WILDLIFE CONSERVATION ACT 1950

WILDLIFE CONSERVATION (RARE FLORA) NOTICE 2010(2)

Made by the Minister for the Environment under section 23F(2) of the Act.

1. Citation

This notice may be cited as the *Wildlife Conservation (Rare Flora) Notice 2010(2)*.

2. Interpretation

In this notice—

“**extant**” means known to be living in a wild state;

“**protected flora**” means any flora belonging to the classes of flora declared by the Minister under section 6 of the Act to be protected flora by notice published in the *Gazette* 9 October 1987, at p. 3855;

“**taxon**” includes any taxon that is described by a genus name and any other name or description.

Note: The plural form of “taxon” is “taxa”.

3. Rare flora

Subject to clause 4, protected flora—

- specified in Schedule 1, being taxa that are extant and considered likely to become extinct or rare and therefore in need of special protection; and
- specified in Schedule 2, being taxa that are presumed to be extinct in the wild and therefore in need of special protection,

are declared to be rare flora for the purposes of section 23F of the Act throughout the State.

4. Application

Clause 3 does not apply to those plants of a taxon of protected flora specified in Schedule 1 or 2 that have been planted for any purpose other than such plants that have been planted for the purpose of conservation of that taxon and in accordance with approval given by the Director General.

5. Revocation

The *Wildlife Conservation (Rare Flora) Notice 2010* is revoked.

PLANNING AND DEVELOPMENT ACT 2005
APPROVED LOCAL PLANNING SCHEME AMENDMENT
City of Albany

Town Planning Scheme No. 3—Amendment No. 264

Ref: 853/5/4/5 Pt 264

It is hereby notified for public information, in accordance with section 87 of the *Planning and Development Act 2005* that the Minister for Planning approved the City of Albany local planning scheme amendment on 3 August 2010 for the purpose of—

1. Rezoning Lot 6 Albany Highway / Link Road from the 'Rural' zone to the 'Special Rural' zone; and

2. Incorporating Lot 6 within Schedule 1—Special Rural Zones, of the Scheme Text in the following manner—

AREA	LOCALITY	LOTS	LOCATION
33	Link Drome	Road	Plantagenet 5118

1.0 PLAN OF SUBDIVISION

1.1 Subdivision of Special Rural Zone Area No. 33 shall generally be in accordance with the indicative subdivision guide plan and shall address the identified site constraints.

1.2 The Council will not recommend lot sizes less than 1.0 ha. Council may recommend that the Western Australian Planning Commission approve minor variations to the Subdivision Guide Plan.

2.0 OBJECTIVES OF THE ZONE

Within Special Rural Zone Area No. 33 the objective is to—

Create rural residential lots with the emphasis on the development of an attractive semi rural landscape on one of the main entry points to the City of Albany.

3.0 LAND USE

3.1 Within Special Rural Zone Area No. 33 the following uses are permitted—

- Residential Dwelling House

3.2 The following uses may be permitted subject to the special approval of Council—

- Home Occupation
- Public Utility
- Livestock Grazing
- Cottage Industry
- Ancillary Accommodation
- Private Stables
- Other incidental or non defined activities considered appropriate by Council which are consistent with the objective of the zone.

3.3 In exercising its discretion in respect of the above uses, Council should be satisfied that the landuse does not give rise to potential nuisance to adjoining or nearby residents.

4.0 KEEPING OF LIVESTOCK/ANIMALS

4.1 Intensive agricultural pursuits such as piggeries are not permitted. The keeping of livestock shall be restricted to fenced pastured areas of the lot. The owner/tenant shall be responsible for the maintenance of stock proof fencing to protect remnant vegetation and tree/shrub areas. Animal numbers shall not exceed the stocking rates recommended by Agriculture W.A. The keeping of animals shall not result in the removal or damage of vegetation and trees or result in soil degradation and dust nuisance.

4.2 Where in the opinion of Council the continued presence of animals on any portion of land is likely to contribute, or is contributing to dust nuisance or soil degradation, notice may be served on the owner of the land, requiring immediate removal of those animals specified in the notice.

4.3 Where notice has been served on a landowner in accordance with this Clause the Council may also require the land to be rehabilitated to its satisfaction within three (3) months of serving the notice.

4.4 In the event that such action is not undertaken, Council may carry out such works as are deemed necessary, with all costs being borne by the landowner.

5.0 LOCATION AND DESIGN OF BUILDINGS AND STRUCTURES

5.1 No dwelling or other noise-sensitive development within 165 metres of Albany Highway or the proposed Albany Ring Road route shall be approved until such time as Council is satisfied that the design complies with the Package A house insulation measures specified in the Implementation Guidelines for State Planning Policy 5.4.

5.2 All non habitable buildings and structures (excluding fencing) shall be setback a minimum of 40 metres from Albany Highway and all habitable buildings shall be setback a minimum of 80 metres from Albany Highway.

5.3 All buildings and structures shall be setback a minimum of 15 metres from Henderson and Link Roads and 10 metres from all other boundaries (with the exception of Albany Highway) unless Council approves a lesser distance; that is if—

Council is of the opinion that the location of the building will not detract from the semi-rural landscape quality of the area or from the amenity of the existing or future residences on adjoining lots.

5.4 Dwellings and outbuildings shall be designed and constructed of materials which allow them to blend into the landscape of the site. Council shall refuse to approve walls and roofs constructed of reflective materials such as unpainted zincalume and off-white colours. Council will be supportive of walls and roofs with green, brown, dark blue, slate grey or red tonings in keeping with the amenity of the area.

5.5 Dwelling houses shall not exceed 7.5 metres in height which is measured vertically from the natural ground level. The maximum height of all outbuildings will be at the discretion of Council in

order to minimise the visual impacts of such buildings when viewed from Link Road and/or Albany Highway and from within the subdivision.

5.6 No boundary fencing shall be constructed of fibre cement, metal sheeting or wooden picket. If boundary fencing is utilised, it shall be of rural construction such as post and strand to the satisfaction of Council.

5.7 Water tanks shall be coloured an appropriate shade of brown or green and/or suitably screened with vegetation in keeping with the amenity of the area to the satisfaction of Council.

6.0 VEGETATION PROTECTION AND TREE/SHRUB PLANTING

6.1 No clearing of vegetation shall occur except for—

- (a) clearing to comply with the requirements of the *Bush Fires Act 1954* (as amended);
- (b) clearing may reasonably be required to construct an approved building and curtilage;
- (c) trees that are diseased or dangerous;
- (d) clearing to gain vehicular access to an approved dwelling or any other clearing which may be approved by the Council;
- (e) clearing required to establish a low fuel area.

6.2 Council may request the Commission to impose a condition at the time of subdivision for tree/shrub planting using endemic native species in order to screen development from Albany Highway and adjoining lots.

6.3 Additional tree planting may be required as a condition of development approval.

6.4 Council may request the Commission to impose a condition at the time of subdivision for the protection of existing remnant vegetation and tree/shrub planting areas by stock proof fencing.

7.0 WATER SUPPLY

7.1 Council may request the Commission impose a condition at the subdivision stage of development requiring proposed lots to be connected to scheme water.

7.2 Fire hydrants shall be provided within the road reserve to the specification of the Water Corporation and FESA.

8.0 EFFLUENT DISPOSAL

8.1 On-site effluent disposal shall be the responsibility of the individual landowner.

8.2 The disposal of liquid and/or solid wastes shall be carried out with an effluent disposal system approved by Council and the Health Department of WA. Systems shall be designed and located to minimise nutrient export and/or release into any waterway or ground water. Conventional effluent disposal areas for new dwellings using conventional systems shall be set back a minimum of 100 metres from any natural permanent watercourse and situated 2 metres above the highest known ground water level. Conventional Systems shall only be approved where Council and the Health Department of WA are satisfied that soil conditions are conducive to the retention of nutrients.

8.3 Council shall require the use of alternative technology effluent disposal systems, such as amended soils or aerobic systems in the following situations—

- where a 100 metre setback from a creek line or water course cannot be achieved;
- where soil conditions are not conducive to the retention of nutrients; and
- in low lying areas.

8.4 Variations to the design or location of effluent disposal areas will require a suitably qualified practitioner demonstrating that effluent disposal will not cause environmental or health impacts to the satisfaction of Council and the Health Department of WA.

8.5 No more than one effluent disposal system will be permitted per lot.

9.0 FIRE MANAGEMENT

9.1 Low fuel areas not less than 20 metres wide shall be provided and maintained around all buildings constructed on the proposed lots.

9.2 The subdivider shall make arrangements to the satisfaction of Council to ensure prospective purchasers are aware of the fire management guidelines of the Homeowners Bushfire Survival Manual.

10.0 NOTIFICATION OF PROSPECTIVE OWNERS

10.1 Provision shall be made to Council's satisfaction to ensure prospective purchasers of land with Special Rural Zone Area No. 33 are made aware in writing—

- (i) of these Special Provisions prior to entering into an agreement to acquire any property.
- (ii) that the lots adjoin the future Albany Ring Road route and proposed interchange with Albany Highway and noise-sensitive development within 165 metres of Albany Highway or the proposed Albany Ring Road route will need to be designed in accordance with the Package A noise insulation measures specified in the Implementation Guidelines for State Planning Policy 5.4; and
- (iii) that no direct vehicular access to Albany Highway will be permitted

10.2 Council may request that the Western Australian Planning Commission impose a condition at the time of subdivision requiring notifications to be placed on the Certificates of title of the proposed lots stating that—

- (i) This property is adjacent to the proposed Albany Ring Road and may be affected by transport noise. Further information regarding transport noise, including development restrictions and noise insulation requirements for noise-affected property are available from the City of Albany; and
- (ii) Amenity may be affected by proximity to a dog kennels located on Lot 7.
