WATER AGENCIES (POWERS) ACT 1984**WATER TREATMENT ENHANCEMENT: CITY OF PERTH—MOUNT ELIZA RESERVOIRS**

Notice of Proposal to Construct a Load-in Facility and Standard Disinfection Module.

To enhance the disinfection of drinking water distributed from the Mount Eliza Reservoirs, the Water Corporation proposes to construct a disinfectant load-in area located on the western side of the reservoirs (just outside the reservoir boundary fence). The load-in area will consist of a load-in pad, approximately 16m in length and 4.5m in width, and two small transfer pumps and ancillary equipment that will be housed in a lockable charcoal grey structure of approximately 12m² in area.

The Water Corporation also proposes to construct a bitumen road and turning circle that will replace the limestone track which currently provides access to the area.

Works will also include a disinfectant (sodium hypochlorite) storage and dosing facility housed in a prefabricated building adjacent to the conference centre but completely contained within the reservoir complex. The module will be charcoal grey with dimensions of approximately 7.5m long, 3.0m wide and 3.5m high.

The location of the proposed works is within the reservoir complex, with the access road and load-in area located within Kings Park to the west of the reservoirs.

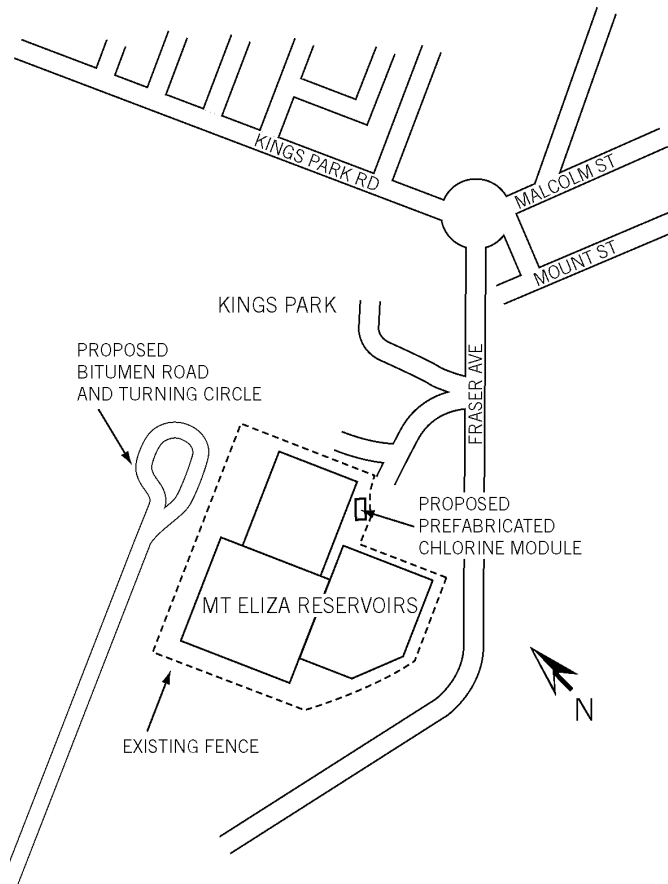

The proposed works are scheduled to commence in February 2005 and will continue for approximately 6 months.

Construction of the proposed works within Kings Park will involve road works and the construction of a lockable structure for protection of equipment from vandalism.
