CITY OF NEDLANDS TOWN PLANNING
SCHEME AMENDMENT No. 42.

THE City of Nedlands under and by virtue of the powers conferred upon it, in that behalf, by the Town Planning and Development Act, 1928, (As Amended), hereby makes the following Town Planning Scheme Amendment for the purpose of "varying the car parking requirements" as follows:—

a. By the deletion of Clauses 5.1, 5.2 and 5.3 of the Scheme Text and the substitution thereof by the following:—

5.1. Vehicle Parking and Loading:

The purpose of this clause is to secure the provision of off-street parking and loading facilities in relation to the use of land so as to reduce or prevent the congestion of traffic in any road or public place.

Every owner or occupier who constructs or substantially reconstructs, alters or adds to a building on any site or changes the use of land or building, shall make provision in accordance with the requirements of Table II hereunder for vehicles used in conjunction with the site (whether by occupiers, their employees or invitees, or other persons), to stand on the site, or in the opinion of the Council sufficiently close to the site but not on the street while being unloaded loaded or awaiting use.

Size and location of car spaces:

The minimum dimensions of every required car parking space shall be 5.5 metres x 2.5 metres. In the case of a parking area with a minimum access width of 7.32 metres or, 5 metres x 3 metres in the case of a parking area with a minimum access width of 6.7 metres. When considering any development or building application, the Council shall have regard to and impose conditions on the details of locating and designing the required car parking spaces. In particular, the Council shall take into account and may impose conditions concerning:—

- (i) the proportion of car spaces to be roofed or covered,
- (ii) the proportion of car spaces to be below natural ground level,
- (iii) the means of access to each car space and the adequacy of any vehicular manoeuvring area,
- (iv) the location of car spaces on the site and their effect on their amenity of adjoining development including the potential effect if those spaces should later be roofed or covered,
- (v) the locations of proposed public footpaths, vehicular crossings, or private footpaths within the lot and the effect on both pedestrian and vehicular traffic movement and safety,
- (vi) the suitability and adequacy of proposed screening or natural planting,
- (vii) the suitability of and adequacy of elevated structural decks for development and service as a proportion of the required area for natural planting and pedestrian space.

Number of Parking and loading spaces to be provided:

The number of spaces to be provided in respect of any particular site shall be determined by Council, having regard to the nature of the use and the known or likely volumes of goods, materials, or people moving to and from the site, and where the use is stipulated, not less than the number of spaces set down in Table II hereunder.

It shall be lawful for Council to enter into agreements with owners in a locality for the purposes of rationalising parking on nearby adjoining sites. Council may purchase land, obtain rights of way or rights of carriage-way through any lot, agree to a concession on numbers of vehicles to be provided in return for access, arrange for reciprocal parking uses on adjacent or nearby lots. Any expenses incurred in these negotiations or the purchase of land are recoverable by Council from those persons benefiting from the parking arrangements.
