TOWN PLANNING AND DEVELOPMENT ACT 1928
APPROVED TOWN PLANNING SCHEME AMENDMENT

City of Mandurah

District Zoning Scheme No. 1A—Amendment No. 180

Ref: 853/6/13/9, Pt. 180.

It is hereby notified for public information, in accordance with section 7 of the Town Planning and Development Act 1928 that the Hon Minister for Planning approved the City of Mandurah Town Planning Scheme Amendment on September 14, 1992, for the purpose of—

1. Rezoning part of portion Murray Location 721 being Certificate of Title Volume 1896 Folio 631 from the "Rural Zone" to "Special Rural Zone".
2. Adding to Appendix 8 of the Scheme Text as follows:

Area 7. "Lake Clifton"—portion of Murray Location 721 Mt John Road (Cnr Old Coast Road) Bouvard, the area adjoins Lake Clifton and the Yalgorup National Park.

It is the intent of Council to enable a rural retreat 10 hectare subdivision to ensure that subdivision and development is in accordance with the "subdivision and development guide plan" endorsed by the City Manager/Town Clerk with no further subdivision being permitted, to ensure environmentally sustainable land use practices within the subdivision. Consequently and notwithstanding the existing zoning of the land, the following controls shall be imposed on all subdivision and development within the area:

- (a) No indigenous vegetation and trees shall be destroyed or cleared except where the developer of the estate/landowner obtains the prior consent in writing of Council, and where such vegetation is dead or diseased, or where the clearing is required for the purpose of a firebreak, dwelling, outbuilding, fence, on-site effluent disposal system, and/or driveways within the defined Building Envelope and for access to the Building Envelope from the road.
- (b) On-site effluent disposal systems servicing development on the lots shall be to the specifications and satisfaction of both the Local Authority and the Health Department of WA and shall:
 - (i) have a 2 metre vertical separation between the base of any leach drain and the highest recorded groundwater level;
 - (ii) have at least a 300 metre horizontal separation between the disposal system and the high water mark of Lake Clifton;
 - (iii) be limited to high environmental performance systems such as ECOMAX, Clearwater 90, Bio Cycle or other similar "approved" system acceptable to the Health Department of WA and shall have a phosphorous retention index (PRI) of greater than 20.
- (c) Stormwater shall be contained on site in accordance with the principles laid down by the Environmental Protection Authority, to the satisfaction of the Local Authority.

- (d) Within this Special Rural Zone land uses other than a single residence, that are permitted or may be permitted by the Council pursuant to the Scheme shall not be permitted unless the Council is satisfied following consultation with the Environmental Protection Authority that the land use does not involve nutrient application or the clearing of the land.

Notwithstanding the above, the following uses are not permitted.

- Boarding houses,
 - Lodging houses, and
 - All other non single residential land uses.
- (e) The keeping of horses, sheep, goats and other grazing animals shall be subject to the prior approval of the Council and the keeping of these animals shall be restricted to the area within the Building Envelope only. Approval will be limited to the keeping of up to two horse equivalents as recommended by the Department of Agriculture.

Where in the opinion of the Council the continued presence of animals on any portion of land in the estate is likely to contribute, or is contributing to unsatisfactory environmental impact, notice may be served on the owner of the said land, requiring the immediate removal of those animals specified in the notice for a period specified in the notice.

- (f) With the intention of preserving and conserving the existing natural vegetation and mature trees and preventing land use practices detrimental to the amenity of the locality, no intensive agricultural or horticultural or market gardening activities will be permitted on the land although Council may permit domestic scale activities within the defined Building Envelope only.
- (g) A minimum 100 m wide foreshore reserve extending eastwards from the high water mark of Lake Clifton is to be provided free of cost by the subdivider and be vested with the National Parks and Nature Conservation Authority (NPNCA) under S20A of the Town Planning and Development Act as a condition of subdivision.
- (h) No clearing or development of any type will be permitted within 300 m of the high water mark of Lake Clifton with the exception of firebreaks as required or specified by the Bush Fires Board of WA and to the satisfaction of CALM.
- (i) A Building Envelope of 4000 m² is to be established on each lot as shown on the subdivision plan which is to be surveyed and fenced with a rural standard fence to the specification and satisfaction of the Council. Fences are to be maintained in a stock-proof condition by the land holder to the satisfaction of Council. Notwithstanding the provisions of the preceding clauses, Council may permit variation of a setback or the location of a building envelope if it is satisfied that such variation is desirable and will not detrimentally affect the objective for the zone or amenity of the area generally. Where Council has agreed to the repositioning of a building envelope, the surrounding fence shall be erected and maintained in that new position.
- (j) No Super Six or similar fencing material is to be used on the land except within the defined Building Envelope.
- (k) Use of fertilisers other than compost generated from organic material on each lot is prohibited.
- (l) No groundwater bores or wells will be permitted. A potable water supply comprising a 92,000 litre tank is to be provided for each lot at the time of developing the land with sheds and/or a dwelling and shall be imposed as a condition of development approval. Emergency water supply tanks expressly for fire-fighting purposes may be equipped with a bore.
- (m) The following fire management controls will be imposed:
- a strategic perimeter firebreak will be installed as a condition of subdivision around the subdivision in a manner acceptable to the Local Bush Fire Authority, CALM and Council.
 - unless otherwise required by Council individual fire breaks around each lot will not be required or encouraged.
 - removal of understorey vegetation from each of the 4000 m² building envelopes as approved by Council.
 - to facilitate fire fighting requirements gated access is to be provided to all lots as required by CALM and Council.
 - building envelopes to be maintained at a fuel reduced level as required by CALM and the Local Bush Fire Authority to ensure buildings are protected during wildfires.
 - outside the Building Envelopes, fire control standards to be required by the City of Mandurah District Fire Protection Plan and the Local Bush Fire Authority fuel reduction orders.
 - fire-breaks surrounding Building Envelopes to be maintained by the landholder.

- a slashed fire-break shall be installed around every third block boundary (in preference to a mineral earth break).
- Council will facilitate discussions between the subdivider and the Local Bush Fire Authority with a view to contributing towards the cost of fire suppression equipment for the Mandurah Volunteer Bush Fire Brigade.
- (n) No extraction or quarrying of any raw material, eg limestone, will be permitted from the land.
- (o) A 1.2 metre high "ring lock" rural fence or other approved fencing meeting the requirements of CALM and Council will be constructed as a condition of subdivision across the full length of the proposed foreshore reserve and serve as a rear boundary fence for those lots fronting the reserve. No gated access from private property to the foreshore reserve will be permitted.
- (p) Except for subclause (o), Council shall not require the construction of lot boundary fences, as this will allow wildlife to free roam over most of the subdivision. No common side boundary fences are permitted.
- (q) Notwithstanding the provisions of clause 2.4 of the Scheme, the following minimum setbacks shall apply:

Front	: 30 metres
Side	: 50 metres
Rear	: to Lake Clifton—300 metres
Rear	: Other—100 metres
