Use and Development Classes	Farmlet Zone

Additional Accommodation	AA
Home Occupation	AA

All other uses shall be listed as "X", uses and developments which are not permitted under the Scheme.

3. Introducing a new zone and related provisions into Part 6 Special Provisions of the Scheme Text to read as follows—

6.10 Farmlet Zone

6.10.1 Purpose and Intent of the Zone

The purpose and intent of the Farmlet Zone is to allow for a range of lot sizes between 10 and 40 hectares within Precincts identified in the Shire of Murray Rural Strategy, to satisfy demand for equestrian/hobby farming lots.

Farmlet Zones should be located near residential precincts. Land with potential to be held in smaller lot sizes should only be further subdivided if it can be shown that there will be minimal detriment to environmental and landscape values. Environmental repair to improve scenic and environmental values shall be encouraged through development control measures, such as a net increase in tree cover, adequate setbacks and lot sizes being dictated by landform, soils and vegetation.

6.10.2 Rezoning Procedure

The Council shall not initiate an amendment to include land within a Farmlet Zone unless the land has been identified for inclusion within this zone in the Council's approved Rural Strategy.

Having regard to the purpose and intent of the Farmlet Zone, Council shall require that any rezoning submission include—

- (i) a statement of the purpose or rationale for which the zone is being created;
- (ii) a plan showing contours at such intervals as to adequately reflect the landform of the area and physical features such as existing vegetation, creeklines, significant improvements such as dwellings, farm buildings, bores, dams, drains, etc;
- (iii) details of the development proposal, including lot sizes, proposed servicing, vegetation retention and planting, land capability, etc. The land subject to rezoning should meet selecton criteria outlined in Appendix C of the Rural Strategy and the proposal should specify how environmental concerns will be addressed;
- (iv) amendment documents shall be prepared to show the manner in which the Scheme can be amended by inclusion of the land within the Farmlet Zone on the Scheme Maps and extension of Schedule 8—Farmlet Zones. The Schedule shall only contain special measures considered appropriate for the control of land uses and development not addressed within this section of the Scheme Text.

6.10.3 Subdivision, Development and Land Use

6.10.4 A Subdivision Guide Plan for each area within the Farmlet Zone shall be endorsed by the Shire Clerk and approved by the State Planning Commission.

6.10.5 Permitted land uses are listed in Table No. 1 Zoning Table of this Scheme Text. Not more than one dwelling shall be permitted on any lot.

6.10.6 A description of the land within the Farmlet Zone and special provisions relating to the land are included in Schedule 8—Farmlet Zones. In addition to other Scheme provisions which may be relevant, land included within the Farmlet Zone shall be subject to the following conditions—

- (a) subdivision of the land subject to rezoning shall be in accordance with a Subdivision Guide Plan endorsed by the Shire Clerk. Minor amendments to the Subdivision Guide Plan may be permitted subject to the approval of the State Planning Commission, however, reduction of lot sizes will not generally be permitted;
- (b) the Council may in the interest of landscape preservation require building envelopes to be shown on one or more lots on the Subdivision Guide Plan. A building envelope shall be no larger than 4 000m² and located in a position to be agreed by the Council. Council may permit variation of a setback or the location of a building envelope if it is satisfied that such variation is desirable and will not detrimentally affect the objective for the zone or amenity of the area generally. No building shall be constructed

on a lot other than within the approved building envelope without the written approval of the Council.

No building envelope shall be closer than 20 metres to a primary street boundary or closer than 10 metres to any other lot boundary or SECWA easement;

- (c) no dwelling shall be constructed or approved for construction unless an approved method of effluent disposal and water storage tank (minimum of 92 000 litres) have been incorporated into the approved plans;
 - (d) where the retention of significant trees/vegetation is to be encouraged, Tree Preservation Areas shall be nominated on the Subdivision Guide Plan. Within the Tree Preservation Areas, no trees or substantial vegetation shall be felled or cleared without prior written consent of Council, except that required for the erection of a single house, outbuildings, fuel free zone, effluent disposal system or access drive. This provision shall not preclude the removal of dead or diseased trees, nor the establishment of firebreaks as required by the Council and the Bush Fires Board of Western Australia.
 - (e) if land is deficient in vegetation cover, Tree Planting Areas shall be nominated on the Subdivision Guide Plan. Planting of indigenous trees and vegetation shall be of a species and density approved by Council and tree planting shall be a condition of subdivision to be carried out by the subdivider to the satisfaction of the Council prior to the issues of clearances for the subdivision of the land.
Landowners shall be responsible for the maintenance and replacement of trees/other vegetation to the satisfaction of Council. Council may require that areas subject to tree planting/vegetation be fenced to prevent damage by stock;
 - (f) the Council may require strategic firebreaks to be nominated on the Subdivision Guide Map. The firebreaks shall be provided as a condition of subdivision and constructed and maintained to the satisfaction of the Council;
 - (g) if a Conservation Area has been nominated on the Subdivision Guide Plan, no keeping of stock in this area will be permitted;
 - (h) on site effluent disposal shall be provided in accordance with the Health Department and the Council;
 - (i) storm water drainage shall be designed to the specification and satisfaction of the Council. The developer shall obtain the approval of the Council for drainage proposals prior to commencing site works;
 - (j) the Council may approve the rearing or agistment of horses, sheep, cattle, providing that the keeping of stock shall not exceed the stocking rates recommended by the Department of Agriculture in Appendix B of the Rural Strategy for the applicable pasture types;
 - (k) no building shall be constructed, within the zone, of materials the nature and colour or texture of which, in the opinion of the Council, is undesirable for the locality;
 - (l) except with the approval of Council, no boundary fence within the Farmlet Zone shall be constructed of asbestos, metal sheeting or wooden pickets;
 - (m) the Council may require the developer or owner of land within a Farmlet Zone to advise future landholders of the restrictions in relation to clearing of the land.
4. Amending the legend of the Scheme Maps to insert "Farmlet" under Zones, which is to be coloured as depicted on the Scheme Amendment Map.
5. Rezoning Lots 500, 501, 502 and 503 St Blaise Grove, North Dandalup, from Rural Zone to Farmlet Zone, as depicted on the Scheme Amendment Map.
6. Introducing a new Schedule into the Scheme Text—Schedule No. 8—Farmlet Zones and adding to the Schedule the following description and special provisions—

(A)	(B)
Description of Land	Special Provisions
Lots 500, 501, 502 and 503 St Blaise Grove, North Dandalup Subdivision Guide Plan No. 94/47/1	(a) A minimum lot size of 17.6ha has been nominated on the Subdivision Guide Plan. (b) An area for limited clearing for stock holding or exercising purposes has been nominated on the Subdivision Guide Plan. Within this area, clearing of vegetation shall be permitted, with large trees to be retained. (c) On-site effluent disposal systems shall be to the specifications and satisfaction of both the Council and the Health Department of Western Australia. The use of "non-standard" effluent disposal systems may be required and in any event, the following requirements shall be satisfied— (i) A 2 metre separation between the base of the leach drain and the highest recorded groundwater level or bedrock.
