**"hours of darkness"** means the hours between sunset on one day and sunrise the next;

**"on a road"** includes partly on a road;

**"pilot vehicle"** means a rigid vehicle to which is affixed a warning sign displaying the words **"OVERSIZE LOAD AHEAD"** to indicate to vehicles approaching from the front that an oversize combination is following that vehicle;

**"used"**, in relation to a motor vehicle or a combination, includes being driven, or towed, and being left stationary.

(2) Nothing in these regulations prevents the application to a towing vehicle, a pilot vehicle or an escort vehicle, of any other written law.

#### **Lighting equipment generally**

4. (1) If a towed implement is being towed on a road during the hours of darkness there must be fitted to the towed implement, and connected electrically to the towing vehicle, lighting equipment which complies with these regulations.

- (b) where there is no suitable structure not more than 1.5 m above ground level to which those lamps and reflectors can be fitted, may be fitted higher than, but as near as possible to 1.5 m above ground level;

- (c) must be fitted symmetrically, to each side of the rear of the agricultural implement, and —
  - (i) wherever possible, horizontally and inwards in the sequence stop lamp, reflector, rear lamp and signalling lamp; or
  - (ii) where it is not possible to fit those lamps and reflectors in accordance with subparagraph (i), be fitted vertically, in the sequence referred to with the stop lamp on the top and the signalling lamp on the bottom;
- (d) must have the outer edge of their reflective or illuminated area not more than 400 mm from each of the lateral extremities of the agricultural implement; and
- (e) must diffuse or direct their emitted or reflected light so as not to cause glare adversely affecting the vision of a person.

### Stop lamps

6. (1) Subject to subregulation (2), there must be fitted to each towed implement towed on a road 2 stop lamps —

- (a) each of which, when lighted, displays a red light clearly visible in sunlight at all distances up to 60 m to the rear of the towed implement; and
- (b) each of which is lighted when the foot brake of the towing vehicle is applied.

(2) Subregulation (1) does not apply if the combination is fitted with a flashing amber light in accordance with regulation 11 and that light is operating whenever the combination is being moved on a road.

### Reflectors

7. (1) Where an agricultural implement is towed or left stationary on a road during the hours of darkness the driver of the towing vehicle or the person who left the implement stationary must ensure that the towed implement, or in the case of a combination consisting of more than 1 towed implement, the rear implement of that combination, is fitted with 2 reflectors —

- (a) each of which, during the hours of darkness, emits a red reflection of the light projected on to that reflector by a headlamp complying with the requirements of regulation 202 of the *Road Traffic (Vehicle Standards) Regulations 1977* so as to be visible clearly, at a distance of 100 m, to the driver of the vehicle from which that light is projected; and

**Clearance lamps**

10. (1) Where an agricultural implement with a width exceeding 2.5 m is towed on a road during the hours of darkness, a clearance lamp must be fitted to each side of that implement.

(2) In this regulation, “clearance lamp” means a lamp which, when lighted, gives an indication of the width of the towed implement from the front and from the rear of that implement.

**Safety of components and attachments**

**13.** (1) Every component of a towed implement being towed on a road must be maintained in such a condition as to be unlikely to render the use of that towed implement unsafe.

must be prevented from moving in that manner by chains, pins or some other mechanical locking system.

(3) Any component or hopper, bin or other attachment of, or to, a towed implement which is capable of becoming loose or detached from that towed implement must be secured to prevent it from becoming loose or detached.

**Safety chains**

**14.** (1) Each agricultural implement forming part of a combination being towed on a road must be connected to the towing vehicle or, in the case of a combination consisting of more than one towed implement, to the implement in front of it, not only by a coupling but also by —
