Shire of Albany

1990/91 FIREBREAK NOTICE

Notice to all Owners and/or Occupiers of Land in the Shire of Albany

Pursuant to the powers contained in Section 33 of the Bush Fires Act 1954, you are hereby required to have all firebreaks clear of inflammable material, such firebreaks to be not less than 3 metres in width within that portion of the Shire lying generally north of the dividing line defined hereunder and 2 metres in width within that portion of the Shire lying generally south west of the dividing line defined hereunder, and constructed by one or more of the following methods—ploughing, cultivation, scarifying, burning or chemical spraying. In addition you may be required to carry out further works which may be deemed necessary and specified by way of separate written notice forwarded to the address of the owner/occupier as shown on the rate records maintained by the Shire of Albany for the land.

1. Land an area of 2 100 Square Metres or Less

For all land having an area of 2 100 square metres or less—

(a) A firebreak is NOT required—However:

(b) The land will be inspected by the Fire Control Officer appointed by the Shire of Albany and notice may then be served if action is to be necessary to prevent the outbreak or spread of a bushfire on the land;

(c) Such land is required to be made safe from fire by the reduction of fire hazards.

Compliance with such requirements need not require the removal of all inflammable materials.

2. All Other Land

- (A) You are required to have constructed firebreaks, as specified in this notice.
- (a) Immediately inside all external boundaries of all land exceeding 2 100 square metres in area whether the land be cleared, partly cleared, bulldozed, chained, used for pasture or be undeveloped.
 - (b) Immediately surrounding all buildings erected on any land having an area in excess of 2 100 square metres.
- (B) You are required, on all land used for and being under crop in the period from 15th November 1990 to 31st March 1991 to—
- (a) Have constructed firebreaks, as specified in this notice immediately inside the external boundary of the land being used for crop and around the standing crop so that the crops are broken up into areas not exceeding approximately 200 hectares. Owners and/or occupiers of land in the North Eastern Sector ONLY have the option of providing a 6 metre width of crop cut for hay as a firebreak around the standing crop, and
 - (b) Having standing within the external boundary of all land being used for crop which is then being harvested and at all times that the harvesting of crop is proceeding suitable operational fire fighting equipment.

ALL firebreaks as designated above must be prepared on or before the 15th day of November 1990 within that portion of the Shire lying generally north of the dividing line defined hereunder and on or before the 15th day of December 1990 within that portion of the Shire lying generally south-west of the dividing line defined hereunder or within 14 days of the date of your becoming owner or occupier should this be after those dates.

The firebreaks required by this notice are to be maintained clear of inflammable material to and including the 30th day of March 1991.

Take notice that pursuant to Clause 33 (4) of the Bush Fires Act, where the owner or occupier of land who has received notice fails or neglects to comply with the requisitions of the notice within the time specified, the Shire of Albany may by its officers and with such servants, workmen and contractors vehicles and machinery as the officers deem fit, enter upon the land and carry out the requisitions of the notice which have not been complied with and pursuant to Clause 33 (5) of the Bush Fires Act the amount of any costs and expenses incurred may be recovered from you as the owner or occupier of the land.

Applications to Vary the Above Requirements

If it is considered to be impractical for any reason whatever to carry out works as required by this notice, you may apply to the Fire Control Officer of your Local Bush Fire Brigade no later than 21 days prior to the date by which the firebreaks are required by this notice for permission to provide firebreaks in an alternative position, to take alternative action to abate the fire hazards on the land or to alter or vary this notice in any other way.

Late Applications Will Not be Accepted

Application forms for this purpose are available from all Bush Fire Control Officers.

It should be noted that residential and minimum equipment level requirements apply where total exemptions from firebreaks are sought for areas in excess of 2 ha. Full details are available from the Shire Council or your local Fire Control Officer.

Note

Council or its duly authorised officer will consider approval of other than firebreaks immediately inside the external boundaries where a more suitable alternative can be provided. Approval of such alternatives will only be considered if submitted with the endorsement of the Bush Fire Brigade for the area concerned and will be on a yearly basis. If permission to vary this order is not granted by the Council or its duly authorised officer, you must comply with the requirements of this notice.

The penalty for failing to comply with this notice is a fine not exceeding \$1 000 and a person in default is also liable, whether prosecuted or not, to pay the costs of performing the work directed in this notice if it is not carried out by the owner or occupier by the date required by this notice.

If the requirements of this notice are carried out by burning, such burning must be in accordance with the relevant provisions of the Bush Fires Act.

Strategic Firebreaks

Landowners and/or occupiers or groups of landowners and/or occupiers may apply to the Council of the Shire of Albany for permission to install strategic firebreaks in a specific area, rather than breaks as previously specified in this notice.

Optional Perimeter Firebreaks—Lower Kalgan, Kojaneerup and Wellstead Brigade Areas

1. Owners and/or occupiers of land in the Lower Kalgan Brigade area only have the option of installing Perimeter Firebreaks on their land for a 2 year period expiring on 1 July 1991.

Fire Protection of Private Hardwood/Softwood Plantations

Definitions and Specifications

Plantation: Any area of planted Pines or Eucalyptus species exceeding 3 ha.

Windbreaks: Will be defined as planted areas not exceeding 15 metres in depth with an unrestricted length.

Firebreaks—15 metres Boundary Break: The first row of trees must be at least 15 metres from the outside edge of the break. The outer 10 metres of the firebreak must be cleared of all flammable material on the ground, and will have a 10 metre vertical clearance, i.e. short grass may be considered low fuel.

Minimum Firebreak Standards: The following firebreak standards apply for plantations—

Firebreaks constructed 15 metres wide (as per definition) on the boundaries of plantations or on such other location as may be agreed between Council and the plantation owner.

Firebreaks (as per definition) 15 metres wide should adjoin first class public roads, i.e. roads subject to heavy traffic density.

Firebreaks clear of all flammable material 10 metres wide should adjoin secondary public roads, i.e. roads subject to low traffic density.

Firebreaks clear of all flammable material 6 metres wide should surround compartments of approximately 30 hectares.

All firebreaks must be maintained in trafficable condition and trees on both sides of breaks progressively pruned to a minimum height of 4 metres to allow unrestricted access of maintenance and fire fighting equipment and so as to maintain an effective width of firebreak.

Where power lines pass through plantation areas firebreaks as per SEC specifications must be provided.

Equipment Standards: The Bush Fires Board recommends the following equipment for protection of plantation areas—

Plantation Area (ha)	Light Duty Unit Min 900 ltrs Capacity	Medium Duty Unit Min 1 900 ltrs Capacity	Heavy Duty Unit Min 2 700 ltrs Capacity
Up to 100	2		
101 to 500	1	1

1 001 to 2 000		2	1
2 001 plus		2	1 for every 1 500 ha or part thereof minimum of 2

N.B. One heavy unit is the equivalent of two medium tanker units.

By order of the Council,

D. J. CUNNINGHAM, Shire Clerk.
