### WATER AGENCIES (POWERS) ACT 1984

*Water Corporation: Shire of Harvey*

#### CONSTRUCTION OF STAGE 2 OF THE STIRLING DAM UPGRADE

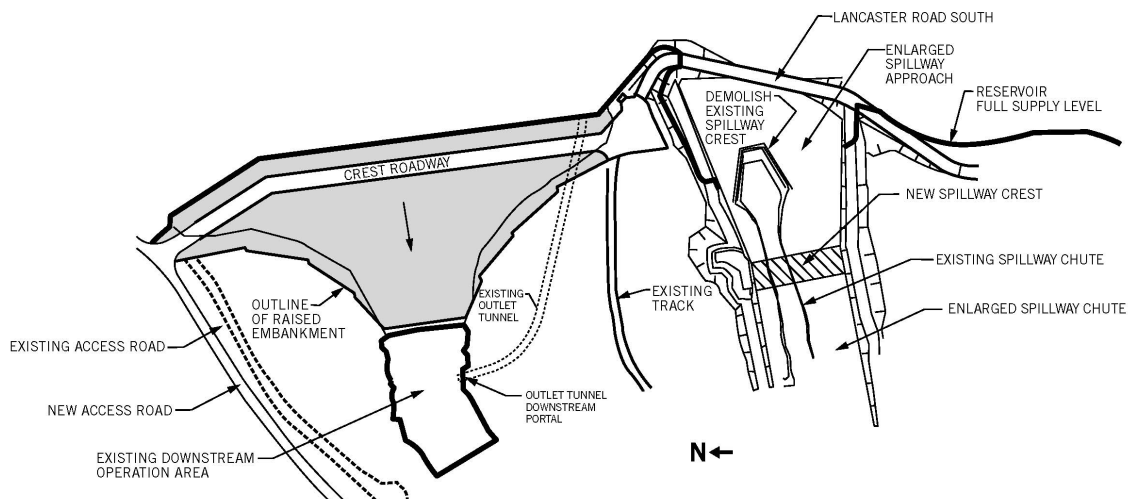

In accordance with the provisions of the *Water Agencies (Powers) Act 1984* the Water Corporation is authorised to construct the following works—

- Enlarging the existing spillway chute to provide increased flood protection.
- Construction of filters on the downstream side of the earthfill zone of the embankment to reduce the probability of failure from internal piping erosion.
- Raising of the existing embankment crest level by 3.3 metres to provide additional storage capacity during extreme flood events.
- Appurtenant works, site rehabilitation and conservation.

The location of the proposed works is at Stirling Dam, approximately 140 kilometres south of Perth and 17 kilometres east of the township of Harvey.

The works will improve the safety of the dam and bring it in line with the Australian National Committee on Large Dams guidelines for an extreme hazard dam. The works form part of the Water Corporation's Stirling Harvey Redevelopment Scheme that has seen the principal use of the existing Stirling Dam change from irrigation supply to the Harvey Region, to supplying potable water to the Integrated Water Supply Scheme.

This authorisation shall take effect from 3 July 2006 and construction will commence after this date.
