### **Division 2 — Noise within the speedway (before 2002-2003 season)**

#### **9. Application of Division**

This Division applies until 15 October 2002.

#### **10. Measuring of most racing vehicles**

The level of noise emitted by a racing vehicle that is to race at the speedway is to be measured in accordance with Division 3 and records are to be created, kept and maintained in accordance with Division 5, as far as is practicable in the circumstances.

#### **11. Information regarding testing requirements**

All owners of vehicles that are raced at the speedway in the 2000-2001 season and the 2001-2002 season are to be advised of the testing requirements that are to be required on and from 15 October 2002.

#### **12. Management plan to be developed**

- (1) A management plan for the implementation of the full testing regime that is to be in force on and after 15 October 2002 is to be developed before 30 June 2001, and a copy of the plan is to be given to both the Director and to the Shire of Augusta-Margaret River on or before 30 June 2001.
- (2) The management plan in subitem (1) must include the results of any noise emission testing carried out during the 2000-2001 season.

#### **13. Obviously noisy racing vehicles may be prevented from racing**

Despite the more stringent requirements of Division 3 not having effect until 15 October 2002, if a racing vehicle at the speedway emits a level of noise that is conspicuously louder than that of the other racing vehicles in the same class at the meeting, the operator may require that vehicle to immediately cease racing, and may prevent that vehicle from further racing at the speedway until that vehicle's noise level has been shown to comply with item 18 or 19 in Division 3, as the case requires.

### **Division 3 — Noise within the speedway (on and after 2002-2003 season)**

#### **14. Measuring individual racing vehicles**

- (1) The level of noise emitted by a racing vehicle (“**the tested vehicle**”) is to be measured while the tested vehicle completes 3 consecutive laps of the speedway within a period that is not greater than 4 times the average race-winning lap time for finals (i.e. other than for heats) recorded at the speedway over the previous season, for the class of racing vehicle to which the tested vehicle belongs.
- (2) The measurements are to be made at a point that is —
  - (a) inside the inner boundary of the speedway track;
  - (b) within 30 metres (plus or minus one metre) of the inner boundary of the speedway track; and

- (c) on, or as close as practicable to, the shorter axis of the speedway track,

and with the measuring microphone not less than 1.2 metres or more than 1.4 metres above the ground plane.

**15. Measurements taken at another speedway**

- (1) The noise emission measurements described in item 14 may be taken at another speedway, by a person approved by the Director, in order to establish noise emissions from a racing vehicle that is to race at the Margaret River Speedway.
- (2) Where the approved person is satisfied that the levels of noise emissions from a racing vehicle (as tested at another speedway) do not exceed those set out in item 18 or 19 (as the case may be), the person may give a signed certificate setting out the details required under item 22 to the owner of the racing vehicle, indicating compliance with the appropriate item.
- (3) The operator is taken to comply with this order if it relies upon a recent certificate relating to a racing vehicle, instead of further testing the racing vehicle under this order.

**16. Calculation of average noise level**

- (1) The level of noise emitted by a racing vehicle is taken to be the level obtained by —
  - (a) adding together the maximum level of noise measured for the vehicle on each of the laps referred to in item 14(1); and
  - (b) dividing the total resulting from that addition by 3.
- (2) If a racing vehicle is tested at another speedway, to establish the noise level of that racing vehicle for the purposes of this order, the lap time specified in item 14(1) is to be determined —
  - (a) from the average race lap time for that class of racing vehicle at the speedway where the test is carried out; or
  - (b) by calculating the lap time for the test, by adjusting the relevant lap time at the Margaret River Speedway in proportion to the difference in length of the 2 tracks.

**17. When racing vehicles are to be tested**

- (1) The noise level for a racing vehicle is to be obtained at or before the first meeting of the season at which that racing vehicle is entered to race.
- (2) A racing vehicle tested at another speedway, that has gained a certificate, need not be subject to a further initial test in order to comply with this order.
- (3) Despite assessing the noise level for a racing vehicle at the start of the season or having a certificate, if the engine or exhaust system of that vehicle is modified or replaced during the season, the level of noise emitted by that racing vehicle must be reassessed before it races again.

**18. Noise emissions – sprint cars, super sedans or late model sedans**

- (1) The level of noise emitted by a sprint car, super sedan or late model sedan that is to be raced at a meeting must not exceed 95 dB  $L_{A\ slow}$

when measured in accordance with item 14 and calculated in accordance with item 16.

- (2) A sprint car, super sedan or late model sedan may exceed 95 dB  $L_{A\ slow}$  when being tested to determine its noise emission level for the purposes of this order.

**19. Noise emissions – other racing vehicles**

- (1) The level of noise emitted by a racing vehicle, other than a sprint car, super sedan or late model sedan, that is to be raced at a meeting must not exceed 90 dB  $L_{A\ slow}$  when measured in accordance with item 14 and calculated in accordance with item 16.
- (2) A racing vehicle may exceed 90 dB  $L_{A\ slow}$  when being tested to determine its noise emission level for the purposes of this order.

**20. Obviously noisy racing vehicles may be prevented from racing**

If a racing vehicle at the speedway emits a level of noise that is conspicuously louder than that of the other racing vehicles in the same class at the meeting, the operator may require that vehicle to immediately cease racing, and may prevent that vehicle from further racing at the speedway until that vehicle's noise level has been shown to comply with item 18 or 19, as the case requires.

**Division 4 — Noise levels in residential areas**

**21. Measurement of noise levels in residential areas**

- (1) The level of noise emitted from 2 meetings held each season [at least one of which must be a meeting described in item 6(1)] is to be measured at, or adjacent to, 2 separate residential premises in the vicinity of the speedway.
- (2) The dates of the meetings and the appropriateness of the measurement sites must first be approved by both the Director and the Shire of Augusta-Margaret River.
- (3) A person who carries out these residential noise measurements must be approved by the Director and the Shire of Augusta-Margaret River.

**Division 5 — Records and reports**

**22. Record of tests**

The operator is to record all results from tests carried out to show compliance with item 10 of Division 2 or item 18 or item 19 of Division 3 and retain those results in a form that shows (for each test) —

- (a) details of the racing vehicle tested;
- (b) the racing vehicle's owner;
- (c) the date and location of the test;
- (d) the calculated lap time;
- (e) the actual time for the 3 laps of the test;
- (f) the point of measurement;
- (g) the measured noise levels; and
- (h) the signature of the approved person.

**23. Record of loud racing vehicles**

The operator is to make a record of all racing vehicles that have been required to cease racing due to the operation of item 13 (Division 2) or item 20 (Division 3) and retain that record in a form that shows —

- (a) details of the racing vehicle required to cease racing;
- (b) the racing vehicle's owner;
- (c) the date and time at which the request to cease racing occurred;
- (d) the action take by the driver of the racing vehicle following the request; and
- (e) the action taken by the owner of the racing vehicle to remedy the excessive noise emissions.

**24. Records to be forwarded within 21 days of request**

If requested to do so in writing by the Director, or by the Shire of Augusta-Margaret River, the operator is to forward a copy of all, or any of the records made under items 22 or 23 (as the case requires) to the person or body making the request, within 21 days of the request.

**25. Reports**

- (1) The operator is to prepare a written report in a form and of a standard approved by the Director each time that measurements are made and recorded, under item 21, of the level of noise emitted from a meeting.
- (2) The operator is to ensure that a copy of each report is given, within 30 days after the measurements referred to in the report are made, to the Director and to the Shire of Augusta-Margaret River.

**Division 6 — General****26. Instruments and inspectors**

- (1) An instrument used to measure levels of noise emissions for the purposes of this order must be calibrated in accordance with, and otherwise comply with, Schedule 4 to the *Environmental Protection (Noise) Regulations 1997*.
- (2) A person who operates the instrument must be approved by both the Director and the Shire of Augusta-Margaret River.
- (3) The Director may approve of a person or persons to measure levels of noise emissions from racing vehicles while at another speedway for the purposes of this order.

**27. Assistance to be given to inspectors**

- (1) An inspector performing functions in relation to this order is to be given any assistance the officer reasonably requires.
- (2) Access to all areas of the speedway (including the racetrack and the parking facilities) is to be provided for inspectors from the Department of Environmental Protection and the Shire of Augusta-Margaret River (and their assistants) who are engaged in activities related to this order during any meeting.

- (3) Access to a particular area at a particular time during a meeting may be refused for safety reasons, if the safety concerns are reasonable in the circumstances.

The Western Australian Parliamentary History Project conducted under the aegis of the Parliamentary History Advisory Committee was established in 1984 to co-ordinate the collection and dissemination of information about the history and functioning of the Parliament of Western Australia. Its initial objective was to produce a series of publications in time for the centenary of the proclamation of Western Australia as a self-governing colony and the establishment of its bicameral legislature.

This publication is part of the second objective set by the Committee to produce a new series of publications which further research the history of the Parliament of Western Australia.
