Important Information Relating to Your Responsibility as a Landholder in the
Donnybrook/Balingup Shire

With reference to section 33 of the Bush Fires Act 1954, you are required to carry out fire prevention work on land owned or occupied by you in accordance with the provisions of this order.

This work must be carried out by 1 December, 1990 and kept maintained throughout the summer months until 31 March, 1991.

An inspection of firebreaks and hazard removal will be carried out in all areas of the Shire by an Authorised Officer.

Persons who fail to comply with the requirements of this order may be issued with an Infringement Notice (Penalty \$40) or prosecuted with an increased Penalty, and additionally, Council may carry out the required work at cost to the Owner or Occupier.

If it is considered for any reason to be impracticable to clear firebreaks or remove flammable materials as required by this Notice or if natural features render firebreaks unnecessary, you may apply to the Council or its duly Authorised Officer not later than the 15th day of December 1990, for permission to provide firebreaks in alternative positions or to take alternative action to abate Fire Hazards on the land. If permission is not granted by the Council or its duly Authorised Officer, you shall comply with the requirements of this Notice. If the requirements of this Notice are carried out by burning, such burning must be in accordance with the relevant provisions of the Bush Fires Act.

1. Rural Land

- (a) On land which is divided by or abuts a formed or partly formed road or railway reserve, a firebreak not less than 2 metres wide shall be provided within 60 metres of the boundary of the road or railway reserve. Breaks are not permitted on road reserves without Council approval.
- (b) A firebreak 2 metres wide shall be provided immediately surrounding and within 20 metres of the perimeter of all buildings, haystacks and fuel storage areas situated on the land. Haystack means any collection of hay including fodder rolls placed or stacked together.
- (c) A cleared area of at least a 6 metre radius shall be provided around all combustion pumping engines.

2. Eucalyptus and Pine Plantations

- (a) Firebreaks not less than 10 metres in width around the perimeter of land on which trees are planted.
- (b) Not less than 10 metres in width along those portions of plantations which enjoy a common boundary with a road reserve.
- (c) Not less than 6 metres in width in such positions that no part or compartment of a plantation shall exceed 28 ha in area.

(d) Where 10 metre breaks are required in accordance with this section of Council's Fire Break Order, pruning of overhang shall be carried out up to a height of five (5) metres above the firebreak (Ground Level).

(e) In addition to the breaks specified, plantations traversed by SEC Power Transmission lines have additional obligations under the Electricity Act.

3. Townsites Land: (Includes Residential, Commercial and Industrial Land).

All flammable material to be removed from townsite lots unless exemption is applied for specific reason such as grazing. Where an exemption is granted firebreaks to be constructed 2 metres wide immediately inside all external boundaries and 3 metres wide immediately surrounding or within 20 metres of the perimeter of all buildings and haystacks on the land.

4. Fuel and/or Gas Depot

In respect of land owned by you on which is situated any container normally used to contain liquids or gas fuel, including the land on which any ramp or support is constructed, you shall have the land clear of all flammable materials.

- 3.2.4 Where in the Zoning Table a particular use is mentioned it is deemed to be excluded from any other use class which by its more general terms might otherwise include such particular use.

- 3.2.5 If the use of land for a particular purpose is not specifically mentioned in the Zoning Table and cannot reasonably be determined as falling within the interpretation of one of the use categories the Council may—

(a) Determine that the use is not consistent with the objectives and purposes of the particular zone and is therefore not permitted, or

(b) Determine by absolute majority that the proposed use may be consistent with the objectives and purpose of the zone and thereafter follow the advertising procedures of Clause 6.2 in considering an application for planning consent.

4.3 Change of Non-Conforming Use

Notwithstanding anything contained in the Zoning Table the Council may Grant its planning consent to the change of use of any land from a Non-Conforming use to another use if the proposed use is, in the opinion of the Council, less detrimental to the amenity of the locality than the Non-Conforming use and is, in the opinion of the Council, closer to the intended uses of the zone or reserve.

4.4 Discontinuance of Non-Conforming Use

4.4.1 When a Non-Conforming use of any land or building has been discontinued for a period of six months or more such land or building shall not thereafter be used otherwise than in conformity with the provisions of the Scheme.

(3) train controller shall comply with a request made under subrule (2).

(4) A Driver shall not drive a train from a station at which a crossing or passing is to take place under a train order until—

(a) the Driver has ascertained that all of the second train has arrived; or

(b) the Driver has received a further train order from the train controller for that area authorizing that Driver to do so.

(5) train controller who cancels a train order which—

- (a) included a crossing or passing; and
- (b) has not been fulfilled,

and replaces that order with a further train order, shall not authorize a Driver by train order to proceed beyond the crossing or passing station indicated in the cancelled train order until that train controller has issued the second train's Driver with a train order detailing the altered crossing.

(6) person receiving a train order which does not include a crossing shall check with the train controller to confirm that no train is to be crossed.

(7) A train controller, after communicating a train order, shall endorse on the form on which the order was prepared the time and name of the person who requested, received or checked information under subrule (1), (2) or (6).

Driver to report

307. (1) A train controller may include in a train order an instruction for the Driver to whom it is issued to report at places specified in the order that, in the opinion of the train controller, are necessary for train working, and the Driver shall comply with the instruction as soon as is practicable.

(2) When the Driver of a train is of the opinion that the train is losing, or has lost, excessive time in a section, the Driver shall report to the train controller responsible for that section as soon as is practicable.

(3) Where the leading locomotive or railcar is replaced en route, the Driver shall report the replacement to the train controller for the area where the replacement took place as soon as is practicable.

(4) Upon receiving a Driver's report under subrule (3), the train controller shall cancel the train order which is in force at the time and, after communicating the cancellation to the Driver involved, shall issue a replacement train order which includes the number of the replacement locomotive or railcar.

Record of train running

308. (1) When the Driver of a train is in radio contact with a train controller, that Driver shall supply to that train controller the times that the train passes through train order crossing and non-crossing stations as this occurs.

(2) When the Driver of a train is not in radio contact with a train controller, the Driver's assistant shall record the times that the train passes through train order crossing and non-crossing stations and supply these times to a qualified employee at the next attended station, or as otherwise instructed by a train controller the last time contact was made.

Train orders not to apply to movements at certain stations

309. The train controller shall not issue train orders regarding control of train movements at superior train order stations, and at train order crossing stations, when a qualified employee is on duty.

Division 4—Accident, breakdown and communication failure

Partial mechanical failure

310. (1) subject to subrule (3), when a Driver intends to take a locomotive and a portion of a train to a station and leave a portion of that train on the track between stations due to mechanical difficulties, the Driver shall first—

- (a) advise the train controller responsible for the area of the location of the portion to be left, and of the mechanical difficulties; and
- (b) ensure that, if there is a guard on the train that the guard is able to remain with the portion of the train to be left.

(2) Upon arrival at the station, the Driver shall advise the train controller, or signalman if the station is attended—

- (a) that the first portion of the divided train has arrived; or
- (b) that the second, or final portion of the divided train has arrived.

(3) Rule 342 applies when a Driver is unable to contact the train controller for that area to advise of the circumstances in subrule (1) (a).

(4) When a train order provides for a crossing at the station to which the first portion of the divided train is being taken, and the train to be crossed is met at that station on arrival of the first portion, the Driver of the divided train shall halt the locomotive with that portion at the facing points and inform the Driver of the train to be crossed of the mechanical failure and existing circumstances.

(5) Under any other circumstances of partial mechanical failure, the Driver shall advise the train controller for that area of the circumstances surrounding that mechanical failure, and the train controller—

- (a) may issue a new train order to replace the existing train order if the train controller feels it is inadequate under the circumstances; and
- (b) shall ensure that the guard of any divided train is informed of any changes made, either by direct communication or oral delegation of this responsibility to the Driver.

(6) when the rear portion of the divided train has been removed from the section—

- (a) the guard; or
 - (b) in the case of a two-man crew, the Driver,
- shall report the situation to the train controller for that area immediately.

Complete mechanical failure

311. (1) Where, due to accident or mechanical failure, a Driver wishes to request a relief locomotive to remove a train which has broken down—

- (a) the Driver shall contact the train controller for the section and explain the circumstances surrounding that request; and
- (b) rule 341 shall apply.

(2) On being contacted by a Driver with a request for a relief locomotive, a train controller may—

- (a) cancel the train order held by the Driver of the disabled train; and
- (b) issue a further train order—
 - (i) authorizing the Driver of a relief locomotive to proceed into the section to the disabled train and to remove that train; and
 - (ii) clearly detailing the location of the disabled train.

(3) The Driver of a relief locomotive shall arrange removal of a disabled train from the section in accordance with directions given in the train order made under subrule (2) (b) (if any), a copy of which is to be shown to the Driver of the disabled train.

(4) The train controller referred to in subrule (2) shall notify an employee at the attended stations on each side of the breakdown site when the section is clear.

Partial or temporary failure of communications

312. (1) where temporary interruption of communications between the train controller and the stations or trains where train orders are to be received occurs, either a qualified employee on, or the Driver of, the train who is unable to contact the train controller for the area directly shall attempt to contact any other station which may be able to communicate with the train controller.

(2) when contact is made by means of subrule (1), the train controller for the area may issue the required train order to the station through which contact has been made, and the recipient at that station shall repeat that train order to either the qualified employee, or the Driver, in subrule (1) in accordance with the procedure in Division 2.

Total failure of communications

313. (1) when a train order has been fulfilled and in a Driver's opinion none of the means of communication specified in rule 291 is available, the Driver's assistant shall, after consultation with the Driver—

- (a) obtain a book of train order forms (Form 41);
- (b) establish communication with a nearby station by any other means of communication available; and
- (c) where necessary receive any further train order for delivery to the Driver of the train.

(2) The Driver of a train shall ensure that the train does not proceed beyond the station at which a train order is fulfilled, until a further train order has been received authorizing the Driver to do so.

(3) Where the communication of train orders in a train controller's area of train order territory is possible only using a locomotive's on-board communication facilities, and those facilities are inoperative, the Driver of that locomotive shall ensure that the locomotive does not enter that area of train order territory until those communication facilities are operating correctly.

Division 5—Other working under train orders

Working of ballast trains

314. (1) A train controller may issue a train order to the Driver of a ballast train authorizing the movement of that train in the area for which that train controller is responsible and the train controller shall specify in that order the station to which the train is to return in order to clear the line.

(2) When a ballast train is, or has been, working under subrule (1), the train controller shall not issue a further train order for that section until—

(a) advice has been received from the Driver of that train that—

(i) the ballast train has arrived at the nominated station undivided;

(ii) the section is clear; and

- (iii) the train order has been fulfilled;

or

(b) the train controller has cancelled the train order made under subrule (1).

Working of on-track machines

315. (1) Where a train order relating to the movement of one or more on-track machines is to be issued by a train controller, the train controller responsible for the area in which the movement is to take place shall issue any train order to the employee who is qualified to, and will in fact, control the relevant machines.

(2) When an on-track machine is departing from a superior train order station or attended train order crossing station, the officer in charge of the station shall receive the train order from the train controller and hand a completed Form 41 to the employee in charge of the machine.

(3) When an on-track machine is to cross a train at a train order crossing station which is unattended at that time, the train controller shall ensure that, prior to the crossing, the train order shows the train or trains to be crossed and whether the on-track machine is to enter the main line, loop or siding at the crossing station.

(4) The employee in charge of the on-track machine or machines shall, after obtaining a train order in accordance with this rule—

(a) set the machine or machines on the rail and prepare them for on-track travel;

(b) proceed on the only or leading machine to the destination stated in the train order; and

(c) on arrival at the destination stated in the train order, inform the train controller for that area—

(i) of the arrival of the machine or machines; and

(ii) that the machine has, or machines have, been removed from the track or that the machine has, or machines have, cleared the traversed section, whichever is the case. ”.
