ENVIRONMENTAL PROTECTION ACT 1986 THE WESTERN AUSTRALIAN WASTE MANAGEMENT AND RECYCLING FUND—CHANGES TO FUND PROGRAMS

The Environmental Protection (Landfill) Levy Act assented to on 30 April 1998 enables the Government to raise a levy on waste to landfill generated or disposed in the Metropolitan Area. The money raised by the levy is held in the Waste Management and Recycling Trust Fund. The use of this fund, which must be directed towards achieving the State's waste management objectives, is governed by provisions in the *Environmental Protection Act 1986*. These provisions require the publication in the *Government Gazette* of the objectives and principles of the Fund at the commencement of operation of the Fund and on other occasions from time to time. The Fund will assist local government, industry and the community to reduce waste in our community and reduce the impact of waste on the environment.

There is a statutory requirement to review the Fund, which has been undertaken by the Waste Management Board, and there has been an extensive consultation process. The review recommended a number of changes to the Fund. The purpose of this notice is to advise of these changes to Fund programs.

Principles of the Fund

The foundation of a strategic approach to waste management is based upon the following principles—

- o Prevention
- o Recovery
- o Disposal

Prevention is the avoidance of the creation of waste. Recovery is the treatment and management of waste for re-use through recycling and re-processing. Disposal is the responsible management of waste into the environment.

The application of these principles enables the management of wastes on a whole of lifecycle basis, while respecting the changing needs of society as a whole. These principles will guide the operation of the Waste Management and Recycling Fund.

Objectives of the Fund

The objective of the Waste Management and Recycling Fund is to move towards the vision of zero waste. Under this vision—

- All Western Australians will live in a waste-free society.
- The Government is to promote a shift away from solely focusing on reducing the amount of waste disposed to landfill towards the management of the whole lifecycle of every product and its wastes, from creation to disposal.
- The prevention of waste will become the main focus.
- Waste prevention will be achieved through active decisions made to anticipate where the generation of waste begins and to stop this from occurring.
- Everyone in the community has a role in preventing waste, being more efficient in the use of resources and in the management of waste.
- We must also continue to manage the wastes that are being created through recovery and responsible disposal.

The Funded Programs

The Minister for the Environment, on the advice of the Waste Management Board, determines priority areas of funding in the form of specific programs. The programs include specific purpose grant schemes which are summarised below.

The full details of funded programs are published in a document called the Waste Management and Recycling Fund—Principles, Objectives and Operating Guidelines. This document is available from the Department of Environment, or electronically via the Department's Website at <http://wastemanagement.environment.wa.gov.au>

Strategic Waste Initiatives Scheme

Objective—

The Strategic Waste Initiatives Scheme (SWIS) has been established to fund projects that will assist in achieving our goal of living in a waste free society and our vision of moving towards zero waste; changing our approach from managing waste, which has predominated in the past to preventing the creation of waste in the first place; reducing our reliance on managing the disposal of waste; being more efficient in the use of resources and the management of waste; continuing to manage the wastes that are being created through recovery and responsible disposal; and involving everyone in the community in preventing waste.

Eligibility—

Government organisations at a State and local level, industry, industry associations, educational and other institutions, community and service organisations.

Description—

Funding will be allocated to projects that address the waste focus areas at strategic intervention points, both of which will be identified through the Waste Management Board's annual strategic planning process. An amount of funds will be provided from the Waste Management and Recycling Fund each year for the scheme. The Waste Management Board will advertise a call for proposals on an annual basis. Applications will be assessed by the Board and recommendations for funding submitted to the Minister for the Environment.

Community Grants Scheme

Objective—

The Community Grants Scheme has been established to provide funding for small, generally local-scale community-based projects that improve the management of waste in Western Australia, and preferably that address the waste focus areas at strategic intervention points. Funding would also be provided to support provision of technical information to communities about proposed waste management projects in their local area.

Eligibility—

Community based groups including local interest groups, schools and environmental groups.

Description—

Small, easily accessed grants available to community groups and funded from the Waste Management and Recycling Fund. There is a limit of one grant per project/issue or interest group. The program formerly known as the Technical Assistance Grants scheme will also operate under this scheme.

Grants will generally be up to \$5,000 per project, although the Waste Management Board may consider larger grants under exceptional circumstances, including technical assistance grants. Calls for proposals will be advertised twice each year and the Waste Management Board will operate a streamlined assessment process to ensure a speedy response to applicants.

Resource Recovery Rebate Scheme

The Resource Recovery Rebate Scheme recognises recycling and waste treatment processes which achieve potential savings in terms of materials or energy. Applications for this scheme are processed by the Municipal Waste Advisory Council of the Western Australian Local Government association.

Objective—

To encourage the provision of services, managed or delivered by local government, that achieve recovery of resources from the waste stream, or achieve a reduction in material landfilled; to recognise the efforts of those local governments currently providing services that achieve resource recovery consistent with their performance relative to other local governments; and to allow for differing rebate amounts for specific waste streams, technology types and in different regions.

Eligibility—

Local governments and regional local governments as constituted under the local Government Act 1995, the Rottnest Island Authority, and other organisations approved by the Waste Management Board.

Description—

The Resource Recovery Rebate Scheme provisions may apply to any resource derived from the waste stream that is subsequently diverted from landfill. Rebates will not be made available for material that ends up in landfill. The Waste Management Board may from time to time publish a list of materials and/or collection systems that are to be excluded when calculating rebates. Rebate payments will be calculated on the basis of tonnes which are able to be supported by appropriate documentation.

NOEL DAVIES, Chairman, Waste Management Board.

WESTERN AUSTRALIAN PLANNING COMMISSION ACT 1985

As read in conjunction with the

METROPOLITAN REGION TOWN PLANNING SCHEME ACT 1959

PEEL REGION SCHEME AMENDMENTS

No. 007/33A: General Omnibus (No. 2)

No. 008/33A: Structures in Artificial Waterways

Call For Public Submissions

The Western Australian Planning Commission intends to amend the Peel Region Scheme (PRS) for land and waterways located in the City of Mandurah and the Shires of Murray and Waroona. Public comment is invited.

No. 007/33A: General Omnibus (No. 2)

The amendment comprises seven separate proposals affecting land in a range of locations within the Peel region. Two proposals are for minor alteration of the Primary Regional Roads reservation. Three involve minor reductions to the Regional Open Space reservation, to reflect development that predates the Peel Region Scheme. One proposes deletion of a segment of Waterways reservation that applies to an artificial inlet within a property adjacent to the Dawesville Channel, at Southport. One proposal is to include land within the State Forests reservation, and to include land forming part of the corridor containing the Murray River within the Regional Open Space reservation.

No. 008/33A: Structures in Artificial Waterways

The purpose of this amendment is to exempt jetties and associated structures (eg. mooring poles and boat lifters) from the requirement to obtain planning approval under the Peel Region Scheme where these are to be located within artificial waterways.

Procedure

The procedure for amending the Scheme, as set out in section 33A of the *Metropolitan Region Town Planning Scheme Act* (as read in conjunction with the *Western Australian Planning Commission Act*), is to be used to advertise this proposal.

Certificate

The Western Australian Planning Commission has certified that, in its opinion, the amendments do not constitute a substantial alteration to the Peel Region Scheme.
