Applications

Applications for the award of a permit over the above area are required to be made in the approved manner, submitted in duplicate and should be accompanied by—

(a) Details of—

- (i) the applicant's assessment of the petroleum potential of the area, including a geological and geophysical review and technical assessment of the area, and the concepts underlying the proposed exploration programme;
- (ii) the minimum work programme proposed for each of the six years, specifying the number of wells to be drilled, the line kilometres of seismic survey to be carried out and the estimated expenditure;
- (iii) wells referred to in the work programme should not include development wells (the AAPG well classification scheme will be the basis of identification).

(b) Particulars of—

- (i) the technical qualifications of the applicant and of its employees;
- (ii) the technical advice available to the applicant;
- (iii) the financial resources available to the applicant, including evidence of the applicant's ability to fund the work programme proposed, and a copy of the latest annual report for each applicant company;
- (iv) where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (a copy of a Heads of Agreement dealing will generally suffice);
- (v) the percentage participating interest of each party to the application; and
- (vi) a single address for service of notices in respect of the application.

- (c) A fee of \$3,000 (non-refundable) made payable to the Department of Mines through an Australian bank or by bank cheque.
- (d) Such other information as the applicant wishes to be taken into account in consideration of the application.

Consideration of an application for a permit shall take into account the adequacy of the work programme for each of the six years of the permit term and the applicants technical and financial ability to undertake the work. The prior purchase of any speculative or contractor seismic data relevant to the area applied for will be taken into favourable account when considering the adequacy of the work programme.

The successful applicant will be required to fulfill the minimum commitment for the first two years without variation. This is known as the firm commitment phase, however, the balance of the programme may be re-negotiated based on or taking into consideration the results of prior exploration.

Where applications are made for Area T92-1 in conjunction with Area L92-1 (see notice under the Petroleum Act 1967, in this *Gazette*) by the same parties, consideration will be given to accommodating a single exploration programme over both areas.

This area lies within the important Western Australian rock lobster fishing grounds and guidelines are in place to minimise conflict between the fishing industry and petroleum industry activities. Marine seismic operations can only take place within specified periods. In most of the areas the allowable seismic surveying period is from 1 July to early November. In areas near the Abrolhos Islands the seismic surveying period extends to early March.

Further information concerning these requirements may be obtained from the Director, Petroleum Division, Department of Mines, Mineral House, 100 Plain Street, East Perth WA, 6004.
