BUSH FIRES ACT 1954*Shire of Waroona*

FIREBREAK NOTICE

Important information relating to your responsibility as a landholder in the Shire of Waroona. With reference to section 33 of the *Bush Fires Act 1954*, you are required to carry out fire prevention work on land owned or occupied by you in accordance with the provisions of this order.

This work must be carried out on or before November 17th and kept maintained throughout the summer months until the close of Restricted Burning Period.

An inspection of firebreaks and hazard removal will be carried out in all areas of the Shire by authorised Officers on or after November 17th. Persons who fail to comply with the requirements of this order may be issued with an infringement notice (penalty \$250) or prosecuted with an increased penalty, and additionally, Council may carry out required work at cost to the owner or occupier.

If it is considered for any reason to be impractical to clear firebreaks as required as required by this notice or natural features render firebreaks unnecessary you may apply to the council or its duly authorised officer not later than the 1st day of November for permission to provide firebreaks in alternative positions (strategic breaks) or to take alternative action to abate fire hazards on the land. If permission is not granted by the council or its duly authorised officer, you shall comply with the requirements of this notice. If the requirements of this notice are carried out by burning, such burning must be in accordance with the relevant provisions of the Bush Fires Act.

Burning is permitted on Sundays and public holidays, at discretion of relevant Fire Control Officers.

(A) Rural Land

Firebreaks not less than three (3) metres wide and four (4) metres vertical must be provided in the following positions—

- (a) Within 60 metres inside and along the boundaries of all land including that which is uncleared, so as to form a continuous break around the holding.

Note—Firebreaks constructed on road verges do not constitute a legal firebreak.

- b) Not more than 100 metres and not less than 20 metres from the perimeter of all groups of buildings, haystacks and fuel installations provided on that land.

NOTE 1: 10 round bales constitute a haystack; 5 large oblong bales constitute a haystack; 200 small oblong bales constitute a haystack.

- c) NOTE 2: Irrigation area—owners or occupiers may be exempt from all or part of the requirements of the above if, in the opinion of the Fire Control Officer responsible for the area in which the land is located, there is no need to construct breaks on the irrigated land or non-irrigated land, not exceeding 20 hectares in area if surrounded by irrigated land.

(B) Rural Residential Zone

The owners of all existing small rural holdings zoned "Rural/Residential" under Town Planning Schemes, must maintain clear of all flammable materials, a firebreak not less than three (3) metres wide and four (4) metres vertical immediately inside all external boundaries of the land.

The owners of existing and future small rural holdings—Rural/Residential lots within the Zone 4 Irrigation Area must maintain clear of all flammable materials, a fire break not less than three (3) metres wide immediately inside all external boundaries of the lots. Lots under irrigation within Zone 4 are eligible for exemption upon application. Strategic firebreaks shown on subdivision guidelines shall be maintained by respective owners and gates *may not* be locked during fire season.

C. Urban Land (Residential, Special Residential, Commercial, Industrial and Rural Land with Waroona & Hamel townsites)

In respect of land owned or occupied by you within the above townsites or any area subdivided for other purposes, you shall—

- (a) where that area of land of 2500 square metres or less, you must remove all flammable material on the land except living standard trees, from the whole of the land; and
- (b) where the area of land exceeds 2500 square metres you must provide firebreaks of at least three (3) metres wide immediately inside all areas external boundaries of the land and also immediately surrounding all buildings situated on the land. Where several adjoining lots are held or used by the owner/occupier, the firebreaks may be provided inside, along the external boundaries of the group of lots.

E. Fuel and/or Gas Depots

In respect of land owned or occupied by you on which is situated any container normally used to contain liquid or gas fuel, including the land on which any ramp or supports are constructed, you shall maintain the land clear of all flammable materials.

F. Fire Protection of Private Hard/Softwood Plantations Definitions and Specifications

Plantations—Any area of planted Pines or Eucalyptus species exceeding 3 hectares.

Windbreaks—Will be defined as planted areas not exceeding 15 metres in depth with an unrestricted length.

Firebreaks—15 metres Boundary Break. The first row of trees must be at least 15 metres from the outside edge of the break. The outer 10 metres of the firebreak must be cleared of all flammable material on the ground and will have a 10 metres vertical clearance, i.e. with no overhanging branches. The remaining 5 metres must be maintained in a low fuel condition, i.e. short grass may be considered a low fuel.

Minimum Firebreak Standards—The following firebreak standards will apply for plantations—

Firebreaks constructed 15 metres wide (as per definition) on the boundaries of plantations or on such other location as may be agreed between the Waroona Shire Council and the plantation owner.

Firebreaks clear of all flammable material 6 metres wide should surround compartments of approximately 30 hectares.

All firebreaks must be maintained in trafficable conditions and trees on both sides of breaks progressively pruned to a minimum height of 4 metres to allow unrestricted access of maintenance and firefighting equipment and so as to maintain an effective width of firebreak.
