TOWN PLANNING AND DEVELOPMENT ACT 1928

ADVERTISEMENT OF APPROVED TOWN PLANNING SCHEME AMENDMENT

SHIRE OF HARVEY

TOWN PLANNING SCHEME NO 1—AMENDMENT NO 24

Ref: 853/6/12/18 Pt 24

It is hereby notified for public information, in accordance with Section 7 of the Town Planning and Development Act, 1928 (as amended) that the Hon Minister for Planning approved the Shire of Harvey Town Planning Scheme Amendment on 29 October, 1999 for the purpose of—

- (i) Rezoning Wellington Locations 5061, Part 2166, Part 2167 and Portion of Reserve 20331 Forestry Road and Myalup Road from the General Farming zone to the Special Rural Zone.
- (ii) Amending the face of the Scheme Maps accordingly; and
- (iii) Incorporating the following provisions in Schedule 4—Additional Requirements—Special Rural Zone, in the following manner—

4.8 AREA 8—FORESTRY ROAD AND MYALUP ROAD

The area shown on the Scheme Map located between Forestry Road and Myalup Road and incorporating Wellington Locations 5061, Part 2166, Part 2167, 1026, 1104, 1131 and Portion of Reserve 20331.

- 4.8.1 Subdivision shall generally be in accordance with the Subdivision Guide Plan (Plan No. 97-21) endorsed by the Chief Executive Officer.
- 4.8.2 The Council will recommend to the Western Australian Planning Commission that a minimum lot size of 2ha should apply. The Council may recommend minor variations to the Subdivision Guide Plan.
- 4.8.3 At the subdivision stage, Council may request the Commission impose a condition requiring preparation of a drainage plan for the area. Such a plan will require the approval of both Council and the Waters and Rivers Commission. Any changes to the existing drainage system shall be designed above the "Annual Average maximum Groundwater Level" and shall provide for—
 - protection of existing agricultural drains;
 - protection of existing wetlands both on site and on adjoining
 - properties; and
 - suitable separation from groundwater levels during winter.

Should the drainage system be modified to the detriment of adjacent or surrounding property, Council may request the landowner reinstate the drainage system at his/her own expense to Council's specification and satisfaction. Alternatively, Council may undertake the remedial work itself and recover the cost from the landowner.

- 4.8.4 Boundary fencing shall be of a rural character such as post and strand. Solid fencing, pickets or metal sheeting shall only be permitted in proximity to buildings where Council determines that it will not adversely impact on the rural character of the area.
- 4.8.5 The keeping of livestock shall be restricted to fenced pastured areas of the lot. Animal numbers shall not exceed the stocking rates recommended by Agriculture WA. Horses shall not be permitted on Lots 1, 2, 3, 4, 5, 15, 20 and 21 as shown on the Subdivision Guide Plan.
- 4.8.6 With the intention of preventing land degradation, Council may, with the advice of Agriculture WA, require removal of, or reduction in the number of stock on any lot within the zone.
- 4.8.7 Utilisation of groundwater is restricted to 1500m³/lot/year for domestic purposes and irrigation of up to 0.2 hectares of land, which includes domestic gardens.
Irrigated areas/domestic gardens shall be setback 50 metres from wetland areas.
- 4.8.8 Buildings and structures shall be set back eighty metres from Forestry and Myalup Road and a minimum of fifteen metres from all other boundaries.
Buildings, structures (other than fences) and effluent disposal systems shall not be permitted within Development Exclusion Areas as shown on the Subdivision Guide Plan.
- 4.8.9 Residential occupation of any lot will not be permitted until a potable water supply is available to the lot. Each dwelling shall be provided with a supply of potable water from a rainwater storage system with a minimum capacity of 90 000 litres to the satisfaction of Council.
- 4.8.10 Provision of on-site effluent disposal shall be the responsibility of the individual landowner.
The disposal of liquid and/or solid wastes shall be carried out with an effluent disposal system approved by Council and the Health Department of Western Australia. Given the soil types and groundwater levels in winter, Council shall require the use of amended soil type effluent disposal systems such as Ecomax/ATU systems.
All effluent disposal systems shall be set back a minimum of 30m from agricultural drains and 50m from wetlands shown on the Subdivision Guide Plan.
- 4.8.11 No clearing of vegetation shall occur except for—
- clearing to comply with the requirements of the Bush Fires Act 1954 (as amended);
 - clearing may reasonably be required to construct an approved building and curtilage;
 - trees that are dead, diseased or dangerous;
 - clearing to gain vehicular access to an approved dwelling or any other clearing which may be approved by the Council;
 - clearing required to establish a low fuel buffer.
- 4.8.12 At the time of subdivision, Council may request the Commission impose a condition requiring replanting of areas shown as "Proposed Replanting" on the Subdivision Guide Plan.
- 4.8.13 Additional replanting may be required to Council's specification and satisfaction at the building approval stage.
- 4.8.14 Council may request the Commission impose a condition at the time of subdivision for the preparation of a Fire Management Plan to the satisfaction of Council in consultation with CALM and the Bush Fire Service.
- 4.8.15 As part of the Fire Management Plan, Council may request the Commission impose a condition at the time of subdivision for the construction of strategic fire breaks as shown on the Subdivision Guide Plan.
Where a lot is traversed by a strategic firebreak as shown on the Subdivision Guide Plan, the owner of the lot shall maintain such firebreak to the satisfaction of Council. Fencing and/or gates across the strategic firebreak shall only be permitted at the discretion of and to the satisfaction of Council and the Bush Fires Board.
- 4.8.16 Low fuel buffers of non-flammable groundcover, at least 20m wide shall be established and maintained around all buildings.
- 4.8.17 The subdivider shall make arrangements to the satisfaction of Council to ensure prospective purchasers are aware of—
- the fire management guidelines of the Homeowners Bushfire Survival Manual and the Australian Standard 3959 "Construction of Buildings in Bushfire Prone Areas".
 - the flammable nature of the nearby pine forest, the need to carry out prescribed burning and potential for associated smoke to annoy residents; the noise and dust associated with activities such as pruning, thinning, spraying, harvesting, ripping, mounding and movement of log trucks; the visual impact associated with harvesting of the pines and possible change in species of trees to be replanted.
- 4.8.18 Council may request the Commission impose a condition at the subdivision stage requiring that water for fire fighting purposes be available. This may take the form of a minimum 50,000 litre storage tank (including a continuous fill mechanism capable of providing 450 litres per minute at the outlet or standpipe).

4.8.19 All buildings shall be set back a minimum of 150m from the pine plantation located to the west of the subject land. Subject to the provision of a 20m low fuel buffer area around a residence and an effective sprinkler system to dampen buildings and their surrounds, the setback from the pine plantation may be reduced to a minimum of 100m. The sprinkler system to serve each residence is to have a fireproof main and to be operated from an independent pump system.

4.8.20 The owner or subdivider of the land shall inform prospective purchasers of land in this area of those provisions relating to the land and such other provisions of the Scheme that may affect it.

J. OFFER, President.
K. J. LEECE, Chief Executive Officer.
