**CITY OF SOUTH PERTH TOWN PLANNING
SCHEME NO. 3—RIVER PARADE GUIDED
DEVELOPMENT SCHEME.**

THE South Perth City Council, under and by virtue of the powers conferred upon it in that behalf by the Town Planning and Development Act, 1928 (as amended) and the Metropolitan Region Town Planning Scheme Act, 1959 (as amended) hereby makes the following Town Planning Scheme.

**TOWN PLANNING SCHEME No. 3.
Scheme Text.**

PRELIMINARY.

1.1 This Town Planning Scheme may be cited as City of South Perth Town Planning Scheme No. 3—River Parade Guided Development Scheme (hereinafter called "the Scheme").

1.2 The Scheme is complementary to the City of South Perth Town Planning Scheme No. 2 and to the extent to which the provisions of the Scheme are inconsistent with the provisions of the City of South Perth Town Planning Scheme No. 2 the provisions of the Scheme shall prevail.

1.3 The Authority responsible for carrying out and enforcing the observance of the Scheme is the City of South Perth (hereinafter referred to as "the Council").

1.4 The Scheme shall apply to the area of land contained within a broken black line on the Land Use Map and the Scheme Map and such area is hereinafter referred to as "the Scheme Area".

1.5 The map entitled "Land Use Map" shows the existing subdivision of the Scheme Area and the map entitled "Scheme Map" shows the design for the further subdivision of the Scheme Area in two stages (designated as "first stage" and "second stage"), the location of the new lots which may be created and of the roads to be constructed. The Council may recommend to the Town Planning Board of Western Australia (hereinafter called the Board) the approval of a subdivision which involves an alteration or variation to the subdivisional design shown on the Scheme Map if the circumstances justify such a course provided that the Council shall not so recommend if in its opinion such alteration or variation would impede or adversely affect the subdivision or development of the Scheme Area as a whole.

1.6 The general objects of the Scheme are—

- (a) to provide a basic design for the subdivision of land within the Scheme Area;
- (b) to facilitate proper development of the land within the Scheme Area;
- (c) to make suitable provision for roads in the Scheme Area;
- (d) to provide proper drainage of roads in the Scheme Area;
- (e) to make suitable provisions to ensure "dryness" of building sites;
- (f) to make provision for sewage disposal facilities within the Scheme Area;
- (g) to make provision for other matters which are necessary or incidental to town planning and housing.

1.7 It is intended that as and when owners of land within the Scheme Area subdivide or develop their land such subdivision or development shall not only be according to a plan which is capable of forming part of an overall plan of subdivision for the Scheme Area but shall also comply with the conditions for development of the Scheme Area contained in or imposed by the Scheme.

1.8 In this Scheme "Australian Height Datum" means the height datum determined under the direction of the National Mapping Council of Australia and established in Western Australia by the Department of Lands and Surveys.

SUBDIVISION.

2.1 An owner of land within the Scheme Area who desires to subdivide his land either alone or in conjunction with other owners shall submit a plan of the proposed subdivision to the Board as required by the Town Planning and Development Act 1928 (as amended).

2.2 Subject to the provisions of Clause 1.5 the Council shall not recommend to the Board the approval of any plan of subdivision unless—

- (a) the proposed subdivision conforms generally with the design shown on the Scheme Map provided that this paragraph shall not prevent the Council from recommending such plan for approval on the ground only that the plan provides only for a first stage subdivision or, that stage having already been carried out, for a second stage subdivision;

- (b) it is a condition of approval by the Board that where any lot to be created by the subdivision has a frontage to River Parade and cannot be connected to a main sewer for the disposal of sewage, the ground level of that lot to a distance of not more than 7.6 metres from the alignment of River Parade shall not be less than 2.45 metres above Australian Height Datum and the ground level of the remainder of such lot shall not be less than 1.7 metres above Australian Height Datum provided that when the plan of the proposed subdivision is accompanied by an application for approval to commence development and a plan of the proposed development the minimum ground level of 2.45 metres above Australian Height Datum required by this paragraph may be confined to the area lying within 8 metres of the position of any soak well or leach drain shown on the plan of the proposed development;
- (c) it is a condition of approval by the Board that where any lot to be created by the subdivision has a frontage to River Parade and can be connected to a main sewer for the disposal of sewage, the ground level of that lot to a distance of not more than 7.6 metres from the alignment of River Parade shall not be less than 1.85 metres above Australian Height Datum and the ground level of the remainder of such lot shall not be less than 1.7 metres above such Datum.

ROADS.

3.1 The roads coloured orange on the Scheme Map shall be constructed and drained at the expense of subdividing owners of land within the Scheme Area to the extent specified in paragraph (c) of Clause 6.1 and in the manner hereafter provided.

3.2 The Council shall in due course construct and drain the roads coloured orange on the Scheme Map.

SEWERAGE.

4.1 The Council shall not recommend for approval by the Board any application for subdivision, other than an application for a first stage subdivision, unless all the lots to be created by the proposed subdivision can be connected to a main sewer for the disposal of sewage.

4.2 A building shall not hereafter be erected within the Scheme Area unless the same can be connected to a sewer and any such building shall not be occupied unless and until it is so connected provided that the Council may approve of the erection and occupation of a single family dwelling house or a duplex dwelling house on a lot existing at the commencement of the Scheme or on a lot created pursuant to a first stage subdivision if the Council is satisfied that—

- (a) the absorption sufficiency of the ground is such as to permit the satisfactory functioning of an apparatus for the bacteriolytic treatment of sewage;
- (b) in the case of a single family dwelling house the level of the ground is such to ensure that the invert of the outlet effluent pipe from a bacteriolytic treatment tank at the point of discharge into a soak well or leach drain will not be less than 2.45 metres above Australian Height Datum.
- (c) in the case of a duplex dwelling house the level of the ground is such to ensure that the bottom of a leach drain or soak well which receives effluent from a bacteriolytic treatment tank is not less than 4.6 metres above Australian Height Datum.

DEVELOPMENT REQUIREMENTS AND CONTROLS.

5.1 A person shall not erect a building within the Scheme Area except in accordance with the provisions of the Scheme.

5.2 (a) Where land has been filled to bring its levels into compliance with the levels prescribed by Clause 2.2 of the Scheme a building shall not be erected on that land unless the filling used for that purpose shall have been effected with clean sand or other material approved by the Council;

(b) where the Board has approved of a plan of subdivision and such plan was accompanied by an application for approval to commence development and a plan of the proposed development the location of any soak well or leach drain shown on that plan shall not be altered unless the area of the lot lying within 8 metres of such soak well or leach drain is not less than 2.5 metres above Australian Height Datum.

5.3 In approving the erection of any building in the Scheme Area the Council may require that it shall be so sited as to ensure the greatest possible outlook or view of the Canning River for the occupants of such building and for the occupants of any other building which may be subsequently erected on that land or any adjoining lot.

5.4 The maximum height of any building erected on—

- (a) land which is within the boundary of any of the new lots which could be created by a subdivision under the Scheme and which lots would have a frontage to River Parade; and
- (b) lots 2, 4, 268, Pt. 276 and 283 River Parade shall not in the case of—
- (i) land south of Lot 279 River Parade exceed 11.5 metres above Australian Height Datum;
- (ii) Lot 279 River Parade and land north thereof exceed 6.85 metres above Australian Height Datum.

SCHEME COSTS.

6.1 For the purposes of the Scheme the Scheme Costs shall comprise—

- (a) the Council's costs of administering and implementing the Scheme including such amount of the Council's overhead costs as are attributable to the Scheme and its implementation and administration;
- (b) all fees and costs incurred by the Council in connection with the preparation of the Scheme;
- (c) one half of the costs of constructing and draining the roads coloured orange on the Scheme Map including one half of the cost of all excavations filling and compaction necessary in the construction and drainage of such roads;
- (d) the cost of such other works and things as the Council may deem necessary for the proper planning of the Scheme Area and the implementation and administration of the Scheme.

6.2 An owner of land within the Scheme Area who makes an application for approval to subdivide such land shall, prior to the final approval of the application by the Board, pay to the Council an amount which bears the same proportion to the total Scheme Costs as the area of the land the subject of the application bears to the area of the whole of the land within the Scheme Area with the exception of the area of all roads and ways shown on the Scheme Map provided that the provisions of this clause shall not apply—

- (a) if an application is made for approval to further subdivide any land which has already been subdivided under the provisions of this Scheme; or
- (b) if an applicant for approval to subdivide that land has already paid his proportion of the Scheme Costs; or
- (c) if the application for approval to subdivide that land does not have the effect of dividing that land into separate lots.

6.3 If an application for approval to subdivide land within the Scheme Area is made before the actual amount of the Scheme Costs has been ascertained the Council may estimate the amount thereof and the owner making such application shall pay his proportion of such estimate to the Council prior to the final approval of his application by the Board. If an estimate so made by the Council proves to be less than the actual Scheme Costs the difference between the amount already paid by the owner and the amount he would have paid had the actual amount of the Scheme Costs been known at the time shall be paid by him to the Council on demand. If an estimate so made by the Council proves to be more than the actual Scheme Costs the difference between the amount already paid by the owner and the amount he would have paid had the actual amount of the Scheme Costs been known at the time shall be paid by the Council to such owner on demand.

Any expenses incurred by the Council under that section may be recovered from the person in default as a simple contract debt in any Court which has jurisdiction to deal with claims of that amount.
