*Shire of Murray*  
Town Planning Scheme No. 4—Amendment No. 281

Ref: TPS/1017

It is hereby notified for public information, in accordance with section 87 of the *Planning and Development Act 2005* that the Minister for Planning approved the Shire of Murray local planning scheme amendment on 9 January 2014 for the purpose of—

1. Rezoning portion of Lots 109, 151, 122 and 251 Oakley Road, Oakley from Rural to Special Use zone.

2. Introducing the following special provisions into the Shire of Murray Town Planning Scheme No. 4, Schedule 5, Special Use Zones—

(A) SPECIFIED LAND	(B) SPECIAL PROVISIONS RELATING TO (A)
Portion of Lots 109, 151, 222 and 251 Adelaide and Oakley Roads, Oakley	<p>i. The land may only be used for refinery water storage and incidental infrastructure and equipment with the exclusion of residue storage areas.</p> <p>ii. The refinery water storage infrastructure should be designed and located to—</p> <ul style="list-style-type: none"> <li>(a) minimise the development footprint;</li> <li>(b) minimise adverse impacts on visual amenity; and</li> <li>(c) maximise the separation distance between the refinery water storage area and sensitive land uses.</li> </ul> <p>iii. Applications for planning approval are to be accompanied by relevant technical studies prepared by suitably qualified and experienced specialists. These studies are to address issues relevant to each development proposal and may include but not be limited to—</p> <ul style="list-style-type: none"> <li>(a) Environmental Management (vegetation, wetlands, acid sulphate soils, dieback, fauna);</li> <li>(b) Water and Drainage Management (surface water, groundwater, watercourses and streams, rainwater management, contamination);</li> <li>(c) Dust and Noise Management;</li> <li>(d) Fire Management, Public Safety and Contingency Management;</li> <li>(e) Traffic Management and Safety.</li> </ul> <p>The local government may require relevant technical studies to be peer-reviewed by independent specialists engaged by the local government prior to an application for planning approval being determined. All costs associated with the peer review process are to be met by the proponent.</p> <p>iv. Prior to Council considering an application for planning approval for refinery water storage infrastructure, the proponent shall submit a Visual Amenity Plan to Council which demonstrates how—</p> <ul style="list-style-type: none"> <li>(a) potential visual amenity impacts of the refinery water storage infrastructure will be minimised;</li> <li>(b) the use of native species endemic to the area will be maximised; and</li> <li>(c) endemic vegetation that will be cleared for the development of the refinery water storage infrastructure will be replaced.</li> </ul> <p>v. The refinery water storage areas are to be periodically dredged to the satisfaction of the local government sufficient to minimise the build up of residue mud and are to be removed within 12 months or such further period as may be agreed by the local government of the Pinjarra Refinery permanently closing with the land to be restored as nearly as practical to the condition immediately before development commenced.</p>

3. Introducing the following definitions of 'Refinery Water' and 'Residue Storage Areas' into 'Appendix 1—Interpretations'—

Refinery Water is liquid used or produced in Alcoa's alumina refining process. The Refinery Water is characterised by varying composition and concentration which can vary with time, season and variations in the refining process. However, the Refinery Water typically contains caustic and water as the main components.

Residue Storage Areas are cells within which residue mud is deposited for indefinite storage.
