## BUSH FIRES ACT 1978

### *Shire of Kojonup*

#### Firebreak Order—(Section 33)

##### Notice to Owners and Occupiers of Land within the Shire of Kojonup

Pursuant to the powers contained in section 33 of the above Act, you are hereby required to have firebreaks clear of all inflammable material, in the position, of the width, and for the period as specified hereunder.

#### 1. Urban Land (Land within a townsite)

During the period from the 15th November to the 31st May inclusive, you shall have firebreaks in the following positions—

1.1 On land which is 4 000 square metres or less in area, you shall remove all inflammable material from the whole of the land.

1.2 On land which exceeds 4 000 square metres (one acre) in area as per item 2.1 hereunder.

1.3 However, owners of property with an area greater than 4 000 square metres that boundaries a developed residentially zoned property, must install a satisfactory 2.4 metre wide boundary firebreak on their land abutting that residential property.

## 2. Rural Land—Homesteads, Buildings, Haystacks, Bulk Fuel, Drums and Liquid Petroleum

2.1 During the period from the 15th December, to the 31st May inclusive you shall have firebreaks at least 20 metres wide, if provided by burning, cultivating or spraying or 60 metres wide, if provided by being closely grazed or mowed to the satisfaction of a Bush Fire Control Officer in such positions as are necessary to completely surround the perimeter of any homestead building (excluding isolated non inflammable buildings) fuel installation (including drums), haystack (but only haystacks within 100 metres of any building) or group of such structures or installations. In each case the outer 2.5 metres of the area must be totally free of any inflammable material and where mowing is the method used all residue of the mowing process must be removed from the area.

### Note:

Boundary firebreaks are not compulsory within the Shire of Kojonup Rural Area. Land holders can provide firebreaks if they wish.

### General Information:

If it is considered impractical for any reason to clear firebreaks on the land as required by this notice you may apply to Council or its duly authorised officer for permission to provide firebreaks in alternative positions or to take alternative action to abate fire hazards on the land. If permission is not granted by Council or its duly authorised officer you shall comply with the requirements of this notice.

Please Note: Following the method adopted by Council to inspect the firebreaks required in this notice, it is not necessary for Council to notify you or give you any prior warning that legal action may proceed for failing to comply with the requirements of this notice.

The penalty for failing to comply with this notice is a fine of not less than \$40 nor more than \$400 and a person in default is also liable, whether prosecuted or not to pay the cost of performing the work directed in this notice if it is not carried out by the required date.

Harvesting: As per the Bush Fires Act it is now compulsory that an engine powered pumping unit and not less than 400 litres of water be in attendance during grain harvesting operations.

Swathers and Balers are subjected to the same conditions as Harvesting, i.e. an engine powered pumping unit and not less than 400 litres of water be in attendance during operations from 1st December.

Oxyacetylene, Arc welders, friction cutting equipment (whilst used in the open) are subject to the same conditions as are swathers and balers, and that in addition, the worksite be adequately cleared of flammable material prior to the use of the abovementioned equipment.

By Order of the Council,

NEIL P. HARTLEY, Shire Clerk.

Please Note: The Bushfire Advisory Committee recommend the prior installation of a preliminary chemical firebreak around your house and sheds and also around the 20 metre boundary mark to burn your break from/to. This practice will help reduce the number of protective burns which escape. The chemical break should be installed in June, or thereabouts, however, annual seasonal conditions should be considered.

Assist fire fighting by prominently displaying owner-property names at main gate please.

#### PETROLEUM ACT 1967

Invitation for Applications for the Grant of Exploration Permits and Drilling Reservations under Section 30 (1) and 43A of the Act

Applications are invited for the grant of exploration permits and drilling reservations within Western Australia's sedimentary basins and will be received up until 4.00 pm on 25 September 1992.

Any areas not taken up from this invitation will be regazetted in early October 1992 with a late December closing date.

Each application for an exploration permit should comprise a single area of contiguous blocks of the applicant's choice. While the Act allows that a maximum of 200 blocks may be applied for in a single application, only applications that propose work programs relative to the whole of the area applied for, shall be considered.

Each application for a drilling reservation shall comprise a block or a contiguous group of blocks containing potential sites of petroleum deposits. A drilling reservation carries a minimum commitment to drill a well within 12 months of being granted.

Not included in this invitation are blocks which, at the time of this notice being published—

- are the subject of exploration permits, production licences or applications therefor;
- are capable of being the subject of an invitation under Section 33 of the Act (surrendered etc licence and location blocks);
- cover offshore islands.

Plans showing the areas available for application are available from the Public Counter located on the first floor of the Department of Minerals and Energy.

Applications for exploration permits are to be made in accordance with Section 31 of the Act, submitted in duplicate and be accompanied by—

- (a) Details of—
  - (i) the blocks comprising the application by reference to the numbers of the blocks as shown on the Department's 1:1 000 000 series map sheets and by a plan delineating those blocks;
  - (ii) the applicant's assessment of the petroleum potential of the area, including a geological and geophysical review and technical assessment of the area, and the concepts underlying the proposed exploration programme;
  - (iii) the minimum work programme proposed for each of the five years, specifying the number of wells to be drilled, the line kilometres of seismic survey to be carried out and the estimated expenditure;
  - (iv) wells referred to in the work programme should not include development wells (the AAPG well classification scheme will be the basis of identification).
- (b) Particulars of—
  - (i) the technical qualifications of the applicant and of its employees;
  - (ii) the technical advice available to the applicant;
  - (iii) the financial resources available to the applicant, including evidence of the applicant's ability to fund the work programme proposed, and a copy of the latest annual report for each applicant company;
  - (iv) where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (a copy of a Heads of Agreement dealing will generally suffice);
  - (v) the percentage participating interest of each party to the application; and
  - (vi) a single address for service of notices in respect of the application.
- (c) A fee of \$3 000, made payable to the Department of Minerals and Energy through an Australian bank or by bank cheque (application fees are not refundable).
- (d) Such other information as the applicant wishes to be taken into account in consideration of the application.

Consideration of an application for a permit shall take into account the adequacy of the work programme for each of the five years of the permit term and the applicant's technical and financial ability to undertake the work. The prior purchase of any speculative or contractor seismic data (such as Western Geophysical's onshore Southern Carnarvon Basin Speculative Seismic Survey) relevant to the area applied for will be taken into favourable account when considering the adequacy of the work programme.

The successful applicant will be required to fulfill the minimum commitment for the first two years without variation. This is known as the firm commitment phase, however, the balance of the programme may be renegotiated based on or taking into consideration the results of prior exploration.

Applications for drilling reservations are to be made in accordance with Section 43B of the Act and shall be submitted in duplicate and be accompanied by—

- (a) Details of—
  - (i) the block(s) comprising the application by reference to the number(s) of the block(s) as shown on the Department's 1:1 000 000 series map sheets and by a plan delineating the block(s);
  - (ii) the applicants proposal for the drilling of a well or wells and other work in respect of the block(s) in the application;
  - (iii) a statement as to size and configuration of the potential petroleum deposit(s) and a geological prognosis of the well(s);

- (iv) a statement as to an approximate time for the completion of the well(s).
- (b) Particulars of—
  - (i) the technical qualifications of the applicant and of its employees;
  - (ii) the technical advice available to the applicant;
  - (iii) the financial resources available to the applicant, including evidence of the applicant's ability to fund the work programme proposed, and a copy of the latest annual report for each applicant company;
  - (iv) where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (a copy of a Heads of Agreement dealing will generally suffice);
  - (v) the percentage participating interest of each party to the application; and
  - (vi) a single address for service of notices in respect of the application.
- (c) A fee of \$3 000, made payable to the Department of Minerals and Energy through an Australian bank or by bank cheque (application fees are not refundable).
- (d) Such other information as the applicant wishes to be taken into account in consideration of the application.

Consideration of an application shall take into account the adequacy of the applicant's assessment of the potential petroleum deposit, the well prognosis and its ability both technically and financially to undertake the work.

In situations where a drilling reservation application may be within an area also the subject of an exploration permit application the award will be on the basis of which application offers the most definitive assessment of a petroleum resource. Should such a decision result in a drilling reservation being awarded, the balance of the area (the blocks not the subject of the drilling reservation) may be offered to the applicant for the exploration permit.

When selecting an area of interest in preparation for an application, consideration should be given to the likelihood of other land uses within that area, particularly land the subject of nature reserves or other areas of conservation value. While the occurrence of such land does not necessarily preclude the grant of a title or petroleum operations being conducted, environmental assessment will be necessary.

Applications made on the approved form are to be addressed to—

## Foreword

This first edition of the Western Australian Government Directory is intended to help provide ready access to the State's Public Sector Agencies.

Government offers an enormous range of services to people in our community which enhances their lives.

Departments and agencies do not operate behind closed doors. These organisations are making every effort to be increasingly responsive to the needs of customers and citizens.

This publication consolidates valuable information about agencies of the Western Australian Government. Simple contact details are accompanied by concise descriptions of the role of agencies and the legislation they administer. Future editions will be improved and expanded taking into account the needs of users.

This directory will have many uses and individuals and organisations should find this volume most helpful.
