Pt Lot 2 Kargotich Road, and Lots 6 and 9 Scott Road, Mundijong.

SPECIAL PROVISIONS

1. Within the 'Farmlet' zone the following land uses are permitted, or are permitted at the discretion of the Council—

Permitted Uses ('P')

- (i) Single House
- (ii) Public Recreation
- (iii) Public Utility

Discretionary Uses ('AA')—

- (i) Ancillary Accommodation
- (ii) Home Occupation

(a) SPECIFIED AREA OF LOCALITY**SPECIAL PROVISIONS**

- (iii) Rural Use
- (iv) Stables

All other uses are prohibited.

In exercising its discretion in respect of "AA" uses, the Council having regard to the Planning Guidelines For Nutrient Management contained in the Shire of Serpentine-Jarrahdale Rural Strategy, shall only permit such uses where it is satisfied following consultation with relevant government agencies that the use does not involve excessive nutrient application of clearing of land, or risk of damage to any on site vegetation.

2. No single house shall be approved by the Council unless it is connected to an alternative domestic waste water treatment system as approved by the Department of Health with an adequate phosphorus retention capacity, as determined by the Department of Environment and with the base of the system or the modified irrigation area being the required distance above the highest known water table.
3. All buildings and effluent disposal systems to be located within the building envelopes defined on the subdivision guide plan unless otherwise approved in writing by the Shire.
4. No indigenous vegetation or trees shall be destroyed or cleared except, but subject to the subdivider or landowner obtaining the prior written consent of the Council, where such vegetation is identified as structurally unsound by an arboriculturist or where the clearing is required for the purpose of a firebreak, dwelling, outbuilding, fence, drainage systems, driveways and/or to accommodate the permitted or discretionary uses identified under special provision 1.
5. Notwithstanding special provision 4, no vegetation or trees shall be destroyed or cleared within the areas designated for revegetation on the endorsed subdivision guide plan or within the areas identified in the Revegetation and Rehabilitation Plan as required by special provision 6.
6. The subdivider shall, in accordance with the land capability assessment dated 10 February 2005, prepare and implement prior to clearance of subdivision a Revegetation and Rehabilitation Plan for the land to the satisfaction of the Council.

The plan is to specifically demonstrate the following—

- (i) Suitable planting of indigenous trees, shrubs and ground cover species over an area equivalent to at least 30 per cent of the total land parcel, and at a density which demonstrates to the satisfaction of the Council the long term lowering of the average annual maximum groundwater level across the land;
- (ii) For the areas designated as multiple use corridor, drainage detention basin and drainage swale on the endorsed subdivision guide plan, the planting of appropriate riparian vegetation at a density to perform suitable nutrient stripping functions of generated water runoff in accordance with special provision 8 to the satisfaction of the Council.

The plan is to include details of a plant schedule, nominating each species, the spacings of each species, the numbers of plants required and the size of each plant to be used at the time of planting, together with the anticipated height of each plant at maturity.

(a) SPECIFIED AREA OF LOCALITY**SPECIAL PROVISIONS**

7. The subdivider shall either maintain the trees and shrubs planted until the land is sold, or shall plant sufficient numbers of trees and shrubs to allow for natural loss while still maintaining the objectives of the land capability assessment and Revegetation and Rehabilitation Plan. Thereafter, the landowners of the subdivided lots shall be responsible for the maintenance and replacement (if and where necessary) of those trees and shrubs planted by the subdivider to the satisfaction of the Council.
8. The subdivider shall prepare and implement a Fire Management Plan prior to clearance of subdivision that identifies and implements the construction requirements relative to strategic firebreaks, fire hydrants, water supplies and equipment and any other fire management requirements that may be deemed necessary, to the specification and satisfaction of the Council and the Fire Emergency Services Authority.
9. Notwithstanding the obligations of the subdivider under clause 5.13(7)(e) of the Scheme, the subdivider shall prepare and implement a Nutrient and Drainage Management Plan for the land prior to clearance of subdivision to the satisfaction of the Council and Department of Environment. The plan is to be based on the land capability assessment dated 10 February 2005, and is to specifically identify nutrient stripping capabilities of the drainage system to meet the requirements of the Peel-Harvey Environmental Protection Policy and Statement of Planning Policy No. 2.1 (Peel-Harvey Catchment). The plan is to include details for the long term monitoring and maintenance of stormwater treatments located within the multiple use corridor and the subdivision generally, and is to be prepared in accordance with best management practices for water sensitive urban design to the satisfaction of the Council.
10. At the time of submitting a building application for each lot, a plan of the site shall be submitted by the applicant to the satisfaction and specifications of the Council which shows site contours, any revegetation areas, the 30 metre foreshore reserve buffer to the 50 metre wide drainage corridor, drainage details, all existing trees and stands of vegetation, those trees and vegetation proposed to be removed and retained, and proposals for additional tree planting and maintenance.
11. The keeping of horses, sheep, goats, cattle or other grazing animals, where permitted shall be subject to the prior, written approval of Council. Approval to keep animals shall not exceed the stocking rates recommended by Agriculture WA for the applicable pasture types, and will be in accordance with Statement of Planning Policy No. 2.1 (Peel-Harvey Catchment). Vegetation planted by the subdivider, and all remnant vegetation must be fenced prior to the introduction of stock onto the property.
12. All multi use trails as required by the Council in accordance with Local Planning Policy No. 9 (Multiple Use Trails within the Shire of Serpentine-Jarrahdale) shall be constructed at the subdivider's cost prior to clearance of the subdivision.
13. The multiple use corridor as depicted on the endorsed subdivision guide plan shall be ceded to the Council at the time of subdivision as foreshore reserve of minimum width 50 metres.
14. Notwithstanding the controls specified by provision 1, development and use of the land is subject to the provisions of the Water Corporation and Department of Environment by-laws applying to underground water supply and pollution control.

(a) SPECIFIED AREA OF LOCALITY	SPECIAL PROVISIONS
15.	Council will not support subdivision in the area designated on the endorsed subdivision guide plan as subject to further investigation until such a time as it can be demonstrated by the landowner that suitable environmental repair and improvement has been undertaken across the land to the satisfaction of Council. This is to be demonstrated through evidence of revegetation and rehabilitation which has taken place, the reduction in nutrient loads and export levels from the land and the extent to which the average annual maximum groundwater level has been reduced. The Council will only support further subdivision where environmental repair and improvement can be clearly demonstrated, and the endorsed subdivision guide plan has been modified accordingly.
16.	Subdivision of the land will not be supported by Council until such time that all existing timber mill operations have ceased permanently to the satisfaction of the Council.

D. L. NEEDHAM, President.
J. ABBISS, Chief Executive Officer.
