Central to any application made is the program of work proposed for each year of the six year term. Applications are to be made in accordance with Section 31 of the PGERA67. Consideration of an application for the grant of a Petroleum Exploration Permit shall take into account work programs relative to the whole of the area applied for, the adequacy of the work program, the applicant's technical and financial ability to undertake the work, and the past performance of the applicant parties in relation to native title negotiations and compliance with title conditions. Permits are awarded on the understanding that the first two year's work commitment will be fulfilled without variation.

Where there is more than one applicant to the application, the percentage participating interest of each party to the application is to be supplied including evidence that a satisfactory settlement has been, or can be reached on a Joint Operating Agreement (copy of Heads of Agreement dealing will generally suffice). All applicant parties must provide supportable evidence of adequate financial capabilities to undertake the work bid and/or proven ability to raise funds for exploration purposes.

The boundaries of Petroleum Exploration Permits granted where boundaries about the coastal-offshore maritime boundary (3NM limit) and/or the coastal-inshore mean low water mark boundary (Territorial baseline) are defined by the Australian Maritime Boundary dataset current at the time of grant of title. The permit boundaries remain static while the permit is in force and subject to change at each renewal or change in title status in line with the most recent Australian Maritime Boundary dataset.

Applicants' attention is drawn to the provisions of Division 3A of the PGERA67 which provides for Petroleum and Geothermal titles to subsist in respect to the same blocks.

Applicants are advised to make themselves aware of the existence of any areas which have the potential to restrict exploration activities, e.g., National Parks, Nature Reserves, Marine Parks, World Heritage Areas, Conservation Reserves, Defence Areas and Mining Titles. Each of the Release Areas contains at least one or more Environmentally Sensitive Area (ESA), Red Book Area, Threatened Ecological Communities (TEC), Nature Reserves (NR) or National Parks (NP). Accordingly, additional environmental assessment is likely to be required for any petroleum exploration and proponents are advised to take this into consideration. Environmental maps are available as part of the release package through the Department of Mines and Petroleum's website.

Insofar as Reserved Land is concerned, entry for exploration purposes is subject to approval by the Minister. In this regard, it should be noted that Government policy is that petroleum extraction from within National Parks, Nature Reserves and access to Conservation Estates should not be presumed.

In respect to internal waters areas, impacts on fishing activities should also be considered. Applicants should note that they will be required to initiate contact with relevant industry bodies concerning their exploration activities at the earliest possible state when planning operations. Due regard must also be given to recreational fishing vessels at all times.

Any applications over onshore areas administered under the PGERA67, including waters containing islands, may be subject to the provisions of the *Native Title Act 1993* (Cth) and applicants should be prepared to negotiate with Native Title parties pursuant to the right to negotiate provisions of the NTA. Plans showing these claim boundaries are available as part of the information package.

Applicants should also be aware that onshore areas (including islands) available for petroleum application are subject (at least in part) to Native Title claims. Plans showing these claim boundaries are available as part of the release package.

## SPECIAL NOTICES

### Area L12-13

The Karlamilyi National Park borders the southern boundary of Release Area L12-13. Activities undertaken within 500m of the National Park will be referred to the Environmental Protection Authority (EPA).

### Area L12-14

A significant number of environmental sensitivities occur within Release Area L12-14 and referral to EPA among other agencies, including Department of Environment (Commonwealth) may be required for operational activities—

- The release area includes public drinking water areas for Bunbury and surrounds and any proposed activities within these areas will be referred to both EPA and Department of Water.
- Any activities within 2km of any occupied town site or within 2km of the coast will be referred.
- There are a number of gazetted environmentally sensitive areas (ESA), and threatened ecological communities (TEC) within the release area. Any activities within 500m of either an ESA or a TEC will be referred. Any activities undertaken within an ESA or TEC will require a clearing permit.
- There are areas of State Forest within the release area. Any activities within 500m of the State Forest will be referred. A section 15A referral under the PGERA67 will be required for activities undertaken within the State Forest.
- Please note that activities that are likely to have a high level of public interest may also require referral to the EPA.

### Area L14-1

It should be noted that a number of watercourses run through the release area and referral to the Department of Water may be required.

An information package on the release areas detailing the criteria for assessment of applications, form for applying in the approved manner, and the conditions to apply following the award of a permit, including a plan of the release areas is available on disk. Copies of the disk can be obtained from the **Petroleum Division, Department of Mines and Petroleum** by contacting the Petroleum Applications Receiving Officer on (08) 9222 3269.

## LODGEMENT OF APPLICATIONS

Electronic lodgement of bids via the Department's secure online system, Petroleum and Geothermal Register (PGR), is now available. Bids for multiple discrete areas may be submitted and the application fees paid online by accessing the PGR system at [www.dmp.wa.gov.au/3976.aspx](http://www.dmp.wa.gov.au/3976.aspx).

The following special instructions should be observed when submitting by hand or post—

- The prescribed fee, stated in the Schedule of Fees available at [www.dmp.wa.gov.au/10470.aspx](http://www.dmp.wa.gov.au/10470.aspx), is to be made **payable to the Department of Mines and Petroleum** through an Australian Bank or by Australian bank cheque and must be submitted with each application. Fees are non-refundable and subject to variation (including Consumer Price Index adjustments) and the current Schedule of Fees must be consulted prior to payment.
- The application should be sealed and clearly marked '**Application for Petroleum Exploration Permit—Commercial-in-Confidence**'.

- Unless delivered by hand to the Petroleum Applications Receiving Officer, the sealed application (as described above) should be enclosed in a plain covering envelope or package and forwarded to the following address—

Executive Director  
Petroleum Division  
Department of Mines and Petroleum  
11th Floor, Mineral House  
100 Plain Street  
EAST PERTH WA 6004

**Attention: Petroleum Applications Receiving Officer**

Confirmation of receipt of applications (delivered and received by hand) will be issued by the Petroleum Applications Receiving Officer.

**Applicants need to observe the closing time and date as published in the release package. Applications received after the closing time and date will not be considered.**
