CLEAN AIR ACT 1964-1981.

CLEAN AIR (DETERMINATION OF AIR IMPURITIES IN GASES  
DISCHARGED TO THE ATMOSPHERE) REGULATIONS 1983.

MADE by His Excellency the Governor in Executive Council.

- Citation. 1. These regulations may be cited as the Clean Air (Determination of Air Impurities in Gases Discharged to the Atmosphere) Regulations 1983.
- Interpretation. 2. In these regulations unless the contrary intention appears—  
 “boiler” means any vessel in which for any purpose water is heated by any combustion material with a total heat input of 100 or more megajoules per hour;  
 “Council” means the Air Pollution Control Council established by the Act;  
 “cubic metre” means that volume of dry gas which occupies a cubic metre at a temperature of 0° Celsius and at an absolute pressure equivalent to one atmosphere;  
 “dark smoke” means smoke that, if compared with charts known as the Ringelmann Chart or Miniature Ringelmann Chart described in regulation 5 (7), would appear darker than shade 1 on either of those charts;  
 “flue” or “duct” means any exhaust, flue, duct, structure or opening from or through which air impurities are or are likely to be emitted to the atmosphere;  
 “the Act” means the Clean Air Act 1964.
- Standard of concentration. 3. For the purposes of section 33 (1) of the Act, in respect of—  
 (a) any boiler or incinerator emitting solid particles—the standard of concentration at the point of emission determined in accordance with regulation 4 (2) of these regulations, of solid particles in residual gases, adjusted to a basis of 12 per cent carbon dioxide shall be 0.25 g/m<sup>3</sup>;  
 (b) any other trade, industry, process, industrial plant or fuel burning equipment emitting solid particles not mentioned in paragraph (a) of this regulation—the standard of concentration at the point of emission, determined in accordance with regulation 4 (2) of these regulations of solid particles in residual gases before admixture with air, smoke or other gases shall be 0.25 g/m<sup>3</sup>.
- Manner of determination of the standard of concentration of solid particles. 4. (1) The standard of concentration of solid particles in each cubic metre of residual gas at the point of emission shall be determined in the following manner—the sample of solid particles entrained in the exhaust gas shall be withdrawn from the flue or chimney in such a way that the velocity of the gases entering a sample nozzle placed in the flue or chimney is, as nearly as practicable the same as the velocity of the gases flowing in the flue or chimney at the sampling point.
- Prescribed point of emission. (2) For the purposes of section 33 (1) of the Act the prescribed point is a point—  
 (a) that is not less than—  
 (i) 2D away from a bend or change in direction of the gas flow; and  
 (ii) 3D away from a fan or damper,  
 where D is the diameter of the flue, or in the case of a rectangular flue, D is the mean of its width and breadth;  
 (b) at which the average gas velocity is greater than 3 metres per second; and  
 (c) that is downstream of any dust control equipment.
- (3) To collect a representative sample of solid particles, increments of sample shall be withdrawn from the flue at points contained in the sampling plane at the prescribed point of emission.
- (4) The number of sampling points shall be—  
 (a) not less than four for duct areas smaller than 0.20 square metres;  
 (b) not less than eight for duct areas between 0.20 and 2.0 square metres; and  
 (c) not less than one for each 0.25 square metres of the sampling plane for duct areas larger than 2.0 square metres,  
 and the sampling points shall be at the centre of equal areas over the sampling plane.
- (5) The sampling time is to be the same for each sampling point, and, shall not in any case be less than 3 minutes.
- (6) The sample of solid particles is to be separated from the gas by a filter of fibreglass, alundum or some other suitable material which will withstand the conditions existing at the sampling position.

Dark smoke.

5. (1) The method by which it is ascertained that smoke is dark smoke is by the use of a Ringelmann Chart or Miniature Ringelmann Chart.

(2) The chart is to be held or fixed in a position facing the observer and is to be in line with the observer and the source under observation.

(3) The darkness of the air impurities at the point where they leave the source is to be compared with the shades on the chart.

(4) The shade which most closely matches the darkness of the air impurities and the time of the duration of this shade are to be noted.

(5) As far as practicable, when observations are made with the sun shining, the position of the observer and the chart is to be such that the sun, chart and observer form a right angle.

(6) When the Ringelmann Chart is used, the observer is to be 15 to 30 metres from the chart and when the Miniature Ringelmann Chart is used, the observer is to be 1 to 5 metres from the chart.

(7) The Ringelmann Chart and Miniature Ringelmann Chart used for making the measurements described in this regulation shall correspond to charts held in the Public Health Department certified as the standard charts under the signature of the Chairman of the Council.

By His Excellency's Command,

R. D. DAVIES,  
Clerk of the Council.

#### Schedule.

Shire of Waroona Town Planning Scheme No. 5  
Lake Clifton Special Rural Zone.

THE Waroona Shire Council, under and by virtue of the powers conferred upon it in that behalf by the Town Planning and Development Act 1928 (as amended) hereby makes the following Town Planning Scheme for the purpose of:—

- (a) Zoning land for Special Rural purposes.
- (b) Controlling the development of Special Rural Holdings in an orderly manner so as to ensure a minimum of detriment to the existing environment.
- (c) Establishing a subdivision and development structure for the control of subdivision.
- (d) Setting aside land for future public use as Reserves.
- (e) Other matters authorised by the enabling act.

#### PART I: Preliminary.

1.1 This Town Planning Scheme may be cited as the Shire of Waroona Town Planning Scheme No. 5 (Lake Clifton Special Rural Zone) and hereinafter called "the Scheme" and shall come into operation on the publication of notice of the Minister's final approval thereof in the *Government Gazette*.

1.2 The Scheme shall apply to the whole of the land set out in the maps forming part of the Scheme.

1.3 The responsible authority for carrying out the Scheme is the Council of the Shire of Waroona (hereinafter referred to as the Council).

#### 1.4 Arrangement of Scheme.

The Scheme Text is divided into the following parts:—

- Part I Preliminary.
- Part II Objectives and Policies of the Scheme.
- Part III Zones.
- Part IV General Provisions.
- Part V Finance and Administration.

#### Schedule 1.

The remaining documents of the Scheme are as follows:—

1. Scheme Map.

1.5 Interpretation: In this Scheme the terms used will have the respective interpretations set out in Appendix "D" of the Town Planning Regulations 1967 unless otherwise specified by this Scheme:—

"Equestrian Activity" means the keeping of horses for domestic purposes and may with the consent of Council, include riding schools and establishments for the breeding, sale, training and agistment of horses.

"Frontage" means the boundary line between a lot and the street which that lot abuts and where the lot abuts more than one street then the least of the measurements shall be deemed to be the frontage for the purpose of ascertaining building setbacks.

"Rural Uses" means uses normally carried out in connection with agriculture, grazing or farming generally including residential use but not including piggeries, noxious uses or other uses considered by Council to be detrimental to the health or amenity of the area, but may with consent of Council include establishments for the breeding and sale of animals.

"Uniform Building By-laws" means the Uniform Building By-laws 1974 published in the *Government Gazette* in December 1974 and amended from time to time thereafter by notices published in the *Government Gazette*.

#### PART II: Objectives and Policies.

2.1 The Scheme defines an area within which Council considers that the establishment of Special Rural Zones and consequent subdivision and development into Special Rural holdings is appropriate, subject to the requirements as shown on the Development Guideline Map appended to this Scheme being recognised.

2.2 Council's primary objective will be to ensure that development which takes place within the Scheme Area occurs with the least detrimental effect possible to the Rural landscape of the area, and in order to achieve that objective applications for subdivision and development show an adequate concern for the environment, and the area's ecology.

2.3 To retain the rural landscape value of the area Council considers it appropriate to retain, as far as practical, existing vegetation. To enhance and retain the visual amenity within the Scheme Area Council may encourage land owners to participate in a tree planting programme.

#### PART III: Zones.

3.1 The Scheme Area contains a Special Rural Zone within which subdivision and development may proceed in accordance with proposals agreed to by the Council and approved by the Town Planning Board.

3.2 Within the Special Rural Zone Council will permit no use other than:—

- Equestrian Activity.
- Dwelling House.
- Rural Use.

#### PART IV: General Provisions.

4.1 Land Use Control: Uses permitted within the Special Rural Zone are subject to the following clauses.

4.1.1 Residential Use will not be permitted in a building other than one approved by the Council for that purpose under the conditions of its Building By-laws except that Council may grant permission for occupation of a caravan or outbuilding for a period not exceeding twelve months if a building permit is concurrently in force or an application therefore is before Council.

4.1.2 All buildings on any lot within the Zone must conform to the provisions of the Uniform Building By-laws.

4.1.3 Only one dwelling house shall be constructed on each lot.

4.1.4 All dwellings within the Scheme Area shall have external walls constructed of brick. However Council may approve the use of alternative materials if in its opinion the type and colour of the materials and the design of the dwelling are of a sufficiently high standard to complement and blend in with the environment of the area. All other buildings shall be constructed of materials which are of a sufficiently high standard to complement and blend in with the environment of the area.

4.1.5 All buildings intended for residential use must include provision for the storage of rainwater from roof catchment in tanks of capacity not less than 92 000 litres.

4.1.6 Notwithstanding the provisions of Clause 4.1.7, no building shall be erected closer than 40 metres to the street frontage or rear boundary and 20 metres to side boundaries. Where the topography, flora of a site or the shape of the lot make the construction of a dwelling or outbuildings difficult, Council may set an alternative setback.

4.1.7 The Scheme Map contains a highway protection area within which:—

- (a) A building or advertising sign or hoarding may not be erected.
- (b) Trees or other indigenous vegetation must not be felled or cleared except those which are dead, diseased or dying, or for the purpose of a firebreak required by a by-law.

4.1.8 Elsewhere within the Scheme Area no trees or indigenous vegetation shall be removed without the consent of Council who in considering approval for clearing will consider the purpose to which the land is to be put and assess the possible effects on the areas amenity, visual appearance and soil stability.

4.1.9 The keeping of horses and livestock will be subject to determination by Council from time to time of appropriate stocking capacity and Council may require the removal of horses or livestock from any lot if in its discretion excessive damage is being caused to the environment.

4.1.10 Council may take any appropriate action necessary to reduce or eliminate any adverse effects on the environment caused solely or partly by stocking of animals or development on any lot. Any expense incurred by Council in implementing this clause shall be borne by the land owner.

4.1.11 The breeding or keeping of animals and intensive agricultural pursuits for commercial gain shall not be permitted without the written approval of Council.

4.1.12 No fence within the Special Rural Zone shall be constructed of the following materials:—

- (a) Asbestos.
- (b) Metal Sheets.
- (c) Wooden Pickets.

4.1.13 Boundary fences shall be constructed to a standard that will keep livestock within the confines of each lot.

4.2 Subdivision Control: Subdivision within the Special Rural Zone is subject to the following clauses:

4.2.1 Subdivision within the Special Rural Zone shall be generally in accordance with the intent and structure of the Development Guideline Map appended to this Scheme or any variation therefrom approved by the Board with the advice of Council provided that such variation can be shown to be in accordance with the objectives of the Scheme.

4.2.2 Once the Special Rural Zone has been subdivided in whole or in part, further subdivision of the subdivided area shall not be permitted.

4.2.3 Prior to the Town Planning Board granting final approval to the subdivision of whole or part of the Special Rural Zone, each lot being subdivided shall have a boundary fence constructed of a uniform standard.

4.2.4 Access to lots adjacent to the Old Coast Road and Clifton Road shall be from an internal road and access of those lots onto the Old Coast Road and Clifton Road shall be precluded by the creation of a 10 metre wide pedestrian accessway adjacent to those roads.

PART V: Finance and Administration.

5.1 Disposal of Land: The Council may deal with or dispose of any land which it owns or which it has acquired pursuant to the provisions of the Scheme, in accordance with the Act, and in conformity with the provisions of the Scheme, and for such purpose may make such agreements with other owners as it deems fit.

## Footnotes to the Balance Sheet.

The Balance Sheet does not reflect Council's contribution of \$109 572 towards the construction of the Red Hill Disposal Site. Total costs associated with this site have been capitalised in the Shire of Bayswater's financial statements and will be transferred to the Eastern Zone Refuse Disposal body.

The Balance Sheet does not reflect that the sum of \$17 013 realised from the sale of assets should have been transferred from the Municipal Fund to the Plant and Equipment Reserve Fund. This transfer will be made in the 1982/83 year.

We hereby certify that the figures and particulars contained in the foregoing are a correct extraction from the books of account.
