- 10. Adding to the Scheme Map Legend after “Rural Residential Zone”: “Special Control Areas”.
- 11. Adding to Part II—Control of Development and Use of Land after Clause 2.6 the following—

2.7 Special Control Areas

2.7.1 The following Special Control Areas are shown on the Scheme Map

- (i) Oakajee Industrial Investigation Zone and Buffer.

2.7.2 The provisions of the Special Control Area apply in addition to the provisions of the zone and any general provisions of the Scheme.

2.7.3 Oakajee Industrial Investigation Zone and Buffer.

The Special Control Area shown on the Scheme Map (generally bounded by Buller River to the south, the ocean foreshore to the west, Coronation Beach Road to the north and an alignment east of the North West Coastal Highway) comprises the Oakajee Industrial Investigation Zone and Buffer.

2.7.3.1 Oakajee Industrial Investigation Zone

The Oakajee Industrial Investigation Zone, located within the Special Control Area, is an area under review by the Government with respect to its potential as a location for heavy industry. The zone allows for the location of industrial development but without any implied Government commitment to provide the necessary transport infrastructure to the site. The zone includes a potential strategic industrial core area, ancillary general industrial area and a potential regional port facility.

2.7.3.2 Oakajee Industrial Investigation Zone

The potential for industrial development within the strategic industrial core in the Industrial Investigation Zone generates the need for a buffer to prevent land use conflicts. The Special Control Area boundary is defined by the outer boundary of the buffer, which is reserved exclusively to accommodate impacts from industry located in the strategic industrial core. Industry-Noxious and Industry-Hazardous located outside of the Special Control Area shall not compromise development of the strategic industrial core afforded by the Oakajee Industrial Buffer.

2.7.3.3 The following provisions apply to this Special Control Area.—

- (a) Prior to any development proposal being considered by Council, the Estate Manager, as nominated by the Government of Western Australia must first consider the proposal. The State Government shall establish an advisory group comprising representatives of relevant agencies, local government, industry and the community. The role of the advisory group shall be to make recommendations to the Estate Manager.
- (b) All development proposed must be in accordance with an approved structure plan or plans.
- (c) Notwithstanding any other provision contained within this Scheme no residential use, temporary or permanent, including a Dwelling House (Single), shall be permitted on land within the Special Control Area. Specific exception may be made to accommodate temporary camp accommodation for workers prior to the establishment of the first industry within the Strategic Industry zone.
- (d) All applications for development of land within the strategic industrial core (Area C) shall be referred to the Environmental Protection Authority.
- (e) Prior to any clearing of remnant vegetation, searches shall be undertaken to identify significant flora on the site. Flora management strategies will be prepared for areas of significant flora.
- (f) The Estate Manager will be required to establish a noise monitoring program before the establishment of the first industrial activity to monitor the cumulative impact of noise generated by industries in the estate, in consultation with the Department of Environment, to determine whether Environmental Protection Authority Regulations are being met within the special control area boundary.

- (g) The Estate Manager will be required to establish an air quality monitoring program before the establishment of the first industrial activity to monitor cumulative impact of gaseous emissions, odours and/or greenhouse gases to the satisfaction of the Department of Environment.
 - (h) The Estate Manager will be required to establish a program before the establishment of the first industrial activity for collection of baseline data and undertake air quality monitoring for dust and particle emissions to the satisfaction of the Department of Environment.
 - (i) The Estate Manager will be required to establish a program before the establishment of the first hazardous industrial activity for ongoing assessment of cumulative risk and to undertake cumulative risk appraisal prior to any new hazardous industry development, to the satisfaction of the Department of Environment.
 - (j) The Estate Manager will be required to establish a monitoring program before the establishment of the first industrial activity for groundwater and marine water to collect baseline data and to ensure water quality is maintained or improved to the satisfaction of the Department of Environment.
 - (k) The Estate Manager will be required to establish a monitoring program before the establishment of the first industrial activity for rainwater to collect baseline data and to ensure that rainwater quality is maintained or improved to the satisfaction of the Department of Environment.
 - (l) Notwithstanding the provisions contained within Part IV of this Scheme, should the cumulative environmental impacts of incremental industrial development exceed the Environmental Protection Authority criteria, the Estate Manager is required to make suitable arrangements for occupants of residences within the Oakajee Industrial Investigation Zone buffer to vacate that residence.
 - (m) Individual industries will be required to provide drainage plans to the satisfaction of Council prior to undertaking any construction.
 - (n) The Estate Manager will be required to prepare an overall Oakajee Landscape Master Plan with performance timetables to ensure nominated actions are completed within time. This Master Plan is to be prepared prior to commencement of construction of the first industry.
 - (o) Individual industries will comply with Landscape Master Plan requirements and submit individual landscape plans and implementation timetables with their development applications. Landscape plans shall be designed and implemented to the satisfaction of the Council.
 - (p) Provisions shall be made for the protection and management of two European heritage sites illustrated on the Structure Plan. All development applications shall also be required to address aboriginal heritage issues in accordance with Aboriginal Heritage Management Plan/s approved by the state government agency responsible for the protection of aboriginal heritage.
12. Deleting from Clause 2.2 Zoning and Development Table—Special Zones, entry 1 relating to Part of Victoria Locations 2, 3, 1039 and 2511 and amending the Scheme Maps accordingly.
