areas within the Shire of Belmont. The Council may approve a wide range of industrial activities within this zone subject to conditions designed to achieve a high standard of industrial environment.

3.9.2 Use Control: The uses permitted in this zone are described in Table No. 1 Zoning Table. When considering any application for development within the zone the Council shall have regard to the provision and preservation of amenities which are commensurate with the establishment and operation of a modern industrial area, particularly in relation to safe and efficient movement of goods and people; aesthetically pleasing layout, disposition and construction of buildings, plant and ancillary facilities and, to safe, convenient and compatible relationships between various uses within the zone and in adjoining zones.

3.9.3 Bulk and Location Requirements: The following bulk and location requirements shall relate to all industrial undertakings within the Industrial Zone:—

(1) Maximum Building Height: No part of any building shall exceed a height fixed by the Department of Civil Aviation as a maximum height in relation to the safe operation of Guildford International Airport.

(2) Maximum Site Coverage: No site shall be built upon so as to exceed a site coverage of 70 per cent.

(3) Setback of Buildings from Site Boundaries: No part of any building shall be built upon that area of land between the street alignment and the building setback line drawn parallel thereto 50 feet within the site.

Provided that: In regard to any corner site the minimum setback from the street alignment shall apply to the frontage of the site to the road or roads of higher category as determined by Council and the setback from the lesser roads shall be not less than 30 feet. In cases where insistence on setback of 50 feet would effectively prevent the industrial use of lots approved by the Town Planning Board having an area of less than 40 perches the Council may approve a minimum building setback of not less than 30 feet from the road or roads of higher category.

(4) Building Setback Areas: No use of the area between the street alignment and building setback lines shall be permitted other than for planting or for pedestrian and vehicular circulation and parking in accordance with the provisions of this ordinance except that—not more than 20 per cent. of the setback area may be used for trade display purposes approved by Council.

3.9.4 Parking and Loading: Any persons undertaking any development within the Industrial Zone shall submit a plan for the approval of Council showing the number, layout and dimensions of parking and loading spaces and the access thereto which in the case of employee parking shall accord generally with the requirements of Part V, Table II repeated hereunder, except in those cases where the Council is satisfied that a lesser number of spaces is appropriate in the particular circumstances, but in any such case the number of spaces required shall not be reduced to less than 50 per cent. of the scheduled requirements and then only on the condition that adequate ground area is reserved to meet the full parking requirement should it be needed at any future time.

Use	
Warehouses, stores storage yards and carriers depots, including incidental offices on premises used for such purposes.	1 to each 1,000 sq. ft. of open space used for such purposes and 1 to each 1,000 sq. ft. of gross floor area; or 1 to every 2 persons to be employed whichever is the greater.
Other Industries.	1 to each 500 sq. ft. of open space used for such purposes and 1 to each 500 sq. ft. of gross floor area; or 1 to every 2 persons to be employd, whichever is the greater.

The Council shall consider such plans having regard to the adequacy, efficiency and safety of proposals for employee, visitor and customer parking, for the loading and unloading of vehicles and for access to and from the site.

3.9.5 Pedestrian and Garden Space: Every person who constructs or who substantially reconstructs, alters or adds to a building or who changes the use of any land or building within the Industrial Zone shall make provision for 25 per cent. of the building setback area between the street alignment and the minimum building setback line to be set aside, developed and maintained as a garden space for pedestrian use only. Before any person undertakes any such development within the Industrial Zone a plan showing the layout position and proposed development of the pedestrian and garden space shall be submitted to the Council and the Council shall decide to approve the plan with or without conditions or not to allow the development because of inadequacies, having regard generally to the provisions and preservation of amenities which might reasonably be expected within a modern industrial area and more particularly to the inter-relation of buildings, parking areas, open spaces and traffic movement both on the subject site and on adjoining sites.

3.10 Rural Zone: The Rural Zone has been created to accommodate land which the Department of Civil Aviation requires for the extension of the Perth Airport. The Council's intention was not to zone the land rural, but to allow restricted industrial use within the area. However, the State Government required the Council to provide for the Commonwealth's airport extension and to incorporate within this text, controls which would ensure that all development applications would be referred to the Metropolitan Region Planning Authority and to the Department of Civil Aviation for these authorities' approval.

The zoning table states that all uses within this zone are subject to the approval of the Metropolitan Region Planning Authority as if the land was reserved in terms of the Metropolitan Region Scheme.

3.11 Specific Use Zones: The zones listed hereunder have more restricted application than preceding zones, and generally, the nominated use only is permitted within the zone:—

Service Station.
Hotel.
Motel.
Private Clubs and Institutions.
Places of Public Assembly.
Residential and Stables.
Private Recreation.
Parking.

3.11.1 Service Station Zone: Within this zone land may only be used for service station purposes.

3.11.2 Hotel Zone: Within this zone land may only be used for hotel purposes provided that land zoned for hotel purposes at the Sandringham Hotel site may, with the special approval of Council, be used for other commercial purposes incidental to or ancillary to the primary hotel use.

3.11.3 Motel Zone: Within this zone land may only be used for Motel purposes, except that in the event of a hotel licence being granted, the land zoned for Motel purposes which fronts Great Eastern Highway, between Leake Street and Keymer Street may, with the special approval of the Council, be used for Hotel purposes.

3.11.4 Private Clubs and Institutions Zone: Within this zone land may only be used for private club and institutional purposes.

3.11.5 Places of Public Assembly: Within this zone land may only be used for places of public assembly.

3.11.6 Residential and Stables Zone:

(1) Intention: The Residential and Stables Zone is established to provide for compatible usage of land in close proximity to the Ascot Racecourse by residential accommodation and stables and ancillary functions of the horse racing industry.

(2) Use Control: The uses permitted within this zone are:

1. The uses specified in Table No. 1 Zoning Table.
2. The stabling and training of horses, and with the approval of the Council,
   (a) the storage of commercial vehicles used in the transport of stock;
   (b) any other use incidental to the horse racing industry.

When considering any application for development within the Zone the Council shall have regard to provision and preservation of amenities which might reasonably be expected to be provided in a residential environment.

(3) Bulk and Location Requirements: The following bulk and location requirements shall relate to all development within the residential and stables zone:

1. Residential Development: Development shall comply with the controls of the Residential A Zone.
2. Stables Development: Any building erected for stables or any other usage associated with, or incidental to, the horse racing industry, shall be built in compliance with the provisions of the Uniform Building Bylaws except that—
   (a) on any lot occupied in part by a residential dwelling, buildings being used for stabling horses or for any other associated usage shall not, together with the area of the dwelling, aggregate more than 40% site coverage.
   (b) on any site used only for stabling horses or for any associated or incidental usage to the horse racing industry, buildings may be erected to a maximum site coverage of 50% of the lot area.

(4) Relationship to By-laws: By-laws made under the Health Act for the purposes of maintaining health and hygiene standards of stables shall be deemed not to be affected by the operation of this Scheme.

3.11.7 Private Recreation: Within this zone land may be used with the approval of Council for purposes associated with or incidental to the horse racing industry.

3.11.8 Parking: Within this zone land may only be used with the approval of Council for vehicle parking purposes.

PART IV—NON-CONFORMING USE OF LAND.

4.1 Existing Use Rights: No provision of the Scheme shall prevent—

(a) the continued use of any land or building for the purpose for which it was being lawfully used at the time of the coming into force of the scheme; or

(b) the carrying out of any development thereon for which, immediately prior to that time, a permit or permits required under the Town Planning and Development Act 1928 (as amended) or any other law authorising the development to be carried out had been duly obtained and was current.

4.2 Non-Conforming Use and Reserved Lands: Where in respect of land reserved under Section II of the Scheme a non-conforming use lawfully exists or was authorised as mentioned in Clause 4.1 of this Part on that land all or any erections, alterations or extensions of the buildings thereon or use thereof shall not be carried out unless the approval of the Council has been obtained in writing.

4.3 Extension of Buildings: Where in respect of land zoned under Section III of the Scheme a non-conforming use lawfully exists or was authorised as mentioned in Clause 4.1 of this Part on that land, buildings may be extended to the limits prescribed by the Uniform Building By-laws made under the Local Government Act, 1960 (as amended), or by any other by-laws made under the Act

for the purpose of limiting the size, location and distance from boundaries and any other matter required by law for that class of use within the boundary of the lot or lots on which the use was carried out immediately prior to the coming into force of the Scheme.

Provided that where the provisions of any by-law referred to in this Section are inconsistent with the provisions of this Scheme then the provisions of this Scheme shall prevail.

4.4 Discontinuance of Non-Conforming Use:

(a) Notwithstanding the preceding provisions of this Section when a non-conforming use of any land or building has been discontinued for a period exceeding 6 months, such land or building shall not thereafter be used other than in conformity with the provisions of the Scheme.

(b) Notwithstanding the provisions of Clause 4.1 of this Section, should any building or works comprised in such land be so damaged or destroyed that the cost of restoration or replacement is greater than 75% of the value of such building or works immediately prior to the damage to or destruction thereof, such land shall be used only in conformity with the provisions of the Scheme.

(c) The Council may effect the discontinuance of a non-conforming use by the purchase or resumption of the affected property, or by the payment of compensation to the owner or the occupier or to both the owner and occupier of that property and may enter into an agreement with the owner of that property for that purpose.

PART V.—GENERAL PROVISIONS

5.1 Vehicle Parking and Loading: The purpose of this clause is to secure the provision of off-street parking and loading facilities in relation to the use of land so as to reduce or prevent the congestion of traffic on any road or public place. Every owner or occupier who constructs or who substantially reconstructs, alters or adds to a building on any site or changes the use of any land or building shall make provision in accordance with the requirements of Clause 5.3 for vehicles used in conjunction with the site (whether by occupiers, their employees or invitees or other persons) to stand on or, in the opinion of the Council, sufficiently close to the site but not on a street while being loaded or unloaded or awaiting use.

5.2 Size and Location of Car Spaces and Loading Facilities: The minimum dimensions of every required car parking space shall be 18ft. x 8ft. excluding all access drives. When considering any development applications, the Council shall have regard to and impose conditions on the details of locating and designing the required car parking spaces and loading facilities. In particular, the Council shall take into account, and may impose conditions concerning—

(a) the proportion of spaces to be roofed or covered,

(b) the proportion of spaces to be below natural ground level.

(c) the means of access to each space and the adequacy of any manoeuvring area,

(d) the location of the spaces on the site and their effect on the amenity of adjoining development, including the potential effect if spaces should later be roofed or covered,

(e) the adequacy of proposed screening or planting,

(f) the extent to which spaces are located within required setback areas, and

(g) the location of proposed footpaths and the effect on traffic movement and safety.

(h) the location of proposed accessways on and off public roads and the effect on traffic movement and safety.

5.3 Number of Parking and Loading Spaces to be provided: The number of spaces to be provided in respect of any particular site shall be determined by Council, having regard to the nature of the use and the known or likely volume of goods, materials or people moving to and from the site. Where the use is stipulated (except as laid down for single dwellings, duplex, triplex and quadruplex houses and flats in Part III) the number of car parking spaces shall be generally in accord with the requirements of Table II.

When making decisions relative to parking provision, Council shall at all times have regard to any existing or proposed public parking facilities nearby.

5.5 Appearance of Buildings: All buildings shall be maintained by the owner and occupier thereof so as to preserve the amenities of the locality and their harmony with the exterior designs of neighbouring buildings.

5.6 Prohibition of Unsightly Objects: No persons shall cause, allow or permit to be placed on any building or part of a building or on a building lot, any article, object or thing which shall be visible from any street, way or public place or from any other land or building or any part thereof,

5.7 Nuisance: No lot, building or appliance shall be used in such a manner as to permit the escape therefrom of smoke, dust, fumes, odour, noise vibration or waste products in such quantity or extent or in such a manner as to create or be a nuisance to any inhabitant of the neighbourhood of such land or to traffic or persons using roads in the vicinity.

5.8 Advertising:

5.8.1 Relationship to By-laws: Without limiting the generality of the application of any by-law it is expressly declared that this Clause is supplementary to and not in substitution for the by-laws relating to the control and licensing of signs and advertising. In the event of conflict between the provisions of this Clause and any by-law the provisions of this Clause shall prevail.

5.8.2 Interpretation: In this Ordinance unless the context otherwise requires, "signs" includes—

(a) every sign placed or affixed (whether by painting or otherwise) as advertising matter upon a site and visible from off the site; and

(b) the board, hoarding or other structure which supports such sign.

5.8.3 Signs In Residential Zones: No sign shall be erected or displayed in any residential zone except:

Provided that such sign not be erected without the consent of the Council and shall be subject to such conditions as the Council shall impose.

(5) A sign advertising the intention to sell the land or premises on which it is situated.

5.8.4 Signs in Other Zones: No sign shall be erected or displayed on land not situated in a residential zone or on or in any building erected thereon:

(1) If it detrimentally affects the amenities of any residential zone or zones or any parts thereof.

(2) If it tends to depreciate the value of any adjoining property.

(3) If the area of the sign exclusive of supporting structure exceeds 2 square feet for every one lineal foot of site frontage, *providing that* in the case of a site having more than one street frontage the limitation as to sign area shall apply to each street frontage and the sign area may not be aggregated and displayed on one street frontage.

(4) If the height of any part of the sign exceeds 20 feet or extends above the roofline of the building whichever is the greater.

5.8.5 Power to Prohibit Signs Affecting Traffic Safety: If at any time the Council, having regard to considerations of traffic safety or the requirements of traffic control, is of the opinion that the erection or display of any sign ought not to be permitted the Council may by resolution prohibit the erection or display of any such sign.

5.9 Amenity Control: No building other than a residential building of not more than two storeys or a building ancillary thereto, shall be erected or built in any zone defined within this Scheme unless and until the Council has approved the design subject to the principles herein contained and the following conditions have been complied with:—

(a) The Council is satisfied that such building will not clash in harmony with the exterior designs of neighbouring buildings.

(b) In considering the design of any building within any zone the Council shall take into consideration the relationship which the shape and siting of such building or buildings proposed within the area bears to the shape of the lot or lots on which such building or buildings is to be erected.

(e) The Council may appoint an Advisory Committee consisting of the President or his nominee and three architects selected by the Council and approved by the Royal Australian Institute of Architects, W.A.
