2. Where the land exceeds 4,000 sqm, clear the land of all flammable material, and install firebreaks at least 2 metres wide, immediately inside all external boundaries of the land, and also immediately surrounding all buildings situated on the land.

#### SPECIAL NOTICE

If it is considered impractical for any reason, to clear firebreaks or reduce fire hazards from the land as required by this notice, you should make written application to the Shire Fire Control Officer no later than 15th November 2001, for permission to provide firebreaks in alternative positions or to take alternative action to abate fire hazards on your land. This application must be countersigned by the Fire Control Officer for your area, to signify his agreement to the variation.

If permission is not granted, you must comply with the requirements of this notice.

#### RURAL LAND

*Compliance Date—6th December 2001 to 12th April 2002*

A firebreak not less than 2 metres wide must be constructed inside and within 100 metres of the boundary of each property where the boundary is adjacent to a road reserve (Firebreaks constructed on road verges do not constitute legal firebreaks under the Bush Fires Act). In addition—

1. A firebreak not less than 2 metres wide must be constructed within a perimeter of 20 metres of all homesteads, buildings, haystacks and fuel storage areas on the land.
2. Where uncleared land abuts a boundary, a firebreak not less than 3 metres wide must be constructed inside and within 100 metres of all such boundaries.

\*Note—All firebreaks must have a 4 metre vertical clearance.

#### Fuel and/or Gas Storage

In respect of land owned or occupied by you where there are containers normally used to contain liquid or gas fuels, including the land upon which a structure is used to hold or support such containers, you must maintain a perimeter firebreak cleared of all flammable material, at least 2 metres wide.

**Eucalypt/Pine Plantations**

*Compliance Date—22nd December 2001 to 12th April 2002*

All plantations exceeding 3 hectares—

“Existing” plantations (pre-1997) require a 10 metre firebreak. The outer 5 metres must be cleared of all flammable material (to bare earth). The remaining 5 metres must be maintained in a low fuel condition.

New plantations (post 1997) require a 15 metre firebreak. The outer 10 metres must be cleared of all flammable material (to bare earth) with no overhanging branches for a vertical clearance of at least 10 metres. The remaining 5 metres must be maintained in a low fuel condition.

Eg very short grass may be considered “low fuel”.

Trees may not be planted closer than 15 metres from the outer edge of the firebreak.

**Vineyards/Proteas**

Firebreaks must be at least 5 metres in width, cleared of all flammable material (to bare earth) around the perimeter of the block.

**SPECIAL RURAL LAND**

*Compliance Date—6th December 2001 to 12th April 2002*

Pastureland Blocks

1. The owners of all existing rural holdings zoned “Special Rural” in Town Planning Schemes must construct a firebreak (to bare earth) not less than 2 metres wide and with a vertical clearance of 3 metres, immediately inside all boundaries. (Firebreaks constructed on road verge do not constitute legal firebreaks under the Bushfires Act).
2. The land shall be grazed, slashed, or the fire hazard reduced by some other means, to the satisfaction of a duly appointed officer.
3. An area of 30 metres around the house and out-buildings must be cleared of hazardous material to create a fuel-free zone, defined as an area devoid of leaves, weeds, rubbish and dead timber. Trees are acceptable provided they are not heavily barked and do not overhang the buildings.

Bushland Blocks

Same firebreak requirements for Pastureland Blocks, with a vertical clearance of 4 metres. (Where trees occur close to boundaries, special permission may be granted by a duly appointed officer, to construct firebreaks up to 6 metres inside such boundaries). Firebreaks constructed on road reserves do not constitute legal firebreaks under the Bush Fires Act. Residents of “bush” blocks should be aware of the particular problems related to their home environment. The annual build-up of leaf litter, branches, etc, rapidly leads to unacceptably dangerous fuel levels and periodic, low-intensity burns should be undertaken. Efficient “mosaic” burning should result in the owner not having to burn for periods of between 4-7 years, depending on the density of fuel levels and the rate of build-up. Your Fire Control Officer can advise you, and your local Bushfire Brigade, or WA Volunteer Urban Fire and Rescue Service can assist you with your programme.

Note: “Bushland” is defined as pre-existing, native or “remnant” vegetation, and includes trees and understorey.

**BUSHFIRE PRECAUTIONS**

Prohibited Burning Times

*The prohibited burning times which apply within the Shire, are: 22nd December 2001 to 28th February 2002.*

Restricted Burning Times

*The restricted burning times are: 9th November 2001 to 21st December 2001, and 1st March 2002 to 12th April 2002.*

These dates may be subject to slight variation according to seasonal conditions, but any alterations will be advertised locally.

IAN BODILL, Chief Executive Officer.

You are also required to install interim firebreaks, 5.0 metres in width, at a minimum of 100 metre intervals within the property.
