2. The Council will not recommend lot sizes less than 2ha.

3. (a) The following uses are permitted "P" within the Special Rural Zone as described in Column (a)—

Single House/Dwelling (maximum of one per lot only)

(b) The following uses are not permitted within the Special Rural Zone, as described in Column (a), unless approval is granted by the Council "AA"—

—Agriculture

—Home Occupation

—Industry Rural

—Stables

—Veterinary Hospital

4. The Symbols used in provision 3 above have the same meaning as those set out in Clause 3.4 of the Scheme Text.

5. All development, including the clearing of land, shall be setback as per the Building Setback Line depicted on Subdivision Guide Plan. The existing shed on Lot 2 Fletcher Road is exempt from this requirement.

6. With the intention of preserving the existing natural vegetation and mature trees and preventing land use practices detrimental to the amenity of the locality, the approval of the Council is required for any agricultural pursuit. The Council will have regard to limits on stocking, the limited groundwater resources, tree and vegetation preservation and the effects on the environment of the locality and residents of the estate when considering the application and may, should approval be granted, impose any conditions as practical and may modify or vary such conditions to take account of seasonal changes.

7. The method of on-site effluent disposal servicing the development shall be determined by the Local Authority, and be to its specifications and satisfaction. In the event that a nutrient fixing effluent disposal system is not required, the septic leach drain system shall have—

(a) at least a 100 metre horizontal separation between the disposal system and the existing drains, water courses and water bodies; and

(b) has a vertical separation of 2 or more metres between the base of the effluent disposal system and the highest recorded groundwater level; and

(c) been approved in writing by Council.

8. Stormwater drainage shall be contained on-site to the satisfaction of the Water Corporation and Council. The developer of the estate shall obtain the approval of the Water Corporation and the Council for drainage proposals prior to commencement of site works.

9. No indigenous vegetation and trees shall be destroyed or cleared except with the prior consent in writing of the Council where such vegetation and trees are dead, diseased or where the clearing is required for the purpose of a firebreak, dwelling, outbuilding, fence and/or house driveways.

10. The developer of the estate shall, within the Tree Planting Area depicted on the Subdivision Guide Plan, plant indigenous and native trees and shrubs of a species and at a density and distribution to be determined by the Council. Tree planting shall occur and be undertaken to the satisfaction of the Council prior to the endorsement by the Western Australian Planning Commission of Diagrams of Survey to create the lots depicted on the Subdivision Guide Plan.

11. The developer of the estate shall maintain the trees and shrubs planted within the Strategic Revegetation Area and vegetation to be retained on each lot to the satisfaction of the Council until the land as a whole or in lots is sold. Thereafter the new landowner(s) shall be responsible for the maintenance and the replacement (if and where necessary) of those trees and shrubs planted by the developer and vegetation retained on each lot to the satisfaction of Council.

12. The developer shall notify in writing any prospective purchasers of the requirement for the continued maintenance of Strategic Revegetation Areas within the estate.

13. The keeping of horses, sheep and goats and other grazing animals shall be subject to the prior approval of the Council. Approval to keep animals shall not exceed the stocking rates recommended by Agriculture Western Australia for the applicable pasture types.

Council may approve the grazing of animals provided that Council is satisfied that nutrient input to the land can be controlled and that such will not result in the removal or damage of the vegetation and trees or result in soil erosion and dust pollution. As a condition of approval Council may require the animals to be stabled or corralled.

Where in the opinion of the Council the continued presence of animals or any portion of land in the estate is likely to contribute, or is contributing to dust pollution, soil erosion or vegetation degradation, notice may be served on the owner of the said land, requiring the immediate removal of those animals specified in the notice for a period specified in the notice.

14. At the time of building application for each lot a plan of the site shall be submitted by the applicant to the satisfaction and specifications of the Council which shall show site contours, existing trees and stands of vegetation, those trees and vegetation to be removed and retained and proposal for tree planting and maintenance.

15. All bores for the purposes of groundwater extraction shall require the prior approval of the Water Corporation of Western Australia.

16. Firebreaks shall be constructed and maintained to the satisfaction of the Bush Fires Board of Western Australia and the Council.

17. The subdivider shall make arrangements satisfactory to Council to ensure that prospective purchasers of lots created will be advised of those provisions of the Local Government Town Planning Scheme which relate to the use and management of the land and the provisions of the Environmental Protection (Swan Coastal Plain Lakes) Policy 1992.
