All other uses are prohibited.

In exercising its discretion in respect to AA uses, the Council having regard to the Planning Guidelines for Nutrient Management shall only permit such uses when it is satisfied following consultation with government agencies that the land use does not involve excessive nutrient application or clearing of land.

- 2 No dwelling shall be approved by the Council unless it is connected to an alternative domestic waste water treatment system as approved by the Health Department of WA with an adequate phosphorus retention capacity, as determined by the Department of Environmental Protection, and with the base of the system or the modified irrigation area being the required distance above the highest known water table.
- 3 No indigenous vegetation shall be cleared, except where such vegetation is dead or diseased, or where the clearing is required for the purpose of firebreak, dwelling, outbuilding, fence, drainage system, driveway, or to accommodate discretionary (AA) uses listed in Special Provision 1; prior to any such clearing, the developer of the estate/landowner shall seek and obtain the written consent of the Council.
- 4 The subdivider shall, in accordance with the endorsed Subdivision Guide Plan and the Schedule of Landscaping for this estate plant indigenous trees and shrubs of a species and at a density and distribution to the satisfaction of the Council prior to the transfer of a lot(s) to a new owner.
- 5 The subdivider shall either maintain the trees and shrubs planted until the land is sold, or shall plant sufficient numbers of trees and shrubs to allow for natural loss. Thereafter, the owners of the subdivided lots shall be responsible for the maintenance and replacement (if and where necessary) of those trees and shrubs planted by the subdivider to the satisfaction of the Council.
- 6 The subdivider shall prepare and implement a Fire Management Plan, including the construction of the strategic firebreaks depicted on the Subdivision Guide Plan, water supplies and equipment and any other fire management requirements deemed necessary, to the specification and satisfaction of the local authority and the Bush Fires Board of Western Australia.

In addition to this, the site plan and proposal shall demonstrate that the development and use of the land will not compromise the implementation of the overlay subdivision, as depicted on the endorsed Subdivision Guide Plan.
- 9 The land is situated within the catchment of the Peel-Harvey estuarine system where active nutrient management and responsible use of fertiliser is crucial to the health of the catchment and estuary. The application, type and distribution of fertiliser to the land shall be within limits set by the Department of Environmental Protection for irrigated and non-irrigated land.
- 10 The Council shall not support any application for subdivision of the land into Rural Living A lot sizes unless the subdivision is consistent with a Subdivision Guide Plan endorsed by Council and the Commission for whole or part of the area.
- 11 A Subdivision Guide Plan for the subdivision of land into Rural Living A lot sizes, shall have regard to the objectives set out in this Scheme for the zone or zones affected by it, and the requirements of Clause 5.9.3.

- 13 Approval to keep animals shall not exceed the stocking rates recommended by Agriculture Western Australia for the applicable pasture types. Any approval to keep any grazing animal will require fencing of all remnant vegetation and planted vegetation by the landowners to the satisfaction of Council.

- 14 Multiple Use Paths shall be constructed to Council's satisfaction by the subdivider, in the locations shown on the Subdivision Guide Plan.
- 15 No direct discharge of stormwater into watercourses or drains is permitted.
